

Sedum ussurience 'Turkish Delight'

Height: 30cm/12"

Description: Deep burgundy, almost black foliage with carmine-red flower umbels. Excellent in containers and pots.

Common name: Stonecrop

Specification

Sowing/Growing information

Sowing	Sow from May to July for flowering plants in May the following year. Using a 286 plugs tray or slightly larger sized unit, sow on to the surface of a moist well-drained seed sowing compost lightly cover the seed with vermiculite and propagate at 18 °C. Temperatures higher than 25 °C will reduce the rate of germination considerably. Germination should take place after 2 weeks.
--------	--

Growing	Grow on the seedlings in a lightly shaded area until they are established and fill the tray. Pot on in late August - September into 1 litre pot or put 3 plugs into 2 or 3 litre pots. Over winter in a well-ventilated unheated glasshouse or tunnel for sales the following March / April or for flowering plants ready to sell in early May to June.
---------	---

Flowering Period	August to September
------------------	---------------------

Hardiness	Hardy Perennial
