## Bejo's New Cropalizer App

- With only a few clicks, analyse the health and growth development of your crop, in the language of your choice.
- You can now easily identify major pests, diseases and disorders in red beet, carrots, cabbage and onions.
- The Cropalizer is a must have tool that also contains information about bacteria, fungi, insects, nematodes, viruses and nutrient disorders.
- It will help you seek advice to prevent and control.

Be proactive with **Bejo's Cropalizer**.

Why do you work the land? Cultivating is a way for you to make a difference in the life of your customers. Seeing them appreciate and eat the results of the long hours and efforts you invest in your production is the most gratifying experience. You also insist on making a difference by working in harmony with the environment to fulfill each one's needs.

As all begins with a tiny seed, we also constantly work hard to supply you with the best organic, untreated and GMO-free varieties for your vegetables, herbs, sprouts, and microgreens. We have tested our varieties with many of you and listened to your comments which helped us offer the perfect varieties to meet the perfect taste, quality, vigour and yield requirements that you want. This is our way to help support your efforts in changing the world - **ONE VEGETABLE AT A TIME.**

Our 2020 catalogue will help you plan the upcoming season to make it all happen!

For any questions, do not hesitate to get in touch with us.

Have a great organic season!

# Artichoke

	Code	Variety	Form.	Maturity (days) <sup>T</sup>	Description
	65-0212	IMPERIAL STAR		120	Produces 6 to 8 artichokes per plant of 7 to 10 cm in diameter.
	65-0216	AMETHYST FI		120	Purple artichoke with homogeneous, heavy, tight heads. Upright plant is spineless and produces multiple secondary buds of 300-400 g each.

IMPERIAL STAR

AMETHYST FI

# Asparagus

	Code	Variety	Form.	Maturity (days)	Description
	65-0457	GUELPH ECLIPSE FI		Perennial	Male asparagus hybrid for green spear production. Bred in Canada, the plant is tolerant of cold winters. It has been noted for thick spears, excellent tip quality, and high fern vigour. Performs on a range of soil types, but prefers sandy and sandy loam soils. Commercial trials have consistently shown Guelph Eclipse to yield higher than all other competing green varieties and, based on research trials, about 20% higher than Guelph Millennium.

GUELPH ECLIPSE FI

# Beans

EXPRESS (PRIMO)

MAJOR

BROAD WINDSOR

NECKARGOLD

NECKARKONIGIN

Code	Variety	Form.	Maturity (days) <sup>S</sup>	Colour	Length (cm)	Tolerances	Description
------	---------	-------	------------------------------	--------	-------------	------------	-------------

## BEANS-BROAD

65-5410	EXPRESS (PRIMO)		65	Medium green	16	–	Early. Medium size white seeds. Recommended for freezing. 5-6 beans/pod.
65-5420	MAJOR		75	Medium green	18	–	Good pod setting, even under less favourable weather conditions. Heavy pods and a high yielder. 5-6 beans/pod.
65-5432	BROAD WINDSOR		75	Pale green	18-20	–	Excellent yield of large, easy-to-shell pods. For fresh markets. 5-7 beans/pod.

## BEANS-POLE

65-5305	NECKARGOLD		65	Yellow	23-27	1	Consistent and reliable yield. For fresh markets and preserving.
65-5310	NECKARKONIGIN		65	Green	23-27	1	Consistent and reliable yield. For fresh markets and preserving.

TOLERANCES: 1 = Common Mosaic Virus - 2 = Common Wilt - 3 = Brown Spot - 4 = Root Rot - 5 = Halo Blight - 6 = Bean Rust - 7 = Anthracnose - 8 = Beet Curly Top Virus

SUNBURST

GOLD RUSH

SYBARIS

CAPRICE

MASCOTTE

	Code	Variety	Form.	Maturity (days) S	Colour	Length (cm)	Sieve	Tolerances	Description
--	------	---------	-------	-------------------	--------	-------------	-------	------------	-------------

## BUSH BEAN-WAX

	65-5125	SUNBURST	UNT	55	–	13-15	Medium	1, 5	Appealing, high-yielding variety. Earlier than Gold Rush.
	65-5161	GOLD RUSH	UNT	58	–	13-15	Medium	1, 4	Long, straight, yellow beans that are easy to pick. Beans are tender and stringless. Extended harvesting, good storage, and fine freezing potential. Suited for mechanical and manual harvesting.

## BUSH BEANS-GREEN

♥	65-5256	SYBARIS	UNT	55	Dark	14	Medium	1, 6	Very good uniformity and exceptional quality. The pods set high in the plant and off the soil surface for a clean and easy harvest. Fresh or processing markets.
	65-5255	CAPRICE	UNT	57	Medium dark	14	Medium	1, 2, 3, 5, 7	Straight, smooth pods that have slow seed development, a fine eating quality and an attractive medium dark-green colour. Upright plant that does not lodge and that sets its pods mid high which lends well to both hand and mechanical harvest.

## FRENCH GOURMET-GREEN

🍵	65-5202	MASCOTTE	UNT	50	Medium dark	11-13	Fine	1, 5, 7	Compact plant ideal for patio containers and window boxes, which can also be grown in garden beds. Beautiful white-blooming time followed by an abundant crop of small, fine, crunchy and good tasting beans. 2014 AAS winner.
---	---------	----------	-----	----	-------------	-------	------	---------	--

TOLERANCES: 1 = Common Mosaic Virus - 2 = Common Wilt - 3 = Brown Spot - 4 = Root Rot - 5 = Halo Blight - 6 = Bean Rust - 7 = Anthracnose - 8 = Beet Curly Top Virus

RED ACE FI

MERLIN FI

ROBIN FI

GUARDSMARK

TOUCHSTONE GOLD

BOLDOR

AVALANCHE FI

CARILLON

	Code	Variety	Form.	Maturity (days) S	Foliage colour	Tolerances	Description
♥	65-0840	RED ACE FI	🍃	55	Bright green	2	Uniform internal colour. Sweet and tender root. High yielders.
	65-0842	MERLIN FI	🍃	55	Bright green	–	Same root quality as Red Ace, but with a higher sugar content (12-15 %) than other varieties. High yielders.
	65-0843	ROBIN FI	UNT	55	Dark green	–	Perfectly round beet, well adapted for bunching or production of baby beets, due to its uniform globe shape at an early stage of development. It has a very fine tap root, and a strongly tied foliage. Can also be used for processing.
	65-0850	DETROIT SUPREME	UNT	60	Dark green	1, 2	Long-time standard. Dark and smooth root, very little zoning. Good top attachment. Also good for pickling and canning.
	65-0887	GUARDSMARK	🍃	60	Medium green	–	Improvement of the variety Chioggia by its better vigour. Same red-purple colouring with white zoning.
♥	65-0889	TOUCHSTONE GOLD	🍃	60	Bright green	1, 2, 4	Round root with an orangey exterior and a vibrant yellow interior. Very sweet taste. Little zoning. Strong foliage.
	65-0890	BOLDOR	UNT	60	Bright green	2	Interesting yellow beet. Bright yellow interior colour. Smooth skin, of good quality as the Touchstone Gold. Tops are tolerant to Cercospora and very healthy. Ideal for bunching.
	65-0895	AVALANCHE FI	UNT	60	Green	2	White beet with round bulbs and a snow-white flesh. Very sweet in taste. Healthy tops with good resistance to diseases. 2015 AAS Winner.
	65-0854	CARILLON	UNT	75	Bright green	–	Elongated shape. Perfect for processing and slicing. Resistant foliage.

TOLERANCES: 1 = Downy Mildew - 2 = Cercospora - 3 = Powdery Mildew - 4 = Rhizoctonia

# Broccoli

CASTLE DOME FI

BLUE WIND II FI

LIEUTENANT FI

CORATO FI

BELSTAR FI

DIPLOMAT FI

IMPERIAL FI

	Code	Variety	Form.	Maturity (days) ↑	Harvest season	Head shape	Use	Description
	65-1402	CASTLE DOME FI	UNT	69	Spring	Dome	Bunching, Crown	Very early, compact, open plant. Good field holding ability. Needs good fertilization for maximum yield.
	65-1401	BLUE WIND II FI	UNT	70	Spring - Fall	Semi-dome	Bunching, Crown	For the beginning of the season. Improvement of the variety Blue Wind because of its better field holding and heat tolerance.
	65-1411	CHIEF NO. 2 FI	UNT	70	Spring - Summer	Dome	Bunching, Crown	Early variety with good heat tolerance. Blueish broccoli, without hollow heart.
	65-1425	EASTERN CROWN FI	UNT	74	Summer - Fall	Dome	Crown	Outstanding variety with blue-green heads, small fine beads and excellent heat tolerance. Compact plant with good yield of for the crown cut market.
	65-1463	LIEUTENANT FI	UNT	75	Spring - Fall	Dome	Bunching	Produces a good quality, medium green head. Compact, strong plant. Adapted to warm weather.
	65-1470	CORATO FI	UNT	82	Spring - Summer	Dome	Bunching, Crown	Variety that stood out of the trials this last summer, due to its nice dark green colour, excellent weight and good heat tolerance. Could be a good alternative to Emerald Pride.
	65-1480	BELSTAR FI	UNCL	83	Fall	Dome	Bunching, Crown	Produces very heavy, high-domed heads. Better suited for cooler periods.
🧱	65-1472	DIPLOMAT FI	UNT	87	Summer - Fall	Dome	Bunching, Crown	Replaces Decathlon. Excellent tolerance to heat.
♥	65-1471	IMPERIAL FI	UNT	88	Summer - Fall	Dome	Bunching, Crown	Diplomat type. Tolerates heat. Low percentage of hollow stems.

# Broccoli Mini

APOLLO FI

	Code	Variety	Form.	Maturity (days) ↑	Harvest season	Use	Description
🧱	65-1498	APOLLO FI	UNT	50	Spring - Summer - Fall	Bunching	Long thin and tender stems ending with tiny heads. The main head must be cut to let the side shoots grow.

# Brussels sprouts

CAPITOLA FI

NAUTIC FI

	Code	Variety	Form.	Maturity (days)	Sprout size	Plant size	Description
	65-2847	CAPITOLA FI		110	Medium	Large	Round and dark green sprouts. For mechanical harvest. Used for fresh markets and processing.
	65-2850	NAUTIC FI		120	Medium	Large	Produces sprouts of 2.5 cm in diameter, that are more widely spaced than other varieties, decreasing the risk of disease spreading and making the harvest easier. High disease tolerance for a reliable crop.

BILKO Y.R. FI

# Cabbage-Chinese

Code	Variety	Form.	Maturity (days)	Dimension (cm) height x dia.	Weight (kg)	Colour	Tolerances	Description
<b>NAPA</b>								
65-2617	BILKO Y.R. FI		60	32 x 18	2.5-2.8	Medium green	1, 2, 3, 4	Large size cabbage shaped like a barrel with a yellow interior.

TOLERANCES: 1 = Fusarium Yellows - 2 = Club Root - 3 = Bolting - 4 = Tipburn - 5 = Soft Rot - 6 = Downy Mildew - 7 = Pepper Spot - 8 = Turnip mosaic virus

MELISSA Y. R. FI

WIROSA FI

# Cabbage-Savoy

Code	Variety	Form.	Maturity (days)	Sprout size	Colour	Description
65-3030	MELISSA Y. R. FI		75	Medium	Dark bluish green	Y.R. version of Clarissa. Holds well in the field. Very curly foliage. Dense and heavy heads.

## STORAGE

65-3085	WIROSA FI		100	Medium	Green-greyish blue	Round cabbage, tolerant to cold weather. For storage.
---------	-----------	--	-----	--------	--------------------	---

TOLERANCES: 1 = Tipburn - 2 = Fusarium Yellows

# Cabbage-Pointed

CARAFLEX Y.R. FI

Code	Variety	Form.	Maturity (days)	Weight (kg)	Tolerances	Description
65-3570	CARAFLEX Y.R. FI		63	0.4-1.4	1	To be used for the production of miniature pointed green cabbages. Tender and sweet tasting. Its unique shape makes it an original choice.

TOLERANCES: 1 = Fusarium Yellows - 2 = Black Speck - 3 = Thrips - 4 = Tipburn - 5 = Black Rot - 6 = Bacterial Spot - 7 = Black Leg

# Cabbage-Summer

KOSARO Y.R. FI

RUBY PERFECTION FI

CAIRO Y.R. FI

FARAO FI

BAJONET Y.R. FI

BRONCO Y.R. FI

DRAGO FI

TOPMA FI

KORSUMA FI

Code	Variety	Form.	Maturity (days)	Weight (kg)	Quantity of heads per Box	Tolerances	Description
------	---------	-------	-----------------	-------------	---------------------------	------------	-------------

## RED

65-3419	KOSARO Y.R. FI		62	0.9-1.4	16-18	1, 2, 4	Primero type that is tolerant to Fusarium Yellows. Well covered heads, very uniform.
65-3423	RUBY PERFECTION FI		80	1-1.6	14-16	6	Deep-red, globe-shaped heads with very good wrappers and good uniformity. Very late to burst and cold and heat tolerant.
65-3438	CAIRO Y.R. FI		85	1.4-1.6	14-16	1, 2, 4	Round, firm and heavy head. Well wrapped. For fresh markets.

## GREEN

65-3514	FARAO FI		55	1.1-1.4	12-16	4	Replaces Cambria. Early cabbage for fresh markets. Dark colour, sweet taste. Good holding in the field.
65-3550	BAJONET Y.R. FI		60	1.5-1.8	12-16	1	Earlier Bronco type. Its bright green colour makes it a fresh and clean appearance. Very erect plant habits, good clearance from the soil. Produces heavy uniform heads.
65-3548	BRONCO Y.R. FI		65	1.8-2.2	14-16	1, 3, 4	A great choice! Bronco's sweet and crunchy texture is very versatile in the kitchen. Well wrapped, uniform head. Also tolerant to black rot and tip burn
65-3546	DRAGO FI		75	1.4-1.8	14-16	—	Round and dense heads with short core. Very uniform in size for a perfect box count. Heads are high from the ground and well wrapped. Good field holding.
65-3547	TOPMA FI		65	1.4-2.2	16	1	Vigorous plant with very nice wrapper leaves. Strong, compact-framed heads in a blue-green colour with good wax. Very good field holding ability. Good performance under difficult conditions.
65-3561	KORSUMA FI		90	1.5-3	16	1	Very vigorous plant. Round, very dense head with an intense green colour. Excellent field holding ability for a longer harvest window. Very attractive variety. Mild, sweet taste.

# Cabbage-Winter

KLIMARO FI

REACTION Y.R. FI

EXPECT Y.R. FI

RESIMA FI

LENNOX FI

SARATOGA Y.R. FI

AMTRAK Y.R. FI

	Code	Variety	Form.	Maturity (days) <sup>T</sup>	Weight (kg)	Quantity of heads per Box	Storage	Tolerances	Description
--	------	---------	-------	------------------------------	-------------	---------------------------	---------	------------	-------------

## RED

♥	65-3487	KLIMARO FI	UNT	110	2.5-3	14-16	Long term	4	Cabbage with a slightly elongated shape and a small core. Excellent yield.
	65-3488	RESIMA FI	UNT	115	1.1-2.7	12-14	Long term	–	Industry standard. Vigorous, healthy plant. Dense, attractive deep red heads that are very uniform. Compact interior with a short core. Nice wrappers. Easy to clean. For fresh or storage markets.

## GREEN

♥	65-3615	EXPECT Y.R. FI	UNT	92	2-2.6	12-14	Long term	1, 3, 4	Lennox type, for long-term storage. Holds its freshness appearance. Tolerant to thrips.
☁	65-3620	LENNOX FI	🍃	92	2-2.5	12-14	Short term	2, 4	Well-known variety for its sweet taste. Well suited for either fresh market or storage. Round, solid heads with smooth wrapper leaves. Very productive, showing vigorous, uniform growth. Will hold its green colour very well in storage. Potential of large size cabbages.
	65-3623	REACTION Y.R. FI	🍃	92	2-2.25	14-16	Medium term	1, 4, 6	Smaller size cabbage. Very well wrapped, with a small core. Can be used for the production of mini cabbages if sown at high density.
	65-3640	SARATOGA Y.R. FI	UNT <sup>6</sup>	104	2-3	12-14	Medium term	1, 2, 4	Excellent all-purpose cabbage. Maintains its deep green colour and crisp texture even after extending storage. Medium to large heads have a tight, dense structure and a uniform, round shape with a small core.
♥	65-3653	AMTRAK Y.R. FI	UNT	107	2.5-3	8-10	Long term	1, 2, 3, 4	Later Bartolo type. Heavier cabbage for a heavy yielder. Maintains a nice green colour in storage. Easy to trim. Potential of large size cabbages

# Carrot

BOLERO FI

PRESTO FI

NAPOLI FI

NAVAL FI

ISTANBUL FI

ENTERPRISE FI

BERLIN FI

	Code	Variety	Form.	Maturity (days) S	Length (cm)	Neck diameter (cm)	Storage	Soil type	Description
--	------	---------	-------	-------------------	-------------	--------------------	---------	-----------	-------------

## MINI

	65-1805	LITTLE FINGER		50	10	2.5	Short	Mineral and muck soil	A small root variety, perfect for baby carrots, preserves or pickling. Deep orange root with smooth skin. Great taste.
--	---------	---------------	--	----	----	-----	-------	-----------------------	--

## NANTES-TOUCHON

	65-1808	BOLERO FI		55	15-20	2-2.5	Long	Mineral and muck soil	Smooth and cylindrical root with round ends. Maintains its superior flavour after months of storage. Sturdy foliage, tolerant to Cercospora and Alternaria.
	65-1809	PRESTO FI		55	15-17.5	2-2.5	Short	Mineral and muck soil	Smooth, cylindrical root that sizes up fast. Early harvest. Exquisite taste.
	65-1815	NAPOLI FI		55	20-22	2-2.5	Short	Mineral and muck soil	Good sweet taste. Ideal for bunching or cello. Early cylindrical root.
	65-1817	NAVAL FI		55	20-22	2-2.5	Short	Mineral and muck soil	A good alternative to Napoli and to Apache. Nice sweet taste and excellent yield because of its cylindrical shape and rounded tip. Healthy deep green tops, perfect for bunching and cello. Remarkable uniformity.
	65-1826	YAYA FI		60	16-19	3	Short	Mineral and muck soil	Nantes type, smooth, crunchy and very sweet. A little shorter than other Nantes, Yaya redeems its little sin with a superior taste.
	65-1830	NANTES IMPROVED		62	18-20	2.5-3	Short	Mineral and muck soil	Popular variety. Known for its sweet taste.

## CELLO-JUMBO

	65-1840	ENVY FI		63	25-28	4-4.5	Long	Mineral and muck soil	Early Cello/Jumbo type. Earlier than Apache. Smooth and uniform carrot. High yield potential.
	65-1842	ISTANBUL FI		65	23-26	3-4	Long	Mineral and muck soil	First Emperor carrot from Bejo. Shows very good uniformity, both in mineral and muck soils.
	65-1871	ENTERPRISE FI		70	25-28	3-4	Long	Mineral and muck soil	Mid-season variety. Strong tops, outstanding for its quality and uniformity. Excellent storage ability.

## COLOURED

	65-1877	YELLOWSTONE		70	20-25	2.5-3	Long	Mineral and muck soil	One of a kind smooth yellow root. Appealing for retail and specialty markets.
	65-1879	WHITE SATIN FI		72	23-25	3	Long	Mineral and muck soil	Cello type with white roots. Strong tops for mechanical harvest.
	65-1880	PURPLE HAZE FI		72	20	2-2.5	Long	Mineral and muck soil	Purple carrot with orange core for fresh markets or processing. Slightly susceptible to bolting.
	65-1881	RAINBOW MIX FI		72	20-22.5	2-2.5	Long	Mineral and muck soil	Cello type in different colours: orange, white, yellow and salmon. For bunching or slicing.
	65-1873	MALBEC FI		70	26	2-2.5	Medium	Mineral and muck soil	Red carrot with the best tolerance to bolting on the market as well as the best root quality. Good uniformity.

## INDUSTRY

	65-1885	BERLIN FI		85	20-25	4 +	Long	Mineral and muck soil	Early Belgrado/Bradford type. Very resistant foliage and better quality root.
	65-1872	BELGRADO FI		80	20-25	4 +	Long	Mineral and muck soil	Bulky Berlicum type for jumbo production or processing.

# Cauliflower

FIORETTO 60 FI

MINUTEMAN FI

FREEDOM FI

MELROSE FI

SYNERGY FI

JANVEL FI

FLAME STAR FI

DEPURPLE FI

VITAVERDE FI

VERONICA YR FI

Code	Variety	Form.	Maturity (days)	Head shape	Plant size	Harvest season	Description
------	---------	-------	-----------------	------------	------------	----------------	-------------

## WHITE

	65-3875	FIORETTO 60 FI		60	Florets	Large	Spring - Fall	New long-stem cauliflower harvested as sticks. Each stick weighs between 10 and 20 grams. Sweet taste with a smoother texture than with traditional cauliflower.
	65-3812	MINUTEMAN FI		68	Dome	Medium	Spring - Fall	Exceptional, early, uniform and productive variety. Dense head.
	65-3815	FREEDOM FI		75	Dome	Upright	Summer - Fall	CMS version of Fremont. Very uniform and concentrated production.
	65-3820	SYNERGY FI		77	Dome	Large	Summer - Fall	Pure white, very nice high quality cauliflower, a little later in maturity than Freedom. Better self cover than Freedom. Very uniform in maturity.
	65-3824	MELROSE FI		80	Dome	Medium	Summer - Fall	Quick growing summer variety. Very dense, nice quality, white head. Good self-covering foliage for its speed of growth. Impressive tolerance to tip burn.
	65-3825	JANVEL FI		80	Dome	Medium	Summer - Fall	Dense, well-filled curds make this an attractive variety for both fresh market and processing. Tall leaves of this vigorous plant provide excellent sunburn protection for curds.

## COLOURED

	65-3868	FLAME STAR FI		78	Dome-Orange	Medium-large	Spring - Fall	Superb, pastel orange cauliflower with better tolerance to heat and stress than the Cheddar variety. Medium-large plant. For spring and fall crops.
	65-3872	DEPURPLE FI		75	Dome-Purple	Large	Spring - Summer - Fall	Splendid lavender colour. Can produce very large heads. Good adaptability to all conditions and strong plant.

## BROCCOFLOWER

	65-3873	VITAVERDE FI		75	Dome-Lime green	Large	Summer - Fall	Versatile, easy-to-grow variety. Nice-looking, compact head. Strong, vigorous, fast-growing, upright plant.
--	---------	--------------	--	----	-----------------	-------	---------------	---

## ROMANESCO

	65-3881	VERONICA YR FI		85	Lime green	Large	Fall	Pointed head showing a nice uniformity. Tolerant to Fusarium.

## BICOLOUR SE

65-1127	FAST LANE F1	UNT	59	12-14	18-20	40	150	Well filled and well-covered husks. Good vigour in cold soil. Easy to harvest.
65-1128	BON JOUR F1	UNT	62	14-16	20	50	200-220	Sure value. Produces large husks for its earliness. Good husk cover.
65-1155	ACCORD F1	UNT	74	18-20	22	50-60	200-210	Well filled cob that maintains its taste. Finds its place in the end of the growing season.

## BICOLOUR SESH2

65-1118	SWEETNESS F1	UNT	61	16	20	45	180	The most vigorous and early sweet variety on the market. Its emergence in cold soils is perfect and the taste is tender and very sweet.
65-1123	LATTE F1	UNT	62	12-14	19-20	40	140	An interesting alternative to the Fastlane variety. Darker plants, better vigour and more taste.
65-1150	PROFIT F1	UNT	68	14-16	20	55	210	Replaces Bojangles. Appreciated by growers because of the vigour of its emergence, its well-filled tip and its good ear cover. Appreciated by consumers because of its sweet taste and the tenderness of its kernels.
65-1175	ALLURE F1	UNT	70	16	20-21	65-70	210	Variety recognized for its solid plant, good husk cover and great taste. Sweet and tender kernels. Needs a warm soil at the plantation.
65-1138	MONTAUK F1	UNT	78	16-20	20-22	50	205	A big ear with excellent eating quality and good vigour. Very sweet taste.
65-1189	ESSENCE F1	UNT	78	16	20-21	75	210	Refined ears with strong tip fill. Very tender with high sugars. Similar to Providence.

## BICOLOUR SH2

65-1167	FLAGLER F1	UNT	76	16-18	20	75	180	Superior field vigour and exceptional eating quality. Large ears with clean and bright kernels with a remarkable sweet, fruity taste.

MINI MUNCH

MOUSE MELON

	Code	Variety	Form.	Maturity (days) S	Fruit size (cm) length x dia.	Flowering habit	Tolerances	Description
--	------	---------	-------	-------------------	-------------------------------	-----------------	------------	-------------

## ENGLISH

	65-4250	BURPLESS 26 FI		65	38-40 x 4,6	Monoecious	3, 6	Digestible type. Tender non-bitter taste. Very productive. High yield.
	65-4254	ENGLISH TELEGRAPH		65	38-45 x 4,5	Monoecious	4, 6	Digestible type. Pleasant, non-bitter taste. Open pollination variety. Recommended for retail sales.

## SLICING

	65-4260	SWEET SUCCESS FI		50	30-36 x 6	Gynoecious	3, 7, 8	Similar to Japanese varieties said to be digestible, but resembling Marketmore. Tender, non-bitter taste. Adapted for greenhouses and outdoor cultivation. Parthenocarpic variety.
	65-4214	BRISTOL FI		52	20 x 5	Gynoecious	1, 2, 3, 4, 5, 6, 7, 8, 9	Early variety. Fruits stay firm, straight and uniform all season long. Nice dark green colour. Incredible yield right at the beginning of the season. Very good disease packages and tolerance to Downy Mildew.
	65-4218	SPEEDWAY FI		54	20 x 6	Gynoecious	1, 2, 3, 6, 8	High yield of dark colour cucumbers. Very uniform fruits on moderately vigorous vines. This variety is popular because of its earliness, yield and disease resistance.
	65-4258	PETICUE FI		54	18-23 X 6	Monoecious	–	Replaces Fanfare. Short vining/bush slicing cucumbers bred to stay compact with the vines using only 1/3 of the space of a standard variety. For the best tasting, crunchy-sweet cues, pick the green fruits at 18 - 23 cm. Harvest regularly to increase the yield.
	65-4266	MARTINI FI		55	13-15 x 4	Monoecious	6	Small cucumber characterized by its white exterior colour, early maturity and thin fruit skin. Sweet and crunchy fruit, without any bitterness, that do not need to be peeled. Tolerant to powdery mildew.
	65-4238	MARKETMORE 70		63	23 X 6,5	Monoecious	1, 2, 4, 6, 8	Mid-early variety that produces long dark green fruits with white spines. Productive and flavourful.

## LEBANESE

	65-4230	MAGIC FI		55	14-16 x 3	Gynoecious	4, 5, 9	Beit Alpha type for the field and greenhouse. Slightly spiny dark green fruit.
	65-4276	MINI MUNCH		55	10 x 3	Gynoecious	–	Parthenocarpic cucumber to be grown in a container or in the garden on a trellis. Early high yield, very thin skin and crispy texture.

## SPECIALTY

	65-4280	MOUSE MELON		70	2 x 3	Gynoecious	–	Tiny little cucumbers ( <i>Melothria scabra</i> ) known in Mexico as "sandiita" (little watermelon) and branded here as mouse melons. They have a prominent cucumber flavour with notes of tartness.
--	---------	-------------	--	----	-------	------------	---	--

**TOLERANCES:** 1 = Anthracnose - 2 = Angular Leaf Spot - 3 = Cucumber Mosaic Virus - 4 = Downy Mildew - 5 = Zucchini Yellow Mosaic Virus - 6 = Powdery Mildew - 7 = Target Leaf Spot - 8 = Scab - 9 = Watermelon Mosaic Virus - 10 = Papaya Ring Spot - 11 = Cladosporiose

**Flowering HABIT** - Gynoecious: Referred to when having 100% female flowers on the same plant. **Monoecious** : Referred to when both male and female are on the same plant.

# Pickling cucumber

PETIPEKEL F1

PUCCINI F1

SALT AND PEPPER

EUREKA F1

	Code	Variety	Form.	Maturity (days) <sup>S</sup>	Flowering habit	Ratio length and diameter	Tolerances	Description
	65-4420	PETIPEKEL F1		45	Monoecious	3,1-3,3	6	Short vining/bush pickling cucumber that has been bred to stay compact with the vines using only 1/3 of the space of a standard variety. Pick the green striped, spined fruit at 8-13 cm (3 - 5 in) for the best results. Harvest regularly to increase the yield. Fruits can be left until 18 cm (7 in) long and used fresh.
	65-4410	PUCCINI F1		50	Parthenocarpic	3,1	11	Parthenocarpic type (does not need to be pollinated to produce fruits). Very compact vines and small foliage. Perfect for early and late season production. Ideally, needs to be isolated from other varieties to preserve its quality.
	65-4480	SALT AND PEPPER		50	Gynoecious	3,15	–	Eye catching white-skinned pickling cucumber with good powdery mildew tolerance. You won't need to add salt and pepper to this unique miniature cucumber. It has just the right amount of natural flavours, quite delicious.
	65-4424	EUREKA F1		55	Monoecious	3,1	1, 2, 3, 4, 5, 6, 8, 9	Highly disease resistant variety. Outstanding for its dark green fruit that looks like a small slicer.

**TOLERANCES:** 1 = Anthracnose - 2 = Angular Leaf Spot - 3 = Cucumber Mosaic Virus - 4 = Downy Mildew - 5 = Zucchini Yellow Mosaic Virus - 6 = Powdery Mildew - 7 = Target Leaf Spot - 8 = Scab - 9 = Watermelon Mosaic Virus - 10 = Papaya Ring Spot - 11 = Cladosporium -

RED RUSSIAN

LARGE IMPROVED

MESCLUN MIX

RUBY STREAK

EARLY MIZUNA

FRENCH SORREL

	Code	Variety	Form.	Type	Maturity (days)	Colour	Description
	67-0470	SSC 3099		Amaranth	30	Red	Variety with a darker colour development than standard varieties. Annual.
	65-0885	SOLDIER		Beet	35	Dark red	Bull's Blood type. Mainly grown for its red foliage resembling Swiss chard.
	65-4850	LARGE IMPROVED		Cress	35	Green	Perennial. Rich in vitamins. Best grown in moist soil conditions.
	65-3133	SIMPLYSALAD STORM MIX		Kale	35	Purple, green, blue	Kale mix made up with attractive textures and colours including purple, green and blue. This mix will last longer in containers than lettuce and won't bolt. Storm Mix can also be planted in the ground for all-season harvest.
	65-3106	RED RUSSIAN		Kale	35	Dark red	Tender leaves with a sweet taste. Tolerates cold temperatures. For baby leaves.
	65-5601	MESCLUN MIX		Mesclun	28	Various	Contains selected leafy types of lettuces and radicchio to be sown together. Harvest when seedlings reach a few centimetres. Multiple harvests.
	65-5602	SIMPLYSALAD ALFRESCO		Mesclun	30	Various	A mixture of leaf lettuces with arugula, endive and radicchio. Mediterranean fresh flavour. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-5603	SIMPLYSALAD CITY GARDEN		Mesclun	30	Various	A mixture of sweet tasting red and green lettuces. A more traditional mixture. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-5605	SIMPLYSALAD WONDER WOK MIX		Mesclun	30	Various	Mix of Asian greens including mustard, kale and pak choi. Zesty and tasteful. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-6230	RUBY STREAK		Mustard	30	Dark red	Delicate and finely serrated red-violet leaves. Gentle spicy sweet taste.
	65-6221	BARBAROSSA		Mustard	45	Dark purple	Red Giant mustard type, which maintains its red colour longer and better.
	65-2682	EARLY MIZUNA		Japanese mustard	45	Light green	Broad finely serrated leaves. Tolerates cold conditions.
	67-6710	FRENCH SORREL		Sorrel	35	Green	Large, green leaves, tangy, light lemony taste. Height: 30 to 45 cm, width: 20 to 25 cm.
	67-8110	ROCKET		Rocket	25	Green	Belongs to the mustard family. Strong aromas with a subtle nutty flavour.

BERGAM'S GREEN

POMEGRANATE CRUNCH

XALBADORA

ARROYO

	Code	Variety	Form.	Maturity (days) S	Colour	Description
--	------	---------	-------	-------------------	--------	-------------

## BUTTERHEAD

	65-5705	HARMONY		55	Green	Attractive and high-yielding Boston type with large, heavy and glossy head. Leaf texture is moderately thick and mildly blistered. Ideal for year-round production in temperate areas. Superior tip burn tolerance. Downy mildew (I-VI) resistant.
	65-5706	RHAPSODY		55	Green	Large, luxurious butterhead, bred for flavour, form and vigour. Glossy, dark green leaves with smooth margins. Good yielders in temperate areas.
	65-5707	BUTTERCRUNCH		55	Green	Heavy, with medium-size head. Tolerates heat. Slow to bolt.

## OAK LEAF

	65-5638	PANISSE		55	Green	Large lime-green oak leaf lettuce. Good hazelnut flavour. Replaces the General variety.
	65-5646	CANTARIX		55	Red	EAZYLEAF. Dark, triple red, mini oak leaves with a small frame. Just one cut and it falls apart into a nice bunch of small red-green leaves, ready to eat. Also impressive as a full mini-head. Excellent flavour.

## LEAF

	65-5615	GRAND RAPIDS		55	Green	Popular selection. Thick, juicy, bright green, frilly leaves. Rapid growth in spring and fall.
	65-5663	EZRILLA		55	Green	EAZYLEAF. Replaces the Capulin variety. Long, narrow leaf margin with a nicely frilled, medium green base. Fast growth.
	65-5675	RED SAILS		55	Red	Dark red leaf lettuce. Voluminous and uniform. Slow to bolt. Recommended for retail sales.

## LEAF

	65-5613	STARFIGHTER		55	Green	High yield of uniform, medium-size heads with good flavour. Dark green leaves are shiny and slightly savoyed. Strong against tip burn, bolting and DM (16-25,27,30-32).
	65-5667	NEW RED FIRE		55	Red	Exceptional for its shiny, red and green leaves. Classy looking selection, very uniform and productive. Consistent yields. High bolting tolerance and strong tolerance to heat. Holds well in fields.
	65-5668	RUBY SKY		55	Dark red	Disease tolerance makes this variety particularly suited to late-season production. Dense head with ruffled leaves in an intense red at the tips and green at the inner base. Holds well in the field. DM (16, 17, 21, 23, 32).
	65-5619	BERGAM'S GREEN		58	Green	Large size, heavy, leaf lettuce, just a bit later than other varieties. Slow to bolt and strong against tip burn. Best suited for summer and fall harvest.

## ICEBERG

	65-5757	GLENDANA		87	Green	Large-sized Iceberg, very adaptable to hot and cool climates. Dense heart and medium core. Strong against tip burn and bolting.
--	---------	----------	--	----	-------	---

## ROMAINE

	65-5770	POMEGRANATE CRUNCH		55	Red	Red mini romaine with open habits and smooth texture. Faster growth than other varieties. Bright poppy-red colour outside and bright red-green inside. Nice twin pack with green mini romaine Starhawk.
	65-5776	XALBADORA		55	Green	New mini romaine with great green colour and gloss, slightly open centre with high leaf count. Xalbadora performs great against tip burn and has a wide adaptability.
	65-5788	RIO BRAVO		72	Green	Tight leaf structure contributes to high pack outs of hearts from the field. Only for early spring production.
	65-5787	PARIS ISLAND COS SELECT M.I.		75	Green	High quality, productive selection. Medium to dark green, non-brittle leaves. Good tolerance to bolting.
	65-5793	ARROYO		75	Green	Tall, upright and V-shaped romaine with tight internodes that makes this best for romaine heart production. Dark in colour with blistered leaves. High tolerance to bolting and tip burn.

## PEA-SHELLING

65-7825	LITTLE MARVEL		57	45	8	7	1	A favourite for over 60 years! Space-saving semi-dwarf plant giving a tremendous return of sweet peas. Good for freezing. Produces two pods per node.
65-7809	SPRING F1		52	50	7.5	6-7	2	Early variety of shelling peas. Each pod contains 6 to 7 peas. Pea is tender and sweet.
65-7856	ALTESSE		68	80	11	9-10	2, 3, 4	Replacement for the variety Utrillo with a better taste, better yield and more erect plant that does not lodge.

## PEA-SNAP

65-7873	NAIROBI		67	60	8-9	8-9	3	Sweet and crunchy pods that remain totally stringless. High tolerance to powdery mildew.
---------	---------	--	----	----	-----	-----	---	--

## PEA-SNOW

65-7886	LITTLE SNOW PEA		54	50-60	8-9	–	–	Green snow pea with purple bicolor flowering. Dwarf plant that will not surpass 50-60 cm in height. Perfect for container cultivation.
65-7878	SWEET SUNSATON		65	70	8-9	–	2, 3	"Snow" pea type with flat pods that are usually used in stir-fries. They can also be frozen or eaten fresh.

TOLERANCES: 1 = Common Wilt - 2 = Fusarium Rot - 3 = Powdery Mildew - 4 = Mosaic Pea Enation - 5 = Leaf and Pod Spot - 6 = Downey Mildew

# Potato

Code	Variety	Form.	Maturity (days) <sup>T</sup>	Height (cm)	Description
65-7905	CLANCY F1		100	60-90	Our first potato from seed. The sterile seed eliminates the potential of introducing disease to the field. is easier to store and will keep longer than potato tubers. Compact and healthy dark green plants with blue flowers. Resulting spuds are a mix ranging from red to rose-blush skin tones with flesh of creamy white and yellow. Good texture and flavour, ideal for mashing or boiling. Start as transplants.

## RED

	65-7234	SOCRATES X3R FI		65		11 x 11	Green-Red	1, 4	One of the best yielders for its maturity. Four lobes, thick walled, sweet tasting pepper. Very vigorous plant that does not lodge.
	65-7236	CLASSIC FI		65		9.5 x 9.5	Green-Red	1, 3, 4	High quality Bell type whose quality comes close to a greenhouse sweet pepper. Extra smooth fruit with thick walls.

## GREEN

	65-7243	ARISTOTLE X3R FI		68		11 x 10	Green-Red	1, 3, 4, 6	Extra large, dark green to red fruits and heavy sets that have impressed growers everywhere. Anthocyaninless (no purplish colour).
--	---------	------------------	--	----	--	---------	-----------	------------	--

## YELLOW

	65-7279	EARLY SUNSATTON X3R FI		70		10 x 10	Yellow	4	The earliest and sweetest yellow Bell type we have seen. Smooth, medium-sized fruits that stay firm at maturity. Produces well in hot weather.
	65-7281	EARLY SUMMER FI		70		10 x 9	Yellow	1, 5, 8	A variety that stands out by being of a dark green colour before turning to yellow, quite unusual for a yellow pepper. High quality and uniform fruit.
	65-7280	ABAY FI		73		10 x 10	Yellow	5	Beautiful yellow pepper that will produce large sized peppers with thick walls throughout the season. Excellent fruit quality, shiny dark-yellow colour at maturity. Nice blocky shape.

## COLOUR

	65-7220	CANDY CANE FI		60		10 X 4	Green w red stripes-Red	—	Snack pepper that has a unique, eye-catching variegated foliage, and fruits that ripens from green striped to solid red. Sweet flavour, thin walls, crispy texture. Can be eaten at any stage of ripeness.
	65-7256	MILENA FI		68		9 x 9	Orange	2, 3, 6, 8	Early orange pepper of high quality. Vigorous and open plants. High yielding.
	65-7298	MARONA FI		75		10 x 10	Brown	1	Nice, very uniform fruit, smooth and glossy. Very thick walls, firm, 2-3 lobes. Very sweet.

## BULL'S HORN

	65-7266	CARMEN		65		15 x 5.5	Green/Red	—	High yield of deliciously sweet flesh fruits that are early to ripe red. Variety that is widely adaptable, flowering and setting fruits over a wide temperature range. Plants are around 60 cm tall with an upright habit and are also suitable for large patio containers.

## PATIO COLLECTION

	65-7207	MOHWAK FI		55		10-13 x 4	Orange	Compact trailing plants. For hanging baskets or patio containers. Height: 30 to 40 cm.
	65-7208	REDSKIN FI		55		10-13 x 4	Red	Mostly used in patio containers because of its erect and compact habit. Height: 30 to 40 cm
	65-7210	LIBERTY BELLE FI		55		10-13 x 4	Yellow	Outstanding new patio sweet pepper with a naturally dwarf habit that makes it perfect for use in patio containers. Large bright yellow fruits, well shaped and very sweet. A strong variety that withstands intense heat without fruit damage or diseases.
	65-7213	PRETTY N SWEET FI		60		2.5 x 4	Multicolor	Ornamental pepper that can be eaten with a fantastic taste. Sweet, multicoloured pepper on a compact 45 cm plant that is attractive to use in ornamental gardens and containers. Early and prolific and has an amazing sweet taste with thick pepper walls.

## MINI

	65-7209	SNACKABELLE FI		55		8 x 6	Red	A tasty, sweet and original treat. Continuous yield of apple-shaped fruits. Ideal for fresh eating or for stuffing. Replaces the Cute Stuff variety.
	65-7201	MINISWEET YELLOW FI		75		8-10 x 3-4	Yellow	Small, sweet, bright coloured fruits with few seeds. Solid, straight and well-branched plants. Excellent yield.
	65-7202	MINISWEET ORANGE FI		75		8-10 x 3-4	Orange	Small, sweet, bright coloured fruits with few seeds. Solid, straight and well-branched plants. Excellent yield.
	65-7203	MINISWEET RED FI		75		8-10 x 3-4	Red	Small, sweet, bright coloured fruits with few seeds. Solid, straight and well-branched plants. Excellent yield.
	65-7214	MAD HATTER FI		85		5-8 x 5-6	Green-Red	Intriguing small flattened disc shape pepper with lobes or wings. Crunchy, crisp and mild fruits for perfect eating at mature green or ripe red stage. Large indeterminate plants will benefit from a support or a trellis. In hot and dry climates, a small number of fruits will have a spicy taste close to the seed cavity.

## BHUT JOLOKIA

	65-7305	BHUT JOLOKIA		85		6-8,5 x 2,5-3	Green-Red	One of the hottest pepper in the world at over 1 million Scoville units. Rough dented fruits with thin skin and fiery hot flavour. The seeds and fruits should be handled with extreme caution.
--	---------	--------------	--	----	--	---------------	-----------	---

## CAYENNE

	65-7325	CAYENNE LONG SLIM		70		10 x 1	Green-Red	Very productive with creased walls. Strong and distinct taste.
--	---------	-------------------	--	----	--	--------	-----------	--

## CHILI

	65-7320	SUPER CHILI FI		75		6 x 1	Orange-Red	Early. Very uniform. High bearing and super-productive plants.
	65-7387	MAMBA RED FI		80		6 x 2,5	Black-Red	Upright-growing pepper plant with mild spicy fruits. Glossy, fleshy fruits turn from a trendy black to a luscious red when ripening. Drought tolerant.

## HUNGARIAN

	65-7338	HOT SUNSET FI		85		20 x 4	Yellow-Red	A prolific and early harvest for these delicious and spicy fruits. Large, healthy, vigorous plant that is disease-free and produces thick-walled, tasty and attractive fruits all season long. Hot Sunset gives you the heat and the great taste.
--	---------	---------------	--	----	--	--------	------------	---

## JALAPENO

	65-7322	EARLY JALAPENO		65		9 x 4	Green-Red	Early. The mildest tasting of the jalapeno types. Ideal for making salsa. For fresh markets and processing.
	65-7321	EMERALD FIRE FI		75		9 x 3,5	Green-Red	Large-size jalapeno. Very uniform and abundant production. Concentrated set. Does not crack even after maturing to red.

## ESPELETTE TYPE

	65-7385	GORRIA		80		9-15 x 3	Green-Red	An Espelette type pepper, the famous European pepper with a well-established culinary reputation. It has a sweet, not too strong, taste. Plants can reach up to one metre in height.

KRIMZON LEE FI

	Code	Variety	Form.	Maturity (days)	Shape	Fruit size (cm) height x dia.	Colour	Description
--	------	---------	-------	-----------------	-------	-------------------------------	--------	-------------

## HABANERO

	65-7350	PRIMERO RED FI		75		8 x 3,5	Green-Red	The earliest ripening habanero on the market. Expect huge yields of peppers that are larger than other habaneros. They have about one third the heat of standard habaneros, letting gardeners appreciate their rich flavour.
	65-7386	BIQUEINHO RED		75		2,5 x 2,5	Yellow-Red	Well branched plants that sets an abundant harvest of small fruits with a little beak-like protuberance that gives it its Portuguese name Biquinho. Fruits are 2-3 cm in diameter, red in colour. Belongs to the habanero family but has a surprisingly mild taste. To be eaten raw to preserve all the good taste. Winner of Les Exceptionnelles 2018.

## PAPRIKA

	65-7304	KRIMZON LEE FI		82		15-20 x 5	Green-Red	Sweet and spicy flesh, perfect pepper for grilling or to add to a salsa. Moderate pungency.

## PATIO COLLECTION

	65-7310	CHILLY CHILI		55		5 x 1	Yellow-Red	Ornamental pepper with an exceptional performance. Non-pungent fruit, that changes colour from yellow to orange, then red at maturity. Extremely heat tolerant.
	65-7308	APACHE FI		58		5-7 x 1	Green-Red	Erect, compact and well-branched chili type plant. For patio containers. Height: 40-45 cm.
	65-7309	CHEYENNE FI		58		10-13 x 3	Green-Orange	Compact and trailing chili type plants. For hanging baskets and patio containers. Height: 40 to 45 cm.
	65-7311	CAYENNETTA FI		58		8-10 x 2	Green-Red	Chili type pepper that grows into a very well-branched upright plant, ideal for patio planters or hanging baskets. Unique cold tolerance and dense foliage that covers and protects the fruits from the sun. Heavy yield of mild tasting peppers. 2012 AAS Winner.
	65-7306	LOCO FI		68		6-7 x 3-4	Purple-Red	Compact well-branched plants. Produces an abundance of small, oval, bright red peppers that will change to purple at maturity. Edible fruits, visible above the foliage.
	65-7307	BASKET OF FIRE FI		80		5-7 x 1	Purple-Cream-Orange-Red	Chili type pepper with a very hot taste on a semi-trailing plant. Perfect for containers or hanging baskets. Good tolerance to cool weather and produce well into autumn. Can be eaten fresh or dried.

## MINIATURE

	65-4093	HOOLIGAN F1		95		5 x 7.5	0.1	Orange, cream spots	Compact	Nice fruit for stuffing and decorating. Good yield.
	65-4091	LIL'PUMP-KE-MON F1		100		6 x 11	0.5-1	Orange	Compact	Bushy plant habits. Strong dark green handle. Small, uniform fruits.

## SMALL

	65-4021	JACK SPRAT F1		90		13 x 11	1.4	Dark orange	Semi-Vine	Exciting pie-class pumpkin to replace Trickster. Fruits weigh three pounds on average and have a nice dark-orange exterior and dark green embedded handle. Jack Sprat is very uniform in size and shape. It boasts high fruit numbers per plant and an excellent yield potential. Good tolerance to powdery mildew.
	65-4060	SMALL SUGAR		115		15 x 18	2.5-3	Dark orange	Large	Sweet flesh. Popular variety.

## MEDIUM

	65-4072	ROUGE VIF D'ESTAMPES		95		15 x 37	4.5-6.5	Red	Vine	Flattened shape with deep ribbing. Sweet, orange flesh.
	65-4031	DIABLO F1		100		28 x 23	7-9	Dark orange	Compact	Blocky round pumpkin ideal for the Halloween market. Diablo produces fruit with very uniform size and shape. It has a beautiful dark orange colour with a strong, dark green, embedded handle. The semi-determinate vine is ideal for home gardens and small market growers.
	65-4038	CARRIE F1		100		27 x 27	7-9	Dark orange	Medium	Beautiful pumpkin, slightly smaller than Sorcerer, smooth, with a good dark and solid handle. Fruits stand out because of their great uniformity and their outstanding quality. It will be an eye catcher in your Halloween assortment.
	65-4014	MAGIC WAND F1		105		32 x 32	7-10	Dark Orange	Semi-Vine	Attractive, uniform, round to flattened shape fruit. Large, firmly rooted handle. Well ribbed.

## LARGE

	65-4036	FREDDIE F1		100		40 x 40	11-12	Dark orange	Large	Superior handle and overall appearance. Colours rapidly even in harsh conditions. Average tolerance to powdery mildew.
	65-4071	CINDERELLA'S CARRIAGE F1		110		15 x 40	10-25	Orangy red	Large	The hybrid version of Rouge Vif d'Estampe. Shows higher yield, faster maturity as well powdery mildew tolerance. Same flattish shape and red colour than the original variety.

## LUFFA

★	65-4538	ZOU SING FI (LUFFA)		55	Elongated	Dark green	50-60	Long, ridged, Luffa type squash, grown for dry sponge production. Early maturity. Not sensitive to day length. Remove all the flowers from the vine below 120 cm if there is any.
---	---------	---------------------	--	----	-----------	------------	-------	---

## SCALLOP

	65-4532	SUNNY DELIGHT FI		42	Scallop	Bright yellow	6-8	Quite an appealing squash that is very distinctive in its class. Shows a better resistance to greenish colouring than similar varieties.
	65-4533	SUNBURST FI		47	Scallop	Bright yellow	6-8	Nice butter-yellow scallop type squash with green blossom end. Mild, white flesh fruit that remains tender and firm. Compact, open habit plant.

## SPAGHETTI

	65-4519	PINNACLE FI		68	Oval	Bright Yellow	18-20	Very productive. Semi-bush vine that allows high density seeding for superior yields. Easy to harvest fruit. Excellent hazelnut taste.
	65-4515	VEGETABLE SPAGHETTI IMPROVED		70	Oval elongated	Light yellow	20-25	Popular variety for its excellent yield. Running vines. White flesh that looks like spaghetti noodles. Keeps a long time.
	65-4520	STRIPETTI FI		85	Oval elongated	Beige with green stripes	30	The skin turns to orange when mature. The best tasting of the spaghetti squashes.

## ZUCCHINI GREEN

	65-4559	EASY PICK GREEN FI PATIO COLLECTION		45	Elongated	Dark green	18-20	Variety adapted to grow either in a container or in the garden. Very easy to harvest thanks to its open plant with no spines. Reaches a height and width of 90-130 cm.
	65-4565	DUNJA FI		48	Elongated	Green	20	Vigorous plant that stays productive for a long period. Good quality fruit, slightly larger at the end.
	65-4567	SPINELESS PERFECTION FI		48	Elongated	Medium green	18-20	Similar to Spineless Beauty but with a good tolerance to many diseases. Fruit is easy to harvest by hand without breaking the petioles. No spines on the leaves or on the petioles.
	65-4571	GREEN MACHINE FI		48	Elongated	Medium green	15-18	Widely adaptable, high-yielding zucchini, that has a very high quality. Medium dark green fruit with light flecking. Green Machine has a strong semi-open plant with an excellent disease package. Can yield 20% more than main varieties.

## ZUCCHINI YELLOW

	65-4545	EASY PICK YELLOW FI PATIO COLLECTION		45	Elongated	Bright yellow	18-20	Variety to grow either in a container or in the garden. Very easy to harvest thanks to its open plant with no spines. Reaches a height and width of 90-130 cm.
	65-4554	GOLDEN GLORY FI		45	Elongated	Bright yellow	18-20	An improved Golden Delight because of its tolerance to CMV. Straight, cylindrical fruits.

## ACORN

65-4642	AUTUMN DELIGHT PMT FI	UNT	85	Dark green	Ribbed and pointed	1.5	Semi-bush	Uniform. High yielders. Tolerant to powdery mildew.
65-4644	TAYBELLE PMT FI	UNT	85	Dark green	Ribbed and pointed	1.5	Semi-bush	High quality acorn squash that has high resistance to powdery mildew and matures from dark green to jet black. Semi-bush plant that allows for higher density planting and a high yield potential.
65-4657	TABLE QUEEN	UNT	90	Dark green	Ribbed and pointed	0.7	Bush	A little acorn type squash (10 by 11.5 cm), dark green with tasty orange flesh. Open pollination. Compact plants.

## BUTTERCUP

65-4604	ORANGE SUMMER FI	UNT	92	Redish orange	Round-flat	1.2-1.6	Bush	Improved Uchiki Kuri hybrid maturing earlier and with more uniformity. A good choice for organic growers because of its ability to germinate in cold soil, its high yield of round, pointed, orange fruits and its tolerance to downy mildew.
65-4607	BONBON FI	UNT	95	Dark green	Round-flat	1.8-2.3	Semi-bush	Dark green fruit with grey stripes, smooth skin and a prominent grey "button" at the base. Stands out for its creamy texture, its sweet taste and its uniformity. Yields 4-5 fruits per plant.
65-4606	SUNSHINE FI	UNT	100	Bright orange	Round-flat	2-2.2	Compact	Replaces Ambercup. Its appearance and its taste are superior. Very sweet bright orange flesh is nutty, creamy smooth and stringless when cooked. High yield of 3 to 4 fruits per plant. AAS 2004 winner.

## BUTTERNUT

65-4612	BUTTERFLY FI	UNT	80	Tan	Pear	1.4-1.8	Semi-bush	Very attractive squash that gets high marks for its uniform size and shape and its tolerance to powdery mildew. High yield on strong and healthy plants. Excellent choice for roadside stands, markets or boxing.
65-4616	AVALON FI	UNT	80	Tan	Pear	1.5-1.8	Vine	Outperforms most other hybrid butternut varieties. Excellent yield and outstanding uniformity. Long-term storage capacity.
65-4617	TIANA FI	UNT	85	Tan	Pear	1-1.2	Vine	Tiana produces medium-sized fruits, with dark flesh and a solid skin, allowing the fruits to be stored. Good yield potential and delicious taste.
65-4618	HAVANA FI	UNT	85	Tan	Pear	1.3-1.8	Semi-vine	Uniform and very productive variety that ripens fairly early for its size. The blocky fruits have a thick neck and a small seed cavity. Flesh is deep orange and tasty. Vigorous plant, well adapted to North America's growing conditions. Good post harvest shelf life.

## BUTTERNUT

	65-4621	HONEYNUT		85	Pear	0,25-0,5	Dark tan	Vine	A very tempting mini butternut squash and an outcome of a research program from Cornell University. Open pollinated plants with a strong tolerance to powdery mildew. It will produce an abundant yield of uniform mini fruits with very high sugar content once fully ripen and fully coloured. Stores very well.
	65-4609	METRO P.M.R. FI		90	Pear	1-1,5	Tan	Vigne	Ideal for market that wants a small size squash. Good yield potential, produces 4-5 fruits per plant. Stores very well. Strong against powdery mildew.

## HUBBARD

	65-4631	RED KURI		92	Water drop	2,3-3,6	Bright orange	Vine	Orange fruit with a smooth, dry, sweet and rich flesh. Produces 2-3 fruits per plant. Good keeping variety
	65-4630	BLUE BALLET		95	Water drop, ribbed	1,8-2,7	Blue grey	Vine	Same appearance that New England, but in a more marketable, smaller size. Sweet, light orange, fibreless flesh. Stores well. Produces about 2 fruits per plant.
	65-4632	UCHIKI KURI		95	Water drop	1,5	Bright Orange	Vine	Medium-sized, teardrop-shaped fruit. Thick dark orange skin over a firm, nutty, stringless flesh. Strong wall variety.
	65-4628	NEW ENGLAND BLUE		110	Water drop, ribbed	6-7	Grey-blue	Vine	Very large fruit.
	65-4680	RED WARTY THINGS		110	Round, warty	9	Orange-red	Vine	Attractive Hubbard variety with very hard rind and Hubbard type flesh. Bright orange, warty fruit, perfect for specialty, roadside and farmer's markets and fall displays.

## KABOCHA

	65-4635	SWEET MAMA FI		85	Flat/Round	1,2	Dark green	Bush	Cupless. Good storage ability. Vines with almost no side branches. Fruits set close to the root.
	65-4603	BLACK FOREST		95	Round-flat	1,3-1,8	Dark green	Vine	Variety bred to be smaller than a typical Kabocha. Dark green, flat-round fruit with medium-dry and sweet orange flesh. Yields 4-5 fruits per plant.

## SPECIALTY

	65-4660	BUSH DELICATA		80	Elongated	0,7-1	Cream-green stripes	Bush	AAS winner. Same shape and colour as the well-known Delicata, on a much more compact plant. Space them closer together for a higher yield. Good tolerance to powdery mildew. Storage capacity up to four months.
	65-4667	MARINA DI CHIOGGA		100	Round, flat, warty	4-8	Dark green	Vine	Firm, red and sweet flesh. In addition to being decorative, this squash is ideal to make raviolis and gnocchi.
	65-4674	BANANA PINK JUMBO		115	Elongated, pointed	7-20	Tan	Vine	Thick, bright orange, good quality flesh. Can be used to make jams.
	65-4669	TRIAMBLE		130	Triangular, folded	3-6	Bluish grey	Semi-bush	Good tasting, orange-yellow flesh. Very decorative. Good storage capacity.

# Gourds

TURK'S TURBAN

Code	Variety	Form.	Maturity (days) S	Description
------	---------	-------	-------------------	-------------

## SPECIALTY

65-4688	TURK'S TURBAN		105	Also called Giraumont, the turban-shaped fruits are mainly dark orange with speckles of green, red and creamy white. With a fair quality for baking and stuffing, this variety also looks stunning in a fall display. Stores well if not bruised while harvesting.
---------	---------------	--	-----	--

# Spinach

STANTON FI

SHELBY FI

ESCALADE FI

BANJO FI

MANDOLIN FI

	Code	Variety	Form.	Maturity (days) S	Harvest season	Leaf type	Tolerances	Description
	65-5052	STANTON FI		50	Spring - Summer - Fall	Semi-savoy	DM (1-11, 13,15), 2	Nice round and dark leaves with a good texture. Vigorous variety that holds well even during hot summer days.
	65-5054	SHELBY FI		50	Spring - Fall	Smooth	DM (1-13), 15, 16	Excellent transition variety for spring and fall, with high quality leaf shape and size and strong tolerance to downy mildew. Shelby has large, smooth, oval-shaped leaves that offer consistency and uniformity during seasons with variable temperatures. For baby leaf production.
	65-5055	ESCALADE FI		50	Spring - Fall	Semi-savoy	DM (1-14)	Dark green spinach, for spring and autumn production. High yield of oval and thick leaves. Holds well in the field. Very erect habit.
	65-5062	BANJO FI		50	Spring - Summer - Fall	Semi-savoy	DM (1-12, 14, 15)	Nice and adaptable variety that performs well throughout the season. A good alternative to Stanton.
	65-5063	MANDOLIN FI		52	Summer	Savoy	DM (1-12, 14, 15)	Very nice summer variety, thanks to its slower growing habit and thickness of the leaves. Very round leaves.

TOLERANCES: DM = Downy Mildew (races 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15) - 2 = White Rust

# Swiss Chard

BALI

SILVERADO

CELEBRATION

	Code	Variety	Form.	Maturity (days) S	Colour	Leaf type	Height (cm)	Description
	65-1012	SILVERADO		58	White	Dark green savoyed	35-40	Silverado is a green chard with heavy savoyed, glossy dark green leaves over a white stem. Compact habits. Slow bolting. Good field holding ability.
	65-1064	BALI		58	Deep red	Dark green savoyed	40-50	Superb Swiss chard with bright red petioles.
	65-1054	CELEBRATION		62	Multicoloured	Dark green savoyed	55	High percentage of red, yellow, orange and pink petioles, very little white. To be used for fresh specialty market, baby leaf or in trays. Foliage more savoyed than Bright Lights.

# Turnip

BELLA LUNA F1

PURPLE TOP WHITE GLOBE

ROYAL CROWN F1

	Code	Variety	Form.	Maturity (days) S	Root shape	Description
♥	65-6422	ROYAL CROWN F1	UNT	50	Round	Improved version of Purple Top White Globe. Very uniform, smoother, more vigorous. Great internal flesh quality. Fast growing. High tolerance to bolting.
	65-6420	PURPLE TOP WHITE GLOBE	🌿	57	Round	Garden turnips. Attractive purple colour. Uniform roots.

## JAPANESE

	65-6410	BELLA LUNA F1	UNT	40	Round	Shiny pure white Japanese turnip that can be harvested at a small size or will hold until a medium size (3.5 to 6 cm). Tolerance to bolting, heat and club root.

## GREEN

	65-8897	CHEF'S CHOICE GREEN F1		75	250-280	Large	Indeterminate	1, 7, 8, 9, 10, 11, 12	Unique green coloured fruits with subtle yellow stripes. Wonderful citrus-like flavour with a perfect tomato texture. Plant is disease free throughout the season.
--	---------	------------------------	--	----	---------	-------	---------------	------------------------	--

## ORANGE

	65-8899	CHEF'S CHOICE ORANGE F1		70	330	Large	Indeterminate	–	Bright, almost neon, internal colour and superior flesh taste and texture for an early maturing orange tomato. Averaged size fruits are 330 g but can weigh up to 450 g. Leaves cover fruit well in protection to sunburn. AAS 2015 winner.
--	---------	-------------------------	--	----	-----	-------	---------------	---	---

## PINK

	65-8880	PINK GIRL F1		65	225	Large	Indeterminate	8, 11	Large calibre fruit, smooth and uniform. Good tolerance to cracking. High quality.
	65-8882	PINK CUPCAKE F1		65	200-250	Medium	Determinate	–	Early pink tomato that produces large, very firm and great tasting fruits. A preferred choice to Pink Girl, because of its firmness.
	65-9099	MARRIAGE BIG BRANDY F1		78	350-425	Large	Indeterminate	–	Pink Beefsteak is a cross of Big Dwarf and Brandywine. Distinctive heirloom look and flavour with better garden performance. Provides earlier and higher yields with less fruit blemishes.
	65-8896	CHEF'S CHOICE PINK F1		85	335-400	Large	Indeterminate	2, 3, 7, 8, 9, 10, 12	Large pink beefsteak tomatoes that complements the Chef's Choice selection. Great yields of 335-400 grams fruits ideal for canning. Perfect acid to sugar balance. The potato leaf-like plant has good disease resistance.
	65-8895	OXHEART		100	300-350	Very Large	Indeterminate	–	Extra large size fruit. Beefsteak type. Popular variety.

## PURPLE

	65-9077	INDIGO APPLE		72	55-110	Large	Indeterminate	–	A larger Indigo tomato with exceptionally high anthocyanin content. Sweet, rich flavoured fruits, resist cracking and sun scald, lasting long into cool autumn weather when others have quit. Firm, meaty fruits that turn red when ripe.
	65-9075	MARRIAGE CHEROKEE CARBON F1		75	280-350	Large	Indeterminate	–	This tomato is a robust Beefsteak type, purple in colour, with a rich flavour that comes from a cross of Cherokee Purple x Carbon. This indeterminate plant is best grown in-ground.

## YELLOW

	65-8898	CHEF'S CHOICE YELLOW F1		70	300	Large	Indeterminate	7, 8, 9, 10, 11	Savoury addition to the Chef's Choice tomato selection. Yellow Beefsteak type on a very productive indeterminate plant. At least 30 fruits of large meaty delicacy that have a sweet, citrus-like flavour with just the right amount of acid.

## CHERRY RED

	65-9234	TINY TIM		45	Moins de 25	Small	Determinate	–	Mini cherry tomatoes on mini tomato plants! Sweet and juicy red fruits on plants that rarely grow taller than 30 cm (12"). Does very well in hanging baskets or containers. Flavourful fruits on this hybrid introduced in 1945.
	65-9236	TUMBLER FI		45	25-30	Medium	Determinate	–	A superior variety for hanging baskets and containers. Prolific plant with graceful, cascading habits. Sweet and juicy early fruits.
	65-9231	MASCOTTE FI		47	25-30	Small	Determinate	–	Nice bright red cherry, slightly larger than Tumbler, on a compact plant. Great sweet taste. Good yield.
	65-9241	BASKET RED FI		55	Moins de 25	Small	Determinate	–	For the hanging basket and patio container market. Continuous production all season long.
	65-9245	CANDYLAND FI		55	7-8	Large	Indeterminate	–	Cherry tomato that can compete with the BONBON. A very tasty tomato with a dark red colour and a diameter of 1.25 cm. The fruits mainly grow outside the plant, making it easier to pick.
	65-9246	SWEET 'N' NEAT SCARLET RED IMPROVED FI		55	25	Small	Determinate	–	Ultra compact plants of about 30 cm high for growing in containers. Good yield of sweet-tasting tomatoes. Perfect for balconies.
	65-9253	SUGAR GLOSS FI		55	20-25	Medium	Indeterminate	–	New indeterminate variety with high-yielding trusses with very visually attractive glossy red fruit. The bright red cherry fruits have a good flavour with a 12% Brix rating. High yielding, up to 60 fruits on long and elegant trusses.
	65-9227	MONCHERRY FI		58	15	Medium	Indeterminate	5, 8, 11	A real candy treat! Extra sweet fruit, juicy and tender. Clusters can carry up to 50 fruits each. Very vigorous plants.
	65-9250	PEPE FI		58	15-20	Compact	Determinate	8, 12	A great quality cherry tomato with a high sugar content giving it an amazing sweet taste. Can be grown in the garden or in containers.
	65-9229	SUNCHERRY FI		60	Moins de 25	Large	Indeterminate	8, 9, 12	Huge crops of shiny, bite-sized red fruits that ripen early and that continue to be produced throughout the summer. Fruits are tolerant to cracking.
	65-9237	JASPER FI		60	10	Large	Indeterminate	8, 9, 15, 16	A 2013 AAS winner. Finally, here is a tomato that can be compared to the "Bonbon" variety. Small tomato with an extraordinary taste. Stands out for its impressive yield and healthy plants.
	65-9249	RAMBLING RED STRIPE FI PATIO COLLECTION		60	25	Small	Determinate	–	Determinate trailing plants. Ideal for hanging baskets and containers. Small red tomatoes with dark green stripes.
	65-9262	SAKURA FI		60	15-20	Large	Indeterminate	3, 7, 8, 12, 17	Cherry tomato well adapted to be harvested by clusters of 20 fruits or more or separately. Tolerant to cracking. Can be grown in open fields or high tunnels. Excellent taste.
	65-9264	SWEET 100 FI		63	Moins de 25	Large	Indeterminate	–	Popular. Thick walls. Very sweet. Productive.

<b>PEAR RED</b>									
	65-9259	RED PEAR		65	Moins de 25	Small	Determinate	–	Popular variety. For fresh markets or retail.
<b>PLUM YELLOW</b>									
	65-9255	YELLOW PLUM		65	Moins de 25	Small	Determinate	–	Fresh or retail market! Very sweet.
<b>PLUM RED-PURPLE</b>									
	65-9254	INDIGO RUBY FI		75	25-50	Medium	Determinate	–	These red plum tomatoes have a sweet flavour and pleasant aroma. Their intense indigo colour on top of each fruit indicates healthy anthocyanins. The plant produces clusters of 4-6 plum-shape fruits.
<b>GRAPE YELLOW</b>									
	65-9300	MIKI CHAN FI		55	15-20	Large	Indeterminate	–	Tall plant. Nice elongated, grape-shaped fruit. Very sweet taste.
<b>GRAPE ORANGE</b>									
	65-9273	MATTHEW FI		60	35	Large	Indeterminate	6, 7, 8, 11, 12, 17	Large size grape tomato. Vigorous plants adapted for field production or under high tunnels.
<b>GRAPE PINK</b>									
	65-9233	SUGARY FI		60	12-16	Large	Indeterminate	–	Pink oblong shaped fruit with a pointed end. High sugar content.
<b>GRAPE RED</b>									
	65-9239	JULIET FI		60	25-35	Medium	Indeterminate	–	Bright red glossy skin. Unique sweet flavour. High tolerance to cracking. The shape is between a big grape and a plum.
	65-9240	MONTESINO FI		64	10-14	Large	Indeterminate	7, 12	"Santa" type grape tomato with a sweet, flavourful taste. Vigorous plant that sets high yields of fruits.

TOLERANCES: 1 = Anthracnose - 2 = Alternaria Stem Canker - 3 = Nematode - 4 = Grey Leaf Spot - 5 = Tobacco Mosaic Virus - 6 = Fusarium Crown and Root - 7 = Fusarium Wilt (race 0) - 8 = Fusarium Wilt (race 1) - 9 = Fusarium Wilt (race 2) - 10 = Fusarium Wilt (race 3) - 11 = Verticillium Wilt (race 1) - 12 = Tomato Mosaic Virus - 13 = Tomato Spotted Wilt - 14 = Bacterial Speck - 15 = Early Blight - 16 = Late Blight - 17 = Cladosporium Leaf Mold (5 races) - 18 = Tomato Yellow Leaf Curl Virus - 19 = Powdery Mildew

LEMON BALM

MANDARINA

ELEONORA (GENOVESE)

EMERALD TOWER (GENOVESE)

HELIOS, LEMON FLAVOUR

THAI SITA

ROSIE

	Code	Variety	Form.	Description
<b>AMARANTH - AMARANTHUS RETROFLEXUS</b>				
	67-0470	SSC 3099		Variety with a darker colour development than standard varieties. Annual.
<b>BALM - MELISSA OFFICINALIS</b>				
	67-1310	LEMON BALM		Lobe-shaped, serrated leaves with a lemony taste. Height and width of 40 to 50 cm. Perennial.
	67-1311	MANDARINA		Very aromatic perennial with a high and spreading growth habit. Oval green leaves with a gentle mandarin fragrance. Semi-hardy perennial.
<b>BASIL - OCIMUM BASILICUM</b>				
	67-1100	SIMPLYHERBS TRY BASIL		Here is a mixture of three basil varieties (Genovese, red and serrated selections) all in one pellet! Fast and easy to create diversified basil plants. Each pellet contains 8 to 14 seeds. Height: 60 to 75 cm. Spread: 30 to 40 cm. Maturity: 28 days. Annual
	67-1105	GREEK		Same characteristics as the sweet basil, but more scented. Annual.
	67-1106	ARISTOTLE (GREEK)		Small leaves, dome-shaped plant habit. Spicy taste and scented leaves. Annual.
	67-1110	SWEET FINE GREEN		Selection of small smooth leaves. Compact plants. Annual.
	67-1112	EMERALD TOWER (GENOVESE)		Well-branched variety with short internodes that makes a towering plant with a huge harvest. Grows well in-ground, in containers and hydroponics. Flowers up to 10 to 12 weeks later than the standard basil. Traditional Genovese flavour. Dark green and glossy foliage. Height: 61-91 cm. Spread: 20-30 cm. Annual.
	67-1113	EVERLEAF (GENOVESE)		Our latest Genovese type to bolt. Large leaf variety with shiny, dark green leaves. Very robust against Botrytis and Fusarium with a long shelf life after cutting. Very good handling and transport capabilities. Suitable for fresh markets and processing. Annual.
	67-1117	EMILY (GENOVESE)		More compact basil type adapted for production in containers in spring and winter thanks to its faster growth. Seeds are tested to be free of downy mildew and treated with Apron in addition. Annual
	67-1119	LARGE GREEN GENOVESE		Superb! Large, aromatic and spoon-shaped bright green leaves. Annual.
	67-1120	LARGE GREEN GENOVA		Selection with large smooth leaves. Our most popular selection for bedding plants. Annual.
	67-1124	ELEONORA (GENOVESE)		The first basil with an intermediate tolerance to downy mildew. Upright growth with medium green, big, lightly serrated leaves. Suitable for open fields and production in pots. Annual.
	67-1125	HELIOS, LEMON FLAVOUR		Rapid growth of small leaves. Great lemony basil taste. Annual.
	67-1130	BASIL LETTUCE LEAF		Crinkled leaves offering a sweet and gentle flavour. Annual.
	67-1132	THAI SITA		Exotic, aromatic and licorice-flavoured basil. Annual.
	67-1133	BASIL THAI SIAM QUEEN		Medium green colour foliage with purple flowers. Annual.
	67-1134	JOLINA		A new variety that is a cross between a Genovese and a Thai basil. Looks like a Genovese (with smaller leaves) but has the flavour and increased resistance to disease of the Thai. Compact plants with short internodes, for production in containers or open field. Annual
	67-1162	ROSIE		Improved red basil with an intense and constant dark red colour. Compact plants with robust stems. Annual.
	67-1163	CRIMSON KING		Red Genovese type basil with an excellent flavour and no green off-types. Improved colour, leaf shape and vigour. Annual.

Code	Variety	Form.	Description	
<b>BORAGE - BORAGO OFFICINALIS</b>				
67-1510	BORAGE		This plant can reach 30 to 80 cm in height on erect stems. Balm leaves are small, lobe-shaped, serrated and have a lemony perfume. Annual.	
<b>BURNET - POTERIUM SANGUISORBA</b>				
67-7211	BURNET		Offers both a nutty and light cucumber taste. Height: 30 cm. Perennial.	
<b>CELERY (CUTTING) - APIUM GRAVEOLENS</b>				
67-1911	CUTTING CELERY		Finely cut glossy leaves. To be used as a garnish like parsley, with a delicious celery flavour. For salads, soups and stews. Can also be dried. Annual.	
<b>CERVIL - ANTHRISCUS CEREFOLIUM</b>				
67-2510	CHERVIL CURLED		Easy to grow. Superior yield in humid soil and shade. Height: 40 to 50 cm, width: 20 cm. Annual.	
<b>CHAMOMILE - MATRICARIA RECUTICA</b>				
67-1710	CHAMOMILE COMMON		Produces many flowers. Equivalent to the German Chamomile. Height: 40 to 50 cm, width: 15 to 20 cm. Annual.	
<b>CHIVES - ALLIUM SCHOENOSPRASUM</b>				
	67-3110	CHIVES IMPROVED THICK		Vigorous selection, slow to bolt. Hollow, round, greyish-green leaves. Height: 15 to 30 cm, width: 15 to 20 cm. Perennial.
	67-3116	NELLY	 	Nice, dark blue-green colour on a fine to medium thick stem. Vigorous and upright growth. Very tolerant to diseases and thrips. Perennial.
	67-3120	GARLIC CHIVES		Flat leaves, greyish-green colour. Very distinct garlic taste. Disease resistant. Height: 30 to 40 cm, width: 30 cm. Perennial.
<b>CORIANDER - CORIANDRUM SATIVUM</b>				
	67-3551	SANTO		Upright plants with broad leaves. Very tolerant to bolting. Annual
	67-3552	SANTO MONOGERM		Identical to Santo, but only one germ per seed. Annual.
	67-3556	MARINO	 	More compact variety, well adapted for production in containers. Annual.
<b>CUMIN - CUMINUM CYNIMUM</b>				
	67-1912	CUMIN		Requires warm cultivation conditions. Height: 45 cm, width: 30 cm. Annual.
<b>DILL - ANETHUM GRAVEOLENS</b>				
	67-0510	DUKAT		Uniform plants with bigger umbels than standard selections. Height: 60 to 75 cm, width: 30 cm. Annual
	67-0511	FERNLEAF		Bushy plant, very close internodes and multiple secondary branches. Height: 40 cm, width: 30 cm. Annual.
	67-0513	HERA		Very late bolting dill, upright growth habit with much leaf mass. Wider harvest window than Bouquet. Exceptional aroma and flavor. Suitable for the fresh market and industry. Annual.
	67-0517	GREEN SLEEVES		Green Sleeves is resistant to bolting and is adapted for open field or greenhouse production. Excellent growth in very hot conditions. Annual

PRELUDIO FI

FLORENCE

FENUGREEK

LEMONGRASS

PEPPERMINT

OREGANO

GREEN PEARL

	Code	Variety	Form.	Description
<b>FENNEL - FOENICULUM VULGARE</b>				
	67-431I	PRELUDIO FI		An early fennel that can be grown in spring and summer, without having to worry about bolting. It has a superior field holding capacity and the bulb forms two weeks earlier than other hybrids. Annual
	67-4320	FLORENCE		Produces medium sized bulbs. Taller and bushier foliage. Tolerant to bolting. Annual.
<b>FENUGREEK-TRIGONELLA FOENUM-GRÆCUM</b>				
	67-4390	FENUGREEK		The leaves are similar to those of a clover, and the plant can reach 60 cm in height. Used for its culinary qualities as well as for its benefits on health. Annual.
<b>LAVENDER - LAVANDULA</b>				
	67-491I	MUNSTEAD		Earlier and more compact version of the common Lavandula angustifolia. Height of 30 cm. Annual.
<b>LEMONGRASS - CYMBOPOGON SP.</b>				
	67-3202	LEMONGRASS		Tropical herb favoured in Thai cuisine. Not only is it widely used as a culinary herb but also as a medicinal herb in India. It has long, slender, pale green stems that are thick and fleshy with a subtle citrus flavour. Lemongrass can be dried and ground into powder, or used fresh in soups, curries and stir-fries. This perennial must be grown in warm weather. Height: 60-100 cm, width: 30-60 cm. Annual.
<b>LOVAGE - LEVISTICUM OFFICINALE</b>				
	67-5310	LOVAGE		Celery tasting aromatic foliage. All the parts of the plant (stem, root and seed) can be used for cooking. Perennial.
<b>MARJORAM (SWEET) - ORIGANUM MAJORANA</b>				
	67-5510	SWEET MARJORAM		Similar to oregano but with larger leaves. Also used as a repellent for insects. Annual.
<b>MINT - MENTHA SP.</b>				
	67-6320	SPEARMINT		The most popular herb because of its mild, fruity taste. Over running plants. Height: 30 to 60 cm. Perennial.
	67-6321	PEPPERMINT		Can reach a height of 50 to 60 cm. Oblong, finely indented leaves with a high content of menthol. Perennial.
<b>OREGANO - ORIGANUM VULGARE</b>				
	67-6510	OREGANO		Requires a fertile and humid soil in a sunny area. Perennial.
	67-6520	GREEK OREGANO		Oval, thick leaves with a very spicy flavour. Perennial.
	67-6521	CLEOPATRA		Pretty silver-grey foliage appreciated for its ornamental beauty and flavour value. Cleopatra distinguishes itself from Greek and Italian oregano by a mildly spicy flavour, tinged with a fresh mint coolness. Compact, trailing plant that produces a high yield of leaves that makes it a first-rate container plant. AAS 2015 winner. Height: 25 cm, width: 25 cm. Perennial.
<b>PARSLEY - PETROSELINUM SP.</b>				
	67-7126	FOREST GREEN		Dark green extra curled type. Erect and vigorous plants. Holds well in hot weather. Annual
	67-7128	GREEN PEARL		Deep green, dense foliage on sturdy stems. Tolerant to bolting. Annual.
	67-7131	ASTRA		Deep green, triple curled parsley developed to be grown and harvested all year round. Repeated crops after 8 to 10 weeks. Can be used fresh, dried or frozen. Astra is darker than Darki. Annual.
	67-7155	DARK GREEN IMPROVED		Smooth dark green leaves. Productive. Annual

	Code	Variety	Form.	Description
<b>ROCKET - ERUCA SATIVA</b>				
	67-8104	WASABI		Wasabi will tickle your nose in the same way the mustard of the same name does. Its oval shape and dented leaves will add punch to your recipes. Height: 15 cm. Width: 20 cm. Annual.
	67-8110	ROCKET		Belongs to the mustard family. Strong aromas with a subtle nutty flavour. Annual.
<b>ROSEMARY - ROSMARINUS OFFICINALIS</b>				
	67-7910	ROSEMARY		Greyish-green woody stems. Leaves are dark green on top and white underneath. Height and width: 90 to 150 cm. Perennial.
	67-7911	SIMPLYHERBS ROSEMARY		Multipellet including 10 to 15 seeds, ideal to easily create nice pots. Minimum germination of at least 80%. Perennial.
<b>RUE - RUTA GRAVEOLENS</b>				
	67-8510	RUE		Small greyish-green leaves that grow in clusters. These pungent bitter tasting leaves are used in salads, and oriental dishes. Perennial.
<b>SAGE - SALVIA OFFICINALIS</b>				
	67-9110	SAGE BROAD LEAF		Soft, round, greyish leaves with oblong extremities. Height and width: 30 to 60 cm. Perennial.
	67-9112	CERES		Contains a high level of essential oils. Height: 70-80 cm. Perennial.
<b>SAVORY - SATUREJA HORTENSIS</b>				
	67-8910	SUMMER SAVORY		Narrow dark green leaves. Height: 30 cm, width: 15 cm. Annual.
	67-8920	WINTER SAVORY		More pronounced flavour than the Summer Savory. Green-grey shiny leaves. Height: 35 to 40 cm, width: 30 to 40 cm. Perennial.
<b>SORREL - RUMEX ACETOSA</b>				
	67-6710	FRENCH SORREL		Large, green leaves, tangy, light lemony taste. Height: 30 to 45 cm, width: 20 to 25 cm. Perennial.
<b>STEVIA REBAUNDIANA</b>				
	67-9210	STEVIA		Dry leaves are used as a natural sweetener. Easy to grow. Perennial.
<b>TAGÈTE - TAGETES FILIFOLIA</b>				
	67-9301	DROPSHOT		Annual plant with a sweet taste with a strong licorice or anise flavour. Globular shape with a height of 25-30 cm. Branches freely and produces a dense plant of fine, thin and tender leaves. Annual.
<b>TARRAGON (RUSSIAN) - ARTEMESIA DRACUNCULUS</b>				
	67-3910	RUSSIAN TARRAGON		Less pronounced flavour than French tarragon. Height: 60 to 90 cm, width: 30 to 45 cm. Perennial.
<b>THYME - THYMUS FRAGRANTISSIMUS</b>				
	67-9515	ORANGELO		French Thyme with a traditional thyme fragrance and overtones of citrusy orange scent. Useful in the kitchen and very interesting as a fragrant ground cover with small white flower. Forms a low mat and spreads to cover the soil. A hardy evergreen perennial that survives to USDA zone 5. Can be used in containers of all sizes, as ground cover, with perennials or makes an excellent spiller component for mixed containers. Perennial.
<b>THYME - THYMUS VULGARIS</b>				
	67-9510	WINTER THYME		Very small, dark green, elongated, oval leaves. Tolerates dryness. Height: 30 cm, width: 50 to 60 cm. Perennial.
<b>WILD ARAGULA - DIPLLOTAXIS TENUIFOLIA</b>				
	67-8123	BELLEZIA		Beautiful variety with an impressive tolerance to downy mildew. Dark green and highly serrated leaves. Excellent bolting tolerance, and excellent shelf life. Annual.

AVAYA FI

EXCELSIOR FI

Code	Variety	Form.	Fruit size (cm)	Colour	Length (cm)	Tolerances	Description
------	---------	-------	-----------------	--------	-------------	------------	-------------

## EGGPLANT

66-0614	TAURUS FI		10 x 8	Purple	10 x 8	–	Oval eggplant uniform in size. Good storage capacity.
---------	-----------	--	--------	--------	--------	---	---

## CUCUMBER

66-4211	PICOLINO FI		12	–	12	2, 4, 5, 6, 7	The shortest of all the mini cucumbers we offer. Produces high quality dark green, shiny fruits. 3-4 fruits per node. The compact, vigorous plant is early to produce.
66-4235	JAWELL FI		14-16	–	14-16	2, 4, 7	Mini European cucumber. Produces one to two fruits per nod. Generative variety with nice vigorous laterals. Variety flexible enough for most growing systems.
66-4236	KATRINA FI		16	–	16	2, 4, 5, 7	Robust and productive mini cucumber with an open plant habit. Produces three to four quality fruits per node. Fruits are glossy, nicely ribbed and very uniform.
66-4237	ELDORA FI		36-42	–	36-42	5, 6, 7	Variety adapted for spring and summer production because of its improved tolerance to Powdery Mildew over all other varieties.
66-4239	KALUNGA FI		31-34	–	31-34	5, 6, 7	Early variety of vigorous growth with a good productive plant. Dark green fruit, slightly ribbed.
66-4241	CAMARO FI		34-40	–	34-40	7	Vigorous plants. Long and straight, dark green fruit, slightly fluted. Intermediate tolerance to powdery mildew. Tends to be generative but performs very well in a variety of conditions.
66-4244	AVAYA FI		30-35	–	30-35	2, 3, 4, 5, 7.	Produces a high percentage of medium fruit with a nice dark green colour, good shape, strong ribbing with a lower tendency to become too necky like other varieties. Excellent fruit quality. Competitive levels of production with improved fruit quality over the current market leaders. Its high level of powdery mildew resistance makes it most suitable for crops grown under high light levels.

## PICKLING CUCUMBER

66-4290	EXCELSIOR FI		10-12	–	10-12	2, 4, 5, 6, 7	Pickling cucumber for both open field and unheated greenhouse, for spring and autumn production. Open and vigorous plant habits. Fruits are medium to dark green and grow 10-12 cm.
---------	--------------	--	-------	---	-------	---------------	---

**TOLERANCES:** 1 = Watermelon Mosaic Virus - 2 = Cucumber Mosaic Virus - 3 = Cucumber Green Mottle Mosaic Virus - 4 = Cucumber Vein Yellowing Virus - 5 = Scab - 6 = Corynespora Blight (Target Leaf Spot) - 7 = Powdery Mildew - 8 = Cladosporium - 9 = Papaya Ring Spot - 10 = Zucchini Yellow Mosaic Virus

DEXTER FI

Code	Variety	Form.	Weight (g)	Colour	Length (cm)	Tolerances	Description
------	---------	-------	------------	--------	-------------	------------	-------------

## STRAWBERRY

66-3801	DELIZZIMO FI		—	Orange	—	—	At last, a hybrid strawberry plant propagated from seeds! Delizzimo combines the vigour of hybrid plants with the best guaranty that seeds bring to start the season with minimal risk of disease transmission. Germination in 4-7 days. Potting in finawl containers 4-5 weeks later. Harvest 3-5 months after seeding. Neutral day variety with exceptional taste! For winter production.
---------	--------------	--	---	--------	---	---	---

## POLE BEAN

66-4301	EMERITE		—	—	17-22	—	Tall, vigorous and productive vine. High yields of fancy pods, slim and rounded. Sweet and delicate flavour.
---------	---------	--	---	---	-------	---	--

## PEPPER

66-7278	DR0719PB FI		240	Orange	—	1, 5	Orange pepper with a very large fruit size throughout the entire season. Its extended sheff life also provides added value to both the grower and the consumer.
66-7282	BERKELEY FI		225-245	Yellow	—	1	Yellow blocky pepper with excellent fruit quality, a consistent blocky shape and uniform size. In trials, Berkeley provided fruits all season long with a high percentage of marketable fruits.
66-7288	DEXTER FI		210-230	Red	—	1	Red, blocky pepper with good yield potential. Its early production allows for an expedited picking process that gives growers the ability to maximize profits. Dexter has an excellent percentage of marketable yield.

TOLERANCES: 1 = Tobamo Virus (ToMV, TMV, PMMoV) - 2 = Pepper Mottle Virus (PepMoV) - 3 = Potato Y Virus (PVY) - 4 = Tobacco Etch Virus (TEV) - 5 = Tomato Spotted Wilt Virus (TSWV) - 6 = Bacterial Spot (Xanthomonas campestris)

## PINK TOMATO

	66-8878	MAKARI F1		Globe	Pink	180-240	1, 4, 5, 6, 9	Pink Beefsteak type, less vegetative than Osaka. Quality, uniformity and firmness make it a one-of-a-kind pink tomato.
--	---------	-----------	--	-------	------	---------	---------------	--

## RED TOMATO

	66-9001	AUREA F1		High & ribbed	Red	220-240	1, 9	Oxheart type with a sweet taste and very low acidity. Generative plants.
	66-9020	REBELSKI F1		Globe	Red	200	1, 4, 5, 6, 7, 9	Beefsteak type that competes against Macarena or Bigdena. Slightly ribbed fruit with a pleasant taste and a good shelf life. Labour-friendly plants with an open leaf structure.
	66-9069	TOUCHÉ F1		Flat globe	Red	270	1, 4, 5, 6, 9	Higher yield potential and vigour than the Torero variety, with less fruit fall. Average fruit size is 270 g that will increase with light and produce a firm and good quality fruit.
	66-9070	FORONTI F1		Flat globe	Red	250-300	1, 4, 5, 6, 7, 9	An improvement to the Torero variety with a better fruit grip on the stem. Higher yield than Bigdena. Performs well under intense light and high temperature.
	66-9084	STARBUCK F1		Flat globe	Red	250-300	2, 4, 5	Tomato offering the best yield ratio of high quality fruits and great taste.
	66-9086	MARGUERITE F1		Flat globe	Red	180-200	1, 4, 5, 6, 9	One of the best-tasting greenhouse varieties. Similar to Trust with a higher yield potential.
	66-9087	TORERO F1		Flat globe	Red	240-260	1, 4, 5, 6, 9	Large firm fruits. Tolerant to blossom end rot and cracking. Favourably competes with the Macarena variety.
	66-9088	TRUST F1		Flat globe	Red	180-200	4, 5, 6, 9, 11	Productive Beefsteak type. Easy to grow in most growing conditions. Excellent taste.

## ORANGE TOMATO

	66-9004	BEORANGE F1		Round	Orange	200-220	1, 4, 5, 6, 9	Orange beef tomato hybrids with good taste and flavour.
--	---------	-------------	--	-------	--------	---------	---------------	---

## COKTAIL TOMATO

	66-9046	YELLOW SUN F1		Globe	Yellow	33	1, 4, 5, 6, 9	Replacement of Goldino. Fruit slightly smaller and a higher yield.
	66-9051	ORANGINO F1		Globe	Orange	35	1, 4, 5, 6, 9, 10	An orange colour fruit solidly attached to the cluster. Good overall shelf life. Loose and truss harvest. Semi open plant habit with medium vigour.

**TOLERANCES:** 1 = Tomato Mosaic Virus (ToMV) - 2 = Tomato Spotted Wilt Virus (TSWV) - 3 = Tomato Yellow Leaf Curl Virus (TYLCV) - 4 = Cladosporium Leaf Mold - 5 = Fusarium Wilt (2 races) - 6 = Fusarium Crown and Root Rot - 7 = Powdery Mildew - 8 = Corky Root - 9 = Verticillium Wilt - 10 = Root Knot - 11 = Silvering - 12 = Alternaria Stem Canker - 13 = Bacterial Speck (Pseudomonas syringae Race 1) - 14 = Torrado Tomato Virus (ToTV)

BOLZANO FI

Code	Variety	Form.	Fruit shape	Colour	Weight (g)	Tolerances	Description
<b>COCKTAIL TOMATO (CONTINUED)</b>							
66-9054	FLORINO FI		Cocktail red	Red	35-40	1, 5, 9, 10	Great tasting cocktail tomato hybrids with superb truss appearance. When pruned to eight fruits, Florino gives a very nice presentation and uniform colouring. Suitable for both truss or loose harvest. For year-round production. Replaces the Kierano variety.
66-9055	BELLINI FI		Cocktail orange	Orange	45-50	1, 4, 5, 9, 10	Flavourful cocktail tomato low in acidity. Produces clusters of 8-12 fruits. For greenhouses and outdoor production.
66-9058	ANNAMAY FI		Globe	Red	35-40	1, 4, 5, 7, 9	A new vigorous cocktail on the vine tomato. A bright and flavourful fruit with intermediate disease resistance, compact truss configuration, nice glossiness, good uniformity and insusceptibility to split fruits. Can advantageously be cultivated under artificial lighting for an excellent winter production.

## TOV

	66-9074	BOUNTICE (DRI008) FI		Flat globe	Red	150-165	1, 2, 4, 5, 6, 9, 14	An outstanding weight for a TOV, an outstanding deep internal red colour and a very good disease packages are the major highlight of this new delicious tomato. Strong plant vigour and open plant type. Fruit setting is about a week after Merlice.
	66-9076	PADUA FI		Globe	Red	160	n/d	De Ruiters' latest innovation in tomato-on-the-vine varieties. Features extra vigour for long crops, excellent truss presentation and tolerance to powdery mildew. Also fuller canopy and higher vigour than Komeett. Better summer fruit quality and less blocky shape.
	66-9077	MERLICE FI		High and round	Red	150-165	1, 4, 5, 6, 7, 9	Variety that stands out by its cluster presentation and how easy it lies flat in a box. High vigour and excellent disease package gives it a high yield potential. Less sensitive to Botrytis than other varieties.
	66-9078	MAXEZA FI		High and round	Red	160	1, 4, 5, 6, 7, 11	Tomato on the vine that combines high yield, great fruit colour and firmness. The perfect variety of early production (3 days earlier) with a comparable yield. Open, vigorous plant that produces well in the summer. Most suitable for growing in facilities with a crop wire height of 4.25 m. Night temperatures below 15 °C are not recommended.
	66-9085	KOMEETT FI		Globe	Red	155	1, 4, 5, 6, 9	Our earliest cluster tomato variety. High yielding and very uniform. The fruits are tight on the cluster and ripen at the same time.
	66-9094	LORENZO FI		Globe	Yellow	110-115	1, 3, 4, 5, 9	Bright yellow cluster tomato. 5 to 6 fresh sweet tasting fruits per cluster. Vigorous plants with short internodes. Good tightness to the cluster.
	66-9098	BOLZANO FI		Round	Orange	100-130	1, 4, 5, 6, 9	Orange clusters to replace the variety Orangaro. Fruits are strongly attached to the cluster.

## ITALIAN TOMATO

66-9150	DRK936 FI		Pink	70-90	1, 4, 5, 6, 9, 10	Pink Italian tomato. Strong crops and good production. Delicious sweet taste.
66-9152	PRUNUS FI		Red	100-120	1, 5, 6, 7, 9	Italian tomato to be harvested individually or by clusters. Firm, dark-coloured fruit, with excellent taste.

## CHERRY TOMATO

66-9040	CONCHITA FI		Red	25-30	1, 4, 5, 6, 9	Cluster cherry tomato. Firm fruit. Very good taste and Brix levels combined to a nice shiny look. Uniform fishbone shaped trusses with 12-16 fruits. Long shelf life.
66-9041	FAVORITA FI		Red	15	1, 4, 5, 10	Perfect combination of good taste, high yield and shelf life. Vigorous plants. Open habits. Uniform red fruits on solid clusters.
66-9044	DRC 564 FI		Red	15-20	1, 2, 5, 9, 10	A hybrid cherry tomato for loose or truss harvest with high yield potential. Excellent taste and beautiful appearance.
66-9049	DRK 948 FI		Yellow	10-15	1, 3, 4, 5, 9	A yellow cherry tomato with an excellent taste and good plant habit. Suitable for both truss or loose harvest.
66-9050	ORANJESTAR FI		Orange	12-17	1, 4, 5, 6, 10	Excellent quality cherry tomato with a unique dark green stalk that can be harvested with the fruit or not. Vigorous and well-balanced plants that perform best in a high-tech production environment.

## PLUM TOMATO

66-9095	FLAVORINO FI		Red	35	1, 5, 9, 10, 13	A small and tasty plum shaped tomato on uniform trusses of 12-14 fruits. Can be harvested individually in clusters. In need of artificial light during winter.

## GRAPE TOMATO

66-9043	BS 3756 FI		Orange	8-12	1, 4, 5, 12, 13	Small orange grape tomato, with an extremely sweet taste, but more sensitive to cracking. Generative plants.
66-9052	ROZESTAR FI		Pink	15-18	1, 4, 5, 6, 10	Pink grape tomato that performs very well in high tech and mid-tech production environments. It has firm fruits and is uniform in size and shape. Well-balanced taste. Vigorous plants.
66-9053	SANTORANGE FI		Orange	10-15	1, 5, 9	Vigorous open plants with short leaves for dense spacing. Plants may be grown with more than two leaders to get more out of each plant and improve plant balance. Excellent taste.
66-9079	DR0603TC FI		Red	9-11	1, 4, 5, 9, 10	Grape tomato with an exceptional taste. Very sweet fruits, well-balanced acidity. Impressive yield on an extensive period of time.
66-9083	GARINCHA FI		Red	12	1, 2, 5, 10	Beautiful, small, oval-shaped mini plum, tasty tomato for the heated glasshouse markets. Very uniform and extremely sweet fruits with an attractive shiny red colour, at maturity. Extraordinary production capacity. Trusses set well and regularly up the plant, which stays in balance through a long crop. Suitable for loose or truss harvest. A top variety.

## ROOTSTOCK

66-8803	MAXIFORT FI		—	—	1, 5, 6, 8, 9, 10	Our most vigorous rootstock available. Very high yield potential. Great for soil and rock wool. Excellent on any crop but especially on weak or generative crops lacking vigour, varieties susceptible to blossom end rot, or for very long crops. Help maintain crop vigour even under full fruit load and high temperatures.
66-8804	MULTIFORT FI		—	—	1, 5, 6, 8, 9, 10	More generative rootstock than Maxifort, which results in earliness and better yields.
66-8802	DR 014ITX FI		—	—	1, 5, 6, 8, 9, 10	Vigorous rootstock. Very good generative capacity. Ideal for a fast setting.
