

HOW TO GROW LAGURUS OVATUS

SOWING INSTRUCTIONS:

Depth: 1/4"

Sprout Time: 5-10 days

Starting Indoors: Sow indoors in pots 6-8 weeks before planting out. Keep at 60-65°F.

Starting Outdoors: Direct sow about 1-2 weeks after last frost.

When to Set Outside: After last frost.

PLACEMENT & CULTIVATION

Free-spirited bunny tails are a fun addition to containers and sunny garden edges, where the fuzzy flowering clusters invite an affectionate touse. They are easy to grow and produce fistfuls of stems for everlasting bouquets to cheer you through the dark winter. Native to the Mediterranean region, they prefer sandy soils.

Final Spacing: 1'

Water Use: Low Water Use

Watering Details: Water during dry spells.

Soil pH: Not particular about pH.

Fertilizer: No need to fertilize.

Diseases & Pests: No major problems.

When to Cut: Cut fresh or allow to start to dry for winter arrangements.
