Vegetable Production CATALOGUE

SEASON **2024**

Proud of our roots since 1928

AXEL F1 65-3614

Strong, healthy storage cabbage with a short core and a fresh colour after storage. Axel stays clean in the field partly due to its resistance to black rot. Has to be handled carefully at harvest to maximise storage.

Maturity: 92 days

Jan van der Heide
Northeast Market Manager | Bejo Seeds

BOTRAN F1 65-3551

Black rot tolerant version of Bronco. Makes nice dense heads, that can vary in size with the spacing. Well wrapped and good uniformity.

Maturity: 70 days.

ONEIDA F1 65-6630

A more productive version of Cartier, but a few days later. Excellent yield and very good skin. Storage until April-May.

Maturity: 98 days

VENECIA F1 65-6631

Hybrid from the same genetic background as Cartier and Oneida, with an additional touch of Spanish blood, that assures of an even higher yield. Storage potential until March-April.

Maturity: 107 days

Martin Deslauriers
Sales Manager | Norseco

RED MOUNTAIN F1 65-6699

Earlier Redwing type, with nice dark colour. Distinguish itself by its nice skin quality, very round and uniform bulbs and long term storage.

Maturity: 118 days.

**HARRIS
MORAN**
SEED COMPANY

ADONIS

A strong vining variety that produces tall attractive large barrel shaped fruit. Nice ribbing and a long thick firmly attached Harris Moran handle. A 25-40lbs fruit that gives a nice punch to your display!

LASALLE

54 days bean extremely well adapted for Canada. Very defensive variety with a consistent growth across wet to dry environment. Strong, upright plant keeps pods safely off the ground for a more efficient harvest. We loved its consistency!

KRATOS

A fantastic option for carving pumpkins. Large, flat round shape with great size of 20-30lbs. Medium-dark color and strong handle for easy picking. Strong vine for optimal fruit health. Relatively early setting for its category and great yield potential for Canada!

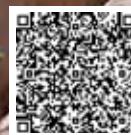

SPRITZ

(HMC591104)

Our latest addition in the Quality Elite lineup. New 74 day sh2 bicolor option. Provides a nice refined ear with glossy full kernels for attractive presentation. A 7.75-8.2 in ear size with explosive taste in every bite. Sugar, taste, and tenderness holds well at maturity. Good tolerance to rust.

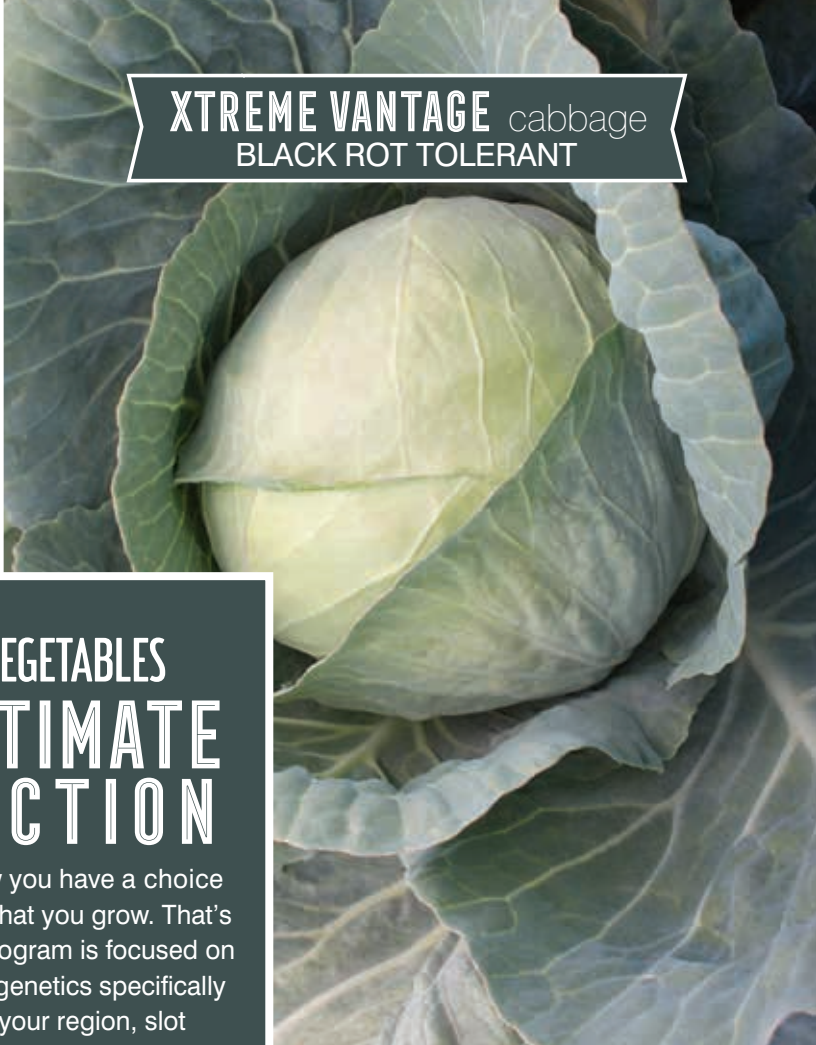

HM.CLAUSE specializes in the breeding, production, and sales of high-quality vegetable seeds. Together, we build a strong collaboration with the farmers we serve, providing the support to sustainably improve the quality and taste of healthy food.

Dear growers,

We are pleased to present our 2024 vegetable seed catalog.

It is the fruit of our efforts to support you by offering the best possible seeds, according to your growing conditions and needs. It takes a community to feed a community, and we're doing everything we can to make this partnership with you a success.

Enjoy your season,

The Norseco market garden team

Katherine Jouvét, Agr.

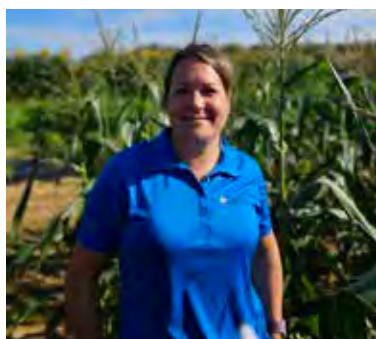

Stéphanie Gosselin, Agr.

We would like to acknowledge the retirement of Mr. Michel Gratton after more than 40 years at Norseco, serving agricultural growers. His professionalism and commitment made him a valued colleague and representative.

Happy retirement Michel.

Artichoke

IMPERIAL STAR

	Code	Variety	Form.	Maturity (days)	Description
	65-0212	IMPERIAL STAR		120	Almost thornless hybrid that produces 6 to 8 artichokes per plant of 7 to 10 cm in diameter. Treat as an annual at our latitudes. Required vernalization.

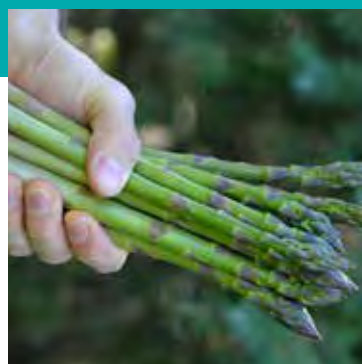

Asparagus

GUELPH ECLIPSE F1

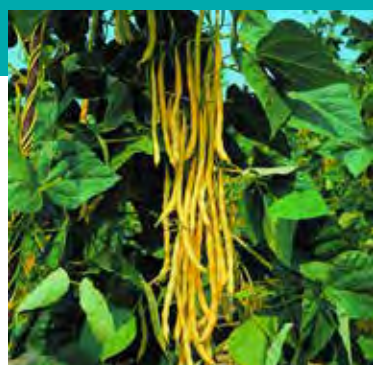

GUELPH MILLENNIUM F1

GUELPH EQUINOX F1

	Code	Variety	Form.	Maturity (days)	Description
	65-0456	GUELPH MILLENNIUM F1		Perennial	Developed by the University of Guelph. Produces 100% male spears and very uniform. Good tolerance to cold temperatures. Highly productive.
	65-0457	GUELPH ECLIPSE F1		Perennial	Green male asparagus, hybridized in Canada, giving it excellent tolerance of cold winters. High yields of large shoots. Very good quality tips and vigorous ferns. Grows in a variety of soils, but prefers sand or sandy loam.
	65-0458	GUELPH EQUINOX F1		Perennial	Early/mid-season cultivar that performs best in temperate and cool environment. Especially used for fresh market due to its excellent quality spears of uniform medium diameter which will pack more quickly. High-yielding variety.

Beans

NECKARGOLD

NECKARKONIGIN

TEGGIA

Code	Variety	Form.	Maturity (days)	Colour	Length (cm)	Tolerances	Description
------	---------	-------	-----------------	--------	-------------	------------	-------------

BEANS-POLE

65-5305	NECKARGOLD		65	Yellow	23-27	HR-BCMV	Consistent and reliable yield. For fresh markets and preserving.
65-5310	NECKARKONIGIN		65	Green	23-27	HR-BCMV	Consistent and reliable yield. For fresh markets and preserving.

SHELL BEANS

65-5528	TEGGIA		80	Cream-red	17-20	–	Beautiful red and cream shelling bean to be harvested fresh, like a lima bean, or to be left to ripen and dry on the plant for supply of beautiful dried beans. Delicious buttery flavor. Bushy plant, without currents, easier to grow in the northern regions than lima beans. Replaces the Supremo variety.

	Code	Variety	Form.	Maturity (days) S	Colour	Length (cm)	Size	Tolerances	Description
--	------	---------	-------	-------------------	--------	-------------	------	------------	-------------

BEANS-BROAD

	65-5410	EXPRESS (PRIMO)	UNIT P&S	65	Medium green	16	—	—	Early. Medium size white seeds. Recommended for freezing. 5-6 beans/pod.
	65-5420	MAJOR	UNIT P&S	75	Medium green	18	—	—	Good pod setting, even under less favourable weather conditions. Heavy pods and a high yielder. 5-6 beans/pod.
	65-5432	BROAD WINDSOR	UNT	75	Pale green	18-20	—	—	Excellent yield of large, easy-to-shell pods. For fresh markets. 5-7 beans/pod.

BUSH BEAN-WAX

	65-5105	ROCDOR		48	—	18	medium	HR-BCMV/CI/Psp	Early season variety. Pick early to avoid it becoming fibrous. Manual harvesting.
	65-5125	SUNBURST	UNT	55	—	13-15	medium	HR-BCMV/Psp	Appealing, high-yielding variety. Earlier than Gold Rush.
	65-5161	GOLD RUSH	UNT	58	—	13-15	medium	HR-BCMV	Long, straight, yellow beans that are easy to pick. Beans are tender and stringless. Extended harvesting, good storage, and fine freezing potential. Suited for mechanical and manual harvesting.
♥	65-5164	BAI003		58	—	14-16	medium	HR-BCMV/Pss	An improvement of the Gold Dust variety with its stronger yellow colour, its long and straight pods. Good field holding. Tolerant to Brown Spot.
♥	65-5165	GOLD DUST		58	—	13-15	large	HR-BCMV/Pss	High quality main season variety. Long and straight beans held on upright plants for easy picking. Improved tolerance to Brown Spot.

FRENCH GOURMET YELLOW

	65-5103	LORIOT		58	—	9-10	fine	HR-BCMV/CI/Psp	French beans, fine and delicate, that produce an abundance of tender, juicy and sweet pods. Compact plant. Replaces the Serin variety
--	---------	--------	--	----	---	------	------	----------------	---

BUSH BEANS-GREEN

	65-5242	BA0999		52	Dark	11-13	medium	HR-BCMV/IR-Pss	Very early bean, perfect to allow you to recover a few days of maturity, when adverse weather conditions prevent you from planting.
	65-5258	LASALLE		53	Dark	15	medium	HR-BCMV/IR-Psp/Pss/Xap	High quality, easy to harvest beans with good yields. Strong, upright plant with easy pick pods. Uniform, straight, quality pods.
♥	65-5240	NYQUIST		55	Dark	12-13	medium	HR-BCMV	High quality, fresh market green bean, with beautiful, dark, straight and uniform pods. Upright plant with high pod position. Very good yield potential. Strong disease package.
	65-5248	AFFIRMED		55	Medium Dark	12-13	medium	HR-BCMV/CI/Psp/IR-Pss	Compares to Caprice. Medium dark green beans at the top of a plant that does not lodge, for a higher percentage of marketable beans.
	65-5252	MESSI		55	Dark	13-15	medium	HR-BCMV/CI	Beautiful dark green bean on a very strong bush. Straight pods set well off the ground and are easy to pick. Good shelf life.
♥	65-5256	SYBARIS	UNT	55	Dark	14	medium	HR-BCMV/IR-Ua/Pss	Very good uniformity and exceptional quality. The pods set high in the plant and off the soil surface for a clean and easy harvest. Fresh or processing markets.

KESTREL

CAPRICE

JAGUAR

SANFORD

MASCOTTE PATIO COLLECTION

HAWAII

TAPIA

AMETHYST

KARIKACHI NO.3 F1

	Code	Variety	Form.	Maturity (days) S	Colour	Length (cm)	Size	Tolerances	Description
--	------	---------	-------	-------------------	--------	-------------	------	------------	-------------

BUSH BEANS-GREEN (CONTINUED)

	65-5241	KESTREL		55	Dark	12-13	medium	HR-BCMV IR-Pss/Ua	Prolific high yielder. Strong, upright plants with distinct dark green leaves. Concentrated sets of uniform dark green, straight, 4 sieve beans that mostly keep their peduncle.
	65-5255	CAPRICE		57	Medium dark	14	medium	HR-BCMV/CI/Psp/Ua/Xap IR-Pss	Straight, smooth pods that have slow seed development, a fine eating quality and an attractive medium dark-green colour. Upright plant that does not lodge and that sets its pods mid high which lends well to both hand and mechanical harvest.
	65-5254	JAGUAR		57	Very dark	14-15	medium	HR-BCMV/CI IR-Ua	Very dark variety that likes heat. Shiny pods pick very easy and clean and have an excellent taste.
	65-5265	SANFORD		56	Dark	13-14	medium	HR-BCMV/CI IR-Ua	Sanford sets well in stressed conditions, either in heat or cool temperatures. It produces vigorous and upright plants with dark green pods that are very straight and of a good length. High percentage of peduncles on pods.

FRENCH GOURMET-GREEN

	65-5202	MASCOTTE PATIO COLLECTION		50	Medium dark	11-13	fine	HR-BCMV/CI/Psp	Compact plant ideal for patio containers and window boxes, which can also be grown in garden beds. Beautiful white-blooming time followed by an abundant crop of small, fine, crunchy and good tasting beans. 2014 AAS winner.
	65-5206	HAWAII		58	Medium green	12-13	fine	HR-BCMV/CI/Psp	Small extra fine bean of beautiful quality. The cordless pods, of a medium green colour, are straight and crispy in the mouth. Barely cooked, it is tender under the tooth. The plant is robust and produces an abundant harvest. Hawaii has its place in every garden. Replaces the Banga variety.

ITALIAN

	65-5272	TAPIA		59	Medium	13-14	large	HR-BCMV IR-Ua	Flat bean. A better version of the variety Ebro, thanks to thicker and less fibrous pod, and improved flavour. An excellent Romano type variety.
--	---------	-------	--	----	--------	-------	-------	------------------	--

BUSH BEANS-PURPLE

	65-5281	AMETHYST		58	Purple	12-14	medium	HR-BCMV	Remarkable dark purple colour on the outside and green on the inside. Nice unique appearance and excellent taste.
--	---------	----------	---	----	--------	-------	--------	---------	---

SOYA EDAMAME

	65-2670	KARIKACHI NO.3 F1		90	—	—	—	—	Very tall (60 to 75 cm), upright plants that are well branched, sturdy and vigorous. Produce a high yield of large, plump pods averaging three seeds each. Strong resistance to lodging. Requires a well-drained soil.
--	---------	-------------------	---	----	---	---	---	---	--

CAMARO F1

BABYBEAT F1

SCARLETT F1

BULLOCK F1

RED ACE F1

MERLIN F1

ROBIN F1

GUARDSMARK

TOUCHSTONE GOLD

AVALANCHE F1

CARILLON

	Code	Variety	Form.	Maturity (days) S	Foliage colour	Tolerances	Description
	65-0836	CAMARO F1		53	Dark green	–	High marketable yield of great quality roots. Uniform size and shape. Nice and thin attachment of dark green, upright foliage.
	65-0827	BABYBEAT F1		55	Bright green	–	True baby beet that forms a nice round shape with a small tap root and smooth skin early on in growth. Well proportioned even when young. Good field holding ability: will stay small. Attractive small tops.
★	65-0833	SCARLETT F1		55	Dark green	–	New beet with improved quality and shape. Rounder and smoother bulbs with a smaller tap root than those of comparable varieties. Excellent internal colour. Excellent uniformity. Suitable for fresh markets, processing and storage.
	65-0834	BULLOCK F1		55	Dark green	–	Round, uniform and very smooth roots with a high brix content. Healthy, erect foliage with a small attachment point. Small taproot. No zoning.
	65-0835	RED CLOUD F1		55	Bright green	–	Variety highly comparable to Red Ace. Dark red interior. Perfectly round and appealing with petioles grouped together. High yield and high sugar content.
♥	65-0840	RED ACE F1		55	Bright green	IR-Cb	Fast growing, sweet flavoured hybrid that produces smooth, medium sized roots of even red colour. Short, erect tops in a bright, shiny green colour. Excellent disease tolerance and uniform early maturity. Heavy yields.
	65-0842	MERLIN F1		55	Bright green	IR-Cb/Pfb	Roots of the same quality as those of the Red Ace variety, but with a sugar content 12-15 % higher than other varieties. Very productive.
	65-0843	ROBIN F1		55	Dark green	–	Perfectly round beet, well adapted for bunching or production of baby beets, due to its uniform globe shape at an early stage of development. It has a very fine tap root, and a strongly tied foliage. Can also be used for processing.
	65-0850	DETROIT SUPREME		60	Dark green	IR-Cb	A true value for a long-time. Dark red inner flesh and smooth root. Good top attachment. For fresh consumption, pickling and canning.
	65-0880	TAUNUS F1		60	Dark green	–	Replaces Rodina. Uniform, cylindrical root. Extremely smooth skin, easy to peel and clean, for uniform slicing.
	65-0887	GUARDSMARK		60	Medium green	–	Improvement of the variety Chioggia by its better vigour. Same red-purple colouring with white zoning.
♥	65-0889	TOUCHSTONE GOLD		60	Bright green	IR-Cb	Round root with an orangey exterior and a vibrant yellow interior. Very sweet taste. Little zoning. Strong foliage.
	65-0890	BOLDOR		60	Bright green	IR-Cb	Interesting yellow beet. Bright yellow interior colour. Smooth skin, of good quality as the Touchstone Gold. Tops are tolerant to Cercospora and very healthy. Ideal for bunching.
	65-0895	AVALANCHE F1		60	Green	IR-Cb	White beet with round bulbs and a snow-white flesh. Very sweet in taste. Healthy tops with good resistance to diseases. 2015 AAS Winner.
	65-0854	CARILLON		75	Bright green	–	Elongated shape. Perfect for processing and slicing. Resistant foliage.

CASTLE DOME F1

BLUE WIND II F1

JET DOME F1

EASTERN CROWN F1

BR 16 F1

EVEREST F1

LIEUTENANT F1

BC 1764 F1

EMERALD CROWN F1

	Code	Variety	Form.	Maturity (days) 	Head shape	Harvest season	Use	Description
	65-1402	CASTLE DOME F1		69	Dome	Spring	Bunching. Crown	Uniform heads with tight, small beads. Early, fast maturing variety with quality crown and florets. Plant vigour allows planting in early season. Needs a good fertilization for maximum yield.
	65-1401	BLUE WIND II F1		70	Semi-dome	Spring - Fall	Bunching. Crown	For the beginning of the season. Improvement of the variety Blue Wind because of its better field holding and heat tolerance.
	65-1417	KINGDOM F1		71	Dome	Spring - Summer	Crown	Early variety that stands out for its very good uniformity in maturity and in shape. Dark green heads with medium size beads, firm and well domed on a small, open plant. A very high quality for your season start and end.
	65-1405	JET DOME F1		72	Semi-dome	Spring - Fall	Bunching	Early maturing variety. Heads are high on the plant, with medium size beads. Quite uniform in maturity. Strongly tolerant to heat. Holds well for extra early maturity class. Can be bunched.
	65-1425	EASTERN CROWN F1		74	Dome	Summer - Fall	Crown	Outstanding variety with blue-green heads, small fine beads and an excellent heat tolerance. Compact plant with good yield. For the crown cut market.
	65-1406	BR 16 F1		75	Dome	Spring - Fall	Bunching. Crown	Variety with a compact plant and a very good tolerance to heat.
	65-1455	EVEREST F1		75	Dome	Spring - Summer	Bunching	Vigorous growth during cool periods when other varieties slow down. Concentrated harvest. Good tolerance to downy mildew caused by Peronospora.
	65-1463	LIEUTENANT F1		75	Dome	Spring - Fall	Bunching	Produces a good quality, medium green head. Compact, strong plant. Adapted to warm weather.
	65-1408	BC 1764 F1		76	Dome	Spring - Fall	Bunching. Crown	Variety offering a good heat tolerance. Good alternative to Green Magic, with a lower incidence of cat eye.
	65-1440	EMERALD CROWN F1		80	Dome	Summer - Fall	Crown	Medium-maturing, very uniform, heavy, well-domed variety with small beads on a small framed plant. Can extend the Green Magic slot into cold due to its resistance to purpling. Emerald. Produces excellent quality crown cuts/short trim.

Broccoli

GREEN MAGIC F1

BELSTAR F1

EASTERN MAGIC F1

DIPLOMAT F1

IMPERIAL F1

	Code	Variety	Form.	Maturity (days)	Head shape	Harvest season	Use	Description
	65-1450	GREEN MAGIC F1		80	Dome	Spring - Fall	Bunching, Crown	Attractive, mid-early maturity class broccoli with good heat tolerance and holding ability. Widely adapted. Has semi-domed, tight head with medium-small bead size.
	65-1480	BELSTAR F1		83	Dome	Fall	Bunching, Crown	Produces very heavy, high-domed heads. Better suited for cooler periods.
	65-1477	EASTERN MAGIC F1		84	Dome	Spring - Summer	Bunching	Multi-use variety, a little earlier than Imperial and showing excellent performance. High-domed head with great blue-green colour and good heat tolerance. The head is high on a tall plant for an easy harvest.
	65-1472	DIPLOMAT F1		87	Dome	Summer - Fall	Bunching, Crown	Offers a good combination of heat tolerance and head quality. A longer, cleaner stem makes it good for bunching.
	65-1471	IMPERIAL F1		88	Dome	Summer - Fall	Bunching, Crown	Superior heat-loving broccoli that produces tight dome-shaped heads with small, dark green beads. The heads have an excellent shelf-life post harvest.

Broccoli Mini

BC1611 F1

SIBSEY F1

	Code	Variety	Form.	Maturity (days)	Harvest season	Use	Description
	65-1495	BC1611 F1		85	Spring - Summer - Fall	Bunching	Tall, vigorous plants with open, branching habit. Good regrowth for high yields of long, slender stems with bright green florets and mild-tasting stems. Early maturing and widely adapted.
	65-1496	SIBSEY F1		85	Spring - Summer - Fall	Bunching	Extra early, long-yielding variety. Starts out similar to a regular crown broccoli but after harvesting the first crown, easy-to-harvest tender, and tasty side shoots continue to appear long into the season. Tolerant to warm temperature bolting. Replaces the Apollo variety.

Brussels sprouts

BRILLIANT FI

CAPITOLA FI

GUSTUS

DIVINO FI

NAUTIC FI

	Code	Variety	Form.	Maturity (days)	Sprout size	Plant size	Description
	65-2835	BRILLIANT FI		105	Medium	Medium	Flexible variety with high yield suitable for mid-autumn harvest. Nice quality, firm, round sprouts. Healthy plant. Suited for mechanical harvest.
	65-2847	CAPITOLA FI		110	Medium	Large	Round and dark green sprouts. For mechanical harvest. Used for fresh markets and processing.
	65-2843	GUSTUS		116	Large	Large	Early maturity perfect for short growing seasons. Large and very smooth sprouts that have minimal aftertaste. High yield of dark green sprouts, evenly spaced and well formed.
	65-2844	DIVINO FI		116	Medium	Large	Produces medium size sprouts, on a strong erect plant that will not lodge. Will become sweeter after a few frosts.
	65-2850	NAUTIC FI		120	Medium	Large	Produces sprouts of 2.5 cm in diameter, that are more widely spaced than other varieties, decreasing the risk of disease spreading and making the harvest easier. High disease tolerance for a reliable crop.

Cabbage-Chinese

BILKO Y.R. FI

EMIKO Y.R. FI

YUKI FI

YODA FI

PACIFIKO Y.R. FI

	Code	Variety	Form.	Maturity (days)	Dimension height x dia. (cm)	Weight (kg)	Colour	Tolerances	Description
--	------	---------	-------	-----------------	------------------------------	-------------	--------	------------	-------------

MICHIHILI

	65-2660	MONUMENT FI		80	45 x 12	2	Medium green	—	Medium green outer leaves with white internal colour. Crisp leaves with a good tolerance to hot and cold conditions. Suited for fall harvest.
--	---------	-------------	--	----	---------	---	--------------	---	---

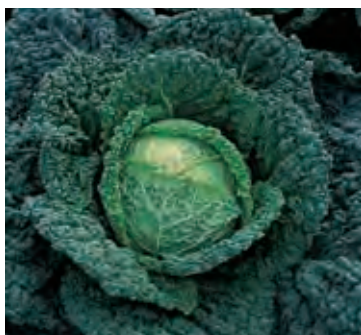

NAPA

	65-2617	BILKO Y.R. FI		60	32 x 18	2.5-2.8	Medium green	HR-Foc/Pb:0.1.3	Large size cabbage shaped like a barrel with a yellow interior.
	65-2606	SCANSIE FI		65	25 x 15	1.2-1.5	Red	T-Bolt/TB	A special bright purple-red Chinese cabbage. Produces heads of 1.2 kg to 1.5 kg in size coloured all the way to the heart. Good tolerance to tip burn and bolting.
	65-2615	EMIKO Y.R. FI		65	32 x 17	2-2.4	Medium green	HR-Foc/Pb:0.1.3	A more barrel shaped Mirako type with darker leaves. Pale interior. Tolerance to bolting.
	65-2618	YUKI FI		65	32 x 18	2-2.3	Dark green	IR-Pb:0.1.3/TBLS/TB	Uniform variety with yellow centres, especially used in the fall. Shows a certain tolerance to Clubroot.
	65-2624	HAN JIANG FI		65	30 x 18	2.3-3	Dark green	—	The heaviest and most tolerant to bolting in the trials. Yellow interior.
	65-2627	YODA FI		65	30 x 18	2-2.3	Dark green	IR-Pb/Vd:1	Napa Cabbage with a large barrel-shaped head and dark green outer leaf. Inside colour is a brilliant yellow with a solid dense interior that gives a very good yield. Good tolerance to diseases.
	65-2613	PACIFIKO Y.R. FI		68	32 x 18	2.3-3	Dark green	HR-Foc/Pb:0.1.3	Dense head with yellow interior.

RED

	65-3416	ALFARO Y.R. F1		62	0.9-1.4	16-18	HR-Foc	Improved version of the Primero variety. Nice round heads, early in maturity, dense and well filled, with a short core. Good wrappers. Very uniform in size and shape and almost no inbred. Sweet taste.
	65-3418	PRIMERO Y.R. F1		62	0.9-1.4	16-18	HR-Foc	Well wrapped, dark red head. Gives a lovely mini cabbage if planted at high density. Good resistance to splitting. Small core.
	65-3419	KOSARO Y.R. F1		62	0.9-1.4	16-18	HR-Foc	Primero type. Well covered heads, very uniform. For early market.
	65-3420	RANCHERO Y.R. F1		75	1-1.6	14-16	HR-Foc	Better wrapper leaves than Primero. Short core. Nice colour. Resistant to splitting.
	65-3423	RUBY PERFECTION F1		80	1-1.6	14-16		Deep-red, globe-shaped heads with very good wrappers and good uniformity. Very late to burst and cold and heat tolerant.
	65-3438	CAIRO Y.R. F1		85	1.4-1.6	14-16	HR-Foc	Round, firm and heavy head with high yield. Well wrapped. For fresh markets.

GREEN

	65-3510	BOURBON F1		55	1,2-1,4	16	–	Dark green, heavy and well-filled head that resists cracking and bolting. Heavier and bigger than Cambria.
	65-3511	CONQUEROR Y.R. F1		55	1,3-1,5	12-16	HR-Foc/BLS	Early cabbage. Dark bluish heads, well wrapped, very heavy, of an excellent quality. Short core. Good field holding ability.
	65-3514	FARAO F1		55	1,1-1,4	12-16	–	Early cabbage for fresh market. Dark colour, sweet taste. Good field holding ability. Strong against cracking.
	65-3507	ADEMA F1		60	1-2,5	14-16	–	Very nice dark green colour. Strong vigour for an early crop. Good field holding ability.
	65-3525	CHECKMATE Y.R. F1		60	1,2-1,5	12-16	HR-Foc	Very small plants who need high-density planting possible. Excellent firmness, short core and good internal structure. Round-shaped head with a sweet taste.
	65-3550	BAJONET Y.R. F1		60	1,5-1,8	12-16	HR-Foc	Earlier Bronco type. Its bright green colour makes it a fresh and clean appearance. Very erect plant habits, good clearance from the soil. Produces heavy uniform heads. Great choice for boxing.
	65-3544	SWINGMA Y.R. F1		63	1,5-3	16	HR-Foc	White cabbage with round heads and dense internal fill. Excellent variety for the fresh market and is an ideal size for the supermarket crate. Offers flexibility, with sound field holding ability.
	65-3547	TOPMA Y.R. F1		65	1,4-2,2	16	HR-Foc	Vigorous plant with very nice wrapper leaves. Strong, compact-framed heads in a blue-green colour with good wax. Very good field holding ability. Good performance under difficult conditions.
	65-3548	BRONCO Y.R. F1		65	1,8-2,2	14-16	HR-Foc T-TB	A standard for mid-season cabbage. Bronco's sweet and crunchy texture is very versatile in the kitchen. Well wrapped, uniform head. Grows well under different circumstances.
	65-3549	XTREME VANTAGE Y.B.R. F1		65	1,8-2,2	14-16	HR-Foc IR-Xcc T-TB	Variety showing very good uniformity in the field. Heads have a nice blue colour and stand high above ground for an easy harvest and a clean plant. Excellent wrappers. Leaves are more tender than most comparable variety at same maturity.

GREEN (CONTINUED)

	65-3551	BOTRAN Y.B.R. FI		65	1,6-2	14-16	HR- Foc IR- Xcc T-TT	Bronco/Grand Vantage type that combines the high quality of Bronco to the good wrappers of Grand Vantage. Stands out due to its high tolerance to black rot.
	65-3545	KILAGREG C.R. FI		70	1,3-2,3	16	HR-Pb	Early maturing variety with high clubroot resistance. Produces very round heads with a dense white interior and small core. Rounded heads are held well above the ground for ease of harvest. Good for fresh market.
	65-3552	VICEROY Y.R. FI		70	4-5	12-16	HR-Foc IR-Xcc T-TB/TT	Blue-green cabbage for fresh markets or processing, depending on the spacing it is given in the field. Good field holding ability. Great internal qualities with a white colour and short core.
	65-3553	GRAND VANTAGE Y.R. FI		70	2,5-2,7	14-16	HR-Foc	Bronco type with several bluish-green wrapper leaves. Dense interior, small core. Excellent vigour and good field holding.
	65-3556	TEKILA Y.C.R.		90	2	14-16	HR-Foc1/Pb	Fresh white cabbage with dark, blue-green leaf colour and a circular head shape. For fresh market. Tekila is strong against club root and cracking which gives it a good standing ability in the field.
	65-3560	TYPHOON Y.R. FI		90	3-4	—	HR-Foc	The size of a winter cabbage with a fall maturity! Large, dark green, dense heads on a clean, upright plant. Healthy look.
	65-3561	KORSUMA Y.R. FI		90	1,5-3	16	HR-Foc	Very vigorous plant. Round, very dense head with an intense green colour for fresh market and processing. Excellent field holding ability for a longer harvest window. Very attractive variety. Mild, sweet taste.

FLAT

	65-3586	GREEN LUNAR Y.B.R. FI		80	1,5-2	—	HR-Foc IR-Xcc	Flat cabbage that grows on uniform semi-erect plants. The globe heads are of a beautiful bright green colour, weigh between 1.5 k and 2 k, and are tolerant to bursting. Autumn harvest recommended.
	65-3578	GUNMA Y.R. FI		85	1,8	—	HR-Foc	Flat cabbage with thin leaves that detach very easily. Excellent for cabbage rolls or wraps. Surprising sweet taste and tender texture.

POINTED

	65-3570	CARAFLEX Y.R. FI		63	0,4-1,4	—	HR-Foc	To be used for the production of miniature pointed green cabbages. Tender and sweet tasting. Its unique shape makes it an original choice.
--	---------	------------------	--	----	---------	---	--------	--

GREEN

	65-3610	STORAGE # 4 Y.R. FI		92	2-2,5	12-14	HR-Foc.I	Variety that produces a high yield of large cabbages. Excellent wrapper leaves. Holds well in the field under stressful weather.
	65-3613	EXPECTATION Y.R. FI		92	2-2,6	12-14	HR-Foc T-TT	CMS version of Expect. Same maturity, same weight, same clean look. Tolerant to thrips. For long-term storage.
	65-3614	AXEL Y.B.R. FI		92	2-2,6	12-14	HR-Foc IR-Xcc T-TT	Strong, healthy storage cabbage with a short core and a fresh colour after storage. Axel stays clean in the field partly due to its resistance to black rot. Has to be handled carefully at harvest to maximise storage.
	65-3615	EXPECT Y.R. FI		92	2-2,6	12-14	HR-Foc T-TT	Lennox type, for long-term storage. Holds its freshness appearance. Tolerant to thrips.
	65-3619	LOUGHTON Y.R. FI		92	2-3	14-16	HR-Foc	Cabbage mostly used for the boxing market. Distinguishes itself with its wrapper leaves, nice round head and attractive blue-green colour.
	65-3620	LENNOX FI		92	2-2,5	12-14	—	Well-known variety for its sweet taste. Well suited for either fresh market or storage. Round, solid heads with smooth wrapper leaves. Very productive, showing vigorous, uniform growth. Will hold its green colour very well in storage. Potential of large size cabbages.
	65-3623	REACTION Y.R. FI		92	2-2,25	14-16	HR-Foc	Smaller size cabbage. Very well wrapped, with a small core. Can be used for the production of mini cabbages if sown at high density. Long-term storage possible.
	65-3642	AXIONA Y.R. FI		92	1,1-2	12-14	HR-Foc	Heavy cabbage in a compact plant. Dense and fine internal structure. Long storage potential.

NAVAL F1

NARVIK F1

YAYA F1

	Code	Variety	Form.	Maturity (days)	Length (cm)	Neck diameter (cm)	Storage	Soil type	Description
--	------	---------	-------	-----------------	-------------	--------------------	---------	-----------	-------------

MINI

	65-1803	CARVORA F1		50	14-16	1	Short	Mineral and muck soil	Good alternative to Mokum for Nantes tray production. Very smooth and very uniform in length and shape. Will keep its uniformity even at lower density.
	65-1804	ADELAIDE F1		50	4-6	1	Short	Mineral and muck soil	Great for bunching and marketing as baby carrots
	65-1805	LITTLE FINGER		50	10	1	Short	Mineral and muck soil	A small root variety, perfect for baby carrots, preserves or pickling. Deep orange root with smooth skin. Great taste.
	65-1807	MOKUM F1		50	14-16	1,5	Medium	Mineral and muck soil	Very uniform Nantes carrot, perfect for the mini Nantes production. One of the best-tasting varieties on the market.
	65-1810	ADANA F1		50	14-16	1,5	Medium	Mineral and muck soil	Small Nantes carrot with nice shape and excellent quality. Stronger foliage than other carrots in the same category. For mini Nantes production.
	65-1801	ATLAS		56	4-6	2,5	Short	Mineral and muck soil	Replaces Parmex. Mini, round "Paris market" type root, with strong foliage that makes harvesting and bunching easier.
	65-1875	CARACAS F1		56	10	4	Medium	Mineral and muck soil	Chantenay type recommended for the production of cone-shaped mini carrots.

NANTES-TOUCHON

	65-1812	GOLDFINGER F1		50	17-20	1,5	Short	Mineral and muck soil	Early Nantes that produces high quality roots, uniform, smooth and attractive. Strong tops and dark orange colour. Sweet flavour and crisp texture. Tolerant to Alternaria and aster yellows.
	65-1808	BOLERO F1		55	15-20	2-2,5	Long	Mineral and muck soil	Smooth and cylindrical root with round ends. Maintains its superior flavour after months of storage. Sturdy foliage, tolerant to Cercospora and Alternaria.
	65-1809	PRESTO F1		55	15-17,5	2-2,5	Short	Mineral and muck soil	Smooth, cylindrical root that sizes up fast. Early harvest. Exquisite taste.
	65-1813	SPEEDO F1		55	18-20	3	Short	Muck soil	Early Nantes with a very good quality. Smooth and uniform cylindrical roots. Rounded tips at maturity. Erect foliage with a good aptitude for top lifting.
	65-1815	NAPOLI F1		55	20-22	2-2,5	Short	Mineral and muck soil	Good sweet taste. Ideal for bunching or cello. Early cylindrical root.
	65-1817	NAVAL F1		55	20-22	2-2,5	Short	Mineral and muck soil	A good alternative to Napoli and to Apache. Nice sweet taste and excellent yield because of its cylindrical shape and rounded tip. Healthy deep green tops, perfect for bunching and cello. Remarkable uniformity.
	65-1818	NARVIK F1		55	18-20	2-2,5	Short	Mineral and muck soil	Refined, 18-20 cm long, very cylindrical roots. Strong foliage attachment. Refined crown with no green shoulder. Good, sweet taste. Good washing quality. Can be used as a bunching Nantes and as baby carrots.
	65-1826	YAYA F1		60	16-19	3	Short	Mineral and muck soil	Nantes type, smooth, crunchy and very sweet. A little shorter than other Nantes, Yaya redeems its little sin with a superior taste.
	65-1830	NANTES IMPROVED		62	18-20	2,5-3	Short	Mineral and muck soil	Popular variety. Known for its sweet taste.

	65-1896	CUPAR FI		87	20-22	6.5-7	Long	Mineral and muck soil	The industry choice for dicing. Vigorous and solid foliage. Excellent for storage.
	65-1891	BLANES FI		90	20-25	4+	Long	Mineral and muck soil	Fontana type. Smooth and uniform. High yield potential
♥	65-1892	BERGEN FI		92	23-25	4 +	Long	Mineral and muck soil	Late variety. Strong tops. High yielders. Proven quality after storage.
★	65-1893	SILVERSTAR (SVDN5904) FI		92	23-25	4 +	n/a	Mineral and muck soil	New cylindrical Berlicum carrot, which reaches a good length and offers a good yield potential.

Cauliflower

FIORETTO 60 FI

MINUTEMAN FI

FREEDOM FI

TWISTER FI

FLAMENCO FI

MELROSE FI

VITAVERDE FI

	Code	Variety	Form.	Maturity (days)	Head shape	Harvest season	Plant size	Description
--	------	---------	-------	-----------------	------------	----------------	------------	-------------

WHITE

	65-3875	FIORETTO 60 FI		60	Florets	Spring - Fall	Large	New long-stem cauliflower harvested as sticks. Each stick weighs between 10 and 20 grams. Sweet taste with a smoother texture than with traditional cauliflower.
	65-3812	MINUTEMAN FI		68	Dome	Spring - Fall	Medium	Exceptional, early, uniform and productive variety. Dense head.
	65-3830	CLARIFY C.R. FI		68	Dome	Spring - Fall	Medium	Good tolerance to heat and tip burn. Very good self-blanching. Resistant to club root. Nice, pure, compact white head.
	65-3832	MONEERA FI		68	Dome	Spring	Medium	Dense and tight curds on heads that will thrive even in hot and dry conditions. Uniform harvest.
	65-3831	MARDI FI		72	Dome	Spring - Summer - Fall	Large	Early cauliflower that prefers northern climates. Produces uniform white buds, weighing on average from 600 g to 800 g. Erect and vigorous plant with partially self-covering foliage that protects the florets.
	65-3815	FREEDOM FI		75	Dome	Summer - Fall	Medium	CMS version of Fremont. Very uniform and concentrated production.
	65-3826	TWISTER FI		79	Dome	Summer - Fall	Medium	Named for its robust spiral-shaped internal wrapping leaves. Twister is a uniform white cauliflower, dense, tightly packed, and heavy. It is a mid-season variety with a uniform harvest. Twister seems to prefer heavy soils.
	65-3818	FLAMENCO FI		80	Dome	Summer - Fall	Large	New high quality cauliflower that produces a tight head and is quite uniform in maturity. Good tolerance to hairyness and no riceyness.
	65-3824	MELROSE FI		80	Dome	Summer - Fall	Medium	Quick growing summer variety. Very dense, nice quality, white head. Good self-covering foliage for its speed of growth. Impressive tolerance to tip burn.

BROCCOFLOWER

	65-3873	VITAVERDE FI		75	Dome-Lime green	Summer - Fall	Large	Versatile, easy-to-grow variety. Nice-looking, compact head. Strong, vigorous, fast-growing, upright plant.

♥	65-1152	SOLSTICE F1 (NIRVANA SERIES)		72	16	18-20	50	175	IR-NCLB	Earlier Nirvana type. Particularly sweet and tender variety. Strong emergence. Strong tip fill. Stands out by its quality, just like Nirvana.
	65-1165	RAQUEL F1		72	16-18	20	70	180	–	High quality ears with a good field holding ability and an excellent yield potential. Superb eating quality. Ears are tightly covered on clean, sturdy plants.
♥	65-1166	ROSIE F1	UNT	74	16-18	20	70	180	–	Beautifully refined ear and kernels. Superior eating quality. Attractive, with large size ears. Excellent field holding ability. Strong, beautiful plant.
★	65-1171	SPRITZ (HMC1104) F1		74	16-18	20	70	180	HR-CR	Rosie type with rust resistance. Good vigour. Same ear style, same good taste and same quality as Rosie.
♥	65-1156	NIRVANA F1 (NIRVANA SERIES)	UNT	75	16	20	61	190	–	The cold soil vigour and extremely sweet and tender taste are two main characteristics of this variety.
	65-1158	EPIPHANY F1 (NIRVANA SERIES)		75	16-18	20	60	190	HR-NCLB/MDMV/CR	From the Nirvana series, Epiphany offers a better germination, a better harvest ease and a better tolerance to diseases. Indeed, Epiphany shows, among others, a good tolerance to common rust. Still with its exceptionally sweet and tender taste.
	65-1167	FLAGLER F1	UNT	76	16-18	20	75	180	IR-CR:RpIG	Superior field vigour and exceptional eating quality. Large ears with clean and bright kernels with a remarkable sweet, fruity taste.
	65-1163	AMERICAN DREAM F1		77	16-18	20	55	180	IR-NCLB	American Dream produces vigorous, healthy plants with cobs that have good tip fill of bicoloured kernels. Very tender and super-sweet kernels. Excellent germination. 2018 AAS winner.
	65-1162	SKYRAY F1		78	18-20	20	60-70	187	HR-CR:RpGDJ IR-NCLB/SW	A nice large ear with excellent tenderness and sweet taste. Great tip cover and tip fill in an attractive green husk package. A high quality shipper with a small shank and an easy snap. Good disease resistances.
	65-1164	CABO F1		78	16-18	20	70	185	–	Good yield potential. Sweet, smooth, juicy kernels. Nice ear filling. Good field holding ability for more harvest flexibility.
	65-1170	CRAVE MAN F1		78	16-18	20	53	190	IR-CR:RpID,IG	Well-adapted variety with vibrant tender kernels and great sweet taste. The attractive ears are protected by equally appealing husks with dark flag leaves and long tip cover.

YELLOW SESH2

	65-1322	CAFÉ F1		68	14-16	20	53	175	–	First synergistic yellow variety of this early maturity. Good size ears, medium kernels and excellent taste.
♥	65-1340	HONEY SELECT F1		78	16	20	60	190	IR-SW	Great sweet taste and tender kernels. For fresh markets.

ENGLISH

	65-4250	BURPLESS 26 F1		65	38-40 x 4,6	Monoecious	IR-Pcu/Ec/CMV	Digestible type. Tender non-bitter taste. Very productive. High yield.
	65-4254	ENGLISH TELEGRAPH		65	38-45 x 4,5	Monoecious	–	Digestible type. Pleasant, non-bitter taste. Open pollination variety. Recommended for retail sales.

SLICING

	65-4229	LISBOA F1		50	18 x 5	Parthenocarpic	HR-Ccu/CVVV/Px IR-CMV/Pcu	Extra early, parthenocarpic variety, which means it doesn't need bees for pollination, but should be isolated if grown outside (can also be grown in a high tunnel). Seed cavity does not contain seeds. Impressive yield of two fruits per internode.
	65-4260	SWEET SUCCESS F1		50	30-36 x 6	Gynoecious	HR-Ccu/TLS	Similar to Japanese varieties said to be digestible, but resembling Marketmore. Tender, non-bitter taste. Adapted for greenhouses and outdoor cultivation. Parthenocarpic variety.
	65-4214	BRISTOL F1		52	20 x 5	Gynoecious	HR-CMV/ZYMV/Ps/Ccu/Co IR-PRSV/Ec/Px/Pcu	Early variety. Fruits stay firm, straight and uniform all season long. Nice dark green colour. Incredible yield right at the beginning of the season. Very good disease packages and tolerance to Downy Mildew.
	65-4218	SPEEDWAY F1		54	20 x 6	Gynoecious	HR-Ps/Ccu/Co IR-CMV/Px	High yield of dark colour cucumbers. Very uniform fruits on moderately vigorous vines. This variety is popular because of its earliness, yield and disease resistance.
	65-4258	PETIQUE F1		54	18-23 X 6	Monoecious	–	Short vining/bush slicing cucumbers bred to stay compact with the vines using only 1/3 of the space of a standard variety. For the best tasting, crunchy-sweet cues, pick the green fruits at 18 - 23 cm. Harvest regularly to increase the yield.
	65-4220	DASHER II F1		55	20 x 6	Gynoecious	IR-Co/CMV/Px/Ccu	High production of very dark first quality fruits. Keeps its shape and colour in high temperatures. Constant quality and uniformity.
	65-4266	MARTINI F1		55	13-15 x 4	Monoecious	IR-Ec/Px	Small cucumber characterized by its white exterior colour, early maturity and thin fruit skin. Sweet and crunchy fruit, without any bitterness, that do not need to be peeled. Tolerant to powdery mildew.
	65-4238	MARKETMORE 70		63	23 X 6,5	Monoecious	HR-Ccu/Pcu IR-Co/Ps/Ec/Px	Mid-early variety that produces long dark green fruits with white spines. Productive and flavourful.
	65-4240	MARKETMORE 76		63	23 x 6,5	Monoecious	HR-Ccu/Pcu IR-Co/Ps/Ec/Px/CMV	Straight, flavourful fruit. Very popular open pollination variety. Productive. Recommended for retail sales.

LEBANESE

	65-4277	QUICK SNACK FI		45	5-6.5 x 2	Parthenocarpic	–	Brand-new mini cuke for all indoor vegetable garden. Parthenocarpic variety that is fast to produce handfuls of cocktail-sized, 5-6.5 cm snackers on compact plants. Plants will benefit from being trellised and pinched when plant reaches top of trellis.
	65-4247	MERCURY FI		53	14-16 x 3	Gynoecious	HR-CMV/PRSV/WMV/ZYMV IR-Px	Finally, a Lebanese cucumber with a better disease package. It's earliness, dark green colour and crispy sweet fruits makes it a variety to grow without hesitation.
	65-4230	MAGIC FI		55	14-16 x 3	Gynoecious	–	Beit Alpha type for the field and greenhouse. Slightly spiny dark green fruit.
	65-4231	BABYLON FI		55	14-16 x 3	Gynoecious	HR-CMV IR-Px	Cylindrical, ribbed fruit with fine white spines. Babylon is unbelievably sweet, crunchy and thin-skinned. Superb quality.
	65-4233	GREEN LIGHT FI		55	7-10 x 3	Parthenocarpic	–	A mini parthenocarpic cucumber offering a high yield of attractive fruit, early ripening and excellent taste without bitterness. The plant can produce up to 40 thornless fruits. For an optimal harvest, stake or climb the plant and harvest the fruits between 7 cm and 10 cm long.
	65-4276	MINI MUNCH		55	10 x 3	Parthenocarpic	IR-Px	Parthenocarpic cucumber to be grown in a container or in the garden on a trellis. Early high yield, very thin skin and crispy texture.

SPECIALTY

	65-4278	LEMON		65	3.5-6	Monoecious	–	Small and round attractive heirloom cucumbers with lemon coloured skin. Mild, sweet and never bitter lime-green flesh. Produces a vigorous long vine that does well on a trellis or a fence.
	65-4280	MOUSE MELON		70	2 x 3	Gynoecious	–	Tiny little cucumbers (Melothria scabra) known in Mexico as "sandita" (little watermelon) and branded here as mouse melons. They have a prominent cucumber flavour with notes of tartness.

CITADEL F1

	Code	Variety	Form.	Maturity (days) S	Flowering habit	Tolerances	Description
	65-4420	PETIPIKEL F1		45	Monoecious	—	Short vining/bush pickling cucumber that has been bred to stay compact with the vines using only 1/3 of the space of a standard variety. Pick the green striped, spined fruit at 8-13 cm (3 - 5 in) for the best results. Harvest regularly to increase the yield. Fruits can be left until 18 cm (7 in) long and used fresh.
	65-4410	PUCCINI F1		50	Parthenocarpic	HR-Ccu IR-Co/Px/Ps/CMV	Parthenocarpic type (does not need to be pollinated to produce fruits). Very compact vines and small foliage. Perfect for early and late season production. Ideally, needs to be isolated from other varieties to preserve its quality.
	65-4477	CORENTINE F1		50	Gynoecious	HR-Ccu/Px IR-CMV	Replacement of Cool Breeze. Parthenocarpic variety that needs to be isolated but does not need any pollination to give loads of medium green fruits with small fine spines.
	65-4480	SALT AND PEPPER		50	Gynoecious	—	Eye catching white-skinned pickling cucumber with good powdery mildew tolerance. You won't need to add salt and pepper to this unique miniature cucumber. It has just the right amount of natural flavours, quite delicious.
	65-4415	CROSS COUNTRY F1		52	Gynoecious	IR-Co/Ps/CMV/CMV/Px/Pcu	Long, dark green fruit. Wide adaptability to diverse conditions. Performs well under stress.
	65-4422	ESPIRIT F1		52	Monoecious	HR-ZYMV IR-Ps/Co/Px/CGMMV	Dark green Eureka type, a little earlier and a little bigger for a better yield. Adapted to both market fresh and processing. Good disease package and tolerance to downey mildew.
	65-4427	EXPEDITION F1		52	Gynoecious	HR-CMV/Ps/CMV IR-Co/Px	For those who like the variety Vlaspi, it must be tried. This variety produces a darker fruit and offers a higher yield.
	65-4426	VLASPIK F1		54	Gynoecious	HR-CMV/CMV/Co IR-Ps/CMV	High yields of large, plump fruits. Suited for mechanical harvest.
	65-4423	ARABIAN F1		55	Gynoecious	HR-Ccu/Co/Px IR-CMV/Ps	Short vine variety, darker colour than Eureka. Fruit is also longer.
 	65-4424	EUREKA F1		55	Monoecious	HR-WMV/ZYMV/Ps/CMV IR-CMV/PRSV/Co/Px	Highly disease resistant variety. Outstanding for its dark green fruit that looks like a small slicer.
	65-4425	CITADEL F1		55	Gynoecious	HR-CMV/Ps/CMV/Co IR-Pcu/Px	Citadel is part of a new hybrid line tolerant to Downey mildew. The combination of fungicides when pressure is too high and good tolerance to Downey mildew will help achieve its highest yield potential.

	Code	Variety	Form.	Maturity (days) ¹	Fruit shape	Fruit size (cm)	Colour	Description
	65-0620	PATIO BABY F1 PATIO COL.		45	Oval	10-12 x 7-8	Dark purple	Unique, high yielding, almost thornless, compact variety that produces baby size eggplants very early. Equally suited for growing in containers or in the garden.
	65-0603	GRETEL F1		55	Cylindrical	7,5 x 3	White	Winner AAS 2009. Bunches of 3 to 6 small, elongated fruits with few seeds. Harvest at 7.5 cm or more. Sweet, tender fruit. Suitable for pot cultivation.
	65-0622	NIGRAL F1		55	Oval	22 x 10	Black purple	Dark and shiny black coloured fruits, without thorns for an easy handling at harvesting and packaging. Good fruit setting under cold and hot conditions. Excellent yield.
	65-0628	CHARMING F1		55	Cylindrical	19 x 5,5	Pink	Pink, chubby fruits with a pleasant lustre. Nice attractive fruit with white flesh. Two to three flowers-bearing fruits on one node.
	65-0621	NADIA F1		58	Oval	22 x 11	Dark purple	Good yield. Uniform, quality production throughout the season. Sturdy plants that can set under cool conditions. Dark, shiny fruits, blemish free. Tolerant to tobacco mosaic virus.
	65-0624	FAIRY TALE F1		58	Elongated oval	10 x 4	Purple with white stripes	Dwarf plant that produces loads of attractive miniature fruits.
	65-0619	SANTANA F1		60	Oval	21 x 10	Black	Very productive. Vigorous plant with few spines. One of the best for heat tolerance without fruit fading problems.
	65-0625	SABELLE F1		65	Round	10 x 10	Purple	Traditional Sicilian type is highly attractive due to colour contrast between skin and calyx. Flavourful flesh and good texture.
	65-0627	DANCER F1		65	Cylindrical	20 x 7,5	Bright purple	Robust, thornless plant. Good production of medium size fruits. Non-bitter and mild taste.
	65-0630	PURPLE SHINE F1		65	Elongated	30 x 4	Purple	Seedless Chinese type. Excellent yield on a solid, upright plant.
	65-0617	NIGHT SHADOW F1		68	Oval	20 x 12	Glossy black purple	Traditional teardrop-shaped fruit that holds quality into a large size. Glossy and attractive fruits that resist wind and handling scratches. Widely-adapted, vigorous plant. Tolerant to tomato mosaic virus.
	65-0606	CLARA F1		70	Oval	15 x 8	White	White eggplant of good size on a thornless plant. White flesh with mild, bitter-free flavor.
	65-0626	BIRGAH F1		70	Round	10 x 10	Pinkish purple	Sicilian type, firm and heavy. Productive plants. Excellent sweet taste.
	65-0629	TRAVIATA F1		70	Elongated oval	20 x 11	Deep purple	Vigorous and thornless plants producing fruits of uniform size throughout the season. For open fields and high tunnels. Good productivity.

AUTUMN WINGS LARGE FRUITS

TURK'S TURBAN

Code	Variety	Form.	Maturity (days) S	Description
65-4684	FANCY WARTED MIX FI		95	Produces a unique combination of small decorative gourds of multiple forms and colours, with either a warty or a smooth skin.
65-4685	GIZMO		95	New winged gourd mix, which is unique for its bush plant type, offers fruit with rich colours including dark green, orange, yellow, light green, and white. Hard-shelled variety with fruit that is 7-12 cm tall by 15-20 cm wide at the tip of the wings. A great addition to your fall decoration lineup.
65-4686	HOARGARTH		95	Distinctive new orange and dark green gourds. Wart-covered fruit that measures 17 cm wide by 12 cm high. Intermediate bush type. Adds texture to fall displays.
65-4689	GALAXY OF STARS FI		95	Hybrid mix of unique star-shaped fruits in yellow, cream, orange, green and white with varying stripe patterns. Great for fall displays.
65-4691	KOSHARE YELLOW		95	Small pear-shaped fruit with a long neck, dark green at the base and yellow at the top. Very smooth skin. Vigorous plant with good yield.
65-4696	SMALL FRUITED WARTED MIX		95	Selection of small warty gourds.
65-4682	GA GA GA FI	UNT Race	100	Crooked ornamental squash for both type of using. Young, light-yellow fruits have buttery flavour, firm texture and are nice for cooking. Fully ripen, golden yellow, blistered fruits are very attractive for fall decoration. Vigorous, bushy plant.
65-4683	LUNCH LADY FI		100	Mix of large, decorative gourds of varying sizes, usually elongated and very warty.
65-4695	AUTUMN WINGS SMALL FRUITS		100	Shaped like a pear with a swan's neck and wings in many intense colours (up to 12 cm long).
65-4697	AUTUMN WINGS MEDIUM FRUITS		100	Shaped like a pear with a swan's neck and wings in many intense colours (up to 18 cm long).
65-4699	AUTUMN WINGS LARGE FRUITS		100	Shaped like a pear with a swan's neck and wings in many intense colours (up to 25 cm long).

SPECIALTY

65-4688	TURK'S TURBAN	UNT	105	Also called Giraumont, the turban-shaped fruits are mainly dark orange with speckles of green, red and creamy white. With a fair quality for baking and stuffing, this variety also looks stunning in a fall display. Stores well if not bruised while harvesting.

Ground Cherry

GOLDEN HUSK

GOLDIE

LITTLE LANTERN

	Code	Variety	Form.	Maturity (days) ^T	Colour	Weight (g)	Plant size	Description
	65-9297	GOLDEN HUSK		65	Orange	Less than 25	Small	Small, very sweet tasting fruits. Perfect for jam.
	65-9299	GOLDIE		65	Orange	Less than 25	Small	Prolific, profusely branching plants that bears 1.25-1.5 cm golden berries and drop ripe fruits. Sweet flavour with a touch of acidity. Fruits can be eaten raw, dried, frozen, canned, etc.
	65-9296	LITTLE LANTERN		70	Orange	Less than 25	Small	Smaller, more compact strain of ground cherry, well suited for pots. Smaller fruits (11-14 mm) and lightly coloured husks. Good ramifications and short internodal spaces.

Kale

SIMPLYSALAD STORM MIX

LACINATO

BLACK MAGIC

SCARLET

REDBOR F1

ROGUE F1

DARKIBOR F1

STARBOR F1

	Code	Variety	Form.	Maturity (days) ^S	Colour	Description
	65-3133	SIMPLYSALAD STORM MIX		35	Purple, green, blue	Kale mix made up with attractive textures and colours including purple, green and blue. This mix will last longer in containers than lettuce and won't bolt. Storm Mix can also be planted in the ground for all-season harvest.
	65-3135	LACINATO		35	Dark green	Dark green kale to be used for the production of smaller leaves (baby leaf), thanks to its more tender texture than the curly kale. Slightly bitter taste.
	65-3127	BLACK MAGIC		45	Very dark blue	Rich, very dark blue kale with a rosette plant habit that makes it easy to harvest. Black Magic has a sweet flavour, a vigorous regrowth and a good uniformity. Continuous harvest.
	65-3104	SCARLET		55	Red	Kale option for winter baby leaf salads, or to grow on as teen leaves for stir-fry or steaming. Scarlet kale has a similar habit to blue kale but with subtle red colouration to mid ribs and veins. Can also be grown as a winter vegetable.
	65-3105	REDBOR F1		55	Red	Unique colour! Very attractive and a good yielder. For niche and ornamental markets.
	65-3118	ROGUE F1		55	Medium green	Mid-early hybrid variety. The plant is up to 70 cm tall, wide and resistant to uprooting. The leaves are of a medium green colour and very curly. It can tolerate temperatures to -15 °C. Thick, healthy leaves sweeten up as the weather cools. For bunching.
	65-3122	DARKIBOR F1	 	55	Very dark blue green	Early maturing, easy growing kale for late summer and fall harvests. Upright plant with finely curled leaves. Good field holding. Ideal for bunching.
	65-3123	STARBOR F1		55	Dark bluish green	Very uniform, compact plants that resist yellowing. Short internodes make this an ideal "mowing" kale, and is also our most productive variety for stripping. For bunching.

QUICKSTAR F1

KONAN F1

KOSSAK F1

KOLIBRI F1

	Code	Variety	Form.	Maturity (days)	Colour	Description
	65-3211	QUICKSTAR F1		52	Pale green	Early variety with an excellent uniformity in shape and maturity. Weighs about 150 gr. Replaces Rapidstar.
	65-3218	KONAN F1		55	Green	Smooth bulbs with very erect foliage. Easy bunching and easy to cultivate. Superb flavour and nice internal structure. The sweetest and most tender of our selection.
	65-3240	KOSSAK F1		55	Green	Huge, but still crisp and tender kohlrabi. The bulbs can reach up to 20-22 cm in diameter without getting pithy, woody or hollow. White flesh hybrid that can keep up to 4 month in cold storage.
	65-3242	LECH F1		55	Green	Slightly flattened, round bulbs with upright, dark green leaves. Good field holding ability. For summer and fall production
	65-3252	KOLIBRI F1		55	Purple	White flesh that remains tender. Medium tops. Good yield.

MAKO POWER F1

BIKER F1

SURFER F1

COMANCHE F1

JUMPER F1

LANCELOT

CURLING F1

	Code	Variety	Form.	Maturity (days)	Colour	Shaft (cm)	Harvest season	Description
	65-7613	COMANCHE F1		90	Bluish green	23-27	Summer	Very quick-growing variety. Produces long, large shanks that size up very early. Very uniform. Easy to clean.
	65-7614	JUMPER F1		90	Medium green	25-30	Summer	Yield similar as of a mid-season leek in only 90 days! Erect foliage.
	65-7615	LANCELOT		90	Medium green	25-30	Summer	Early high-yielding leek. Replaces the Ventura variety.
	65-7630	LANCIA F1		95	Bluish green	25-28	Summer	Erect foliage with no leaves at the base making harvesting and cleaning easier. Similar to Albana.
	65-7616	MAKO POWER F1		100	Very dark green	25-30	Fall	Mid-season leeks, very dark green, upright in the field. Will not bulb. Erect plant, very uniform, of nice calibre. Good shank length.
	65-7688	BIKER F1		100	Bluish green	25-28	Fall	An excellent quality blue-green leek, which is uniform and easy to clean. Erect foliage. Has a strong disease package and good holding ability.
	65-7680	SURFER F1		110	Bluish green	24-26	Fall	Comparable to Shelton and to Midfield, with a slightly longer shaft. More erect foliage. Very vigorous.
	65-7686	CURLING F1		118	Dark bluish green	24-26	Winter	The darkest variety of our assortment. Very erect, good uniformity, good field holding. Can be stored.
	65-7693	BANDIT		118	Bluish green	22-25	Winter	Sturdy winter harvest leeks. Late to bolt, will remain in good condition for a long time in your field. Can be stored. Replaces the Maine variety.

	Code	Variety	Form.	Maturity (days) S	Type	Colour	Description
	65-0885	SOLDIER		35	Beet	Dark red	Bull's Blood type. Mainly grown for its red foliage resembling Swiss chard.
	65-5601	MESCLUN MIX		28	Mesclun	Various	Contains selected leafy types of lettuces and radicchio to be sown together. Harvest when seedlings reach a few centimetres. Multiple harvests.
	65-5602	SIMPLYSALAD ALFRESCO		30	Mesclun	Various	A mixture of leaf lettuces with arugula, endive and radicchio. Mediterranean fresh flavour. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-5603	SIMPLYSALAD CITY GARDEN		30	Mesclun	Various	A mixture of sweet tasting red and green lettuces. A more traditional mixture. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-5605	SIMPLYSALAD WONDER WOK MIX		30	Mesclun	Various	Mix of Asian greens including mustard, kale and pak choi. Zesty and tasteful. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-3133	SIMPLYSALAD STORM MIX		35	Kale	Purple, green, blue	Kale mix made up with attractive textures and colours including purple, green and blue. This mix will last longer in containers than lettuce and won't bolt. Storm Mix can also be planted in the ground for all-season harvest.
	65-6230	RUBY STREAK		30	Mustard	Dark red	Delicate and finely serrated red-violet leaves. Gentle spicy sweet taste.
	65-2682	EARLY MIZUNA		45	Japanese mustard	Light green	Broad finely serrated leaves. Tolerates cold conditions.
	67-6710	FRENCH SORREL		Perennial	Sorrel	Green	Large, green leaves, tangy, light lemony taste. Height: 30 to 45 cm, width: 20 to 25 cm. Perennial.
	67-8110	ROCKET		Annual	Rocket	Green	Belongs to the mustard family. Strong aromas with a subtle nutty flavour. Annual.

BUTTERHEAD

	65-5706	RHAPSODY		55	Green	HR-BI:1-6/LMV	Large, luxurious butterhead, bred for flavour, form and vigour. Glossy, dark green leaves with smooth margins. Good yielders in temperate areas.
	65-5707	BUTTERCRUNCH		55	Green	—	Heavy, with medium-size head. Tolerates heat. Slow to bolt.
	65-5734	EDOX		55	Red	HR-BI/LMV	The best red and green Boston on the market. Dense head with soft thick leaves. Crisp texture and subtle mild flavour. Can be grown all season long. Tolerances: DM (I-17, 19, 21, 23), LMV.

OAK LEAF

	65-5639	BAUER		55	Green	HR-BI:1-9/Nr/TBSV IR-LMV	Uniform, compact oak leaf with a darker colour than other varieties in the same category. Can be grown almost anywhere, in-ground, containers, or window boxes and harvested at the baby leaf stage or grown full-sized head. Dense heads that produce an abundance of sweet, crisp sturdy leaves.
	65-5645	BELLEVUE		55	Red	HR-BI:1-8/Nr/TBSV IR-LMV	Red oak leaf lettuce ideal for growing regular or mini lettuces. Smooth and pleasant texture with a sweet taste. A perfect choice for growing in adverse conditions due to its excellent field performance, late setting, and tolerance to mildew. Replaces the variety Cantarix.

LEAF

	65-5613	STARFIGHTER		55	Green	IR-BI:1-25, 27, 28, 30, 31	High yield of uniform, medium-size heads with good flavour. Dark green leaves are shiny and slightly savoyed. Strong against tip burn, bolting.
	65-5615	GRAND RAPIDS		55	Green	—	Popular selection. Thick, juicy, bright green, frilly leaves. Rapid growth in spring and fall.
	65-5617	TWO STAR M.I.		55	Green	—	A market standard. Voluminous and heavy head with dark green, serrated leaves that fold easily for packing. Very slow to bolt.
	65-5621	TROPICANA		55	Green	IR-Rs/LMV	Very good heat and bolt tolerant variety that can be used in fresh pack or whole leaf production. Also tolerant to tip burn, lettuce mosaic virus and corky root.
	65-5667	NEW RED FIRE		55	Red	—	Exceptional for its shiny, red and green leaves. Classy looking selection, very uniform and productive. Consistent yields. High bolting tolerance and strong tolerance to heat. Holds well in fields.
	65-5668	RUBY SKY		55	Dark red	HR-BI:1-17, 21, 23/Nr IR-LMV	Disease tolerance makes this variety particularly suited to late-season production. Dense head with ruffled leaves in an intense red at the tips and green at the inner base. Holds well in the field.
	65-5675	RED SAILS		55	Red	—	Dark red leaf lettuce. Voluminous and uniform. Slow to bolt. Recommended for retail sales.
	65-5619	BERGAM'S GREEN		58	Green	HR-BI:16-26, 28, 32EU/ Nr:0/TBSV IR-LMV:1	Large size, heavy, leaf lettuce, just a bit later than other varieties. Slow to bolt and strong against tip burn. Best suited for summer and fall harvest.

ROMAINE

	65-5770	POMEGRANATE CRUNCH		55	Red	Box	–	Red mini romaine with open habits and smooth texture. Faster growth than other varieties. Bright poppy-red colour outside and bright red-green inside. Nice twin pack with green mini romaine Starhawk.
	65-5775	SUCRETTE		55	Green	Box	HR-BI:16-29.32.34EU IR-LMV/I	Mini lettuce known as “fat” because of its thick leaves, with an almost sweet taste. Highly resistant to heat and bolting, making it ideal for summer cultivation.
	65-5776	XALBADORA		55	Green	Box	–	New mini romaine with great green colour and gloss, slightly open centre with high leaf count. Xalbadora performs great against tip burn and has a wide adaptability.
	65-5788	RIO BRAVO		72	Green	Box, heart	–	Tight leaf structure contributes to high pack outs of hearts from the field. Only for early spring production.
	65-5789	GREEN TOWERS M.I.		72	Green	Box	–	Popular variety used for its weight, height and uniformity. Tolerant to bolting and to tip burn.
	65-5778	TETON		75	Dark green	Heart	HR-BI:16-34	Romaine variety that displays large size and straight ribs. Good potential for hearts, and strong field tolerance to lettuce dieback (LNSV).
	65-5781	PATRONA		75	Green	Box	HR-BI:16-34/Nr IR-LMV/Rs	Large, dark green romaine lettuce suitable for fresh whole head, processing and machine harvesting.
	65-5783	SUN VALLEY		75	Green	Box, heart, processing	–	Large frame variety with a medium yellow interior and brilliant, thick, smooth tapered midrib. Excellent weight at harvest. Tolerant to corky root and bolting. Also tolerant to low and high temperature abnormalities.
	65-5784	SUNBELT		75	Green	Box, heart, processing	–	Large frame variety with a straight tapered but shape for an impressive pack at harvest time. Excellent field holding ability. Strong against bolting and tip burn.
	65-5786	VALLEY HEART M.I.		75	Green	Box, heart	–	Tall and dense heads, medium green in colour. Good cold and tip burn tolerance and slow to bolt. Large slightly blistered leaves. Ideal for fresh market or heart production.
	65-5787	PARIS ISLAND COS SELECT M.I.		75	Green	Box	–	High quality, productive selection. Medium to dark green, non-brittle leaves. Good tolerance to bolting.
	65-5790	VAQUERO		75	Green	Box, heart	HR-TBSV/Rs/Fol	Nice, very dense variety ideal for box and heart production. Excellent tolerance to bolting.
	65-5793	ARROYO		75	Green	Box, heart	–	Tall, upright and V-shaped romaine with tight internodes that makes this best for romaine heart production. Dark in colour with blistered leaves. High tolerance to bolting and tip burn.
	65-5794	BLUE ROCK		75	Green	Box, heart	HR-BL:7-9/TBSV/Nr	Dark green romaine lettuce that can be used either for hearts, cartons and processing. Small core, good density, beautiful heavy heart and good height. Slow to bolt.

	65-6630	ONEIDA FI		98	Large	Very firm	June	IR-Foc/Pt	Dark skin onion with a very nice round shape and a large size. Small necks that cure down well, medium term storage.
	65-6613	RIDGE LINE FI		100	Large	Firm	Decembre	IR-Foc/Pt	Early variety with a high percentage of large size bulbs. Nice dark brown colour and small dry necks. Fairly uniform round shape.
	65-6619	LASALLE FI		100	Large	Very firm	June	IR-Foc	Dark brown onion with long-term storage potential. Large size if it has enough space. Small neck, excellent firmness and great skin retention after storage. Good disease package.
	65-6632	HAECKERO FI		100	Large	Very firm	June	HR-Pd	Vigorous onion, with a strong root system, that grows well even in adverse conditions. Round bulbs with good skin and small necks.
	65-6623	TRAVERSE FI		103	Large	Firm	March/April	HR-Foc/Pt	Great quality, mid-season onion. Remarkable round shape, firm, small neck and very uniform. Large size bulbs for an excellent yield.
	65-6628	PATTERSON FI		105	Large	Very firm	June	HR-Pt	Excellent large calibre, early storage onion. Nice dark skin, large size bulbs, great firmness.
	65-6635	CATSKILL FI		105	Medium	Medium	March	IR-Foc/Pt	Late maturity variety with large size potential, well adapted to the north-east growing conditions. Attractive bulbs with nice skin colour. Medium to long-term storage.
	65-6631	VENECIA FI		107	Large	Very firm	March/April	IR-Foc/Pt	Improvement of the Oneida variety: a higher percentage of big size bulbs. Very uniform round shape. Good dark skin and a small neck.
	65-6634	OVERLOOK FI		109	Large	Firm	March	HR-Pt IR-Foc	Catskill type with a better yield. Higher percentage of large bulbs. Very round, small necks, nice golden colour.

SAFRANE FI

GUNNISON FI

MONTCLAIR FI

	Code	Variety	Maturity (days) S	Size	Firmness	Storage length	Tolerances	Description
♥	65-6621	SAFRANE FI	112	Large	Very firm	June	IR-Pt	A true value for many years. Excellent potential for large size bulbs. Very good root system. Very long storage.
	65-6627	GUNNISON FI	112	Large	Very firm	May	IR-Pt	High yield of good quality onion that combines jumbo size, perfect skin and extra-long storage. Round onion with small necks that dries down quickly.
	65-6638	MONTCLAIR FI	118	Medium-Large	Very firm	March	HR-Pt IR-Foc	Produces large, globe-shaped bulbs with heavy, dark coloured skin and an excellent quality out of storage. Good performance in mineral soil. For transplant.

Breeding Success from the Start

Hyrid Onion Traverse

- Widely adaptable, suitable for fresh and long-term storage markets
- Hard bulbs with attractive skin
- Potential to produce Jumbo bulbs
- High resistance to Pink root and Fusarium

Hybrid Onion Rubillion

- Medium-early maturity
- Hard bulbs have dark red skin and good internal color
- Ideal for long-term storage markets
- Transplant or direct seeding

Hybrid Onion Switchback

- Medium-early maturity
- Globe shaped bulbs have excellent skin and uniformity
- Best for fresh and mid storage markets
- Transplant or direct seeding

PINK

	65-6681	BLUSH F1		105	May	IR-Pt	Very nice skin, large size pink onion with an excellent storage capacity.
--	---------	----------	--	-----	-----	-------	---

RED

	65-6682	RED EMPEROR F1		88	Decembre	–	Our earliest red onion. Round, slightly flat bulbs. Dark red colour that resists well to browning. For optimum results, grow as transplant but can also be grown as direct planting if very early.
	65-6687	MONASTRELL F1		90	December	–	Improvement of the Red Emperor variety with its larger size and darker red colour. To be harvested as soon as ready. Good storage potential. For transplants or very early direct sowing.
	65-6689	RED SPRING F1		92	Decembre	IR-Pt/Foc	As early as Red Sky! Nice uniform round shape with an even darker red than Red Sky. A little lower proportion of large size bulbs. Red all to the centre.
	65-6688	RED SKY F1		95	January	–	Our earliest red onion for direct sowing. Replaces Red Beauty. Round, uniform and firm, deep red bulbs. Small neck that closes up well. Susceptible to pink root.
	65-6692	RED MARLEY F1		98	January	IR-Foc/Pt	Early variety, interesting because of its large size potential, producing a good yield. Bright red.
	65-6690	RUBY RING F1		103	February	–	Dark red onion, inside and out, with solid skin. Elongated round shape. High percentage of single centres. Very vigorous plants.
	65-6683	RED STONE F1		105	March	–	Very round bulbs, very uniform, in a nice dark red without any sun scald. Small neck. Good storage potential.
	65-6694	RUBILLON F1		105	March	IR-Foc	Mid-season onion, with round shape and large size very uniform. Consistent variety from one trial to another.
	65-6685	SV4643NT F1		110	January	HR-Foc IR-Pt	Red onion with improved vigour and a darker colour. Good size potential. Adapted for growing from transplants or direct sowing in all growing areas.
	65-6686	RED NUGENT F1		113	January	IR-Foc/Pt	Improvement of red onion 4643. Better vigour, larger size and darker red colour.
	65-6693	RED BULL F1		115	February	IR-Pt	Earlier Redwing type. Large size and very dark red colour. For long-term storage.
 	65-6696	RED CARPET F1		116	February	IR-Pt	Redwing type with a more reliable seed availability. Very nice external and internal colour. Excellent uniformity and size potential.
	65-6697	BAROLO F1		116	March	–	Mid-season red onion with an attractive dark interior, a very dark glossy exterior, and a uniform round shape. Good caliber. Tolerant of root diseases. Long term storage.
	65-6675	RED GARCIA (SVI608) F1		117	February	IR-Foc/Pt/SLB	Dark red onion for long-term storage. Well suited for transplant or direct sowing, with a mild red onion taste. Great vigorous plant.
	65-6699	RED MOUNTAIN F1		118	March	–	Earlier Redwing type, with similar colour, size and quality. Stood out in the trials due to its excellent storability.
	65-6698	REDWING F1		120	March	–	Round onion, 7 to 8 cm in diameter. Thick skin. Known for its good quality and uniformity.

SNACK HERO

SUPER SUGAR SNAP

LITTLE SNOW PEA

SWEET SUNSATON

OREGON GIANT

	Code	Variety	Form.	Maturity (days)	Length (cm)	Seeds per Pod	Plant Height (cm)	Tolerances	Description
	65-7809	SPRING		52	7.5	6-7	50	HR-Fop/Ep	Early variety of shelling peas. Each pod contains 6 to 7 peas. Pea is tender and sweet.
	65-7810	SHERWOOD		53	8	7-8	37	HR-BYMV/Fop IR-Pv	Early normal leaf type that is highly adaptable in a variety of growing environments. Has the added benefit of tolerance to downy mildew. First flower node will appear after only 9-10 days. 1-2 pods per node. 7-8 berries per pod.
	65-7825	LITTLE MARVEL		57	8	7	45	—	A favourite for over 60 years! Space-saving semi-dwarf plant giving a tremendous return of sweet peas. Good for freezing. Produces two pods per node.
	65-7856	ALTESSE		68	11	9-10	80	HR-PEMV/ Ep/Fop	Replacement for the variety Utrillo with a better taste, better yield and more erect plant that does not lodge.
	65-7852	MR. BIG		71	12.5	8-10	60-90	HR-BYMV/ Ep/Fop	Early variety. Long and large pods on a large size plant. Easy to shell. Also suited for freezing.

PEA-SHELLING

	65-7874	SNACK HERO		67	10	8-9	45-60	—	Slender 10 cm long pods that have the straight and elongated appearance of a green bean but the taste and texture of a snap pea. Early set of stringless, super-sweet and delicious pods. Self-supporting vines can be grown with or without support and are perfect for containers or hanging baskets.
	65-7875	SUPER SUGAR SNAP		67	9	8-10	60	T-Ep	Powdery Mildew tolerant version of Sugar Snap, with heavier early yields over a shorter period of time. 1 or 2 pods per node. 1.5m plants need trellising.

PEA-SNOW

	65-7886	LITTLE SNOW PEA		54	8-9	—	50-60	—	Green snow pea with purple bicolor flowering. Dwarf plant that will not surpass 50-60 cm in height. Perfect for container cultivation.
	65-7878	SWEET SUNSATON		65	8-9	—	70	—	"Snow" pea type with flat pods that are usually used in stir-fries. They can also be frozen or eaten fresh.
	65-7882	OREGON GIANT		65	13	—	80	HR-Fop/Ep/ PEMV	"Snow" pea type with flat pods. Produces two large and long pods at each node.

RED

	65-7215	NEW ACE F1		58		9 x 7,5	–	Extra early hybrid used for the production of medium-sized, blocky, red peppers.
	65-7231	SAILFISH X10R F1		65		9,5 x 9,5	HR-TMV IR-Xcv:0-10/Pc	Early sweet pepper, square in shape, and in a beautiful bright red colour. Concentrated fruit set, medium size with smooth and thick walls. The fruit does not crack and can stay on the plant for a long time.
	65-7233	RED KNIGHT X3R F1		65		11 x 11	HR-PVV/Xcv:0-3,7,8	King Arthur type, extra large fruit with better disease resistance and a more compact open plant. Turns to red early.
	65-7234	SOCRATES X3R F1		65		11 x 11	HR-PVV, Xcv:0-3,7,8	One of the best yielders for its maturity. Four lobes, thick walled, sweet tasting pepper. Very vigorous plant that does not lodge. Suitable for cooler production areas.
	65-7236	CLASSIC F1		65		9,5 x 9,5	HR-Tm:0/ Xcv:0-3,7,8	High quality Bell type whose quality comes close to a greenhouse sweet pepper. Extra smooth fruit with thick walls.
	65-7241	RED FISH X10R F1		67		13 x 13	HR-Tm:0 IR-Xcv:0-10/Pc	New early red pepper for fresh market or processing, which will produce higher yields than other red varieties. Strong, vigorous plant that produces large fruits.
	65-7289	GIANT MARCONI F1		68		18 x 8	HR-Tm:0-2	Extra large elongated fruit that rapidly turns red. Best for grilling, roasting, frying and in salads. High yield.

GREEN

	65-7240	GREENBELL F1		67		11 x 9,5	–	Replaces the Bell Boy variety. Square, firm, medium size fruit with thick walls. Good yield.
	65-7225	CURRIER F1		68		10,5 x 10	HR-Xcv:1-3/ PepMoV/PVV/TMV IR-CMV/Pc	Variety similar to Karisma but earlier maturity. Dark green fruit turns a nice red. Vigorous plant with excellent fruit protection.
	65-7243	ARISTOTLE X3R F1		68		11 x 10	HR-PVV/Tm:0/ Xcv:0-3,7,8	Extra large, dark green to red fruits and heavy sets that have impressed growers everywhere. Anthocyaninless (no purplish colour).
	65-7245	PLAYMAKER X10R F1		68		12 x 12	HR-PVV/Tm:0 IR-Xcv:0-10/Pc	Fruits are dark green, anthocyaninless and the plant produces heavily concentrated set of large fruits. Easier management for growers with disease resistance.
	65-7246	SVR 1819 X5R F1		68		12 x 12	T-Xcv:0-5	Aristotle type. Continuous production of 3 to 4 lobe fruits that do not contain anthocyanins (no purple colour).
	65-7248	TARPON X10R F1		70		10 x 10	HR-Tm:0 IR-Xcv:0-10/Pc	Mid-season hybrid. A compact plant that produces medium-size fruits, very uniform, dark green, smooth, and square. Concentrated fruit set.
	65-7276	CALIFORNIA WONDER		70		11 x 9,5	HR-Tm	Popular variety used for the retail market. Large blocky thick-walled pepper.

	65-7266	CARMEN FI		65		15 x 5,5	–	High yields of deliciously sweet fruits that are early to ripe. Variety that is widely adaptable, flowering and setting fruits over a wide temperature range. Plants are around 60 cm tall with an upright habit and are also suitable for large patio containers.
	65-7265	DIMITRI FI		68		20 x 5	–	Smooth, cone-shaped fruits with pointed tip on a vigorous and fertile plant.
	65-7268	KAPTUR FI		73		18 x 6	–	Large-size, bull's horn-style pepper. Fairly thick 6-7 mm fruit. Solid, productive plant.

SHISHITO

	65-7286	TAKARA FI		60		9 X 3	–	Old Japanese pepper with a small fruit and a mild but rich flavour. Compact plants with spreading habit, short internodes, well branched and high yield. One out of 10-20 fruits might be a little spicy or pungent under stress conditions like hot and dry weather. It makes them fun to eat.
--	---------	-----------	--	----	--	-------	---	---

MINI

	65-7209	SNACKABELLE FI		55		8 x 6	–	A tasty, sweet and original treat. Continuous yield of apple-shaped fruits. Ideal for fresh eating or for stuffing.
	65-7219	CANDY CANE CHOCOLATE CHERRY FI		60		10 X 4	–	Unique striped pepper that maintains its interesting coloration at every stage. Mini, elongated bells are a good size for snacking, with sweet flavour and eye-catching appearance. Variegated foliage adds to the interest for that small pepper.
	65-7220	CANDY CANE FI		60		10 X 4	–	Snack pepper that has a unique, eye-catching variegated foliage, and fruits that ripen from green striped to solid red. Sweet flavour, thin walls, crispy texture. Can be eaten at any stage of ripeness.
	65-7185	RUBY DELITE FI		65		7 x 3	HR-TMV: 0/ Xcv: 0-3,7,8	Large-fruited snack pepper variety with a very early maturity and hot set potential. It is adapted to hot set slots or where there is an advantage to have very early maturity. Fruits have very good size are smooth and firm with a glossy dark colour at full maturity. Mid-strong vigorous plant with good cover and continuous setting ability.
	65-7186	LEMON DELITE FI		65		7 x 3	HR-TMV: 0/ Xcv: 0-3,7,8	
	65-7187	ORANGE DELITE FI		65		7 x 3	HR-TMV: 0/ Xcv: 0-3,7,8	
	65-7200	MINISWEET MIX FI		75		8-9 x 3	–	Now available as a mix of three shiny colours, these mini sweet peppers remain a favourite that pleases everyone either in a lunchbox or in raw vegetable platters. Can be grown in gardens or in patio containers on balconies. The plants are loaded with small, smooth, sweet fruits with very few seeds.

MINI (CONTINUED)

	65-7201	MINISWEET YELLOW F1		75		8-10 x 3-4	Small, sweet, bright-coloured fruits with few seeds. Solid, straight and well-branched plants. Excellent yield.
	65-7202	MINISWEET ORANGE F1		75		8-10 x 3-4	
	65-7203	MINISWEET RED F1		75		8-10 x 3-4	
	65-7296	JUST SWEET F1		75		7 x 4	Small 4-lobed snack pepper, similar to a Bell pepper, but smaller. Deliciously sweet fruits that grow on a vigorous plant up to 90 cm high. Bright and brilliant yellow colour. A very robust bushy habit that does not require a stake. 2019 AAS winner.
	65-7401	PEPPERS FROM HEAVEN RED F1		75		7 x 3	Basket type pepper which produces an impressive number of fleshy sweet fruits. Continuous harvest, flowers and fruit that appear multiple times during the plant's growth. Great choice for big baskets, young plants, pot plants and window boxes.
	65-7402	PEPPERS FROM HEAVEN YELLOW F1		75		7 x 3	
	65-7403	PEPPERS FROM HEAVEN ORANGE F1		75		7 x 3	
	65-7214	MAD HATTER F1		85		5-8 x 5-6	Intriguing small flattened disc shape pepper with lobes or wings. Crunchy, crisp and mild fruits for perfect eating at mature green or ripe red stage. Large indeterminate plants will benefit from a support or a trellis. In hot and dry climates, a small number of fruits will have a spicy taste close to the seed cavity.

PATIO COLLECTION

	65-7190	FRESH BITES RED F1		55		8 x 3	Small and sweet snacking peppers. Very compact plant that produces quickly and offers an abundant harvest, concentrated over a short period of time. Ideal for sunny windowsills or countertops. Can also be grown outside on a table top.
	65-7191	FRESH BITES YELLOW F1		55		8 x 3	
	65-7192	FRESH BITES ORANGE F1		55		8 x 3	
	65-7210	LIBERTY BELLE F1		55		10-13 x 4	Outstanding patio sweet pepper with a naturally dwarf habit that makes it perfect for use in patio containers. Large bright yellow fruits, well shaped and very sweet. A strong variety that withstands intense heat without fruit damage or diseases.
	65-7213	PRETTY N SWEET F1		60		2.5 x 4	Ornamental pepper that can be eaten with a fantastic taste. Sweet, multicoloured pepper on a compact 45 cm plant that is attractive to use in ornamental gardens and containers. Early and prolific and has an amazing sweet taste with thick pepper walls.

ANCHO-POBLANO

	65-7329	SEQUOIA F1		70		17 x 7,5	1,800	Large, dark green, very uniform poblano. Very productive, upright plant. Mild pungency.
--	---------	------------	--	----	--	----------	-------	---

BHUT JOLOKIA

	65-7305	BHUT JOLOKIA		85		6-8,5 x 2,5-3	800,000-1,000,000	One of the hottest pepper in the world at over 1 million Scoville units. Rough dented fruits with thin skin and fiery hot flavour. The seeds and fruits should be handled with extreme caution.
--	---------	--------------	--	----	--	---------------	-------------------	---

CAYENNE

	65-7332	ARAPAHO F1		68		15 x 3	2,000-4,000	Early. High yield. Compact plants. Long and slender pepper with medium pungency.
	65-7325	CAYENNE LONG SLIM		70		10 x 1	30,000-50,000	Very productive with creased walls. Strong and distinct taste.
	65-7333	MESILLA F1		85		25 x 4	2,000-4,000	High yield potential. Large, solid plant. Very long fruit. Good fruit quality.

CHERRY

	65-7376	TIME BOMB F1		68		3,5 x 4,5	2,500-5,000	Cherry pepper. An early and large Cherry Bomb type.
--	---------	--------------	--	----	--	-----------	-------------	---

CHILI

	65-7320	SUPER CHILI F1		75		6 x 1	30,000-40,000	Early. Very uniform. High bearing and super-productive plants.
--	---------	----------------	--	----	--	-------	---------------	--

HABANERO

	65-7350	PRIMERO RED F1		75		8 x 3,5	50,000-75,000	The earliest ripening habanero on the market. Expect huge yields of peppers that are larger than other habaneros. They have about one third the heat of standard habaneros, letting gardeners appreciate their rich flavour.
	65-7356	VELOCIRAPTOR F1		80		6 x 4	150,000-220,000	Early maturing and high-yielding red habanero that is widely adaptable to multiple growing regions. Yields an abundance of large to extra-large, bright red peppers on a medium frame plant. Excellent uniformity. Distinct colour, smell and taste of a classical Habanero.

HUNGARIAN

	65-7340	HUNGARIAN WAX		60		14 x 4	5,000-10,000	Popular bedding plant variety. Fruit with a moderately hot taste.
	65-7338	HOT SUNSET F1		85		20 x 4	650	A prolific and early harvest for these delicious and spicy fruits. Large, healthy, vigorous plant that is disease-free and produces thick-walled, tasty and attractive fruits all season long. Hot Sunset gives you the heat and the great taste.

BASKET OF FIRE FI

	Code	Variety	Form.	Maturity (days)	Shape	Fruit size (cm) length x dia.	Scoville Scale	Description
--	------	---------	-------	-----------------	-------	-------------------------------	----------------	-------------

JALAPENO

	65-7319	POT-A-PENO FI		55		8-10 x 2.5	1,000-1,500	New jalapeno peppers with a compact habit perfect for growing in containers and hanging baskets. A unique jalapeno with fruit hanging down beneath the plant making it very easy to harvest without damaging the appearance or productivity of the plant. Plant sets plentiful small, green jalapeno fruits that have a traditional spicy zip. A few extra weeks and they will ripen to red for a sweet, spicy flavour.
	65-7322	EARLY JALAPENO		65		9 x 4	2,500-8,000	Early. The mildest tasting of the jalapeno types. Ideal for making salsa. For fresh markets and processing.
	65-7323	EL JEFE FI		70		10 x 4	5,000	Large fruits on a vigorous plant. Very productive. Not much cracking or purple spots.
	65-7330	TOTZIL FI		70		11-12 x 4	2,000-2,500	Early jalapeño variety, suitable for fresh market, that produces large to extra large fruit with high uniformity. Semi-open plant facilitates quick hand harvesting.

ESPELETTE TYPE

	65-7385	GORRIA		80		9-15 x 3	1,500-2,500	An Espelette type pepper, the famous European pepper with a well-established culinary reputation. It has a sweet, not too strong, taste. Plants can reach up to one metre in height.
--	---------	--------	--	----	--	----------	-------------	--

PATIO COLLECTION

	65-7310	CHILLY CHILI FI		55		5 x 1	500	Ornamental pepper with an exceptional performance. Non-pungent fruit, that changes colour from yellow to orange, then red at maturity. Extremely heat tolerant.
	65-7308	APACHE FI		58		5-7 x 1	70,000-80,000	Erect, compact and well-branched chili type plant. For patio containers. Height: 40-45 cm.
	65-7309	CHEYENNE FI		58		10-13 x 3	30,000-50,000	Compact and trailing chili type plants. For hanging baskets and patio containers. Height: 40 to 45 cm.
	65-7311	CAYENNETTA FI		58		8-10 x 2	20,000	Chili type pepper that grows into a very well-branched upright plant, ideal for patio planters or hanging baskets. Unique cold tolerance and dense foliage that covers and protects the fruits from the sun. Heavy yield of mild tasting peppers. 2012 AAS Winner.
	65-7387	MAMBA RED FI		80		6 x 2.5	30,000-50,000	Upright-growing pepper plant with mild spicy fruits. Glossy, fleshy fruits turn from a trendy black to a luscious red when ripening. Drought tolerant.
	65-7307	BASKET OF FIRE FI		80		5-7 x 1	80,000	Chili type pepper with a very hot taste on a semi-trailing plant. Perfect for containers or hanging baskets. Good tolerance to cool weather and produce well into autumn. Can be eaten fresh or dried.

In order to obtain the best yield possible, spacing between pumpkin plants in the field is very important. Please refer to the following chart to determine the appropriate spacing for every variety.

IN ROW	Fruit size	
	Mini and small size fruits	18-24 in.
	Medium size fruits	24-36 in.
	Large and extra large size fruits	36-72 in.
BETWEEN ROWS	Vine size	
	Bush	4-5 ft.
	Short vine	6 ft.
	Medium vine	9 ft.
	Long vine	12 ft. and more

MINIATURE

	65-4004	CRUNCHKIN F1		90		0.25- 0.5	—	Orange speckled with yellow	Short	Flat-shaped fruits with a medium-orange colour and slight flecking. Concentrated high yield of hard-shelled fruits that have extended storage ability. Excellent choice as decorative pumpkin.
	65-4095	WEE-BE-LITTLE F1		90		0.2-0.3	—	Orange	Medium	Productive, vigorous plant. Nice uniform fruits. Slightly ribbed.
	65-4019	KANDY KORN PLUS F1		92		0.3-0.45	—	Dark orange	Bush	A round mini pumpkin. Produces 7-8 fruits per plant. For high density sowing. Tolerant to powdery mildew.
	65-4000	PIXIE F1		93		0.3-0.8		Bright orange	Bush	Hard-shelled mini pumpkin, slightly larger than Munchkin but smaller than Crunchkin, with a flecked orange colour, strong stems, and slight ribbing. Improved virus protection and harvest flexibility from the precocious gene, and lengthened storability from its hard shell. Strong yields of 10-12 fruit per plant, that set close to the crown for easy harvest.
	65-4002	MUNCHKIN F1		93		0.25	—	Bright orange	Bush	Early mini decorative pumpkin. Excellent bright orange colour. Flat, deeply sutured shape. Excellent yield.
	65-4001	APPRENTICE F1		95		0.5	—	Burnt orange	Bush	Small, round, uniform fruits, with a smooth shell, perfect for decorating. Hard shell. High-yielding variety.
	65-4087	ORANGITA F1		95		0.5-0.7	—	Bright orange	Short	Excellent producers of slightly larger fruits than other mini pumpkins. Nice deep ribbing for an attractive look. Sweet flesh tasting like an acorn squash. To be used in a display with Casperita. Tolerant to powdery mildew.
	65-4097	JILL-B-LITTLE		95		0.25-0.5	—	Orange	Long	Improvement of the Jack-B-Little variety with more fruit uniformity, darker colour and better yield.
	65-4091	LIL'PUMP-KE-MON F1		100		0.5-1	dna	Orange	Short	Bushy plant habits. Strong dark green handle. Small, uniform fruits.

WHITE

	65-4076	NEW MOON F1		90		16-22	dna	White	Long	Large white fruits with thick, white flesh. Keeps its firmness and its white colour many weeks after harvesting.
	65-4075	BLANCO F1		95		0.9-1.8	dna	White	Medium	White, round, high quality pumpkin with a long, solidly attached handle. Shows a certain tolerance to yellowing due to sun and frost.
	65-4090	BABY BOO F1		95		0.1-0.15	dna	White	Medium	Flattened shape with deep ribbing. Slightly sweet, chestnut taste. Perfect for decoration. Stores well, 3 to 6 months.

WHITE (CONTINUED)

	65-4092	CASPERITA F1	95		0.25-0.5	dna	White	Short	Casperita is a larger mini white pumpkin in a classic shape, with deep ribs and a strong green handle. This attractive pumpkin has sweet, white flesh that reminds the acorn squash taste. Casperita produces good yield of 4-5 fruits per plant. Winner «les Exceptionnelles 2019.
	65-4044	CRYSTAL STAR F1	100		11-16	dna	White	Medium	Flat, round shape. Maintains its pure white colour until frost without taking blue or yellow tones.
	65-4058	SNOWDROP F1	100		0.5	dna	White	Medium	Miniature round to upright white pumpkins that set on medium vines an impressive number of fruit per plant. Strong dark green stems that contrasts the bright white colour that stays white through the season. Pair Snowdrop with varieties like Hot Chocolate for warm fall colour palettes.
	65-4073	SNOWBALL F1	100		2.2-2.8	dna	White	Medium	Small, very white pumpkin that keeps its colour in the field. Very good yield.
	65-4077	MOONSHINE F1	100		3.5-5.5	dna	White	Medium	Bright white, smooth skin, very uniform. Very solid, dark green handle. Harvest when mature to avoid discolouration.
	65-4074	FULL MOON	115		16-27	dna	White	Long	Unique! A big white pumpkin. The fruits must be picked as soon as they are mature to avoid any risk of discolouration.

WARTY

	65-4084	GRIZZLY BEAR F1	85		2.5-3.5	120	Light brown	Long	Novelty pumpkin with warts and bumps. Unique light-brown colouring makes it a great addition to any fall display.
	65-4046	HOMESTYLE	95		6.5-8	30-35	Butter	Medium	Butter-coloured warty pumpkin. High-yielding variety with good handles. Hard warts so it is less susceptible to rotting and easier to handle.
	65-4080	GOOSE BUMPS II F1	95		3.5-5.5	60	Dark orange, warty	Medium	Goose flesh for sure! A round and warty pumpkin.
	65-4006	MINIWARTS F1	110		1.4	dna	Orange with green warts	Short	Smaller version of Warty Goblin with the same orange shell and striking green warts. Very uniform in shape and size. Ideal for Halloween decoration and roadside stands.
	65-4045	POPCORN F1	110		7-10	35-40	White	Long	Creamy white, heavily warty pumpkin. Strong, dark green vines set reliable yields of 8 kg fruits with well-attached, long, dark green stems. The pale fruits will become of a buttery colour with time. Handle fruit with care to minimize damage to the warts.

WARTY (CONTINUED)

	65-4016	WARTY GOBLIN F1		95		3.5-9	45	Orange with green warts	Long	Heavily warted pumpkins with a very high yield. Strong, dark handle. Hard shells for durability. Excellent choice for patches and roadside stands
	65-4048	BAD JELLY F1		95		5.5-7	60	Banana yellow with warts	Medium	Absolutely unique warty pumpkin in a banana yellow colour. Its average weight is 5.5 kg to 7 kg and it grows on an average vine. Originality assured.
	65-4062	SPECTER F1		95		6.5-8	50	White with white warts	Medium	Very uniform in shape and size. Medium round shape. High yield potential. Large, firmly attached handle.
	65-4069	SCARFACE F1		105		9-10	45	Dark orange, warted	Long	Large, elongated, warted pumpkin for roadside and bin applications. Dark orange rind with mature and hard warts for a freeky look. Large, sturdy handle for an easy harvest. Light ribbing.

STACKER

	65-4063	JADE KNIGHT F1		90		3-4.5	dna	Green-Gray	Long	Blocky oblate pumpkin with moderate ribbing and a unique deep grey-green colour. Trailing vines set excellent yields and carry a tolerance to PM (2) and ZYMV. Perfect for ornamental display or as an edible with thick bright yellow flesh. For a different take on Fall decor. Stacks very well.
★	65-4064	COLORADO SUN F1		95		3.6-5.4	dna	Multicoloured	Long	A very unique coloration, like a psychedelic sunrise, full of greens, blues, pinks, and reds. Very nice ribbing and a flattened shape that works well for stacking.
	65-4071	MOON STACKER F1		95		4.5-6.8	dna	White	Long	White skinned pumpkin with a super-thick, bright yellow/orange flesh. Very oblate shape with ribbing, perfect for stacking as its name implies. Pairs beautifully with blue, pink and red stacking varieties. High eating quality flesh. Long storage life.
	65-4072	ROUGE VIF D'ETAMPES		95		4.5-6.5	dna	Red	Long	Flattened shape with deep ribbing. Sweet, orange flesh.
	65-4078	PORCELAIN DOLL F1		100		8-10	dna	Pink	Long	Eye-catching exotic pink pumpkin. Its ribbed, almost square, fruits also have a sweet, deep orange flesh that is delicious in pies, soups, curry or muffins. Good tolerance to powdery mildew.
	65-4079	BLUE DOLL F1		100		8-10	dna	Blue	Long	Exotic, eye-catching blue pumpkin, very similar to Porcelain Doll. Can be used for ornamental as well as for consumption. Good tolerance to powdery mildew.
	65-4081	INDIAN DOLL F1		100		8-10	dna	Dark salmon	Long	Exotic pumpkin that completes the trio with Porcelain Doll and Blue Doll. Can be used for ornamental as well as for consumption. Good tolerance to powdery mildew.

COLOURED

	65-4053	PHANTOMITA F1	90		0,5-0,7	dna	Yellow, light green, dark green	Semi-bush	Great addition to Casperita and Orangita. Good yielders of lovely, flat, deeply ribbed fruits in a unique colour and striping. Flesh and sugars are similar to an acorn squash.
	65-4047	HOT CHOCOLATE F1	95		2-3,5	120	Tan	Medium	Attractive little pumpkin in a unique chocolate brown colour. Solid handle and high yield of fruits that reach an average of 2.5 kg to 3 kg.
	65-4086	BLAZE F1	95		1,4	dna	Yellow/Orange stripes	Short	Original flat, round shape, ornamental pumpkin. Dark green handle very firmly attached. Vigorous plants with tolerance to powdery mildew. Yields 4-5 fruits per plant.
	65-4099	BLACK KAT F1	95		0,25-0,5	dna	Black	Short	Black pumpkin that is just the right size for restaurants or displays. Will start turning orange after around two months of storage. Tolerant to powdery mildew.
	65-4049	MELLOW YELLOW F1	100		5,5-7	45-50	Lemon yellow	Medium	Impressive and eye-catching, early, lemon yellow pumpkin. Round, ribbed fruit with a strong and straight handle. Intermediate tolerance to powdery mildew.
	65-4082	SUNLIGHT F1	100		2	140	Bright yellow	Short	Here is a great variety to differentiate yourself of the usual orange Halloween colours. Bright yellow fruit with a solid green handle. Tolerant to powdery mildew.
★	65-4083	CIDER F1	100		6,8-11	30-40	Tan	Medium	Very round, dark tan pumpkin. Nice ribbing, good handle.
	65-4067	SPICY MOCHA F1	105		4,5-5,5	45-50	Moka tan	Medium	Nice round pumpkin in a coffee colour for a touch of originality in your assortment. Good disease tolerance.
	65-4061	ONE TOO MANY F1	110		9	—	White with green-red veins	Long	Truly distinctive pumpkin. Pale orange fruits that are laced with red and green coloured veins. Variable in shape. Very productive.
	65-4065	LEMONADE F1	110		8	35-40	Golden yellow	Long	Eye catching bright yellow colour for a patch stand out. Strong vine for superior performance. Bright coloration for a pop of contrast in mixed bins and displays. Very uniform shape and medium size. Thick dark green handle.
	65-4066	FIREBALL F1	110		4	35-40	Yellow/Orange stripes	Long	An explosive addition to any patch! Excellent yields with good post-harvest holding. Vibrant orange and yellow stripes with unique pattern for good contrast in specialty and mixed bins.

	Code	Variety	Form.	Maturity (days) S	Colour	Foliage	Use	Harvest season	Description
	65-8005	EARLY SCARLET GLOBE		21	Bright red	Short	Bunching	Spring	Good quality, early variety, mostly used for home gardens.
♥	65-8020	MELITO F1		21	Dark red	Short	Bunching, cello	Spring - Summer - Fall	Radish that can be used for cello as well as for bunching. Very strong top attachment. Good uniformity.
	65-8028	ARIANA F1		21	Bright red	Short	Bunching, cello	Summer	Very round, nice radish. Appealing bright red. Short foliage.
	65-8019	ROVER F1		22	Dark red	Medium	Cello	Spring - Summer	Very uniform variety that doesn't get pithy. Constant yield and performance throughout the season. Strong foliage.
	65-8021	CHERRIETTE F1		22	Bright red	Medium	Cello	Summer	Short top type mainly for cello. Grows well in warm conditions. Very uniform size and shape. Firm root.
	65-8023	ESCALA F1		22	Dark red	Medium	Bunching	Summer	Radishes with compact tops for summer production, mainly for bunching but can also be used for cello. Good tolerance to Downy Mildew, Rhizoctonia and Fusarium. Performs best in lighter soils.
♥	65-8015	RED SATIN F1		23	Bright red	Medium	Cello	Spring - Fall	Medium sized foliage. Uniform round roots that have a refined taproot and good tolerance to damping-off.
	65-8017	RED QUEEN F1		25	Bright red	Medium	Bunching, cello	Spring - Summer - Fall	Very round, glossy red, smooth bulbs with a small tail. Very uniform in shape and size. Excellent internal and external quality bulbs that show good tolerance to white rust, Fusarium and downy mildew.

SPECIALTY

	65-8069	PEARL F1		25	White	Medium	Bunching, cello	Spring - Summer - Fall	White, smooth, round radish with a small green neck for open field production. Vigorous growth and good tolerance to cracking. Adaptable variety for cello bags production or for fresh bunches, due to its strong tops. Shines when mixed with round red radishes.
	65-8054	JUNON F1		26	Red-White tip	Medium	Bunching, cello	Spring - Summer	Good top attachment. Production from March to July. Attractive red colour. Adapted to mechanical harvest.
	65-8062	PURPELLA F1		27	Purple	Medium	Bunching, cello	Spring - Summer - Fall	Stunning dark purple hybrid radishes with better uniformity and adaptability than most OP selection. Very fast to size up. Purpella holds well in the field, with a crispy, bright white interior even when other purple varieties have become pithy.
	65-8055	FRENCH BREAKFAST		28	Red-White tip	Medium	Bunching	Spring - Summer	5 to 8 cm long cylindric radishes. May become hollow early.
	65-8060	EASTER EGG II		28	White-Pink-Purple-Red	Short	Bunching	Spring - Summer	Colourful! Uniform in maturity.
	65-8094	NEW WHITE SPRING F1		55	White	Long	Fresh market	Spring - Summer - Fall	Daikon radish that produces roots 30 cm long. Good tolerance to bolting. Vigorous and uniform growth.
	65-8077	RIDO RED F1		60	Pale green	Long	Fresh market	Fall	Round, 5-10 cm, pale green radishes with a stunning dark pink interior. Flesh is surprisingly sweet, crisp, and refreshing. Best grown in cool weather. Warm days, cool nights, and adequate nutrition and moisture result in a more colourful interior.

Potato

Code	Variety	Form.	Maturity (days) T	Height (cm)	Description
65-7905	CLANCY FI		100	60-90	Our first potato from seed. The sterile seed eliminates the potential of introducing disease to the field, is easier to store and will keep longer than potato tubers. Compact and healthy dark green plants with blue flowers. Resulting spuds are a mix ranging from red to rose-blush skin tones with flesh of creamy white and yellow. Good texture and flavour, ideal for mashing or boiling. Start as transplants.

CLANCY FI

Rapini

Code	Variety	Form.	Maturity (days) S	Description
65-8260	SESSANTINA SAN MARZANO		60	The San Marzano selection distinguishes itself by its uniformity and the quality of its flowerets. For fall production.

SESSANTINA SAN MARZANO

Rhubarb

	Code	Variety	Form.	Maturity (das)	Description
	65-8410	GIANT VICTORIA		Perennial	A selection that offers quality and uniformity. Vigorous plants.

GIANT VICTORIA

Rutabaga

LAURENTIAN THOMSON

APPALACHES

	Code	Variety	Form.	Maturity (days) S	Root shape	Description
	65-6475	LAURENTIAN THOMSON		85	Round	Smooth, globe-shaped roots with purple shoulders and fine-grained yellow flesh. Excellent storage capacity.
	65-6477	APPALACHES		85	Round	Laurentien type rutabaga, with better tolerance to cabbage maggot. Bulbs of larger caliber than York with foliage attached higher for easier cleaning. Does not have a hollow heart. Same beautiful purplish colour as Laurentien.

Salsify

Code	Variety	Form.	Maturity (days) S	Fruit size (cm)	Description
65-8620	MAMMOUTH SANDWICH		150	15-20 x 3-4	Good quality, tapered, smooth, creamy-white roots. Best cooked, fried, in salads, in sauces, etc. Young leaves are great in salads.

MAMMOUTH SANDWICH

Spinach

SIoux FI

TUNDRA FI

RX 2157 FI

MANDOLIN FI

	Code	Variety	Form.	Maturity (days) S	Colour	Leaf type	Harvest season	Tolerances	Description
	65-5035	SIoux FI	UNT	50	Dark green	Semi-savoy	Spring - Summer - Fall	HR-Pe:1-15, 17, 19	Widely adaptable variety with dark green, thick but supple, semi-savoyed leaves. Upright growing with a medium fast growth speed. Reliable in warm and hot conditions. Mostly used for baby leaf production but can be grown full size. Good replacement to Stanton.
	65-5043	C2-606 FI		50	Dark green	Slightly savoyed	Spring - Summer - Fall	HR-Pe:1-15, 17, 19	Very high yield of spade-shaped leaves. Adapts to different types of uses (baby, bunching) and is very tolerant to bolting.
	65-5053	TUNDRA FI	COOL	50	Dark green	Semi-savoy	Summer	HR-Pe:1-15, 17, 19	High quality spinach for the production of tender and succulent baby leaves. Attractive dark green, oval and semi-savoyed leaves. The upright plant and the length of the stem make harvesting easy and clean. Abundant harvest. Replaces the Shelby variety.
	65-5057	DARKSIDE FI		50	Very dark green	Slightly savoyed	Spring - Summer - Fall	HR-Pe:1-15, 17, 19	Excellent choice for baby leaf growers. Uniform dark green, smooth, round-oval leaves. Nice upright plant habit. Thick leaves and good tonnage. Slow to moderate growth habit.
	65-5066	RX 2157 FI		50	Very dark green	Semi-savoy	Summer	HR-Pe:1-15, 17, 19	Almost oval shaped, thick leaves, very dark green in colour. Performs very well during summer time. Suited for baby leaves and bunching.
♥	65-5063	MANDOLIN FI	UNT	52	Dark green	Savoy	Summer	HR-Pe:1-15, 17, 19	Very nice summer variety, thanks to its slower growing habit and thickness of the leaves. Very round leaves.

SPAGHETTI (CONTINUED)

	65-4506	SMALL WONDER F1		70	Orange yellow	Oval elongated	15-18	–	Orange-yellow exterior. Excellent flavour. Good yield of uniform fruits.
♥	65-4515	VEGETABLE SPAGHETTI IMPROVED	🌿	70	Light yellow	Oval elongated	20-25	–	Popular variety for its excellent yield. Running vines. White flesh that looks like spaghetti noodles. Keeps a long time.
	65-4520	STRIPETTI F1	🍅	85	Beige with green stripes	Oval elongated	30	–	The skin turns to orange when mature. The best tasting of the spaghetti squashes.
	65-4526	ANGEL HAIR F1	🍅	85	Bright yellow	Oval elongated	15	–	Small "single-serving" type spaghetti squash that provides only 1 or 2 servings of flesh. The uniform fruit is attractive with its oval shape and darker yellow rind than most other varieties. Sweet hazelnut taste. Long vine.

ZUCCHINI GREEN

🍅	65-4542	EIGHT BALL F1		45	Medium green	Round	6-8 diam.	–	Unique round zucchini. Early, strong plants with an open compact habit.
🍅	65-4574	CASH MACHINE F1		45	Dark green	Elongated	20	IR-WMV/ZYMV/PRSV/Px	Nice looking, cylindrical fruit. Small, open plant that makes harvest easy. The exceptional plant longevity allows for extended harvest.
	65-4565	DUNJA F1	🌿	48	Green	Elongated	20	IR-WMV/ZYMV/PRSV/Px	Vigorous plant that stays productive for a long period. Good quality fruit, slightly larger at the end.
🍅	65-4566	SPINELESS BEAUTY F1		48	Medium green	Elongated	19-22	–	Slightly waxed, smooth cylindrical fruits. Leaves and stems have no spines. Good yielders.
♥	65-4567	SPINELESS PERFECTION F1	🍅	48	Medium green	Elongated	18-20	IR-WMV/ZYMV/Px	Similar to Spineless Beauty but with a good tolerance to many diseases. Fruit is easy to harvest by hand without breaking the petioles. No spines on the leaves or on the petioles.
♥	65-4570	SPINELESS SUPREME F1		48	Medium green	Elongated	18-20	IR-CMV/WMV/ZYMV/PRSV/Px	Glossy fruit on a spineless plant to reduce likelihood of fruit damage during harvest. Improved disease and virus resistance package that keeps plants healthy throughout the season to maximize yield.
♥	65-4571	GREEN MACHINE F1	🌿	48	Medium green	Elongated	15-18	IR-CMV/WMV/ZYMV/PRSV/Px	Widely adaptable, high-yielding zucchini, that has a very high quality. Medium dark green fruit with light flecking. Green Machine has a strong semi-open plant with an excellent disease package. Can yield 20% more than main varieties.

BUTTERNUT

	65-4610	EARLY BUTTERNUT F1	UNT	75	Tan	Blocky	1,3	Semi-bush	One of the earliest butternuts. Good squash for short growing season. Fine textured and sweet tasting orange flesh.
	65-4620	ISABEL F1		75	Tan	Pear	1,2	Vine	Excellent alternative to Early Butternut because of its earliness, its higher yield and the better quality of its fruits. Ideal to start the growing season.
	65-4609	METRO P.M.R. F1	UNT	80	Tan	Pear	1-1,5	Vine	Ideal for market that wants a small size squash. Good yield potential, produces 4-5 fruits per plant. Stores very well. Strong against powdery mildew.
	65-4611	POLARIS F1		80	Tan	Pear	1,4-2,3	Vine	Small to medium size squash, its shape is similar to the Waltham Butternut. Very smooth exterior, deep orange interior. Tolerant to cracking. For fresh markets.
♥	65-4612	BUTTERFLY F1	UNT	80	Tan	Pear	1,4-1,8	Semi-bush	Very attractive squash that gets high marks for its uniform size and shape and its tolerance to powdery mildew. High yield on strong and healthy plants. Excellent choice for roadside stands, markets or boxing.
★	65-4614	CERES F1		80	Tan	Pear	1,6-2	Vine	Early maturing fresh market variety with a traditional butternut shape and a very smooth, no ribbing, exterior. Vigorous plant habit with intermediate resistance to powdery mildew.
	65-4616	AVALON F1	UNT	80	Tan	Pear	1,5-1,8	Vine	Outperforms most other hybrid butternut varieties. Excellent yield and outstanding uniformity. Long-term storage capacity.
♥	65-4615	QUANTUM F1	UNT	85	Tan	Rectangular	1,1-2	Vine	Medium size squash, with wide neck and small seed cavity. Exceptional yield. Sweet and nutritious. Perfect shape for box filling.
	65-4617	TIANA F1	QUAL	85	Tan	Pear	1-1,2	Vine	Tiana produces medium-sized fruits, with dark flesh and a solid skin, allowing the fruits to be stored. Good yield potential and delicious taste.
	65-4618	HAVANA F1	QUAL	85	Tan	Pear	1,3-1,8	Semi-vine	Uniform and very productive variety that ripens fairly early for its size. The blocky fruits have a thick neck and a small seed cavity. Flesh is deep orange and tasty. Vigorous plant, well adapted to North America's growing conditions. Good post harvest shelf life.
	65-4621	HONEYNUT	UNT	85	Dark tan	Pear	0,25-0,5	Vine	A very tempting mini butternut squash and an outcome of a research program from Cornell University. Open pollinated plants with a strong tolerance to powdery mildew. It will produce an abundant yield of uniform mini fruits with very high sugar content once fully ripen and fully coloured. Stores very well.
	65-4640	AUTUMN FROST F1	UNT	85	Frosted tan	Square	1,1-1,8	Vine	Unique variety with round, ribbed fruits that ripen to a beige colour covered with frosty white. Pleasant taste similar to a butternut squash, but with a superior quality, a better developed flavor and a storage capacity of 4 months. Tolerant to powdery mildew.

ACORN

♥	65-4642	AUTUMN DELIGHT PMT F1	UNT	85	Dark green	Ribbed and pointed	1,5	Semi-bush	Uniform. High yielders. Tolerant to powdery mildew.
♥	65-4644	TAYBELLE PMT F1	UNT	85	Dark green	Ribbed and pointed	1,5	Semi-bush	High quality acorn squash that has high resistance to powdery mildew and matures from dark green to jet black. Semi-bush plant that allows for higher density planting and a high yield potential.
	65-4647	HEART OF GOLD F1		85	Cream-dark green	Ribbed and pointed	1-1,2	Semi-bush	Heart-shaped fruit with mottled striping. Thick, orange and fine-grained flesh.
	65-4649	MASHED POTATOES F1		85	White	Ribbed and oval	0,5-0,7	Compact vine	Stark white acorn that will hold its pure colour into late fall. The flesh is nearly white and resembles mashed potatoes when baked and fluffed. Typically produces 3-4 fruits per plant and most of the fruits are found on the crown set.
	65-4650	GOLDILOCKS F1	UNT	85	Orange	Ribbed and pointed	0,5	Bush	Bright orange acorn squash with a uniform shape and colour used for both food and decoration. The plants are vigorous, the yield is good and the nutty flavour is delicious.
	65-4664	CELEBRATION F1		85	Pale yellow-orange stripes	Ribbed	0,7	Bush	Excellent tasting squash and very decorative. Tolerant to powdery mildew.
	65-4657	TABLE QUEEN	UNT	90	Dark green	Ribbed and pointed	0,7	Bush	A little acorn type squash (10 by 11,5 cm), dark green with tasty orange flesh. Open pollination. Compact plants.

CHERRY RED

	65-9234	TINY TIM		45	Less than 25	Small	Det.	HR-Sbl/SI/Ss	Mini cherry tomatoes on mini tomato plants! Sweet and juicy red fruits on plants that rarely grow taller than 30 cm (12"). Does very well in hanging baskets or containers.
	65-9236	TUMBLER FI		45	25-30	Medium	Det.	-	A superior variety for hanging baskets and containers. Prolific plant with graceful, cascading habits. Sweet and juicy early fruits.
	65-9231	MASCOTTE FI		47	25-30	Small	Det.	-	Nice bright red cherry, slightly larger than Tumbler, on a compact plant. Great sweet taste. Good yield.
	65-9232	RED PROFUSION FI		47	20	Medium	Det.	-	Very early trailing tomatoes with a very well-branched habit and good weather tolerance. Highly suitable for large baskets or containers, the earliness makes it easier to sell with coloured fruit. Replaces the Basket Red variety.
	65-9245	CANDYLAND FI		55	7-8	Large	Indt.	-	Cherry tomato that can compete with the BONBON. A very tasty tomato with a dark red colour and a diameter of 1.25 cm. The fruits mainly grow outside the plant, making it easier to pick.
	65-9246	SWEET 'N' NEAT SCARLET RED IMPROVED FI		55	25	Small	Det.	-	Ultra compact plants of about 30 cm high for growing in containers. Good yield of sweet-tasting tomatoes. Perfect for balconies.
	65-9251	LITTLE BING FI		55	Less than 25	Very Small	Det.	HR-Fol:2/Va/Vd	Tasty variety that produces an abundance of tomatoes in the middle of summer. Determinate plant with a compact habit (less than 61 cm in height) and a healthy green foliage.
	65-9253	SUGAR GLOSS FI		55	20-25	Medium	Indt.	-	New indeterminate variety with high-yielding trusses with very visually attractive glossy red fruit. High yielding, up to 60 fruits on long and elegant trusses.
	65-9292	RED CANDY FI		55	10-15	Large	Indt.	HR-Fol:1	Shiny dark red colour. Good taste. Good resistance to cracking. Vigorous plant that stays healthy for a long time.
	65-9227	MONCHERRY FI		58	15	Medium	Indt.	HR-Fol:1-2/TMV	A real candy treat! Extra sweet fruit, juicy and tender. Clusters can carry up to 50 fruits each. Very vigorous plants.
	65-9250	PEPE FI		58	15-20	Compact	Indt.	HR-Fol:0/ToMV:0-2	A great quality cherry tomato with a high sugar content giving it an amazing sweet taste. Can be grown in the garden or in containers.
	65-9229	SUNCHERRY FI		60	Less than 25	Large	Indt.	HR-TMV/Fol:1	Huge crops of shiny, bite-sized red fruits that ripen early and that continue to be produced throughout the summer. Fruits are tolerant to cracking.
	65-9237	JASPER FI		60	10	Large	Indt.	HR-Pj IR-AS	A 2013 AAS winner. Finally, here is a tomato that can be compared to the "Bonbon" variety. Small tomato with an extraordinary taste. Stands out for its impressive yield and healthy plants.

	65-9267	SUN GOLD F1		60	Less than 25	Medium	Indt.	HR-TMV/Fol-I	Delicious tasting, dark orange fruit. Extremely productive.
	65-9274	TORONJINA F1		60	18-22	Large	Indt.	HR-Fol-I-2/Ff/ToMV	Vibrant orange and very sweet cherry tomato deliciously tasty. Gives high yields of very uniform fruits.
	65-9276	SUNORANGE F1		60	16	Large	Indt.	HR-TMV/Fol-I/Ff	Vibrant orange and very sweet cherry tomato deliciously tasty. High yields of very uniform fruits. Good tolerance to cracking.
	65-9304	ORANGETO F1		60	20-25	Small	Semi-det	HRToMV IR-Pi	Small, bright orange, semi-determinate tomato with a good tolerance to late blight. Sweet and juicy fruits that do not crack and can be grown in a container or in the field. Winner of the 2020 Les Exceptionnelles program.

CHERRY PURPLE

	65-9278	INDIGO BLUE BERRIES		75	25-50	Large	Indt.	–	Green fruits that quickly show a purple shoulder, ripening to a deep black colour. The fruits contain a high level of anthocyanin, a natural antioxidant known to fight certain diseases. Harvest the fruit when the colours have deepened.
--	---------	---------------------	--	----	-------	-------	-------	---	---

CHERRY PINK

	65-9294	SUNPEACH F1		55	15-20	Large	Indt.	HR-TMV	Vigorous, high-yielding plants that will stay healthy longer in the season due to its disease package. Fruits are in a shiny deep pink colour and are set on long trusses. Excellent sweet flavour.
	65-9268	SWEET TREATS F1		65	20-30	Large	Indt.	HR-FfA-E/Fol-I-2/ToMV.0.1 IR-For/Sb/Sl/Sa	Great balance of sugar and acidity in a cherry tomato. Shiny, round fruit, tolerant to cracking.

CHERRY GREEN

	65-9252	SUNGREEN F1		65	Less than 25	Large	Indt.	–	Green cherry tomato, that will remain green! When is the right time to pick it? Watch it carefully, you'll notice a change in the skin colour, going from deep green to light green when ripe. Crisp texture and slightly sour taste with a touch of citrus.

POLLINATOR

	65-6096	WILD CARD PLUS FI		68	–	Pale green - Medium green stripes	Round-oval	–	IR-Fo:1/Co	Variety of pollinators, which has an early flowering extending over a long period, to ensure availability of pollen as soon as the hybrid begins to flower. Long internodes that bring the pollen laterally to the female flowers wherever they are. Inedible fruits.
--	---------	-------------------	--	----	---	-----------------------------------	------------	---	------------	---

	Code	Variety	Form.	Description
BALM-MELISSA OFFICINALIS				
	67-1310	LEMON BALM		Lobe-shaped, serrated leaves with a lemony taste. Height and width of 40 to 50 cm. Perennial.
	67-1311	MANDARINA		Very aromatic perennial with a high and spreading growth habit. Oval green leaves with a gentle mandarin fragrance. Semi-hardy perennial.

BASIL-OCIMUM BASILICUM

	67-1100	SIMPLYHERBS TRY BASIL		Here is a mixture of three basil varieties (Genovese, red and serrated selections) all in one pellet! Fast and easy to create diversified basil plants. Each pellet contains 8 to 14 seeds. Height: 60 to 75 cm. Spread: 30 to 40 cm. Maturity: 28 days. Annual
	67-1105	GREEK		Same characteristics as the sweet basil, but more scented. Annual.
	67-1106	ARISTOTLE (GREEK)		Small leaves, dome-shaped plant habit. Spicy taste and scented leaves. Annual.
	67-1110	SWEET FINE GREEN		Selection of small smooth leaves. Compact plants. Annual.
	67-1112	EVERLEAF EMERALD TOWERS (GENOVESE)		Well-branched variety with short internodes that makes a towering plant with a huge harvest. Grows well in-ground, in containers and hydroponics. Flowers up to 10 to 12 weeks later than the standard basil. Traditional Genovese flavour. Dark green and glossy foliage. Height: 61-91 cm. Spread: 20-30 cm. Annual.
	67-1113	EVERLEAF (GENOVESE)		Our latest Genovese type to bolt. Large leaf variety with shiny, dark green leaves. Very robust against Botrytis and Fusarium with a long shelf life after cutting. Very good handling and transport capabilities. Suitable for fresh markets and processing. Annual.
	67-1117	EMILY (GENOVESE)		More compact basil type adapted for production in containers in spring and winter thanks to its faster growth. Seeds are tested to be free of downy mildew and treated with Apron in addition. Annual
	67-1119	LARGE GREEN GENOVESE		Superb! Large, aromatic and spoon-shaped bright green leaves. Annual.
	67-1120	LARGE GREEN GENOVA		Selection with large smooth leaves. Our most popular selection for bedding plants. Annual.
	67-1121	DEVOTION DMR		An aromatic and sweet Genovese-type basil with excellent downy mildew resistance. Flat to cup shaped leaves that are tender, flavourful and productive throughout the growing season. Slow to bolt. Extremely uniform.
	67-1122	BONNAZZA (GENOVESE)		Genova type that shows a good tolerance to Fusarium and Botrytis. Excellent shelf life after harvest. Recommended for container production. Annual
	67-1123	ELIDIA (GENOVESE)		Variety that stands out for its intermediate tolerance to Fusarium. Short compact plant that produces dark green leaves. For pot production but performs well in the field.
	67-1125	HELIOS, LEMON FLAVOUR		Rapid growth of small leaves. Great lemony basil taste. Annual.
	67-1127	EMMA (GENOVESE)		The next generation of downy mildew tolerant basil varieties, Emma is particularly well suited for indoor pot production. Emma has short internodes and uniform cupped leaves.
	67-1130	LETTUCE LEAF		Crinkled leaves offering a sweet and gentle flavour. Annual.
	67-1131	EVERLEAF THAI TOWERS		Columnar basil that has green leaves with occasional purple flecks and soft purple stems. Aromatic and vibrant licorice flavour. Late bloomer that allows for large quantities of flavourful leaves to be harvested throughout the summer. Annual.
	67-1132	THAI SITA		Exotic, aromatic and licorice-flavoured basil. Annual.
	67-1133	THAI SIAM QUEEN		Medium green colour foliage with purple flowers. Annual.

	Code	Variety	Form.	Description
BASIL-OCIMUM BASILICUM (CONTINUED)				
	67-1162	ROSIE	UNT 	Improved red basil with an intense and constant dark red colour. Compact plants with robust stems. Annual.
	67-1163	CRIMSON KING	UNT 	Red Genovese type basil with an excellent flavour and no green off-types. Improved colour, leave shape and vigour. Annual.
	67-1165	PURPLE BALL	UNT 	Unique basil with a spherical silhouette, compact and bushy, 30 cm high. A bushy plant that adorns itself with small dark purplish-purple leaves. Also bears purple tubular flowers of 1 cm in diameter. Winner of the program Les Exceptionnelles 2018.
BORAGE - BORAGO OFFICINALIS				
	67-1510	BORAGE	UNT 	This plant can reach 30 to 80 cm in height on erect stems. Balm leaves are small, lobe-shaped, serrated and have a lemony perfume. Annual.
BURNET-POTERIUM SANGUISORBA				
	67-7211	BURNET	UNT 	Offers both a nutty and light cucumber taste. Height: 30 cm. Perennial.
CELERY (CUTTING)-APIUM GRAVEOLENS				
	67-1911	CUTTING CELERY	UNT 	Finely cut glossy leaves. To be used as a garnish like parsley, with a delicious celery flavour. For salads, soups and stews. Can also be dried. Annual.
CHAMOMILE - MATRICARIA RECUTICA				
	67-1710	CHAMOMILE COMMON	UNT 	Produces many flowers. Equivalent to the German Chamomile. Height: 40 to 50 cm, width: 15 to 20 cm. Annual.
CHERVIL-ANTHRISCUS CEREFOLIUM				
	67-2510	CHERVIL CURLED	UNT 	Easy to grow. Superior yield in humid soil and shade. Height: 40 to 50 cm, width: 20 cm. Annual.
CHIVES-ALLIUM SCHOENOPRASMUM				
	67-3110	CHIVES IMPROVED THICK	UNT 	Vigorous selection, slow to bolt. Hollow, round, greyish-green leaves. Height: 15 to 30 cm, width: 15 to 20 cm. Perennial.
	67-3116	NELLY	 UNT 	Nice, dark blue-green colour on a fine to medium thick stem. Vigorous and upright growth. Very tolerant to diseases and thrips. Perennial.
	67-3120	GARLIC CHIVES	UNT 	Flat leaves, greyish-green colour. Very distinct garlic taste. Disease resistant. Height: 30 to 40 cm, width: 30 cm. Perennial.
CORIANDER-CORIANDRUM SATIVUM				
	67-3551	SANTO	 UNT 	Upright plants with broad leaves. Very tolerant to bolting. Annual.
	67-3552	SANTO MONOGERM	UNT 	Identical to Santo, but only one germ per seed. Annual.
	67-3556	MARINO	 EXCL 	More compact variety, well adapted for production in containers. Annual.
CUMIN-CUMINUM CYNIMUM				
	67-1912	CUMIN	UNT 	Requires warm cultivation conditions. Height: 45 cm, width: 30 cm. Annual.
DILL - ANETHUM GRAVEOLENS				
	67-0510	DUKAT	UNT 	Uniform plants with bigger umbels than standard selections. Height: 60 to 75 cm, width: 30 cm. Annual.
	67-0511	FERNLEAF	UNT 	Bushy plant, very close internodes and multiple secondary branches. Height: 40 cm, width: 30 cm. Annual.
	67-0513	HERA	 EXCL 	Very late bolting dill, upright growth habit with much leaf mass. Wider harvest window than Bouquet. Exceptional aroma and flavor. Suitable for the fresh market and industry. Annual.
	67-0515	ELLA		Very dark and compact variety, with short hypocotyl, producing a sturdy plant. Shows a very good bolting tolerance. Mostly for container production. Annual.
	67-0517	GREEN SLEEVES		Green Sleeves is resistant to bolting and is adapted for open field or greenhouse production. Excellent growth in very hot conditions. Annual.

	Code	Variety	Form.	Description
FENNEL-FOENICULUM VULGARE				
	67-4311	PRELUDIO FI		An early fennel that can be grown in spring and summer, without having to worry about bolting. It has a superior field holding capacity and the bulb forms two weeks earlier than other hybrids. Annual
	67-4313	DRAGON FI		Medium-fast growing fennel that makes a very round bulb and is very slow to bolt. Can be grown in a wide range of growing conditions. Annual
	67-4320	FLORENCE		Produces medium sized bulbs. Taller and bushier foliage. Tolerant to bolting. Annual.

FENUGREEK-TRIGONELLA FOENUM-GRACUM

	67-4390	FENUGREEK		The leaves are similar to those of a clover, and the plant can reach 60 cm in height. Used for its culinary qualities as well as for its benefits on health. Annual.
--	---------	-----------	---	--

LAVENDER - LAVANDULA

	67-4911	MUNSTEAD		Earlier and more compact version of the common Lavandula angustifolia. Height of 30 cm. Annual.
--	---------	----------	---	---

LEMONGRASS-CYMBOPOGON SP.

	67-3202	LEMONGRASS		Tropical herb favoured in Thai cuisine. Not only is it widely used as a culinary herb but also as a medicinal herb in India. It has long, slender, pale green stems that are thick and fleshy with a subtle citrus flavour. Lemongrass can be dried and ground into powder, or used fresh in soups, curries and stir-fries. This perennial must be grown in warm weather. Height: 60-100 cm, width: 30-60 cm. Annual.
--	---------	------------	---	---

LOVAGE-LEVISTICUM OFFICINALE

	67-5310	LOVAGE		Celery tasting aromatic foliage. All the parts of the plant (stem, root and seed) can be used for cooking. Perennial.
--	---------	--------	---	---

MARJORAM (SWEET)-ORIGANUM MAJORANA

	67-5510	SWEET MARJORAM		Similar to oregano but with larger leaves. Also used as a repellent for insects. Annual.
--	---------	----------------	---	--

MINT-MENTHA SP.

	67-6320	SPEARMINT		The most popular herb because of its mild, fruity taste. Over running plants. Height: 30 to 60 cm. Perennial.
	67-6321	PEPPERMINT		Can reach a height of 50 to 60 cm. Oblong, finely indented leaves with a high content of menthol. Perennial.

OREGANO - ORIGANUM VULGARE

	67-6510	OREGANO		Requires a fertile and humid soil in a sunny area. Perennial.
	67-6520	GREEK OREGANO		Oval, thick leaves with a very spicy flavour. Perennial.
	67-6521	CLEOPATRA		Pretty silver-grey foliage appreciated for its ornamental beauty and flavour value. Cleopatra distinguishes itself from Greek and Italian oregano by a mildly spicy flavour, tinged with a fresh mint coolness. Compact, trailing plant that produces a high yield of leaves that makes it a first-rate container plant. AAS 2015 winner. Height: 25 cm, width: 25 cm. Perennial.

PARSLEY-PETROSELINUM SP.

Curled	67-7126	FOREST GREEN		Dark green extra curled type. Erect and vigorous plants. Holds well in hot weather. Annual
Curled	67-7128	GREEN PEARL		Deep green, dense foliage on sturdy stems. Tolerant to bolting. Annual.
Curled	67-7131	ASTRA		Deep green, triple curled parsley developed to be grown and harvested all year round. Repeated crops after 8 to 10 weeks. Can be used fresh, dried or frozen. Astra is darker than Darki. Annual.
Curled	67-7133	WEGA		Dark green parsley, with a thicker and more solid stem, resulting in a more erect and robust plant habit, making it easier to bunch. Slightly curlier than Darki. Annual
Italian	67-7155	DARK GREEN IMPROVED		Smooth dark green leaves. Productive. Annual
Italian	67-7158	PEIONE		Italian parsley with bigger leaves than standard varieties. Dark green colour and good yield. Intermediate tolerance to downy mildew. Annual
Root	67-7182	ARAT		For fall harvest. 20 to 25 cm white root. Annual

ROCKET CULTIVATED-ERUCA SATIVA

	67-8110	ROCKET		Belongs to the mustard family. Strong aromas with a subtle nutty flavour. Annual.
	67-8113	ASTRO		Slightly serrated leaves with a nutty taste. Slow to bolt. Annual

ROCKET WILD-DILOTAXIS TENUIFOLIA

	67-8123	BELLEZIA		Beautiful variety with an impressive tolerance to downy mildew. Dark green and highly serrated leaves. Excellent bolting tolerance, and excellent shelf life. Annual.
	67-8124	GRAZIA		Improved selection of wild arugula, more compact with uniform, dark green, fine leaves. Slow bolting. The best shelf-life variety available. Annual

ROSEMARY-ROSMARINUS OFFICINALIS

	67-7910	ROSEMARY		Greyish-green woody stems. Leaves are dark green on top and white underneath. Height and width: 90 to 150 cm. Perennial.
	67-7911	SIMPLYHERBS ROSEMARY		Multipellet including 10 to 15 seeds, ideal to easily create nice pots. Minimum germination of at least 80%. Perennial.

RUE-RUTA GRAVEOLENS

	67-8510	RUE		Small greyish-green leaves that grow in clusters. These pungent bitter tasting leaves are used in salads, and oriental dishes. Perennial.
---	---------	-----	---	---

SAGE-SALVIA OFFICINALIS

	67-9110	SAGE BROAD LEAF		Soft, round, greyish leaves with oblong extremities. Height and width: 30 to 60 cm. Perennial.
	67-9112	CERES		Contains a high level of essential oils. Height: 70-80 cm. Perennial.

SAVORY-SATUREJA HORTENSIS

	67-8910	SUMMER SAVORY		Narrow dark green leaves. Height: 30 cm, width: 15 cm. Annual.
	67-8920	WINTER SAVORY		More pronounced flavour than the Summer Savory. Green-grey shiny leaves. Height: 35 to 40 cm, width: 30 to 40 cm. Perennial.

SORREL-RUMEX ACETOSA

	67-6710	FRENCH SORREL		Large, green leaves, tangy, light lemony taste. Height: 30 to 45 cm, width: 20 to 25 cm. Perennial.
--	---------	---------------	---	---

STEVIA REBAUNDIANA

	67-9210	STEVIA		Dry leaves are used as a natural sweetener. Easy to grow. Perennial.
---	---------	--------	---	--

TAGETE-TAGETES FILIFOLIA

	67-9301	DROPSHOT		Annual plant with a sweet taste with a strong licorice or anise flavour. Globular shape with a height of 25-30 cm. Branches freely and produces a dense plant of fine, thin and tender leaves. Annual.
--	---------	----------	---	--

TARRAGON (RUSSIAN)-ARTEMESIA DRACUNCULUS

	67-3910	RUSSIAN TARRAGON		Less pronounced flavour than French tarragon. Height: 60 to 90 cm, width: 30 to 45 cm. Perennial.
--	---------	------------------	---	---

THYME-THYMUS FRAGRANTISSIMUS

	67-9515	ORANGELO		French Thyme with a traditional thyme fragrance and overtones of citrusy orange scent. Useful in the kitchen and very interesting as a fragrant ground cover with small white flower. Forms a low mat and spreads to cover the soil. A hardy evergreen perennial that survives to USDA zone 5. Can be used in containers of all sizes, as ground cover, with perennials or makes an excellent spiller component for mixed containers. Perennial.
--	---------	----------	---	--

THYME-THYMUS VULGARIS

	67-9510	WINTER THYME		Very small, dark green, elongated, oval leaves. Tolerates dryness. Height: 30 cm, width: 50 to 60 cm. Perennial.

	66-0615	SCORPIO FI		20-25 x 12-15	Spring - Fall	–	Large firm fruits. Tolerant to blossom end rot and cracking. Favourably competes with the Macarena variety.
--	---------	------------	---	---------------	---------------	---	---

CUCUMBER

	66-4201	CORINTO FI		20-25	Spring - Fall	IR-CMV/CVVV/Px	Slicer variety that sets well under cool conditions. Produces cylindrical, dark green, shiny and smooth fruits.
	66-4211	PICOLINO FI		12	All year round	HR-Ccu/TLS IR-CMV/CVVV/Px	The shortest of all the mini cucumbers we offer. Produces high quality dark green, shiny fruits. 3-4 fruits per node. The compact, vigorous plant is early to produce.
	66-4220	DR7109CB FI		9	All year round	HR-CMV/Ccu IR-CVVV	Dark green snacking cucumber with good colour and crunch. Improved fruit quality and high yield potential. Compact leaf structure with short internodes. Consistent fruit size throughout the season.
	66-4232	SPLASH FI		14-16	All year round	HR-CVVV/ZYMM/Ccu/Px IR-CGMMV	Crunchy and dense fruits with a good shelf life, grow on strong, vigorous plants that require less labour than comparables. For high wire or umbrella cultivation.
	66-4235	JAWELL FI		14-16	All year round	IR-CMV/CVVV/Px	Mini European cucumber. Produces one to two fruits per nod. Generative variety with nice vigorous laterals. Variety flexible enough for most growing systems.
	66-4236	KATRINA FI		16	Spring - Summer - Beginning of fall	HR-Ccu IR-CMV/CVVV/Px/CGMMV	Robust and productive mini cucumber with an open plant habit. Produces three to four quality fruits per node. Fruits are glossy, nicely ribbed and very uniform.
	66-4239	KALUNGA FI		31-34	Spring - Summer - Fall	HR-Ccu/TLS IR-Px	Early variety of vigorous growth with a good productive plant. Dark green fruit, slightly ribbed.
	66-4241	CAMARO FI		34-40	Spring - Summer - Fall	IR-Px	Vigorous plants. Long and straight, dark green fruit, slightly fluted. Intermediate tolerance to powdery mildew. Tends to be generative but performs very well in a variety of conditions.
★	66-4242	GEORGIA FI		31-36	Spring - Summer	HR-CVVV/Ccu/Px IR-CGMMV/CMV/Cca	English cucumber for spring and summer crop cycles, with improved percentage of medium fruits on a well-balanced, open plant. Extended crop cycle if desired.
	66-4246	DAVIDA FI		30-35	Spring - Summer	HR-CVVV/Ccu/TLS/Px IR-CGMMV/CMV	Strong plant, with an open plant habit, making the crop easy to grow and handle. Good yield potential of high quality fruits in spring and summer. High tolerance to powdery mildew.
★	66-4247	KEYSTONE FI		31-36	Fall - Winter	HR-Cca/Ccu IR-CGMMV/CVVV/Px	English cucumber for winter, and potentially fall crops, with high total yield potential, high percentage marketable fruits on an open plant. Uniform fruit size, dark green, nice ribs and limited bottlenecked fruits.

EMERITE

Code	Variety	Form.	Length (cm)	Tolerances	Description
------	---------	-------	-------------	------------	-------------

PICKLING CUCUMBER

66-4290	EXCELSIOR FI		10-12	HR-Ccu/TLS IR-CMV/CVV/PPx	Pickling cucumber for both open field and unheated greenhouse, for spring and autumn production. Open and vigorous plant habits. Fruits are medium to dark green and grow 10-12 cm.
---------	--------------	---	-------	------------------------------	---

POLE BEAN

66-4301	EMERITE		17-22	—	Tall, vigorous and productive vine. High yields of fancy pods, slim and rounded. Sweet and delicate flavour.
---------	---------	---	-------	---	--

STRAWBERRY

66-3801	DELIZZIMO FI		—	—	At last, a hybrid strawberry plant propagated from seeds! Delizzimo combines the vigour of hybrid plants with the best guaranty that seeds bring to start the season with minimal risk of disease transmission. Germination in 4-7 days. Potting in final containers 4-5 weeks later. Harvest 3-5 months after seeding. Neutral day variety with exceptional taste! For winter production.
66-3803	SORAYA FI		—	—	Specifically bred for both summer and winter production with "particularly strong performance" under LED lights, but also very well suited for a year-round production. Firm and bright fruit ideal for retail. The flavourful strawberries in all seasons.

	TYLCV	Tomato yellow leaf curl	Tomato yellow leaf curl virus
	Va	Verticillium wilt (races)	Verticillium albo-atrum (races)
	Vd	Verticillium wilt (races)	Verticillium dahliae (races)
	Xcv	Bacterial spot	Xanthomonas campestris pv. versicatoria

Tolerance (T)

Ability of a plant variety to endure abiotic stress pressure without severe consequences of its growth, development, appearance and yield.

High resistance (HR)

Ability of a plant to highly restrict the growth and/or development of a specified pest and/or the damage it causes under normal pest pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest pressure.

Intermediate resistance (IR)

Ability of a plant to restrict the growth and/or development of a specified pest and/or the damage it causes but may exhibit a greater range of symptoms or damage compared to high resistant varieties. Plants with Intermediate Resistance will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest pressure.

ENZA ZADEN

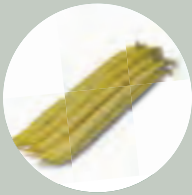

The smallest
difference leads
to the greatest
change

Experience Enza Zaden

Focus is in our genes.

We have a deep focus on a limited number of crops. Our breeding programs offer the best varieties and solutions that add value to all members of the food chain.

Goldstrike Wax beans

- Consistent yellow colored pods without color deviation
- Maximize revenue with excellent field holding and harvest flexibility

No stress with **The Magma Collection®**

Strengthen your supplier reliability year-round.

Sanford

Especially suitable for the early and colder parts of the season with vigorous and strong plants for easy harvesting.

PV-979

Predictable yield in heat and stress with strong upright plants.

new

Spinach All year round high leaf quality spinach guaranteed

Opal

- Pe. 1-19
- Thick texture
- Uniform leaf shape

Mandolin

- Pe. 1-12, 14-16, 19
- Dark color
- Good performance in the heat

Scarlett

- Earlier to market as the variety attains Brix sooner
- Good consumer appeal due to consistent shape and deep red color

Bullock

- Longer supply from storage due to high brix level
- Greater consumer satisfaction as a result of natural sweetness

Red Beet Boost your performance with brix

Seeds of Rijk Zwaan

Sharing a healthy future

Patrona RZ

Resima RZ

Jerada RZ

Patrona RZ

Lettuce

- Large green cos lettuce for fresh and processing markets
- Good field standability and shelf life
- Solid ribs and uniform heads
- Great for machine harvesting
- Strong against bacterial leaf spot

Resima RZ

Red Cabbage

- Dark red cabbage variety with uniform round shape
- High adaptability to different growing regions
- Very suitable for long-term storage
- Compact heads with strong internal structure

Jerada RZ

Carrot

- Early-segment Nantes carrot
- High yielding variety
- Very uniform cylindrical shape
- Good field standability for fresh and bunch markets

Include these varieties in your program!

in the field*

**ORANGE FANCY
(SV5934) F1**

Long cylindrical carrot for cello or slicing. High quality due to its smoothness and straight roots.

SILVERSTAR (SV5904) F1

New cylindrical Berlicum carrot, that reaches a good length and offers a good yield potential.

KILLINGTON (SV1496) F1

Early onion with large size potential, for a high total yielding. Strong root system. Mostly adapted to mineral soils or poor ground. Maturity 94 days.

OVERLOOK F1

Catskill type with a better yield. Higher percentage of large bulbs. Very round, small necks, nice golden colour. Maturity 109 days.

RED GARCIA (SV1608) F1

Dark red onion for long-term storage. Well suited for transplant or direct sowing, with a mild red onion taste. Great vigorous plant. Maturity 117 days.
