

Proven Accents® *Spikes*

Dracaena indivisa

Exposure

- **Part Sun to Sun**

The optimum amount of sun or shade each plant needs to thrive: Full Sun (6+ hours), Part Sun (4-6 hours), Full Shade (up to 4 hours).

Flower Season

•Spring

•Summer

Mature Size

Height 2' - 3' (60-90 cm) **Spread** 15" - 18" (37.5-45 cm)

pH: B (5.8 - 6.4)

EC (2:1 Extraction Method): B (0.6 - 0.9)

Fertilization: Medium (150 - 200 ppm)

Light Requirements: Medium, High

Water Categories: Dry to Moderate Moderate to Moist Moist to Wet

Rooting Out Temperature: A (65 - 72 °F)

Growing On Temperature:

B (60 - 65 °F)

Holding Temperature:

A,B (45 - 50 °F)

Planting and Timing Information:

Spring through Summer Finish. 1 liner per 4-6" pot.

Finishing Times:

4-5" and Quart Pot : 8-10

6" and Gallon Pot : 10-12

Pinching and Growth Regulators:

Pinching will destroy the symmetry of the plants and greatly add to production time.

Pest and Disease Management:

General pest and disease practices as listed in notes. Plant liners so as to not bury crowns. Scout for spider mites and treat as necessary.

Grower Tips:

For Cordylena, pot size will limit the final size of the plant.

To avoid tip burning do not dry soil out severely.

Spring Outdoor Finish:

Last to move outside
