CATALOGUE

SEASON **2022**

Proud of our roots since 1928

ONION VENEZIA F1 65-6631

Hybrid from the same genetic background as Cartier and Oneida, with an additional touch of spanish blood, that assures of even higher yield. Storage potential still to be determined.

Maturity: 107 days

Marie-Hélène Monchamp
Representative (Qc) | Norseco

CARROT JEFFERSON (B3188) F1 65-1870

New Emperor type, for the cello-jumbo market. Well filled, uniform and smooth roots. The tops hold up well against Alternaria.

Maturity: 70 days

CARROT NARVIK F1 65-1818

New Nantes variety, very cylindrical and uniform, with an excellent sweet and juicy taste. To trial for bunching or baby carrot.

Maturity: 55 days

Jan van der Heide
Northeast Market Manager | Bejo Seeds

ONION ONEIDA F1 65-6630

A more productive version of Cartier, but a few days later. Excellent yield and very good skin. Storage until March.

Maturity: 98 days

CARROT NAVEDO F1 65-1816

New cross of long, cylindrical, smooth and well-filled roots. Ideal for jumbo and cello types. Excellent uniformity and high yield potential.

Maturity: 63 days

**HARRIS
MORAN**
SEED COMPANY

Lemonade

An eye-catching and delightful yellow pumpkin that adds a beautiful pop of color in any mixed bin.
Relative maturity: 100 days.

Rosie

Rosie is a bicolor sweet corn with an attractive, refined ear, excellent field holding ability, a strong plant, and superior eating quality. Relative maturity: 74 days.

Davinci

Very high fruit quality, determinate plant and extended set for higher yield, combined with crimson gene for great vivid color and appearance.

Red Coral

An exciting new determinate grape tomato with high yield potential, traditional tomato taste, and a comprehensive disease package for open field.

Harris Moran is proud to offer a variety of uniquely attractive, high-quality products for your specific market needs.

Dear producers,

You will agree that the past 12 months have been anything but ordinary. All sectors of our economy have been affected by the pandemic and agriculture has not been spared.

But in hindsight, the fears of food shortages have not materialized. You worked hard to feed our communities, demonstrating your tremendous adaptability and resilience while facing unprecedented labour challenges, changing market demands and climate uncertainties.

NORSECO admires the tremendous work that was done, and recognize what is still ahead, and is proud to contribute, in its own way, by ensuring you a stable supply of quality seeds.

The 2022 catalogue reflects our team's ongoing efforts to identify and present new varieties with greater flexibility, higher yields, increased resistance and, good taste.

We wish you an excellent 2022 season and reaffirm our full collaboration.

Artichoke

	Code	Variety	Form.	Maturity (days) ^T	Tolerances	Description
	65-0212	IMPERIAL STAR		120	–	Produces 6 to 8 artichokes per plant of 7 to 10 cm in diameter.

IMPERIAL STAR

Asparagus

GUELPH MILLENIUM FI

GUELPH ECLIPSE FI

Code	Variety	Form.	Maturity (days)	Description
65-0456	GUELPH MILLENIUM FI		Perennial	Developed by the University of Guelph. Produces 100% male spears and very uniform. Good tolerance to cold temperatures. zHighly productive
65-0457	GUELPH ECLIPSE FI		Perennial	Male asparagus hybrid for green spear production. Bred in Canada, the plant is tolerant of cold winters. It has been noted for thick spears, excellent tip quality, and high fern vigour. Performs on a range of soil types, but prefers sandy and sandy loam soils. Commercial trials have consistently shown Guelph Eclipse to yield higher than all other competing green varieties and, based on research trials, about 20% higher than Guelph Millennium. Early.

Beans

NECKARGOLD

NECKARKONIGIN

SORANO

TEGGIA

Code	Variety	Form.	Maturity (days) ^S	Colour	Length (cm)	Size	Tolerances	Description
------	---------	-------	------------------------------	--------	-------------	------	------------	-------------

BEANS-POLE

65-5305	NECKARGOLD		65	Yellow	23-27	–	1	Consistent and reliable yield. For fresh markets and preserving.
65-5310	NECKARKONIGIN		65	Green	23-27	–	1	Consistent and reliable yield. For fresh markets and preserving.

SHELL BEANS

65-5525	SORANO		80	White to pale yellow	13-14	–	–	Replaces Impero Bianco. Variety resistant to high temperatures. Its green and flat pods will become pale yellow and round at maturity. 7-8 beans/pod.
65-5528	TEGGIA		80	Cream-red	17-20	–	–	Beautiful red and cream shelling bean to be harvested fresh, like a lima bean, or to be left to ripen and dry on the plant for supply of beautiful dried beans. Delicious buttery flavor. Bushy plant, without currents, easier to grow in the northern regions than lima beans. Replaces the Supremo variety.

EXPRESS (PRIMO)

BROAD WINDSOR

ROCDOR

SUNBURST

GOLD RUSH

BAI003

GOLD DUST

LORIOT

Code	Variety	Form.	Maturity (days)	Colour	Length (cm)	Size	Tolerances	Description
------	---------	-------	-----------------	--------	-------------	------	------------	-------------

BEANS-BROAD

65-5410	EXPRESS (PRIMO)	UNT	65	Medium green	16	—	—	Early. Medium size white seeds. Recommended for freezing. 5-6 beans/pod.
65-5420	MAJOR	UNT	75	Medium green	18	—	—	Good pod setting, even under less favourable weather conditions. Heavy pods and a high yielder. 5-6 beans/pod.
65-5432	BROAD WINDSOR	UNT	75	Pale green	18-20	—	—	Excellent yield of large, easy-to-shell pods. For fresh markets. 5-7 beans/pod.

BUSH BEAN-WAX

65-5105	ROCDOR		48	—	18	medium	1, 7	Early season variety. Pick early to avoid it becoming fibrous. Manual harvesting.
65-5125	SUNBURST	UNT	55	—	13-15	medium	1, 5	Appealing, high-yielding variety. Earlier than Gold Rush.
65-5161	GOLD RUSH	UNT	58	—	13-15	medium	1, 4	Long, straight, yellow beans that are easy to pick. Beans are tender and stringless. Extended harvesting, good storage, and fine freezing potential. Suited for mechanical and manual harvesting.
65-5164	BAI003		58	—	14-16	medium	1, 3	An improvement of the Gold Dust variety with its stronger yellow colour, its long and straight pods. Good field holding. Tolerant to Brown Spot.
65-5165	GOLD DUST		58	—	13-15	large	1, 3	High quality main season variety. Long and straight beans held on upright plants for easy picking. Improved tolerance to Brown Spot.

FRENCH GOURMET YELLOW

65-5103	LORIOT		58	—	9-10	fine	1, 5, 7	French beans, fine and delicate, that produce an abundance of tender, juicy and sweet pods. Compact plant. Replaces the Serin variety
---------	--------	--	----	---	------	------	---------	---

TOLERANCES: 1 = Common Mosaic Virus - 2 = Common Wilt - 3 = Brown Spot - 4 = Root Rot - 5 = Halo Blight - 6 = Bean Rust - 7 = Anthracnose - 8 = Beet Curly Top Virus

CAPRICE

Code	Variety	Form.	Maturity (days) S	Colour	Length (cm)	Size	Tolerances	Description
------	---------	-------	-------------------	--------	-------------	------	------------	-------------

BUSH BEANS-GREEN

65-5242	BA0999		52	Dark	11-13	medium	1, 3	Very early bean, perfect to allow you to recover a few days of maturity, when adverse weather conditions prevent you from planting.
65-5257	LEWIS		53	Dark	14	medium	1, 3, 5, 6, 8	Well adapted for seeding from beginning to end of the season. Good performance in humid conditions. Upright, solid plant.
65-5258	LASALLE		53	Dark	15	medium	1, 2, 5	High quality, easy to harvest beans with good yields. Strong, upright plant with easy pick pods. Uniform, straight, quality pods.
65-5248	AFFIRMED		55	Medium Dark	12-13	medium	2, 7, 8	Compares to Caprice. Medium dark green beans at the top of a plant that does not lodge, for a higher percentage of marketable beans.
65-5250	BA1006		55	Dark	14-15	medium	1, 3	Easy to pick BA 1006 produces straight pods in an excellent dark green colour that snap off the plant easily. Under stressful heat conditions, it shows a significantly improved plant habit and it is comparable to Valentino in yield and performance. Suitable both for fresh markets and processing.
♥ 65-5251	BA0958		55	Dark	14-16	medium	1, 3	The only bean in our selection that has intermediate tolerance to Bacterial Brown Spot. Long and straight pods. High yield potential even in hot conditions.
65-5252	MESSI		55	Dark	13-15	medium	2, 6	Beautiful dark green bean on a very strong bush. Straight pods set well off the ground and are easy to pick. Good shelf life.
♥ 65-5256	SYBARIS		55	Dark	14	medium	1, 6	Very good uniformity and exceptional quality. The pods set high in the plant and off the soil surface for a clean and easy harvest. Fresh or processing markets.
65-5259	PV857		55	Dark	12-15	Medium-Large	1, 6, 7	Consistent high yields. Produces strong heat tolerant plants with dark, fleshy, straight pods.
65-5254	JAGUAR		57	Very dark	14-15	medium	1, 6, 7	Very dark variety that likes heat. Shiny pods pick very easy and clean and have an excellent taste.
65-5255	CAPRICE		57	Medium dark	14	medium	1, 2, 3, 5, 7	Straight, smooth pods that have slow seed development, a fine eating quality and an attractive medium dark-green colour. Upright plant that does not lodge and that sets its pods mid high which lends well to both hand and mechanical harvest.

FRENCH GOURMET-GREEN

	65-5202	MASCOTTE PATIO COLLECTION		50	Medium dark	11-13	fine	1, 5, 7	Compact plant ideal for patio containers and window boxes, which can also be grown in garden beds. Beautiful white-blooming time followed by an abundant crop of small, fine, crunchy and good tasting beans. 2014 AAS winner.
	65-5206	HAWAII		58	Medium green	12-13	fine	1, 5, 7	Small extra fine bean of beautiful quality. The cordless pods, of a medium green colour, are straight and crispy in the mouth. Barely cooked, it is tender under the tooth. The plant is robust and produces an abundant harvest. Hawaii has its place in every garden. Replaces the Banga variety.

ITALIAN

65-5272	TAPIA		59	Medium	13-14	large	1, 6	Flat bean. A better version of the variety Ebro, thanks to thicker and less fibrous pod, and improved flavour. An excellent Romano type variety.
---------	-------	--	----	--------	-------	-------	------	--

BUSH BEANS-PURPLE

65-5281	AMETHYST		58	Purple	12-14	medium	1	Remarkable dark purple colour on the outside and green on the inside. Nice unique appearance and excellent taste.
---------	----------	--	----	--------	-------	--------	---	---

SOYA EDAMAME

	65-2670	KARIKACHI NO.3 FI		90	—	—	—	—	Very tall (60 to 75 cm), upright plants that are well branched, sturdy and vigorous. Produce a high yield of large, plump pods averaging three seeds each. Strong resistance to lodging. Requires a well-drained soil.
--	---------	-------------------	--	----	---	---	---	---	--

TOLERANCES: 1 = Common Mosaic Virus - 2 = Common Wilt - 3 = Brown Spot - 4 = Root Rot - 5 = Halo Blight - 6 = Bean Rust - 7 = Anthracnose - 8 = Beet Curly Top Virus

MERLIN FI

ROBIN FI

VULTURE FI

TAUNUS FI

GUARDSMARK

TOUCHSTONE GOLD

BOLDOR

AVALANCHE FI

CARILLON

	Code	Variety	Form.	Maturity (days) ^S	Foliage colour	Tolerances	Description
	65-0827	BABYBEAT FI		55	Bright green	–	True baby beet that forms a nice round shape with a small tap root and smooth skin early on in growth. Well proportioned even when young. Good field holding ability: will stay small. Attractive small tops.
★	65-0834	BULLOCK FI		55	Dark green	–	Round, uniform and very smooth roots with a high brix content. Healthy, erect foliage with a small attachment point. Small taproot. No zoning.
	65-0835	RED CLOUD FI		55	Bright green	–	Variety highly comparable to Red Ace. Dark red interior. Perfectly round and appealing with petioles grouped together. High yield and high sugar content.
	65-0836	CAMARO FI		55	Dark green	–	High marketable yield of great quality roots. Uniform size and shape. Nice and thin attachment of dark green, upright foliage.
♥	65-0840	RED ACE FI		55	Bright green	2	Uniform internal colour. Sweet and tender root. High yielders.
	65-0842	MERLIN FI		55	Bright green	–	Roots of the same quality as those of the Red Ace variety, but with a sugar content 12-15 % higher than other varieties. Very productive.
	65-0843	ROBIN FI		55	Dark green	–	Perfectly round beet, well adapted for bunching or production of baby beets, due to its uniform globe shape at an early stage of development. It has a very fine tap root, and a strongly tied foliage. Can also be used for processing.
	65-0855	VULTURE FI		58	Dark green	–	Semi-long cylindrical root with a small crown and a small tap root. Mainly recommended for processing because it has a higher output potential than other beet varieties because of its longer shape. Good sweet taste.
	65-0850	DETROIT SUPREME		60	Dark green	1, 2	A true value for a long-time. Dark red inner flesh and smooth root. Good top attachment. For fresh consumption, pickling and canning.
	65-0880	TAUNUS FI		60	Dark green	–	Replaces Rodina. Uniform, cylindrical root. Extremely smooth skin, easy to peel and clean, for uniform slicing.
	65-0887	GUARDSMARK		60	Medium green	–	Improvement of the variety Chioggia by its better vigour. Same red-purple colouring with white zoning.
♥	65-0889	TOUCHSTONE GOLD		60	Bright green	1, 2, 4	Round root with an orangy exterior and a vibrant yellow interior. Very sweet taste. Little zoning. Strong foliage.
	65-0890	BOLDOR		60	Bright green	2	Interesting yellow beet. Bright yellow interior colour. Smooth skin, of good quality as the Touchstone Gold. Tops are tolerant to Cercospora and very healthy. Ideal for bunching.
	65-0895	AVALANCHE FI		60	Green	2	White beet with round bulbs and a snow-white flesh. Very sweet in taste. Healthy tops with good resistance to diseases. 2015 AAS Winner.
	65-0854	CARILLON		75	Bright green	–	Elongated shape. Perfect for processing and slicing. Resistant foliage.

TOLERANCES: 1 = Downy Mildew - 2 = Cercospora - 3 = Powdery Mildew - 4 = Rhizoctonia

BLUE WIND II FI

KINGDOM FI (FBC 6317)

JET DOME FI

EASTERN CROWN FI

	Code	Variety	Form.	Maturity (days) ^T	Harvest season	Head shape	Use	Description
	65-1402	CASTLE DOME FI		69	Spring	Dome	Bunching, Crown	Very early, compact, open plant. Good field holding ability. Needs good fertilization for maximum yield.
	65-1401	BLUE WIND II FI		70	Spring - Fall	Semi-dome	Bunching, Crown	For the beginning of the season. Improvement of the variety Blue Wind because of its better field holding and heat tolerance.
	65-1411	CHIEF NO. 2 FI		70	Spring - Summer	Dome	Bunching, Crown	Early variety with good heat tolerance. Broccoli of bluish colour free of hollow heart.
	65-1417	KINGDOM FI (FBC 6317)		71	Spring - Summer	Dome	Crown	Impressive variety that stands out for its very good uniformity in maturity and in shape. Dark green heads with medium size beads, firm and well domed on a small, open plant. A very high quality for your season start and end.
	65-1405	JET DOME FI		72	Spring - Fall	Semi-dome	Bunching	For a nice season start. Can replace Blue Wind II. Heads are high on the plant, with the same colour but a little more domed than Blue Wind II. Medium size beads. Can be bunched.
	65-1425	EASTERN CROWN FI		74	Summer - Fall	Dome	Crown	Outstanding variety with blue-green heads, small fine beads and excellent heat tolerance. Compact plant with good yield of for the crown cut market.

	Code	Variety	Form.	Maturity (days)	Harvest season	Head shape	Use	Description
	65-1406	BR 16 FI		75	Spring - Fall	Dome	Bunching, Crown	Variety with a compact plant and a very good tolerance to heat.
	65-1455	EVEREST FI		75	Spring - Summer	Dome	Bunching	Vigorous growth during cool periods when other varieties slow down. Concentrated harvest. Good tolerance to downy mildew caused by Peronospora.
	65-1463	LIEUTENANT FI		75	Spring - Fall	Dome	Bunching	Produces a good quality, medium green head. Compact, strong plant. Adapted to warm weather.
	65-1408	BC 1764 FI		76	Spring - Fall	Dome	Bunching, Crown	Variety offering a good heat tolerance. Good alternative to Green Magic, with a lower incidence of cat eye.
	65-1440	EMERALD CROWN FI		80	Summer - Fall	Dome	Crown	Firm heads with small beads. Does not turn purple when cold.
	65-1450	GREEN MAGIC FI		80	Summer - Fall	Dome	Bunching, Crown	Uniform variety with medium beads. Good tolerance to heat.
	65-1470	CORATO FI		82	Spring - Summer	Dome	Bunching, Crown	Variety that stood out of the trials this last summer, due to its nice dark green colour, excellent weight and good heat tolerance.
	65-1480	BELSTAR FI		83	Fall	Dome	Bunching, Crown	Produces very heavy, high-domed heads. Better suited for cooler periods.
	65-1477	EASTERN MAGIC FI		84	Spring - Summer	Dome	Bunching	Multi-use variety, a little earlier than Imperial and showing excellent performance. High-domed head with great blue-green colour and good heat tolerance. The head is high on a tall plant for an easy harvest.
	65-1472	DIPLOMAT FI		87	Summer - Fall	Dome	Bunching, Crown	Replaces Decathlon. Excellent tolerance to heat.
	65-1471	IMPERIAL FI		88	Summer - Fall	Dome	Bunching, Crown	Diplomat type. Tolerates heat. Low percentage of hollow stems.

GREEN (CONTINUED)

	65-3550	BAJONET Y.R. FI		60	1.5-1.8	12-16	1	Earlier Bronco type. Its bright green colour makes it a fresh and clean appearance. Very erect plant habits, good clearance from the soil. Produces heavy uniform heads.
	65-3554	GALLICAN Y.R. FI		60	2.3-3.6	12-14	1	Appealing round, grey-green heads with consistent size and upright leaf type. Excellent cabbage flavour. Highly uniform plant growth and quick maturity.
	65-3547	TOPMA Y.R. FI		65	1.4-2.2	16	1	Vigorous plant with very nice wrapper leaves. Strong, compact-framed heads in a blue-green colour with good wax. Very good field holding ability. Good performance under difficult conditions.
	65-3548	BRONCO Y.R. FI		65	1.8-2.2	14-16	1, 3, 4	A great choice! Bronco's sweet and crunchy texture is very versatile in the kitchen. Well wrapped, uniform head. Also tolerant to black rot and tip burn
	65-3549	XTREME VANTAGE Y.B.R. FI		65	1.8-2.2	14-16	1, 4, 5	New cabbage variety showing very good uniformity in the field. Heads have a nice blue colour and stand high above ground for an easy harvest and a clean plant. Excellent wrappers. Very good disease package, showing a strong resistance against black rot and a strong tolerance to tip burn. Leaves are more tender than most comparable variety at same maturity.
	65-3551	BOTRAN Y.B.R. FI		65	1.6-2	14-16	1, 5	Bronco/Grand Vantage type that combines the high quality of Bronco to the good wrappers of Grand Vantage. Stands out due to its high tolerance to black rot.
	65-3552	VICEROY Y.R. FI		70	4-5	12-16	1, 3, 4	Blue-green cabbage for fresh markets and processing, depending on the spacing it is given in the field. Tolerance to tip burn and thrips. Good field holding ability.
	65-3553	GRAND VANTAGE Y.R. FI		70	2.5-2.7	14-16	1	Bronco type with several bluish-green wrapper leaves. Dense interior, small core. Excellent vigour and good field holding.
	65-3546	DRAGO FI		75	1.4-1.8	14-16	—	Round and dense heads with short core. Very uniform in size for a perfect box count. Heads are high from the ground and well wrapped. Good field holding.
	65-3560	TYPHOON Y.R. FI		90	3-4	—	1, 3	The size of a winter cabbage with a fall maturity! Large, dark green, dense heads on a clean, upright plant. Very good thrips resistance. Healthy look.
	65-3561	KORSUMA Y.R. FI		90	1.5-3	16	1	Very vigorous plant. Round, very dense head with an intense green colour. Excellent field holding ability for a longer harvest window. Very attractive variety. Mild, sweet taste.

TOLERANCES: 1 = Fusarium Yellows - 2 = Black Speck - 3 = Thrips - 4 = Tipburn - 5 = Black Rot - 6 = Bacterial Spot - 7 = Black Leg

FLAT

65-3586	GREEN LUNAR Y.R. FI		80	1,5-2	–	1, 5	Flat cabbage that grows on uniform semi-erect plants. The globe heads are of a beautiful bright green colour, weigh between 1.5 k and 2 k, and are tolerant to bursting. Autumn harvest recommended.
65-3578	GUNMA Y.R. FI		85	1,8	–	1, 3	Flat cabbage with thin leaves that detach very easily. Excellent for cabbage rolls or wraps. Surprising sweet taste and tender texture.

POINTED

65-3570	CARAFLEX Y.R. FI		63	0,4-1,4	–	1	To be used for the production of miniature pointed green cabbages. Tender and sweet tasting. Its unique shape makes it an original choice.
---------	------------------	--	----	---------	---	---	--

RED

	65-3416	ALFARO Y.R. FI		62	0,9-1,4	16-18	1	Improved version of the Primero variety. Nice round heads, early in maturity, dense and well filled, with a short core. Good wrappers. Very uniform in size and shape and almost no inbred. Sweet taste.
	65-3418	PRIMERO Y.R. FI		62	0,9-1,4	16-18	1, 3, 4	Well wrapped, dark red head. Gives a lovely mini cabbage if planted at high density. Good resistance to splitting. Small core.
	65-3419	KOSARO Y.R. FI		62	0,9-1,4	16-18	1, 2, 4	Primero type that is tolerant to Fusarium Yellows. Well covered heads, very uniform.
	65-3420	RANCHERO Y.R. FI		75	1-1,6	14-16	1, 4, 7	Better wrapper leaves than Primero. Resistant to splitting.
	65-3423	RUBY PERFECTION FI		80	1-1,6	14-16	6	Deep-red, globe-shaped heads with very good wrappers and good uniformity. Very late to burst and cold and heat tolerant.
	65-3439	RED CHARISMA FI		80	1-3,5	14-16	–	Oval shape and wine red interior. Very good field holding ability
	65-3438	CAIRO Y.R. FI		85	1,4-1,6	14-16	1, 2, 4	Round, firm and heavy head. Well wrapped. For fresh markets.

TOLERANCES: 1 = Fusarium Yellows - 2 = Black Speck - 3 = Thrips - 4 = Tipburn - 5 = Black Rot - 6 = Bacterial Spot - 7 = Black Leg

GREEN

	65-3610	STORAGE # 4 Y.R. FI		92	2-2.5	12-14	1, 3, 4	Variety that produces a high yield of large cabbages. Excellent wrapper leaves. Holds well in the field under stressful weather.
	65-3615	EXPECT Y.R. FI		92	2-2.6	12-14	1, 3, 4	Lennox type, for long-term storage. Holds its freshness appearance. Tolerant to thrips.
	65-3618	HAZELTON Y.R. FI		92	2-2.5	14-16	1, 3	Improved Loughton. Higher yield, better uniformity and better wrappers.
	65-3619	LOUGHTON Y.R. FI		92	2-3	14-16	1, 3	Cabbage mostly used for the boxing market. Distinguishes itself with its wrapper leaves, nice round head and attractive blue-green colour.
	65-3620	LENNOX FI		92	2-2.5	12-14	2, 4	Well-known variety for its sweet taste. Well suited for either fresh market or storage. Round, solid heads with smooth wrapper leaves. Very productive, showing vigorous, uniform growth. Will hold its green colour very well in storage. Potential of large size cabbages.
	65-3623	REACTION Y.R. FI		92	2-2.25	14-16	1, 4, 6	Smaller size cabbage. Very well wrapped, with a small core. Can be used for the production of mini cabbages if sown at high density.
	65-3641	BUSONI Y.R. FI		98	2.2-3.5	12-14	1	Very vigorous plant. Keeps its green colour during a long time in storage.
	65-3644	ULTRA VANTAGE Y.R. FI		100	2.5-3.5	14-16	1	Storage type cabbage with many strengths including large head size and a dense core. Robust and hearty plant habit, strong stalk and a high head position for a clean and easy to harvest head. Excellent performer in the field.
	65-3645	SHERRINGTON Y.B.R. FI		100	2.5-3.5	14-16	1, 5	Big cabbage, similar to Loughton, only a little bigger. Long-term storage.
	65-3650	BARTOLO FI		100	2-3	12-14	2, 4	Popular variety known for its quality and uniformity. Can produce large cabbages. Similar to Lennox with superior storage ability.

TOLERANCES: 1 = Fusarium Yellows - 2 = Black Speck - 3 = Thrips - 4 = Tipburn - 5 = Black Rot - 6 = Bacterial Spot - 7 = Black Leg

MINI

	65-1803	CARVORA FI		50	14-16	1	Short	Mineral and muck soil	Good alternative to Mokum for Nantes tray production. Very smooth and very uniform in length and shape. Will keep its uniformity even at lower density.
	65-1804	ADELAIDE FI		50	4-6	1	Short	Mineral and muck soil	Great for bunching and marketing as baby carrots
	65-1805	LITTLE FINGER		50	10	1	Short	Mineral and muck soil	A small root variety, perfect for baby carrots, preserves or pickling. Deep orange root with smooth skin. Great taste.
	65-1807	MOKUM FI		50	14-16	1,5	Medium	Mineral and muck soil	Very uniform Nantes carrot, perfect for the mini Nantes production. One of the best-tasting varieties on the market.
	65-1810	ADANA FI		50	14-16	1,5	Medium	Mineral and muck soil	Small Nantes carrot with nice shape and excellent quality. Stronger foliage than other carrots in the same category. For mini Nantes production.
	65-1801	ATLAS		56	4-6	2,5	Short	Mineral and muck soil	Replaces Parmex. Mini, round "Paris market" type root, with strong foliage that makes harvesting and bunching easier.
	65-1875	CARACAS FI		56	10	4	Medium	Mineral and muck soil	Chantenay type recommended for the production of cone-shaped mini carrots.

NANTES-TOUCHON

	65-1812	GOLDFINGER FI		50	17-20	1,5	Short	Mineral and muck soil	Early Nantes that produces high quality roots, uniform, smooth and attractive. Strong tops and dark orange colour. Sweet flavour and crisp texture. Tolerant to Alternaria and aster yellows.
	65-1808	BOLERO FI		55	15-20	2-2,5	Long	Mineral and muck soil	Smooth and cylindrical root with round ends. Maintains its superior flavour after months of storage. Sturdy foliage, tolerant to Cercospora and Alternaria.
	65-1809	PRESTO FI		55	15-17,5	2-2,5	Short	Mineral and muck soil	Smooth, cylindrical root that sizes up fast. Early harvest. Exquisite taste.
	65-1813	SPEEDO FI		55	18-20	3	Short	Muck soil	Early Nantes with a very good quality. Smooth and uniform cylindrical roots. Rounded tips at maturity. Erect foliage with a good aptitude for top lifting.
	65-1815	NAPOLI FI		55	20-22	2-2,5	Short	Mineral and muck soil	Good sweet taste. Ideal for bunching or cello. Early cylindrical root.
	65-1817	NAVAL FI		55	20-22	2-2,5	Short	Mineral and muck soil	A good alternative to Napoli and to Apache. Nice sweet taste and excellent yield because of its cylindrical shape and rounded tip. Healthy deep green tops, perfect for bunching and cello. Remarkable uniformity.
	65-1818	NARVIK FI		55	18-20	2-2,5	Short	Mineral and muck soil	Refined, 18-20 cm long, very cylindrical roots. Strong foliage attachment. Refined crown with no green shoulder. Good, sweet taste. Good washing quality. Can be used as a bunching Nantes and as baby carrots.
	65-1826	YAYA FI		60	16-19	3	Short	Mineral and muck soil	Nantes type, smooth, crunchy and very sweet. A little shorter than other Nantes, Yaya redeems its little sin with a superior taste.
	65-1830	NANTES IMPROVED		62	18-20	2,5-3	Short	Mineral and muck soil	Popular variety. Known for its sweet taste.

CELLO-JUMBO

	65-1816	NAVEDO FI		63	25-28	3-4	Medium	Mineral and muck soil	Imperator genetic mixed with Berlicum blood, leading to a uniform crop of long, straight and smooth roots, well filled to the bottom, giving a higher yield.
	65-1824	CELOBUNCH FI		63	23-28	3-4	Medium	Muck	Early cello/jumbo type for muck soil. High yield potential. Tolerant to Alternaria.
	65-1840	ENVY FI		63	25-28	4-4.5	Long	Mineral and muck soil	Early Cello/Jumbo type. Earlier than Apache. Smooth and uniform carrot. High yield potential.
	65-1823	CAROCHOICE FI		65	25	3-4	Long	Mineral	Very nice, smooth carrot. Deep orange, almost coreless, tapered roots. Good choice for mineral soils.
	65-1837	ORANGE BLAZE FI		65	25-28	3-4	Medium	Mineral and muck soil	New cello/jumbo from Seminis. A complement to SV2384 and Enterprise, offering a higher ratio of jumbo size carrots. For both mineral and muck soils.
	65-1842	ISTANBUL FI		65	23-26	3-4	Long	Mineral and muck soil	First Imperator carrot from Bejo. Shows very good uniformity, both in mineral and muck soils.
	65-1845	SV2384DL FI		65	28-30	3-4	Long	Mineral and muck soil	Good quality roots, for both mineral and muck soil. Very strong tops.
	65-1870	JEFFERSON (B3188) FI		70	25-28	3-4	Long	Mineral and muck soil	New Imperator type, for the cello-jumbo market. Well filled, uniform and smooth roots. The tops hold well against Alternaria.
	65-1871	ENTERPRISE FI		70	25-28	3-4	Long	Mineral and muck soil	Mid-season variety. Strong tops, outstanding for its quality and uniformity. Excellent storage ability.
	65-1887	VOLCANO FI		80	22.5-27	4-4.5	Long	Mineral and muck soil	Carrot for all soil types. Strong foliage. Cylindrical shape that gives an excellent yield. Roots are resistant to breakage during harvest and store well. Also strong against Alternaria.
	65-1843	JACINTO FI		85	23-25	3-4	Long	Mineral and muck soil	Superior quality roots that are smooth, straight, sweet and have a tapered tip. Dark orange exterior with indistinct core. Strong, erect, dark green foliage with small attachment.

WHITE

	65-3875	FIORETTO 60 FI		60	Florets	Large	Spring - Fall	New long-stem cauliflower harvested as sticks. Each stick weighs between 10 and 20 grams. Sweet taste with a smoother texture than with traditional cauliflower.
	65-3812	MINUTEMAN FI		68	Dome	Medium	Spring - Fall	Exceptional, early, uniform and productive variety. Dense head.
	65-3830	CLARIFY C.R. FI		68	Dome	Medium	Spring - Fall	Good tolerance to heat and tip burn. Very good self-blanching. Resistant to club root. Nice, pure, compact white head.
	65-3832	MONEERA FI		68	Dome	Medium	Spring	Dense and tight curds on heads that will thrive even in hot and dry conditions. Uniform harvest.
	65-3831	MARDI FI		72	Dome	Large	Spring - Summer - Fall	Early cauliflower that prefers northern climates. Produces uniform white buds, weighing on average from 600 g to 800 g. Erect and vigorous plant with partially self-covering foliage that protects the florets.
	65-3814	AEROSPACE FI		75	Dome	Large	Summer - Fall	High quality, dense heads that need to be tied. Large calibre (9) Good tolerance to hair growth and no riceyness.
	65-3815	FREEDOM FI		75	Dome	Upright	Summer - Fall	CMS version of Fremont. Very uniform and concentrated production.
	65-3826	TWISTER FI		79	Dome	Medium	Summer - Fall	Named for its robust spiral-shaped internal wrapping leaves. Twister is a uniform white cauliflower, dense, tightly packed, and heavy. It is a mid-season variety with a uniform harvest. Twister seems to prefer heavy soils.
	65-3818	FLAMENCO FI		80	Dome	Large	Summer - Fall	New high quality cauliflower that produces a tight head and is quite uniform in maturity. Good tolerance to hairyness and no riceyness.
	65-3824	MELROSE FI		80	Dome	Medium	Summer - Fall	Quick growing summer variety. Very dense, nice quality, white head. Good self-covering foliage for its speed of growth. Impressive tolerance to tip burn.

BROCCOFLOWER

	65-3873	VITAVERDE FI		75	Dome-Lime green	Large	Summer - Fall	Versatile, easy-to-grow variety. Nice-looking, compact head. Strong, vigorous, fast-growing, upright plant.

BICOLOUR SESH2

65-1119	VITALITY F1		66	14-16	18	45	155	Good tasting, early corn. Well filled and well covered ears. Good vigour in cold soil.
65-1139	SCI102 F1		66	16	20	50	180	Variety that stands out because of its vigour and its exceptional taste. High quality ear and very high yield.
♥ 65-1118	SWEETNESS F1	UNT	67	16	20	45	180	The most vigorous and early sweet variety on the market. Its emergence in cold soils is perfect and the taste is tender and very sweet.
65-1123	LATTE F1	UNT	68	12-14	19-20	40	140	An interesting alternative to the Fastlane variety. Darker plants, better vigour and more taste.
♥ 65-1150	PROFIT F1	UNT	72	14-16	20	55	210	Appreciated by growers because of the vigour of its emergence, its well-filled tip and its good ear cover. Appreciated by consumers because of its sweet taste and the tenderness of its kernels.
65-1175	ALLURE F1	🌿	74	16	20-21	65-70	210	Variety recognized for its solid plant, good husk cover and great taste. Sweet and tender kernels. Needs a warm soil at the plantation.
🇦 65-1176	KRISTINE F1		74	16	20-22	50	180	Dark green husks. Clean plants without side shoots.
65-1140	UTOPIA F1		76	16-18	20-21	75	210	A variety similar to Montauk, with a better yield. 18-20 rows of small, sweet and juicy kernels. Excellent emergence. Tight husks and a lot of flag leaves.
65-1138	MONTAUK F1	UNT	78	16-20	20-22	50	205	A big ear with excellent eating quality and good vigour. Very sweet taste.
65-1189	ESSENCE F1	UNT	78	16	20-21	75	210	Refined ears with strong tip fill. Very tender with high sugars. Similar to Providence.
♥ 65-1190	PROVIDENCE F1		79	18	20	45-55	180-200	Improved version of Serendipity, with high tolerance to rust.
65-1173	PRIMUS F1		80	16-18	21	75	190	Variety similar to Providence but sweeter and with a longer shelf life. Long slender ears with very smooth kernels. For memorable corn roasts.
♥ 65-1187	CAMEO F1		80	18	23	65	220	The best variety to end your season. Vigorous and rugged plants. Excellent yield of savoury ears.

BICOLORE SESH2 PLUS

♥ 65-1129	EVOLUTION F1		70	16	20	50	190	Excellent variety with an attractive outside package, good cold soil emergence and an outstanding eating quality.
-----------	--------------	--	----	----	----	----	-----	---

BICOLOUR QUAD SWEET

65-1124	TEMPTRESS F1		70	16	20	50	190	Very sweet variety called "Quad Sweet" because of its high content in Sh2 kernels in the cobs. Same maturity as Temptation but the ears are bigger and sweeter, with an excellent germination and good stand in the field.
65-1174	NECTAR F1		72	18	20	70	185	Second Quad Sweet introduction from Crookham. Sweet and creamy, full season corn. Very good germination. Well filled and well-covered cob. Sturdy plant.

Mycorrhizae treatment : order before January 15th.

BICOLOUR SH2

♥	65-1152	SOLSTICE FI		72	16	18-20	50	175	Earlier Nirvana type. Particularly sweet and tender variety. Strong emergence. Strong tip fill. Stands out by its quality, just like Nirvana.
	65-1165	RAQUEL FI		72	16-18	20	70	180	High quality ears with a good field holding ability and an excellent yield potential. Superb eating quality. Ears are tightly covered on clean, sturdy plants.
♥	65-1166	ROSIE FI		74	16-18	20	70	180	Beautifully refined ear and kernels. Superior eating quality. Attractive, with large size ears. Excellent field holding ability. Strong, beautiful plant.
	65-1167	FLAGLER FI	UNT	76	16-18	20	75	180	Superior field vigour and exceptional eating quality. Large ears with clean and bright kernels with a remarkable sweet, fruity taste.
	65-1163	AMERICAN DREAM FI		77	16-18	20	55	180	American Dream produces vigorous, healthy plants with cobs that have good tip fill of bicoloured kernels. Very tender and super-sweet kernels. Excellent germination. 2018 AAS winner.
★	65-1162	SKYRAY FI		78	18-20	20	60-70	187	A nice large ear with excellent tenderness and sweet taste. Great tip cover and tip fill in an attractive green husk package. A high quality shipper with a small shank and an easy snap. Good disease resistances.
	65-1164	CABO FI		78	16-18	20	70	185	Good yield potential. Sweet, smooth, juicy kernels. Nice ear filling. Good field holding ability for more harvest flexibility.

BICOLORE SH2 - NIRVANA SERIES

♥	65-1156	NIRVANA FI	UNT	75	16	20	61	190	The cold soil vigour and extremely sweet and tender taste are two main characteristics of this variety.
	65-1158	EPIPHANY FI		75	16-18	20	60	190	From the Nirvana series, Epiphany offers a better germination, a better harvest ease and a better tolerance to diseases. Indeed, Epiphany shows, among others, a good tolerance to common rust. Still with its exceptionally sweet and tender taste.

YELLOW SESH2

	65-1322	CAFÉ FI		68	14-16	20	53	175	First synergistic yellow variety of this early maturity. Good size ears, medium kernels and excellent taste.
♥	65-1340	HONEY SELECT FI		78	16	20	60	190	Great sweet taste and tender kernels. For fresh markets.

ENGLISH

	65-4250	BURPLESS 26 F1		65	38-40 x 4,6	Monoecious	3, 6	Digestible type. Tender non-bitter taste. Very productive. High yield.
	65-4254	ENGLISH TELEGRAPH		65	38-45 x 4,5	Monoecious	4, 6	Digestible type. Pleasant, non-bitter taste. Open pollination variety. Recommended for retail sales.

LEBANESE

	65-4247	MERCURY F1		53	14-16 x 3	Gynoecious	3, 5, 6, 9	Finally, a Lebanese cucumber with a better disease package. It's earliness, dark green colour and crispy sweet fruits makes it a variety to grow without hesitation.
	65-4230	MAGIC F1		55	14-16 x 3	Gynoecious	4, 5, 9	Beit Alpha type for the field and greenhouse. Slightly spiny dark green fruit.
	65-4231	BABYLON F1		55	14-16 x 3	Gynoecious	3, 6	Cylindrical, ribbed fruit with fine white spines. Babylon is unbelievably sweet, crunchy and thin-skinned. Superb quality.
	65-4233	GREEN LIGHT F1		55	7-10 x 3	Parthenocarpic	–	A mini parthenocarpic cucumber offering a high yield of attractive fruit, early ripening and excellent taste without bitterness. The plant can produce up to 40 thornless fruits. For an optimal harvest, stake or climb the plant and harvest the fruits between 7 cm and 10 cm long.
	65-4276	MINI MUNCH		55	10 x 3	Gynoecious	–	Parthenocarpic cucumber to be grown in a container or in the garden on a trellis. Early high yield, very thin skin and crispy texture.

SLICING

	65-4229	LISBOA F1		50	18 x 5	Parthenocarpic	3, 4, 8, 6	Extra early, parthenocarpic variety, which means it doesn't need bees for pollination, but should be isolated if grown outside (can also be grown in a high tunnel). Seed cavity does not contain seeds. Impressive yield of two fruits per internode.
	65-4260	SWEET SUCCESS F1		50	30-36 x 6	Gynoecious	3, 7, 8	Similar to Japanese varieties said to be digestible, but resembling Marketmore. Tender, non-bitter taste. Adapted for greenhouses and outdoor cultivation. Parthenocarpic variety.
	65-4214	BRISTOL F1		52	20 x 5	Gynoecious	1, 2, 3, 4, 5, 6, 7, 8, 9	Early variety. Fruits stay firm, straight and uniform all season long. Nice dark green colour. Incredible yield right at the beginning of the season. Very good disease packages and tolerance to Downy Mildew.

TOLERANCES: 1 = Anthracnose - 2 = Angular Leaf Spot - 3 = Cucumber Mosaic Virus - 4 = Downy Mildew - 5 = Zucchini Yellow Mosaic Virus - 6 = Powdery Mildew - 7 = Target Leaf Spot - 8 = Scab - 9 = Watermelon Mosaic Virus - 10 = Papaya Ring Spot - 11 = Cladosporiose

Flowering HABIT - Gynoecious: Referred to when having 100% female flowers on the same plant. **Monoecious:** Referred to when both male and female are on the same plant.

SLICING (CONTINUED)

	65-4217	ROCKINGHAM F1		54	21 x 6	Gynoecious	1, 2, 3, 6, 8	Variety that replaces Speedway favourably by its dark, smooth and uniform fruits. Tolerant to Powdery Mildew.
 	65-4218	SPEEDWAY F1		54	20 x 6	Gynoecious	1, 2, 3, 6, 8	High yield of dark colour cucumbers. Very uniform fruits on moderately vigorous vines. This variety is popular because of its earliness, yield and disease resistance.
 	65-4258	PETICUE F1		54	18-23 X 6	Monoecious	–	Short vining/bush slicing cucumbers bred to stay compact with the vines using only 1/3 of the space of a standard variety. For the best tasting, crunchy-sweet cues, pick the green fruits at 18 - 23 cm. Harvest regularly to increase the yield.
	65-4220	DASHER II F1		55	20 x 6	Gynoecious	1, 2, 3, 6, 8	High production of very dark first quality fruits. Keeps its shape and colour in high temperatures. Constant quality and uniformity.
	65-4266	MARTINI F1		55	13-15 x 4	Monoecious	6	Small cucumber characterized by its white exterior colour, early maturity and thin fruit skin. Sweet and crunchy fruit, without any bitterness, that do not need to be peeled. Tolerant to powdery mildew.
	65-4238	MARKETMORE 70		63	23 X 6,5	Monoecious	1, 2, 4, 6, 8	Mid-early variety that produces long dark green fruits with white spines. Productive and flavourful.
	65-4240	MARKETMORE 76		63	23 x 6,5	Monoecious	1, 2, 4, 6, 8	Straight, flavourful fruit. Very popular open pollination variety. Productive. Recommended for retail sales.

SPECIALTY

 	65-4280	MOUSE MELON		70	2 x 3	Gynoecious	–	Tiny little cucumbers (<i>Melothria scabra</i>) known in Mexico as "sandiita" (little watermelon) and branded here as mouse melons. They have a prominent cucumber flavour with notes of tartness.
--	---------	-------------	---	----	-------	------------	---	--

TOLERANCES: 1 = Anthracnose - 2 = Angular Leaf Spot - 3 = Cucumber Mosaic Virus - 4 = Downy Mildew - 5 = Zucchini Yellow Mosaic Virus - 6 = Powdery Mildew - 7 = Target Leaf Spot - 8 = Scab - 9 = Watermelon Mosaic Virus - 10 = Papaya Ring Spot - 11 = Cladosporiose

	Code	Variety	Form.	Maturity (days) ^S	Flowering habit	Tolerances	Description
	65-4420	PETIPIKEL FI		45	Monoecious	6	Short vining/bush pickling cucumber that has been bred to stay compact with the vines using only 1/3 of the space of a standard variety. Pick the green striped, spined fruit at 8-13 cm (3 - 5 in) for the best results. Harvest regularly to increase the yield. Fruits can be left until 18 cm (7 in) long and used fresh.
	65-4410	PUCCINI FI		50	Parthenocarpic	11	Parthenocarpic type (does not need to be pollinated to produce fruits). Very compact vines and small foliage. Perfect for early and late season production. Ideally, needs to be isolated from other varieties to preserve its quality.
	65-4477	CORENTINE FI		50	Gynoecious	3, 6, 8	Replacement of Cool Breeze. Parthenocarpic variety that needs to be isolated but does not need any pollination to give loads of medium green fruits with small fine spines.
	65-4480	SALT AND PEPPER		50	Gynoecious	—	Eye catching white-skinned pickling cucumber with good powdery mildew tolerance. You won't need to add salt and pepper to this unique miniature cucumber. It has just the right amount of natural flavours, quite delicious.
	65-4415	CROSS COUNTRY FI		52	Gynoecious	1, 2, 11	Long, dark green fruit. Wide adaptability to diverse conditions. Performs well under stress.
	65-4422	ESPIRIT (4149) FI		52	Monoecious	2, 3, 4, 5, 6, 7, 8	Dark green Eureka type, a little earlier and a little bigger for a better yield. Adapted to both market fresh and processing. Good disease package and tolerance to downy mildew.
	65-4427	EXPEDITION FI		52	Gynoecious	1, 2, 3, 4, 6, 8	For those who like the variety Vlaspiik, it must be tried. This variety produces a darker fruit and offers a higher yield.
	65-4426	VLASPIIK FI		54	Gynoecious	1, 2, 3, 4, 6, 8	High yields of large, plump fruits. Suited for mechanical harvest.
	65-4423	ARABIAN FI		55	Gynoecious	1, 2, 3, 4, 6, 8	Short vine variety, darker colour than Eureka. Fruit is also longer.
	65-4424	EUREKA FI		55	Monoecious	1, 2, 3, 4, 5, 6, 8, 9	Highly disease resistant variety. Outstanding for its dark green fruit that looks like a small slicer.
	65-4425	CITADEL FI		55	Gynoecious	1, 2, 3, 4, 6, 8	Citadel is part of a new hybrid line tolerant to Downey mildew. The combination of fungicides when pressure is too high and good tolerance to Downey mildew will help achieve its highest yield potential.

TOLERANCES: 1 = Anthracnose - 2 = Angular Leaf Spot - 3 = Cucumber Mosaic Virus - 4 = Downy Mildew - 5 = Zucchini Yellow Mosaic Virus - 6 = Powdery Mildew - 7 = Target Leaf Spot - 8 = Scab - 9 = Watermelon Mosaic Virus - 10 = Papaya Ring Spot - 11 = Cladosporiose

Flowering HABIT - Gynoecious: Referred to when having 100% female flowers on the same plant. **Monoecious:** Referred to when both male and female are on the same plant.

TURK'S TURBAN

Code	Variety	Form.	Maturity (days) 	Description
65-4684	FANCY WARTED MIX FI		95	Produces a unique combination of small decorative gourds of multiple forms and colours, with either a warty or a smooth skin.
65-4685	GIZMO		95	New winged gourd mix, which is unique for its bush plant type, offers fruit with rich colours including dark green, orange, yellow, light green, and white. Hard-shelled variety with fruit that is 7-12 cm tall by 15-20 cm wide at the tip of the wings. A great addition to your fall decoration lineup.
65-4686	HOARGARTH		95	Distinctive new orange and dark green gourds. Wart-covered fruit that measures 17 cm wide by 12 cm high. Intermediate bush type. Adds texture to fall displays.
65-4689	GALAXY OF THE STARS FI		95	Hybrid mix of unique star-shaped fruits in yellow, cream, orange, green and white with varying stripe patterns. Great for fall displays.
65-4691	KOSHARE YELLOW		95	Small pear-shaped fruit with a long neck, dark green at the base and yellow at the top. Very smooth skin. Vigorous plant with good yield.
65-4692	SMALL FRUITS MIX		95	Selection of the best small ornamental gourds.
65-4696	SMALL FRUITED WARTED MIX		95	Selection of small warty gourds.
65-4683	LUNCH LADY FI		100	Mix of large, decorative gourds of varying sizes, usually elongated and very warty.
65-4695	AUTUMN WINGS SMALL FRUITS		100	Shaped like a pear with a swan's neck and wings in many intense colours (up to 12 cm long).
65-4697	AUTUMN WINGS MEDIUM FRUITS		100	Shaped like a pear with a swan's neck and wings in many intense colours (up to 18 cm long).
65-4699	AUTUMN WINGS LARGE FRUITS		100	Shaped like a pear with a swan's neck and wings in many intense colours (up to 25 cm long).
65-4688	TURK'S TURBAN		105	Also called Giraumont, the turban-shaped fruits are mainly dark orange with speckles of green, red and creamy white. With a fair quality for baking and stuffing, this variety also looks stunning in a fall display. Stores well if not bruised while harvesting.

Ground Cherry

GOLDEN HUSK

LITTLE LANTERN

	Code	Variety	Form.	Maturity (days) T	Weight (g)	Plant size	Plant habit	Description
	65-9297	GOLDEN HUSK		65	Less than 25	Small	Determinate	Small, very sweet tasting fruits. Perfect for jam.
	65-9296	LITTLE LANTERN		70	Less than 25	Small	Determinate	Smaller, more compact strain of ground cherry, well suited for pots. Smaller fruits (11-14 mm) and lightly coloured husks. Good ramifications and short internodal spaces.

Kale

LACINATO

BLACK MAGIC

SCARLET

REDBOR F1

RED RUSSIAN

ROGUE F1

DARKIBOR F1

STARBOR F1

	Code	Variety	Form.	Maturity (days) S	Colour	Description
	65-3135	LACINATO		35	Dark green	Dark green kale to be used for the production of smaller leaves (baby leaf), thanks to its more tender texture than the curly kale. Slightly bitter taste.
	65-3127	BLACK MAGIC		45	Very dark blue	Rich, very dark blue kale with a rosette plant habit that makes it easy to harvest. Black Magic has a sweet flavour, a vigorous regrowth and a good uniformity. Continuous harvest.
	65-3104	SCARLET		55	Red	Kale option for winter baby leaf salads, or to grow on as teen leaves for stir-fry or steaming. Scarlet kale has a similar habit to blue kale but with subtle red colouration to mid ribs and veins. Can also be grown as a winter vegetable.
	65-3105	REDBOR F1		55	Red	Unique colour! Very attractive and a good yielder. For niche and ornamental markets.
	65-3106	RED RUSSIAN		55	Dark red	Tender leaves with a sweet taste. Tolerates cold temperatures. For baby leaves.
	65-3118	ROGUE F1		55	Medium green	Mid-early hybrid variety. The plant is up to 70 cm tall, wide and resistant to uprooting. The leaves are of a medium green colour and very curly. It can tolerate temperatures to -15 °C. Thick, healthy leaves sweeten up as the weather cools. For bunching.
	65-3122	DARKIBOR F1		55	Very dark blue green	Early maturing, easy growing kale for late summer and fall harvests. Upright plant with finely curled leaves. Good field holding. Ideal for bunching.
	65-3123	STARBOR F1		55	Dark bluish green	Very uniform, compact plants that resist yellowing. Short internodes make this an ideal "mowing" kale, and is also our most productive variety for stripping. For bunching.

Kohlrabi

QUICKSTAR FI

KONAN FI

LECH FI

KOLIBRI FI

	Code	Variety	Form.	Maturity (days) ^S	Colour	Description
♥	65-3211	QUICKSTAR FI		52	Pale green	Early variety with an excellent uniformity in shape and maturity. Weighs about 150 gr. Replaces Rapidstar.
☄	65-3218	KONAN FI		55	Green	Smooth bulbs with very erect foliage. Easy bunching and easy to cultivate. Superb flavour and nice internal structure. The sweetest and most tender of our selection.
	65-3240	KOSSAK FI		55	Green	Huge, but still crisp and tender kohlrabi. The bulbs can reach up to 20-22 cm in diameter without getting pithy, woody or hollow. White flesh hybrid that can keep up to 4 month in cold storage.
	65-3242	LECH FI		55	Green	Slightly flattened, round bulbs with upright, dark green leaves. Good field holding ability. For summer and fall production
	65-3252	KOLIBRI FI		55	Purple	White flesh that remains tender. Medium tops. Good yield.

CURLING FI

	Code	Variety	Form.	Maturity (days) ^T	Colour	Shaft (cm)	Harvest season	Description
	65-7612	CHINOOK FI		90	Medium green	25-30	Summer	Very quick-growing variety. Produces very long, large shanks that size up very early.
	65-7613	COMANCHE FI		90	Bluish green	23-27	Summer	Very quick-growing variety. Produces long, large shanks that size up very early. Very uniform. Easy to clean.
☄	65-7614	JUMPER FI		90	Medium green	25-30	Summer	Yield similar as of a mid-season leek in only 90 days! Erect foliage.
☄	65-7615	LANCELOT		90	Medium green	25-30	Summer	Early high-yielding leek. Replaces the Ventura variety.
☄	65-7630	LANCIA		95	Bluish green	25-28	Summer	Erect foliage with no leaves at the base making harvesting and cleaning easier. Similar to Albana.
♥	65-7616	MAKO POWER FI		100	Very dark green	25-30	Fall	Mid-season leeks, very dark green, upright in the field. Will not bulb. Erect plant, very uniform, of nice calibre. Good shank length.
	65-7687	FENCER FI		100	Bluish green	25-28	Fall	Bluish-green full season variety. Uniform large size. Long shanks remarkably easy to clean.
	65-7688	BIKER FI		100	Bluish green	25-28	Fall	An excellent quality blue-green leek, which is uniform and easy to clean. Erect foliage. Has a strong disease package and good holding ability.
♥	65-7680	SURFER FI		110	Bluish green	24-26	Fall	Comparable to Shelton and to Midfield, with a slightly longer shaft. More erect foliage. Very vigorous.
♥	65-7686	CURLING FI		118	Dark bluish green	24-26	Winter	The darkest variety of our assortment. Very erect, good uniformity, good field holding. Can be stored.
☄	65-7693	BANDIT		118	Bluish green	22-25	Winter	Sturdy winter harvest leeks. Late to bolt, will remain in good condition for a long time in your field. Can be stored. Replaces the Maine variety.

	Code	Variety	Form.	Maturity (days)	Type	Colour	Description
	67-0470	SSC 3099		Annual	Amaranth	Red	Variety with a darker colour development than standard varieties. Annual.
	65-0885	SOLDIER		35	Beet	Dark red	Bull's Blood type. Mainly grown for its red foliage resembling Swiss chard.
	65-4850	LARGE IMPROVED		60	Cress	Green	Watercress. Rich in vitamins. Best grown in moist soil conditions.
	65-2682	EARLY MIZUNA		45	Japanese mustard	Light green	Broad finely serrated leaves. Tolerates cold conditions.
	65-3133	SIMPLYSALAD STORM MIX		35	Kale	Purple, green, blue	Kale mix made up with attractive textures and colours including purple, green and blue. This mix will last longer in containers than lettuce and won't bolt. Storm Mix can also be planted in the ground for all-season harvest.
	65-3106	RED RUSSIAN		55	Kale	Dark red	Tender leaves with a sweet taste. Tolerates cold temperatures. For baby leaves.
	65-5601	MESCLUN MIX		28	Mesclun	Various	Contains selected leafy types of lettuces and radicchio to be sown together. Harvest when seedlings reach a few centimetres. Multiple harvests.
	65-5602	SIMPLYSALAD ALFRESCO		30	Mesclun	Various	A mixture of leaf lettuces with arugula, endive and radicchio. Mediterranean fresh flavour. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-5603	SIMPLYSALAD CITY GARDEN		30	Mesclun	Various	A mixture of sweet tasting red and green lettuces. A more traditional mixture. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-5605	SIMPLYSALAD WONDER WOK MIX		30	Mesclun	Various	Mix of Asian greens including mustard, kale and pak choi. Zesty and tasteful. Multipelleted. Can be harvested up to three times. Best if placed in shade or part shade when grown in patio containers.
	65-6230	RUBY STREAK		30	Mustard	Dark red	Delicate and finely serrated red-violet leaves. Gentle spicy sweet taste.
	65-6221	BARBAROSSA		45	Mustard	Dark purple	Red Giant mustard type, which maintains its red colour longer and better.
	67-8110	ROCKET		Annual	Rocket	Green	Belongs to the mustard family. Strong aromas with a subtle nutty flavour. Annual.
	67-6710	FRENCH SORREL		Perennial	Sorrel	Green	Large, green leaves, tangy, light lemony taste. Height: 30 to 45 cm, width: 20 to 25 cm. Perennial.

LEAF

	65-5613	STARFIGHTER		55	Green	BL:1-25,27,28,30,31/Nr/Pb	High yield of uniform, medium-size heads with good flavour. Dark green leaves are shiny and slightly savoyed. Strong against tip burn, bolting.
	65-5615	GRAND RAPIDS		55	Green	—	Popular selection. Thick, juicy, bright green, frilly leaves. Rapid growth in spring and fall.
	65-5617	TWO STAR M.I.		55	Green	—	A market standard. Voluminous and heavy head with dark green, serrated leaves that fold easily for packing. Very slow to bolt.
	65-5621	TROPICANA		55	Green	Rs/LMV	Very good heat and bolt tolerant variety that can be used in fresh pack or whole leaf production. Also tolerant to tip burn, lettuce mosaic virus and corky root.
	65-5663	EZRILLA		55	Green	—	EAZYLEAF. Replaces the Capulin variety. Long, narrow leaf margin with a nicely frilled, medium green base. Fast growth.
	65-5667	NEW RED FIRE		55	Red	—	Exceptional for its shiny, red and green leaves. Classy looking selection, very uniform and productive. Consistent yields. High bolting tolerance and strong tolerance to heat. Holds well in fields.
	65-5668	RUBY SKY		55	Dark red	BL:1-17,21,23/Nr/LMV	Disease tolerance makes this variety particularly suited to late-season production. Dense head with ruffled leaves in an intense red at the tips and green at the inner base. Holds well in the field.
	65-5675	RED SAILS		55	Red	—	Dark red leaf lettuce. Voluminous and uniform. Slow to bolt. Recommended for retail sales.
	65-5619	BERGAM'S GREEN		58	Green	—	Large size, heavy, leaf lettuce, just a bit later than other varieties. Slow to bolt and strong against tip burn. Best suited for summer and fall harvest.

ICEBERG

	65-5759	AAC RICHELIEU	84	Ithaca	Beginning of July to end of August	Large heads with excellent filling capacity. Good density and very good weight, which allows for an earlier harvest under stress conditions. Tolerant to bolting, rib discolouration and tip burn.
	65-5761	ITHACA 737	85	Ithaca	Juin	Iceberg type that tolerates heat very well. Non bitter taste. Well adapted to our climate. Suited for muck soil.
	65-5765	PYB 7101	85	Vanguard	June	Large head with good tolerance to heat and rib discolouration. Full head with a good weight. Excellent quality lettuce.
	65-5767	HOCHELAGA	85	Ithaca	Primeur	Particularly heavy and compact heads, for very early fresh market. Tolerant to bolting in long-day growth conditions. Also very strong against rib discolouration.
	65-5768	AAC CHAMPLAIN	85	Ithaca	End of July to early September	Large, heavy heads on a short stem. Good structure with few protruding ribs. Medium tolerance to bolting, tip burn and rib discolouration.
	65-5757	GLENDANA	87	Vanguard	June / August - September	Large-sized Iceberg, very adaptable to hot and cool climates. Dense heart and medium core. Strong against tip burn and bolting.
	65-5758	AAC CANICULA	87	Vanguard	Mid-July to mid-August / mid-August to mid-October	Good weight variety with a short core. Lower incidence of rib discolouration and good tolerance to bolting and tip burn. For fresh markets and processing.
	65-5763	PRESTIGE	87	Vanguard	June / August - September	Large, dense head with a good tolerance to bolting.
	65-5764	ESTIVAL	87	Vanguard	End of June to end of Septembre.	Good weight heads, uniform, with a short core. Adapted variety to extreme climatic conditions. Good field holding ability. Tolerant to rib discolouration, bolting and tip burn.

Fondation Laitue
Lettuce Foundation

2006

Lettuce from here, by and for the people of here.

Since 2006, the Lettuce Foundation, owned by lettuce producer-growers, has had the **mission** of conducting research projects in lettuce genetic improvement.

Norseco is proud to be the exclusive distributor of seeds from the **Lettuce Foundation** for it is a prime example of variety development, based on the needs of local producers.

Supported by intensive research over many years, we offer a complete range of **lettuce** seeds adapted to local production conditions and to current and changing market needs. Current research glimpse of new advances, expected in the near future, of great benefit to producers.

ROMAINE

	65-5770	POMEGRANATE CRUNCH		55	Red	Box	—	Red mini romaine with open habits and smooth texture. Faster growth than other varieties. Bright poppy-red colour outside and bright red-green inside. Nice twin pack with green mini romaine Starhawk.
	65-5776	XALBADORA		55	Green	Box	—	New mini romaine with great green colour and gloss, slightly open centre with high leaf count. Xalbadora performs great against tip burn and has a wide adaptability.
	65-5788	RIO BRAVO		72	Green	Box, heart	—	Tight leaf structure contributes to high pack outs of hearts from the field. Only for early spring production.
	65-5789	GREEN TOWERS M.I.		72	Green	Box	—	Popular variety used for its weight, height and uniformity. Tolerant to bolting and to tip burn.
	65-5781	PATRONA		75	Green	Box	Bl:16-34/Nr/LMV/Rs	Large, dark green romaine lettuce suitable for fresh whole head, processing and machine harvesting.
	65-5782	SOLID KING EL		75	Green	Box, heart	—	Adaptable romaine variety, in a medium, glossy green colour. Impressive weight compared to other romaine types. Excellent tolerance to tip burn, bolting and corky root.
	65-5783	SUN VALLEY		75	Green	Box, heart, processing	—	Large frame variety with a medium yellow interior and brilliant, thick, smooth tapered midrib. Excellent weight at harvest. Tolerant to corky root and bolting. Also tolerant to low and high temperature abnormalities.
	65-5784	SUNBELT		75	Green	Box, heart, processing	—	Large frame variety with a straight tapered but shape for an impressive pack at harvest time. Excellent field holding ability. Strong against bolting and tip burn.
	65-5785	MEZQUITE		75	Green	Box, heart	Bl:1-26,28,32 EU/1-8 US/Nr/TBSV/Rs	A semi-savoy full-sized romaine with a thick texture. Tall variety, well filled and heavy, that works well for the heart market, but the nice internal blanching provides an attractive product for the value-added segment. The base is tapered with straight ribs, which makes for easier harvesting and packing.
	65-5786	VALLEY HEART M.I.		75	Green	Box, heart	—	Tall and dense heads, medium green in colour. Good cold and tip burn tolerance and slow to bolt. Large slightly blistered leaves. Ideal for fresh market or heart production.
	65-5787	PARIS ISLAND COS SELECT M.I.		75	Green	Box	—	High quality, productive selection. Medium to dark green, non-brittle leaves. Good tolerance to bolting.
	65-5790	VAQUERO		75	Green	Box, heart	Rs/TBSV/Fol:1	Nice, very dense variety ideal for box and heart production. Excellent tolerance to bolting.
	65-5793	ARROYO		75	Green	Box, heart	—	Tall, upright and V-shaped romaine with tight internodes that makes this best for romaine heart production. Dark in colour with blistered leaves. High tolerance to bolting and tip burn.
	65-5794	BLUE ROCK		75	Green	Box, heart	Bl:7-9/Nr/TBSV	Dark green romaine lettuce that can be used either for hearts, cartons and processing. Small core, good density, beautiful heavy heart and good height. Slow to bolt.

A TRIFECTA FOR SUCCESS FROM TAKII

Hybrid Onion Traverse

- Widely adaptable, suitable for fresh and long-term storage markets
- Hard bulbs with attractive skin
- Potential to produce Jumbo bulbs
- High resistance to Pink root and Fusarium

Hybrid Onion Rubillion

- Medium-early maturity
- Hard bulbs have dark red skin and good internal color
- Ideal for long-term storage markets
- Transplant or direct seeding

Hybrid Onion Ridgline

- Medium-early maturity
- Hard bulbs with attractive skin
- Potential to produce Jumbo bulbs
- Adapts well for transplant or direct seeding

---------	----------	--	-----	---	---

RED

65-6682	RED EMPEROR F1		88	–	Our earliest red onion. Round, slightly flat bulbs. Dark red colour that resists well to browning. For optimum results, grow as transplant but can also be grown as direct planting if very early.	
65-6687	MONASTRELL F1		90	–	Improvement of the Red Emperor variety with its larger size and darker red colour. To be harvested as soon as ready. Good storage potential. For transplants or very early direct sowing.	
65-6689	RED SPRING F1		92	2, 3	As early as Red Sky! Nice uniform round shape with an even darker red than Red Sky. A little lower proportion of large size bulbs. Red all to the centre.	
	65-6688	RED SKY F1	100	–	Our earliest red onion for direct sowing. Replaces Red Beauty. Round, uniform and firm, deep red bulbs. Small neck that closes up well. Susceptible to pink root.	
65-6690	RUBY RING F1		103	–	Dark red onion, inside and out, with solid skin. Elongated round shape. High percentage of single centres. Very vigorous plants.	
65-6683	RED STONE F1		105	–	Very round bulbs, very uniform, in a nice dark red without any sun scald. Small neck. Good storage potential.	
65-6694	RUBILLON F1		105	1	Mid-season onion, with round shape and large size very uniform. Consistent variety from one trial to another.	
	65-6685	SV4643NT F1	110	1, 3	Red onion with improved vigour and a darker colour. Good size potential. Adapted for growing from transplants or direct sowing in all growing areas.	
65-6686	RED NUGENT F1		113	1, 3	Improvement of red onion 4643. Better vigour, larger size and darker red colour.	
	65-6693	RED BULL F1		115	1, 3	Earlier Redwing type. Large size and very dark red colour. For long-term storage.
	65-6696	RED CARPET F1		116	1, 3	Redwing type with a more reliable seed availability. Very nice external and internal colour. Excellent uniformity and size potential.
	65-6697	BAROLO F1		116	–	Mid-season red onion with an attractive dark interior, a very dark glossy exterior, and a uniform round shape. Good caliber. Tolerant of root diseases. Long term storage.
65-6699	RED MOUNTAIN F1		118	1, 3	Earlier Redwing type, with similar colour, size and quality. Stood out in the trials due to its excellent storability.	
65-6698	REDWING F1		120	1, 3	Round onion, 7 to 8 cm in diameter. Thick skin. Known for its good quality and uniformity.

Code	Variety	Form.	Maturity (days) ^S	Length (cm)	Seeds per Pod	Plant Height (cm)	Tolerances	Description
------	---------	-------	------------------------------	-------------	---------------	-------------------	------------	-------------

PEA-SHELLING

65-7809	SPRING		52	7.5	6-7	50	2	Early variety of shelling peas. Each pod contains 6 to 7 peas. Pea is tender and sweet.
65-7811	PREMIUM		52	7	6-7	58	2	Very vigorous dark green plant, producing 1 to 2 pods per node.
65-7810	SHERWOOD		53	8	7-8	37	2, 4, 6	Early normal leaf type that is highly adaptable in a variety of growing environments. Has the added benefit of tolerance to downy mildew. First flower node will appear after only 9-10 days. 1-2 pods per node. 7-8 berries per pod.
65-7825	LITTLE MARVEL		57	8	7	45	1	A favourite for over 60 years! Space-saving semi-dwarf plant giving a tremendous return of sweet peas. Good for freezing. Produces two pods per node.
65-7826	ALEXANDRA		66	10	8-9	95	2, 3, 4	Erect plant habit that keeps the plant from tipping over. Nice contrast of blueish foliage and dark green pods.
65-7856	ALTESSE		68	11	9-10	80	2, 3, 4	Replacement for the variety Utrillo with a better taste, better yield and more erect plant that does not lodge.
65-7852	MR. BIG		71	12.5	8-10	60-90	2, 3	Early variety. Long and large pods on a large size plant. Easy to shell. Also suited for freezing.

PEA-SNAP

65-7873	NAIROBI		67	8-9	8-9	60	3	Sweet and crunchy peas that remain stringless until harvest. High tolerance to powdery mildew.
65-7874	SNACK HERO		67	10	8-9	45-60	—	Slender 10 cm long pods that have the straight and elongated appearance of a green bean but the taste and texture of a snap pea. Early set of stringless, super-sweet and delicious pods. Self-supporting vines can be grown with or without support and are perfect for containers or hanging baskets.
65-7875	SUPER SUGAR SNAP		67	9	8-10	60	3	Powdery Mildew tolerant version of Sugar Snap, with heavier early yields over a shorter period of time. 1 or 2 pods per node. 1.5m plants need trellising.

PEA-SNOW

65-7886	LITTLE SNOW PEA		54	8-9	—	50-60	—	Green snow pea with purple bicolor flowering. Dwarf plant that will not surpass 50-60 cm in height. Perfect for container cultivation.
65-7878	SWEET SUNSATATION		65	8-9	—	70	2, 3	"Snow" pea type with flat pods that are usually used in stir-fries. They can also be frozen or eaten fresh.
65-7882	OREGON GIANT		65	13	—	80	1, 3	"Snow" pea type with flat pods. Produces two large and long pods at each node.

TOLERANCES: 1 = Common Wilt - 2 = Fusarium Rot - 3 = Powdery Mildew - 4 = Mosaic Pea Enation - 5 = Leaf and Pod Spot - 6 = Downey Mildew

GREEN

	65-7240	GREENBELL F1		67		11 x 9,5	1, 2, 6	Replaces the Bell Boy variety. Square, firm, medium size fruit with thick walls. Good yield.
	65-7225	CURRIER F1		68		10,5 x 10	1, 3, 4, 7, 10, 11, 12	Variety similar to Karisma but earlier maturity. Dark green fruit turns a nice red. Vigorous plant with excellent fruit protection.
	65-7243	ARISTOTLE X3R F1		68		11 x 10	1, 3, 4, 6	Extra large, dark green to red fruits and heavy sets that have impressed growers everywhere. Anthocyaninless (no purplish colour).
	65-7245	PLAYMAKER X10R F1		68		12 x 12	6, 7, 9	The first commercial variety with tolerance to bacterial leaf spot, races 1-10, AND Phytophthora blight. Fruits are dark green, anthocyaninless and the plant produces heavily concentrated set of large fruits.
	65-7246	SVR 1819 F1		68		12 x 12	5	Aristotle type. Continuous production of 3 to 4 lobe fruits that do not contain anthocyanin (no purple colour).
	65-7250	TURNPIKE X5R F1		68		11 X 12	5, 6, 7	Large size. Bell pepper with a dark green colour and a blocky shape. Firm fruit. Good disease package including resistance to Phytophthora.
	65-7248	TARPON X10R F1		70		10 x 10	6, 7, 9	Mid-season hybrid with tolerance to bacterial leaf spot and Phytophthora blight. A compact plant that produces medium-size fruits, very uniform, dark green, smooth, and square. Concentrated fruit set.
	65-7276	CALIFORNIA WONDER		70		11 x 9,5	1	Popular variety used for the retail market.

RED

	65-7215	NEW ACE F1		58		9 x 7,5	1	Extra early hybrid used for the production of medium sized, blocky, red peppers.
	65-7231	SAILFISH X10R F1		65		9,5 x 9,5	7, 9	Early sweet pepper, square in shape, and in a beautiful bright red colour. Concentrated fruit set, medium size with smooth and thick walls. The fruit does not crack and can stay on the plant for a long time.
	65-7233	RED KNIGHT X3R F1		65		11 x 11	3, 4	King Arthur type with better disease resistance and a more compact open plant. Turns to red early.
	65-7234	SOCRATES X3R F1		65		11 x 11	1, 4	One of the best yielders for its maturity. Four lobes, thick walled, sweet tasting pepper. Very vigorous plant that does not lodge.
	65-7236	CLASSIC F1		65		9,5 x 9,5	1, 3, 4	High quality Bell type whose quality comes close to a greenhouse sweet pepper. Extra smooth fruit with thick walls.
	65-7289	GIANT MARCONI F1		68		18 x 8	1	Extra large elongated fruit that rapidly turns red. Best for grilling, roasting, frying and in salads. High yield.

	Code	Variety	Form.	Maturity (days)	Shape	Fruit size (cm) length x dia.	Tolerances	Description
--	------	---------	-------	-----------------	-------	-------------------------------	------------	-------------

BANANA

	65-7290	SWEET BANANA		63		18 x 4	–	Popular variety for bedding plants and retail market.
	65-7285	4796 F1		65		20 x 4	–	A nice cylindrical shape and soft skin that will change colour from yellow to bright red. A vigorous plant that is tolerant to bacterial leaf spot (races 1-3, 7, 8). 12-15 fruits per plant.
	65-7288	SOPRON F1		65		21 x 4	–	High quality fruit for fresh markets and processing. Productive plants.
	65-7292	SWEET SUNSET F1		80		18 x 4	4	Light-yellow fruit, turning to orange then to red when it reaches its maturity. Sweet taste and perfect texture.

BULL'S HORN

	65-7269	MARCATO F1		70		17 x 6	1, 3, 10	For growers offering specialty peppers at roadside stands or farmer's market. Large yield of tapered, brilliant red fruits with good flesh thickness and sweet flavour at full maturity.
	65-7270	MATTADORES F1		70		25 x 9	–	Bull's Horn type pepper, said to be one of the longest sweet peppers in the world. Relatively thin skin, with two or three lobes. Slightly sweet taste, to be used fresh or for processing.
	65-7272	CORNISSIMO F1		75		15-18 x 6	–	Extra-large Corno-shaped fruit that ripens from green to red, with outstanding thick walls, rich flavour and more sweetness than most large-fruited peppers. To produce seedless fruit, grow in isolation from other non-seedless pepper varieties. If not isolated, it will produce larger, great-tasting fruits with just a few seeds.

CUBANELLE

	65-7282	ARUBA F1		65		18 x 6	–	Elongated shape. Turns red at maturity. High yield and early production. Vigorous, upright plant.
	65-7283	GRENADA F1		65		17 x 8	4	Nice looking, smooth and straight fruit. Shallow shoulder cavities for cleaner fruits.

SHEPHERD

	65-7266	CARMEN F1		65		15 x 5,5	–	High yields of deliciously sweet fruits that are early to ripe. Variety that is widely adaptable, flowering and setting fruits over a wide temperature range. Plants are around 60 cm tall with an upright habit and are also suitable for large patio containers.
	65-7265	DIMITRI F1		68		20 x 5	1	Smooth, cone-shaped fruits with pointed tip on a vigorous and fertile plant.
	65-7268	KAPTUR F1		73		18 x 6	1	Large-sized, bull's horn-style pepper. Fairly thick 6-7 mm fruit. Solid, productive plant.

SHISHITO

65-7286	TAKARA FI		60		9 X 3	Old Japanese pepper with a small fruit and a mild but rich flavour. Compact plants with spreading habit, short internodes, well branched and high yield. One out of 10-20 fruits might be a little spicy or pungent under stress conditions like hot and dry weather. It makes them fun to eat.
---------	-----------	--	----	--	-------	---

MINI

	65-7209	SNACKABELLE FI		55		8 x 6	A tasty, sweet and original treat. Continuous yield of apple-shaped fruits. Ideal for fresh eating or for stuffing. Replaces the Cute Stuff variety.
	65-7219	CANDY CANE CHOCOLATE CHERRY FI		60		10 X 4	Unique striped pepper that maintains its interesting coloration at every stage. Mini, elongated bells are a good size for snacking, with sweet flavour and eye-catching appearance. Variegated foliage adds to the interest for that small pepper.
	65-7220	CANDY CANE FI		60		10 X 4	Snack pepper that has a unique, eye-catching variegated foliage, and fruits that ripens from green striped to solid red. Sweet flavour, thin walls, crispy texture. Can be eaten at any stage of ripeness.
	65-7185	RUBY DELITE FI		65		7 x 3	Large-fruited snack pepper variety with a very early maturity and hot set potential. It is adapted to hot set slots or where there is an advantage to have very early maturity. Fruits have very good size are smooth and firm with a glossy dark colour at full maturity. Mid-strong vigorous plant with good cover and continuous setting ability. Tolerant to tobacco mosaic virus and bacterial leaf spot (1-3).
	65-7186	LEMON DELITE FI		65		7 x 3	
	65-7187	ORANGE DELITE FI		65		7 x 3	
	65-7200	MINISWEET MIX FI		75		8-9 x 3	Now available as a mix of three shiny colours, these mini sweet peppers remain a favorite that pleases everyone either in a lunchbox or in raw vegetable platters. Can be grown in your garden or in a patio container on your balcony. The plants are loaded with small, smooth, sweet fruits with very few seeds.
	65-7201	MINISWEET YELLOW FI		75		8-10 x 3-4	Small, sweet, bright coloured fruits with few seeds. Solid, straight and well-branched plants. Excellent yield.
	65-7202	MINISWEET ORANGE FI		75		8-10 x 3-4	
	65-7203	MINISWEET RED FI		75		8-10 x 3-4	
	65-7296	JUST SWEET FI		75		7 x 4	Small 4-lobed snack pepper, similar to a Bell pepper, but smaller. Deliciously sweet fruits of 7 cm long that grow on a vigorous plant up to 90 cm high and 37 cm wide. Bright and brilliant yellow colour. A very robust bushy habit that does not require a stake. Winner AAS 2019.
	65-7214	MAD HATTER FI		85		5-8 x 5-6	Intriguing small flattened disc shape pepper with lobes or wings. Crunchy, crisp and mild fruits for perfect eating at mature green or ripe red stage. Large indeterminate plants will benefit from a support or a trellis. In hot and dry climates, a small number of fruits will have a spicy taste close to the seed cavity.

TOMATO PEPPER

	65-7261	RIGHT ON RED FI		75		4-6 x 2-3	Unique shape, perfect for stuffing or for eating raw. Very high yield on compact full plants. Red fruits bear upright on the plant for easy harvest. For home gardens, roadside stands, specialty markets and even for greenhouse growing.
	65-7262	YES TO YELLOW FI		75		4-6 x 2-3	
	65-7263	ORANGE YOU SWEET FI		75		4-6 x 2-3

ANCHO-POBLANO

65-7329	SEQUOIA FI		70		17 x 7,5	Large, dark green, very uniform poblano. Very productive, upright plant. Mild pungency.
---------	------------	--	----	--	----------	---

BHUT JOLOKIA

65-7305	BHUT JOLOKIA		85		6-8,5 x 2,5-3	One of the hottest pepper in the world at over 1 million Scoville units. Rough dented fruits with thin skin and fiery hot flavour. The seeds and fruits should be handled with extreme caution.
---------	--------------	--	----	--	---------------	---

CAYENNE

	65-7332	ARAPAHO FI		68		15 x 3	Early. High yield. Compact plants. Long and slender pepper with medium pungency.
	65-7325	CAYENNE LONG SLIM		70		10 x 1	Very productive with creased walls. Strong and distinct taste.
	65-7333	MESILLA FI		85		25 x 4	High yield potential. Large, solid plant. Very long fruit. Good fruit quality.

CHERRY

	65-7376	TIME BOMB FI		68		3,5 x 4,5	Cherry pepper. An early and large Cherry Bomb type.

ESPELETTE TYPE

	65-7385	GORRIA		80		9-15 x 3	An Espelette type pepper, the famous European pepper with a well-established culinary reputation. It has a sweet, not too strong, taste. Plants can reach up to one metre in height.
--	---------	--------	--	----	--	----------	--

HABANERO

	65-7350	PRIMERO RED FI		75		8 x 3.5	The earliest ripening habanero on the market. Expect huge yields of peppers that are larger than other habaneros. They have about one third the heat of standard habaneros, letting gardeners appreciate their rich flavour.
	65-7355	SVHH5137		85		8 x 3.5	Habanero type that ripens to red, with a typical shape, thick walls and excellent firmness. Plant is of medium to strong vigor, very productive and early maturing.

HUNGARIAN

	65-7340	HUNGARIAN WAX		60		14 x 4	Popular bedding plant variety. Fruit with a moderately hot taste.
	65-7338	HOT SUNSET FI		85		20 x 4	A prolific and early harvest for these delicious and spicy fruits. Large, healthy, vigorous plant that is disease-free and produces thick-walled, tasty and attractive fruits all season long. Hot Sunset gives you the heat and the great taste.

JALAPENO

	65-7319	POT-A-PENO FI		55		8-10 x 2.5	New jalapeno peppers with a compact habit perfect for growing in containers and hanging baskets. A unique jalapeno with fruit hanging down beneath the plant making it very easy to harvest without damaging the appearance or productivity of the plant. Plant sets plentiful small, green jalapeno fruits that have a traditional spicy zip. A few extra weeks and they will ripen to red for a sweet, spicy flavour.
	65-7322	EARLY JALAPENO		65		9 x 4	Early. The mildest tasting of the jalapeno types. Ideal for making salsa. For fresh markets and processing.
	65-7323	EL JEFE FI		70		10 x 4	Large fruits on a vigorous plant. Very productive. Not much cracking or purple spots.
	65-7321	EMERALD FIRE FI		75		9 x 3.5	Large-size jalapeno. Very uniform and abundant production. Concentrated set. Does not crack even after maturing to red.

PAPRIKA

	65-7304	KRIMZON LEE FI		82		15-20 x 5	Sweet and spicy flesh, perfect pepper for grilling or to add to a salsa. Moderate pungency.

PATIO COLLECTION

	65-7310	CHILLY CHILI FI		55		5 x 1	Ornamental pepper with an exceptional performance. Non-pungent fruit, that changes colour from yellow to orange, then red at maturity. Extremely heat tolerant.
	65-7308	APACHE FI		58		5-7 x 1	Erect, compact and well-branched chili type plant. For patio containers. Height: 40-45 cm.
	65-7309	CHEYENNE FI		58		10-13 x 3	Compact and trailing chili type plants. For hanging baskets and patio containers. Height: 40 to 45 cm.
	65-7311	CAYENNETTA FI		58		8-10 x 2	Chili type pepper that grows into a very well-branched upright plant, ideal for patio planters or hanging baskets. Unique cold tolerance and dense foliage that covers and protects the fruits from the sun. Heavy yield of mild tasting peppers. 2012 AAS Winner.
	65-7307	BASKET OF FIRE FI		80		5-7 x 1	Chili type pepper with a very hot taste on a semi-trailing plant. Perfect for containers or hanging baskets. Good tolerance to cool weather and produce well into autumn. Can be eaten fresh or dried.

TOLERANCES: 1 = Tobacco Mosaic Virus - 2 = Tobacco Etch Virus - 3 = Potato Virus Y - 4 = Bacterial Leaf Spot (races 1 to 3) - 5 = Tobamo Virus

Pumpkin

In order to obtain the best yield possible, spacing between pumpkin plants in the field is very important. Please refer to the following chart to determine the appropriate spacing for every variety.

IN ROW	Fruit size	
	Mini and small size fruits	18-24 in.
	Medium size fruits	24-36 in.
	Large and extra large size fruits	36-72 in.
BETWEEN ROWS	Vine size	
	Bush	4-5 ft.
	Short vine	6 ft.
	Medium vine	9 ft.
	Long vine	12 ft. and more

LARGE (CONTINUED)

	65-4043	KRATOS FI		100	35 x 33 9-13,5	30-35	Dark orange	Short	Large handled pumpkin that matures a little earlier than most of other large fruit varieties. Good yield of medium-dark orange, medium ribbed fruits.
	65-4032	ALADDIN FI		105	37 x 30 11-20	30	Dark orange	Medium	Dark orange fruits that set near the crown. Large size fruits potential. High quality harvest.
	65-4027	CRONUS FI		115	35 x 40 11-27	15	Dark orange	Long	Very large variety, dark orange and well ribbed. Very large handle, dark green and strongly attached to the fruit. Needs the right spacing in the field.

MEDIUM

	65-4050	HERMES FI		90	22 x 22 4-5	35-40	Dark orange	Short	Early pumpkin, medium size, on a semi-bush plant tolerant to powdery mildew. High yield of dark orange, round, medium ribbed fruits with a dark, solid handle. Perfect size and uniformity for boxes of 50-60 fruits.
	65-4016	WARTY GOBLIN FI		95	35 x 28 3,5-9	45	Orange with green warts	Long	Heavily warted pumpkins with a very high yield. Strong, dark handle. Hard shells for durability. Excellent choice for patches and roadside stands
	65-4048	BAD JELLY FI		95	30 x 30 5,5-7	60	Banana yellow with warts	Medium	Absolutely unique warty pumpkin in a banana yellow colour. Its average weight is 5.5 kg to 7 kg and it grows on an average vine. Originality assured.
	65-4062	SPECTER FI		95	22-30 x 22-30 6,5-8	50	White with white warts	Medium	Very uniform in shape and size. Medium round shape. High yield potential. Large, firmly attached handle.
	65-4072	ROUGE VIF D'ETAMPES		95	15 x 37 4,5-6,5	dna	rose	Long	Flattened shape with deep ribbing. Sweet, orange flesh.
	65-4080	GOOSE BUMPS II FI		95	18 x 18 3,5-5,5	60	Dark orange, warted	Medium	Goose flesh for sure! A round and warted pumpkin.
	65-4018	ORANGE SUNRISE FI		100	25 x 30 7-9	30-35	Orange fluo	Short	Early maturing variety. Enticing deep orange colour and nice ribbing. Excellent round shape and size. Very strong, dark green handle.
	65-4025	EAGLE CITY GOLD FI		100	30 x 28 8-10	35-40	Dark orange	Medium	A very new variety with intermediate resistance to powdery mildew. Very smooth. Shallow ribs that make it ideal for carving. Round, deep orange fruits with strong handle.

Pumpkin

Code	Variety	Form.	Maturity (days)	Shape	Size H x D (cm) Weight (kg)	Bin count	Colour	Vine	Description
------	---------	-------	-----------------	-------	-----------------------------	-----------	--------	------	-------------

MEDIUM (CONTINUED)

♥	65-4026	EROS FI		100		30 x 32 9-11	35-40	Dark orange	Medium	Similar to Gladiator. Large fruits, ideal for roadside stands or shipping, uniform in size and shape. Long, strong handle, firmly rooted to fruits. Nicely ribbed.
	65-4031	DIABLO FI		100		28 x 23 7-9	40	Dark orange	Short	Blocky round pumpkin ideal for the Halloween market. Diablo produces fruit with very uniform size and shape. It has a beautiful dark orange colour with a strong, dark green, embedded handle. The semi-determinate vine is ideal for home gardens and small market growers.
	65-4034	BELLATRIX FI		100		28 X 28 7-9	35	Bright orange	Long	Extra early, big, round pumpkin. Very productive! Bright orange fruits with a long sturdy handle. Intermediate tolerance to powdery mildew.
	65-4038	CARRIE FI	UNT	100		27 x 27 7-9	40	Dark orange	Short	Beautiful pumpkin, slightly smaller than Sorcerer, smooth, with a good dark and solid handle. Fruits stand out because of their great uniformity and their outstanding quality. It will be an eye catcher in your Halloween assortment.
	65-4044	CRYSTAL STAR FI		100		30 x 27 11-16	dna	White	Medium	Flat, round shape. Maintains its pure white colour until frost without taking blue or yellow tones.
	65-4049	MELLOW YELLOW FI		100		25 x 30 5.5-7	45-50	Lemon yellow	Medium	Impressive and eye-catching, early, lemon yellow pumpkin. Round, ribbed fruit with a strong and straight handle. Intermediate tolerance to powdery mildew.
	65-4078	PORCELAIN DOLL FI		100		20 x 30 8-10	dna	Pink	Long	Eye-catching exotic pink pumpkin. Its ribbed, almost square, fruits also have a sweet, deep orange flesh that is delicious in pies, soups, curry or muffins. Good tolerance to powdery mildew.
	65-4079	BLUE DOLL FI		100		20 x 30 8-10	dna	Blue	Long	Exotic, eye-catching blue pumpkin, very similar to Porcelain Doll. Can be used for ornamental as well as for consumption. Good tolerance to powdery mildew.
	65-4081	INDIAN DOLL FI		100		20 x 30 8-10	dna	Dark salmon	Long	Exotic pumpkin that completes the trio with Porcelain Doll and Blue Doll. Can be used for ornamental as well as for consumption. Good tolerance to powdery mildew.
♥	65-4012	MAGIC LANTERN FI		105		30 x 35 6.8-11.4	45	Orange	Short	Attractive, classy appearance, dark orange with medium ribs. Slightly upright shape. High yield potential even with close spacing in the field. Excellent vigour and uniformity.
	65-4013	GLADIATOR FI		105		35 x 30 6.5-11	40	Dark Orange	Short	Round, deep orange fruit, with moderate ribbing. Thick, long handle, firmly rooted to the fruit. Vigorous, productive vine.
♥	65-4014	MAGIC WAND FI		105		32 x 32 7-10	40	Dark Orange	Short	Attractive, uniform, round to flattened shape fruit. Large, firmly rooted handle. Well ribbed.
★	65-4067	MOCHA FI		105		25 x 30 4.5-5.5	45-50	Moka tan	Medium	Nice round pumpkin in a coffee colour for a touch of originality in your assortment. Good disease tolerance.

SMALL (CONTINUED)

	65-4003	LITTLE GIANT F1	95		14 x 14 0.9-1.8	dna	Dark Orange	Long	Little pie pumpkin with an attractive dark orange colour and a dark, firmly attached handle. Ideal for school field trips. Smooth enough for painting and ribbed enough to have the Halloween looks.
	65-4009	FIELD TRIP F1	95		20 x 25 2.3-3.2	dna	Dark Orange	Short	Distinctive long handle. Flat and ribby. Very uniform in shape and size. Sweet taste. Perfect for pick-your-own activity.
	65-4047	HOT CHOCOLATE F1	95		20 x 20 2-3.5	120	Tan	Medium	Attractive little pumpkin in a unique chocolate brown colour. Solid handle and high yield of fruits that reaches an average of 2.5 kg to 3 kg.
	65-4075	BLANCO F1	95		13 x 13 0.9-1.8	dna	White	Medium	White, round, high quality pumpkin with a long, solidly attached handle. Shows a certain tolerance to yellowing due to sun and frost.
	65-4086	BLAZE F1	95		9 x 18 1.4	dna	Yellow/Orange stripes	Short	Original flat, round shape, ornamental pumpkin. Dark green handle very firmly attached. Vigorous plants with tolerance to powdery mildew. Yields 4-5 fruits per plant.
	65-4073	SNOWBALL F1	100		12 x 12 2.2-2.8	180	White	Medium	Small, very white pumpkin that keeps its colour in the field. Very good yield.
	65-4077	MOONSHINE F1	100		16 x 16 3.5-5.5	140	White	Medium	Bright white, smooth skin, very uniform. Very solid, dark green handle. Harvest when mature to avoid discolouration.
	65-4082	SUNLIGHT F1	100		13 x 15 2	140	Bright yellow	Short	Here is a great variety to differentiate yourself of the usual orange Halloween colours. Bright yellow fruit with a solid green handle. Tolerant to powdery mildew.
	65-4096	TIFFANY F1	100		13 x 15 1.7	dna	Dark orange	Short	More elongated Jack Sprat type. Nice, dark and solid handle.
	65-4008	CANNON BALL F1	105		12 x 12 1.4-2.3	dna	Burnt Orange	Medium	A superb pie pumpkin in a burnt-orange colour, slightly ribbed, with a large, firmly rooted handle. Excellent shelf life that makes it a great variety for painting and school tours.
	65-4011	NAKED BEAR F1	105		12 x 10 1-2	dna	Orange	Medium	Very high yield variety with large handle. Perfect for pies or edible seed production. Hulless seeds are excellent for roasting, and can be pressed for oil.
	65-4006	MINIWARTS F1	110		15 x 15 1.4	dna	Orange with green warts	Short	Smaller version of Warty Goblin with the same orange shell and striking green warts. Very uniform in shape and size. Ideal for Halloween decoration and roadside stands.
	65-4060	SMALL SUGAR	115		15 x 18 2.5-3	dna	Dark orange	Long	Sweet flesh. Popular variety.

MINIATURE

	65-4004	CRUNCHKIN F1	90		0,5-1 x 7,5-10 0,25- 0,5	Orange speckled with yellow	Short	Flat-shaped fruits with a medium-orange colour and slight flecking. Concentrated high yield of hard-shelled fruits that have extended storage ability. Excellent choice as decorative pumpkin.
	65-4095	WEE-BE-LITTLE F1	90		7,5 x 9 0,2-0,3	Orange	Medium	Productive, vigorous plant. Nice uniform fruits. Slightly ribbed.
	65-4019	KANDY KORN PLUS F1	92		8 x 8 0,3-0,45	Dark orange	Bush	A round mini pumpkin. Produces 7-8 fruits per plant. For high density sowing. Tolerant to powdery mildew.
	65-4002	MUNCHKIN F1	93		2,5 x 7,5 0,25	Bright orange	Bush	Early mini decorative pumpkin. Excellent bright orange colour. Flat, deeply sutured shape. Excellent yield.
	65-4001	APPRENTICE F1	95		10 x 12 0,5	Burnt Orange	Bush	Small, round, uniform fruits, with a smooth shell, perfect for decorating. Hard shell. High-yielding variety.
	65-4087	ORANGITA F1	95		8 x 12 0,5-0,7	Bright orange	Short	Excellent producers of slightly larger fruits than other mini pumpkins. Nice deep ribbing for an attractive look. Sweet flesh tasting like an acorn squash. To be used in a display with Casperita. Tolerant to powdery mildew.
	65-4090	BABY BOO F1	95		5 x 7,5 0,1-0,15	White	Medium	Flattened shape with deep ribbing. Slightly sweet, chestnut taste. Perfect for decoration. Stores well, 3 to 6 months.
	65-4092	CASPERITA F1	95		8 x 11 0,25-0,5	White	Short	Casperita is a larger mini white pumpkin in a classic shape, with deep ribs and a strong green handle. This attractive pumpkin has sweet, white flesh that reminds the acorn squash taste. Casperita produces good yield of 4-5 fruits per plant. Winner «les Exceptionnelles 2019.
	65-4093	HOOLIGAN F1	95		5 x 7,5 0,1	Orange, cream spots	Short	Nice fruit for stuffing and decorating. Good yield.
	65-4097	JILL-B-LITTLE	95		5 x 7 0,25-0,5	Orange	Long	Improvement of the Jack-B-Little variety with more fruit uniformity, darker colour and better yield.
	65-4099	BLACK KAT F1	95		6 x 12 0,25-0,5	Black	Short	Black pumpkin that is just the right size for restaurants or displays. Will start turning orange after around two months of storage. Tolerant to powdery mildew.
	65-4091	LIL'PUMP-KE-MON F1	100		6 x 11 0,5-1	Orange	Short	Bushy plant habits. Strong dark green handle. Small, uniform fruits.

	Code	Variety	Form.	Maturity (days)	Colour	Foliage	Use	Harvest season	Description
	65-8005	EARLY SCARLET GLOBE		21	Bright red	Short	Bunching	Spring	Good quality, early variety, mostly used for home gardens.
	65-8013	SOLARIS FI		21	Dark red	Medium	Bunching	Spring - Summer	A good alternative to Escala. Roots are rounder and more uniform. Healthy foliage. For bunching.
	65-8020	MELITO FI		21	Dark red	Short	Bunching, cello	Spring - Summer - Fall	Radish that can be used for cello as well as for bunching. Very strong top attachment. Good uniformity.
	65-8028	ARIANA FI		21	Bright red	short	Bunching, cello	Summer	Very round, nice radish. Appealing bright red. Short foliage.
	65-8033	BODIAM FI		21	Bright red	Medium	Bunching, cello	Spring - Fall	Early radish, bright red with a contrasting pure white interior. Healthy and durable foliage with a strong attachment point for easy handling and mechanical harvesting. Uniform bulbs with good tolerance to cracking.
	65-8019	ROVER FI		22	Dark red	Medium	Cello	Spring - Summer	Very uniform variety that doesn't get pithy. Constant yield and performance throughout the season. Strong foliage.
	65-8021	CHERRIETTE FI		22	Bright red	Medium	Cello	Summer	Short top type mainly for cello. Grows well in warm conditions. Very uniform size and shape. Firm root.
	65-8023	ESCALA FI		22	Dark red	Medium	Bunching	Summer	Radishes with compact tops for summer production, mainly for bunching but can also be used for cello. Good tolerance to Downy Mildew, Rhizoctonia and Fusarium. Performs best in lighter soils.
	65-8025	CELESTA FI		22	Dark red	Medium	Bunching	Summer	Radishes with compact tops for summer production, mainly for bunching but can also be used for cello. Good tolerance to Downy Mildew, Rhizoctonia and Fusarium. Performs best in lighter soils.
	65-8015	RED SATIN FI		23	Bright red	Medium	Cello	Spring - Fall	Medium sized foliage. Uniform round roots that have a refined taproot and good tolerance to damping-off.

SPECIALTY

	65-8054	JUNON FI		26	Red-White tip	Medium	Bunching, cello	Spring - Summer	Good top attachment. Production from March to July. Attractive red colour. Adapted to mechanical harvest.
	65-8066	BACCHUS FI		27	Purple	Medium	Bunching, cello	Spring - Summer - Fall	Exceptional dark purple variety. Nice uniformity. Strong, resistant foliage. Crunchy, tasty flesh. Recommended for early spring and fall harvest, flavour becomes quite hot in the heat of summer.
	65-8055	FRENCH BREAKFAST		28	Red-White tip	Medium	Bunching	Spring - Summer	5 to 8 cm long cylindrical radishes. May become hollow early.
	65-8060	EASTER EGG II		28	White-Pink-Purple-Red	Short	Bunching	Spring - Summer	Colourful! Uniform in maturity.
	65-8094	NEW WHITE SPRING FI		55	White	Long	Fresh market	Spring - Summer - Fall	Daikon radish that produces roots 30 cm long. Good tolerance to bolting. Vigorous and uniform growth.
	65-8077	RIDO RED FI		60	Pale green	Long	Fresh market	Fall	Round, 5-10 cm, pale green radishes with a stunning dark pink interior. Flesh is surprisingly sweet, crisp, and refreshing. Best grown in cool weather. Warm days, cool nights, and adequate nutrition and moisture result in a more colourful interior.

Potato

CLANCY FI

Code	Variety	Form.	Maturity (days) T	Height (cm)	Description
65-7905	CLANCY FI		100	60-90	Our first potato from seed. The sterile seed eliminates the potential of introducing disease to the field, is easier to store and will keep longer than potato tubers. Compact and healthy dark green plants with blue flowers. Resulting spuds are a mix ranging from red to rose-blush skin tones with flesh of creamy white and yellow. Good texture and flavour, ideal for mashing or boiling. Start as transplants.

SESSANTINA SAN MARZANO

Rapini

Code	Variety	Form.	Maturity (days) S	Description
65-8260	SESSANTINA SAN MARZANO		60	The San Marzano selection distinguishes itself by its uniformity and the quality of its flowerets. For fall production.

GIANT VICTORIA

Rhubarb

	Code	Variety	Form.	Maturity (days)	Description
	65-8410	GIANT VICTORIA		Perennial	A selection that offers quality and uniformity. Vigorous plants.

LAURENTIAN THOMSON

APPALACHES

Rutabaga

	Code	Variety	Form.	Maturity (days) S	Root shape	Description
	65-6475	LAURENTIAN THOMSON		85	Round	Smooth, globe-shaped roots with purple shoulders and fine-grained yellow flesh. Excellent storage capacity.
	65-6477	APPALACHES		85	Round	Laurentien type rutabaga, with better tolerance to cabbage maggot. Bulbs of larger caliber than York with foliage attached higher for easier cleaning. Does not have a hollow heart. Same beautiful purplish colour as Laurentien.

MAMMOUTH SANDWICH

Salsify

Code	Variety	Form.	Maturity (days) S	Fruit size (cm)	Description
65-8620	MAMMOUTH SANDWICH		150	15-20 x 3-4	Good quality, tapered, smooth, creamy-white roots. Best cooked, fried, in salads, in sauces, etc. Young leaves are great in salads.

Spinach

C2-606 FI

SIUX FI

TUNDRA FI

BANJO FI

RX 2157 FI

MANDOLIN FI

	Code	Variety	Form.	Maturity (days) ^S	Colour	Leaf type	Harvest season	Tolerances	Description
	65-5043	C2-606 FI		50	Very dark green	Slightly savoyed	Summer	DM (I-9, II-16)	The darkest variety in our assortment. Very high yield of spade-shaped leaves. Adapts to different types of uses (baby, bunching) and is very tolerant to bolting.
♥	65-5052	STANTON FI		50	Very dark green	Semi-savoy	Spring - Summer - Fall	DM (I-II, 13,15), 2	Nice round and dark leaves with a good texture. Vigorous variety that holds well even during hot summer days.
★	65-5035	SIUX FI	UNT	50	Dark green	Semi-savoy	Spring - Summer - Fall	DM (I-15)	Widely adaptable variety with dark green, thick but supple, semi-savoyed leaves. Upright growing with a medium fast growth speed. Reliable in warm and hot conditions. Mostly used for baby leaf production but can be grown full size. Good replacement to Stanton.
	65-5053	TUNDRA FI	UNT	50	Dark green	Semi-savoy	Summer	DM (I-13, 15, 16)	High quality spinach for the production of tender and succulent baby leaves. Attractive dark green, oval and semi-savoyed leaves. The upright plant and the length of the stem make harvesting easy and clean. Abundant harvest. Replaces the Shelby variety.
	65-5062	BANJO FI	UNT	50	Dark green	Semi-savoy	Spring - Summer - Fall	DM (I-12, 14, 15)	Nice and adaptable variety that performs well throughout the season. A good alternative to Stanton.
	65-5066	RX 2157 FI		50	Very dark green	Semi-savoy	Summer	DM (I-13)	Almost oval shaped, thick leaves, very dark green in colour. Performs very well during summer time. Suited for baby leaves and bunching.
	65-5063	MANDOLIN FI	UNT	52	Dark green	Savoy	Summer	DM (I-12, 14, 15)	Very nice summer variety, thanks to its slower growing habit and thickness of the leaves. Very round leaves.

TOLERANCES: DM = Downy Mildew (races 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16) - 2 = White Rust

SPAGHETTI (CONTINUED)

	65-4506	SMALL WONDER F1		70	Orangy Yellow	Oval elongated	15-18	–	Orangy-yellow exterior. Excellent flavour. Good yield of uniform fruits.
	65-4515	VEGETABLE SPAGHETTI IMPROVED		70	Light yellow	Oval elongated	20-25	–	Popular variety for its excellent yield. Running vines. White flesh that looks like spaghetti noodles. Keeps a long time.
	65-4520	STRIPETTI F1		85	Beige with green stripes	Oval elongated	30	–	The skin turns to orange when mature. The best tasting of the spaghetti squashes.
	65-4526	ANGEL HAIR F1		85	Bright Yellow	Oval elongated	15	–	Small "single-serving" type spaghetti squash that provides only 1 or 2 servings of flesh. The uniform fruit is attractive with its oval shape and darker yellow rind than most other varieties. Sweet hazelnut taste. Long vine.

ZUCCHINI YELLOW

	65-4541	ONE BALL F1		45	Bright yellow	Round	6-8 diamètre	–	Yellow version of Eight Ball. Open, erect and productive plants.
	65-4545	EASY PICK YELLOW II F1 PATIO COLLECTION		45	Bright yellow	Elongated	18-20	–	Variety to grow either in a container or in the garden. Very easy to harvest thanks to its open plant with no spines. Reaches a height and width of 90-130 cm.
	65-4553	GOLDEN DELIGHT F1		45	Golden yellow	Elongated	18-20	–	Golden-yellow fruits. Semi-spiny plant that is vigorous and allows for easy harvest with limited fruit damage.
	65-4554	GOLDEN GLORY F1		45	Bright yellow	Elongated	18-20	CMV, PM, WMV, ZYMV	An improved Golden Delight because of its tolerance to CMV. Straight, cylindrical fruits.

ZUCCHINI GREEN

	65-4542	EIGHT BALL F1		45	Medium green	Round	6-8 diamètre	–	Unique round zucchini. Early, strong plants with an open compact habit.
	65-4568	QUIRINAL F1		45	Medium green	Elongated	15-18	PM, WMV, ZYMV	Very smooth, cylindrical, nice quality fruit. Vigorous, open and erect plant, very few spines.
	65-4574	CASH MACHINE F1		45	Dark green	Elongated	20	PM, CMV, WMV, ZYMV	Nice looking, cylindrical fruit. Small, open plant that makes harvest easy. The exceptional plant longevity allows for extended harvest.
	65-4565	DUNJA F1		48	Green	Elongated	20	PM, WMV, ZYMV, PRSV	Vigorous plant that stays productive for a long period. Good quality fruit, slightly larger at the end.
	65-4566	SPINELESS BEAUTY F1		48	Medium green	Elongated	19-22	–	Slightly waxed, smooth cylindrical fruits. Leaves and stems have no spines. Good yielders.
	65-4567	SPINELESS PERFECTION F1		48	Medium green	Elongated	18-20	PM, WMV, ZYMV	Similar to Spineless Beauty but with a good tolerance to many diseases. Fruit is easy to harvest by hand without breaking the petioles. No spines on the leaves or on the petioles.

TOLERANCES: PM : Powdery Mildew - CMV : Cucumber Mosaic Virus - PRSV : Papaya Ring Spot Virus - WMV : Watermelon Mosaic Virus - ZYMV : Zucchini Yellow Mosaic Virus

BUTTERNUT

	65-4610	EARLY BUTTERNUT FI		75	Tan	Blocky	1,3	Semi-bush	One of the earliest butternuts. Good squash for short growing season. Fine textured and sweet tasting orange flesh.
	65-4620	ISABEL FI		75	Tan	Pear	1,2	Vine	Excellent alternative to Early Butternut because of its earliness, its higher yield and the better quality of its fruits. Ideal to start the growing season.
	65-4609	METRO P.M.R. FI		80	Tan	Pear	1-1,5	Vigne	Ideal for market that wants a small size squash. Good yield potential, produces 4-5 fruits per plant. Stores very well. Strong against powdery mildew.
	65-4611	POLARIS FI		80	Tan	Pear	1,4-2,3	Vine	Small to medium size squash, its shape is similar to the Waltham Butternut. Very smooth exterior, deep orange interior. Tolerant to cracking. For fresh markets.
	65-4612	BUTTERFLY FI		80	Tan	Pear	1,4-1,8	Semi-bush	Very attractive squash that gets high marks for its uniform size and shape and its tolerance to powdery mildew. High yield on strong and healthy plants. Excellent choice for roadside stands, markets or boxing.
	65-4616	AVALON FI		80	Tan	Pear	1,5-1,8	Vine	Outperforms most other hybrid butternut varieties. Excellent yield and outstanding uniformity. Long-term storage capacity.
	65-4615	QUANTUM FI		85	Tan	Rectangular	1,1-2	Vine	Medium size squash, with wide neck and small seed cavity. Exceptional yield. Sweet and nutritious. Perfect shape for box filling.
	65-4617	TIANA FI		85	Tan	Pear	1-1,2	Vine	Tiana produces medium-sized fruits, with dark flesh and a solid skin, allowing the fruits to be stored. Good yield potential and delicious taste.
	65-4618	HAVANA FI		85	Tan	Pear	1,3-1,8	Semi-vine	Uniform and very productive variety that ripens fairly early for its size. The blocky fruits have a thick neck and a small seed cavity. Flesh is deep orange and tasty. Vigorous plant, well adapted to North America's growing conditions. Good post harvest shelf life.
	65-4621	HONEYNUT		85	Dark tan	Pear	0,25-0,5	Vine	A very tempting mini butternut squash and an outcome of a research program from Cornell University. Open pollinated plants with a strong tolerance to powdery mildew. It will produce an abundant yield of uniform mini fruits with very high sugar content once fully ripen and fully coloured. Stores very well.
	65-4640	AUTUMN FROST FI		85	Frosted tan	Square	1,1-1,8	Vine	Unique variety with round, ribbed fruits that ripen to a beige colour covered with frosty white. Pleasant taste similar to a butternut squash, but with a superior quality, a better developed flavor and a storage capacity of 4 months. Tolerant to powdery mildew.
	65-4624	ULTRA HP FI		90	Tan	Elongated pear	1,8-8	Vine	Variety selected for its high tonnage. Fruits are often curved with very high yield potential. Fine, sweet, dark orange flesh. For processing, dehydration or freezing.
	65-4608	BUTTERKIN FI		100	Tan	Round-flat	1	Vine	New, unusual cross between a butternut squash and a pumpkin. Vibrant orange fleshed fruits with a creamy, smooth and sweet taste. Ideal for roasting, baking, soups or pumpkin pies.
	65-4619	SUCRINE DU BERRY		115	Deep green to straw yellow	Pear	2-3	Vine	A 15 to 20 cm long squash with very good quality light-orange flesh.

ACORN

♥	65-4642	AUTUMN DELIGHT PMT FI	UNT	85	Dark green	Ribbed and pointed	1,5	Semi-bush	Uniform. High yielders. Tolerant to powdery mildew.
♥	65-4644	TAYBELLE PMT FI	UNT	85	Dark green	Ribbed and pointed	1,5	Semi-bush	High quality acorn squash that has high resistance to powdery mildew and matures from dark green to jet black. Semi-bush plant that allows for higher density planting and a high yield potential.
	65-4647	HEART OF GOLD FI		85	Cream-dark green	Ribbed and pointed	1-1,2	Semi-bush	Heart-shaped fruit with mottled striping. Thick, orange and fine-grained flesh.
	65-4649	MASHED POTATOES FI		85	White	Ribbed and oval	0,5-0,7	Compact vine	Stark white acorn that will hold its pure colour into late fall. The flesh is nearly white and resembles mashed potatoes when baked and fluffed. Typically produces 3-4 fruits per plant and most of the fruits are found on the crown set.
★	65-4650	GOLDSLOCKS FI	UNT Exact	85	Orange	Ribbed and pointed	0,5	Bush	Bright orange acorn squash with a uniform shape and colour used for both food and decoration. The plants are vigorous, the yield is good and the nutty flavour is delicious.
	65-4664	CELEBRATION FI		85	Pale yellow-orange stripes	Ribbed	0,7	Bush	Excellent tasting squash and very decorative. Tolerant to powdery mildew.
	65-4657	TABLE QUEEN	EXCL	90	Dark green	Ribbed and pointed	0,7	Bush	A little acorn type squash (10 by 11,5 cm), dark green with tasty orange flesh. Open pollination. Compact plants.

SPECIALTY

	65-4660	BUSH DELICATA	UNT	80	Cream-green stripes	Elongated	0,7-1	Bush	AAS winner. Same shape and colour as the well-known Delicata, on a much more compact plant. Space them closer together for a higher yield. Good tolerance to powdery mildew. Storage capacity up to four months.
	65-4667	MARINA DI CHIOGGA	UNT Exact	100	Dark green	Round, flat, warty	4-8	Vine	Firm, red and sweet flesh. In addition to being decorative, this squash is ideal to make raviolis and gnocchi.
	65-4671	LADY GODIVA		110	Green-yellow stripes	Square	3-9	Semi-bush	Light-orange flesh for soups or ratatouille. Produces skinless seeds for oil extraction.
	65-4674	BANANA PINK JUMBO	UNT Exact	115	Tan	Elongated, pointed	7-20	Vine	Thick, bright orange, good quality flesh. Can be used to make jams.

CELEBRATION

	Code	Variety	Form.	Maturity (days)	Colour	Leaf type	Height (cm)	Description
	65-1005	DELTA		58	White	Medium green slightly savoyed	35-40	Lucullus type Swiss chard that distinguishes itself by its large ribs as well as its rather smooth leaves. Many proclaim this type as being the best tasting Swiss chard among all.
	65-1012	SILVERADO		58	White	Dark green savoyed	35-40	Silverado is a green chard with heavy savoyed, glossy dark green leaves over a white stem. Compact habits. Slow bolting. Good field holding ability.
	65-1013	SILVER STAR		58	White	Dark green savoyed	35-40	Very vigorous, healthy, upright variety for multiple harvests. Strong colour contrast which leads to an attractive final look.
	65-1064	BALI		58	Deep red	Dark green savoyed	40-50	Superb Swiss chard with bright red petioles.
	65-1054	CELEBRATION		62	Multicoloured	Dark green savoyed	55	High percentage of red, yellow, orange and pink petioles, very little white. To be used for fresh specialty market, baby leaf or in trays. Foliage more savoyed than Bright Lights.

RED

	65-9015	POLBIG FI		55	170-225	Small	Determinate	8, 11	Our earliest variety. Round, firm, fleshy fruits. Excellent yield. Well adapted to cold regions.
	65-9002	PATIO FI		60	115	Small	Determinate	2, 8	Compact, erect plants. For cultivation in containers or pots.
	65-9004	PRIMO RED FI		63	250-300	Medium	Determinate	8, 9, 11, 12, 13	Large tomato with excellent firmness. Healthy, compact plant with good fruit protection. Nice colour.
	65-9025	MOUNTAIN SPRING FI		64	225-250	Medium	Determinate	8, 9, 11	Concentrated production of No. 1 dark red fruits. Very firm. Resistant to blossom end rot.
	65-9026	TASTI-LEE FI		64	180-200	Medium	Determinate	8, 9, 11	Hybrid for the fresh market. A high level of lycopene gives it a rich red colour, inside and out and adds health benefits to the fruit. Remains firm at maturity. Leave it on the vine to ripen for a well-developed taste.
	65-9033	ROCKY TOP FI		64	200-250	Large	Determinate	4, 8, 9, 10, 11	Vigorous and productive plants. Produces large size tomatoes. Can also be grown in a greenhouse or a high tunnel.
	65-9086	CAIMAN FI		64	220-240	Large	Indeterminate	–	An early Beefsteak tomato, on a vigorous and open plant, very easy to grow. Produces round fruits, dark red in colour, with a very appreciated taste.
	65-9000	HOMESLICE FI		65	140-200	Small	Determinate	10, 11	Vigorous, compact variety that produces very early and bountiful yields of exceptional slicers. True tomato flavour. Perfect for patio containers and small gardens. Replaces the Megabite variety.
	65-9001	BIG LEAGUE FI		65	400-600	Very Small	Determinate	–	Large size tomato for small spaces. Produces early excellent large fruits that ripen early in the season. Because of the weight of the fruit, which can reach 400 g to 600 g each, it is recommended to install fruit stands. To be produced in the field or for transplants. Replaces the Megabite variety.
	65-9029	CELEBRITY PLUS FI		68	200	Medium	Determinate	2, 3, 4, 5, 8, 9, 11, 13	Improvement of the popular Celebrity strain. Same good yield, same great taste. More disease tolerance.
	65-9045	CELEBRITY FI		68	200	Large	Determinate	2, 3, 4, 5, 8, 9, 11	Popular variety. Dark red fruit. Very good taste. Fresh market, pack or resale production.
	65-9046	MOUNTAIN MERIT FI		69	225-280	Small	Determinate	3, 8, 9, 10, 11, 13, 16	A large tomato with an excellent resistance to late blight. A nice round, deep-red, juicy fruit with a mild flavour. Short, determinate plants that have a concentrated harvest. Ideal variety for commercial growers or for home gardeners who want a lot of tomatoes at once.
	65-9056	ACE 55 VF		69	200	Medium	Determinate	8, 11	Highly comparable to Campbell 1327. Standard O.P. variety.
	65-9005	MOUNTAIN FRESH PLUS FI		70	250-300	Large	Determinate	3, 8, 9, 11	Firm, nice quality tomato. Large plant with good fruit protection.

RED (CONTINUED)

	65-9006	RED MORNING F1		70	240-260	Medium	Determinate	8, 9, 11, 12, 13	Early variety produces a high number of first quality fruits. Better plant than Primo Red. Abundant production.
	65-9008	RED MOUNTAIN F1		70	200	Medium	Determinate	3, 8, 9, 11, 13,	Round, medium-sized fruit with exceptional fruit quality. Good resistance to several diseases.
	65-9100	MARRIAGE GENUWINE F1		70	300-330	Large	Indeterminate	–	Slicer tomato is a cross of Costoluto Genovese and Brandywine. Distinctive heirloom look and flavour with better garden performance. Provides earlier and higher yields with fewer fruit blemishes.
	65-9093	BIG BEEF PLUS F1		73	280-400	Large	Indeterminate	1, 3, 4, 5, 6, 8, 11, 13, 21	Improvement of the popular variety. Sweeter (more brix), better appearance with the addition of the "Crimson" gene and more disease tolerance.
	65-9094	BIG BEEF F1		73	280-400	Large	Indeterminate	1, 3, 4, 5, 8, 11	Beefsteak type. Very uniform fruit size. Highly productive.
	65-9007	MOUNTAIN MAJESTY F1		75	250-300	Large	Determinate	8, 9, 11, 13	Extra-large, firm, smooth fruit. Contains the Crimson gene, which gives the interior a dark red colour. Large, resistant plant.
	65-9081	MEGA FANTASTIC F1		75	175-185	Large	Indeterminate	2, 3, 4, 8, 11	Replacing famous Fantastic tomato. Same vigorous plants, same tomato size and colour, same favourite taste, appreciated by gardeners for years.
	65-9083	FLORIDA 47 F1		75	230-260	Medium	Determinate	4, 8, 9, 11, 12	Adapted for stake production. Firm fruit. High yield.
	65-9084	SV710ITD F1		75	225-250	Medium	Determinate	2, 3, 4, 8, 9	Earlier Florida 47 type. Large, faultless dark red fruits on a healthy, highly resistant plant. Same dark red colour inside and out. Exceptional taste and overall quality.
	65-9085	BETTER BOY F1		75	230	Large	Indeterminate	2, 3, 4, 8, 11	Well adapted variety. Large dark red fruit, smooth and firm.
	65-9095	BEEFSTEAK		80	280-400	Large	Indeterminate	–	Large meaty, thick and tasty tomato. Ideal for sandwiches.

YELLOW

	65-9209	GOLDMINE F1		65	225-240	Large	Indeterminate	–	Popular variety. Pack production for resale. Very productive plants. Light-yellow colour.
	65-8898	CHEF'S CHOICE YELLOW F1		70	300	Large	Indeterminate	7, 8, 9, 10, 11	Savoury addition to the Chef's Choice tomato selection. Yellow Beefsteak type on a very productive indeterminate plant. At least 30 fruits of large meaty delicacy that have a sweet, citrus-like flavour with just the right amount of acid.
	65-9096	BUFFALOSUN F1		75	300-350	Large	Indeterminate	7, 8, 9, 10, 11, 13, 16	Variety with a good texture, a high yield, and a low cracking incidence. Produces beautiful orange-red fruits on the outside, marbled on the inside, until the end of the season. The indeterminate plant bears fruit with a sweet taste, with tender flesh, without any pasty texture. It is recommended to stake Buffalosun. This variety is tolerant to late-season mildew. Winner AAS 2020.

--	---------	------------------------	--	----	---------	-------	---------------	------------------------	--

ORANGE

	65-8899	CHEF'S CHOICE ORANGE FI		70	330	Large	Indeterminate	–	Bright, almost neon, internal colour and superior flesh taste and texture for an early maturing orange tomato. Averaged size fruits are 330 g but can weigh up to 450 g. Leaves cover fruit well in protection to sunburn. AAS 2015 winner.
--	---------	-------------------------	--	----	-----	-------	---------------	---	---

PINK

	65-8880	PINK GIRL FI		65	225	Large	Indeterminate	8, 11	Large calibre fruit, smooth and uniform. Good tolerance to cracking. High quality.
	65-8882	PINK CUPCAKE FI		65	200-250	Medium	Determinate	–	Early pink tomato that produces large, very firm and great tasting fruits. A preferred choice to Pink Girl, because of its firmness.
	65-9099	MARRIAGE BIG BRANDY FI		78	350-425	Large	Indeterminate	–	Pink Beefsteak is a cross of Big Dwarf and Brandywine. Distinctive heirloom look and flavour with better garden performance. Provides earlier and higher yields with less fruit blemishes.
	65-8896	CHEF'S CHOICE PINK FI		85	335-400	Large	Indeterminate	2, 3, 7, 8, 9, 10, 12	Large pink beefsteak tomatoes that complements the Chef's Choice selection. Great yields of 335-400 grams fruits ideal for canning. Perfect acid to sugar balance. The potato leaf-like plant has good disease resistance.
	65-8895	OXHEART		100	300-350	Very Large	Indeterminate	–	Extra large size fruit. Beefsteak type. Popular variety.

PURPLE

	65-9077	INDIGO APPLE		72	55-110	Large	Indeterminate	–	A larger Indigo tomato with exceptionally high anthocyanin content. Sweet, rich flavoured fruits, resist cracking and sun scald, lasting long into cool autumn weather when others have quit. Firm, meaty fruits that turn red when ripe.
	65-9075	MARRIAGE CHEROKEE CARBON FI		75	280-350	Large	Indeterminate	–	This tomato is a robust Beefsteak type, purple in colour, with a rich flavour that comes from a cross of Cherokee Purple x Carbon. This indeterminate plant is best grown in-ground.

	Code	Variety	Form.	Maturity (days)	Weight (g)	Plant size	Plant habit	Tolerances	Description
	65-9218	SUNRISE SAUCE FI		60	85-110	Small	Determinate	8, 11	The only non-heirloom orange, Roma/paste/cooking tomatoes on the market. The concentrated yield of fruits is perfect for making sauces and salsas. A determinate plant that is ideal for small-space gardens or large containers. Easy-to-peel, sweet and meaty tomato, with a taste like traditional Roma. Cooking will maximize flavour.
	65-9219	PONY EXPRESS FI		63	100-120	Medium	Determinate	3, 8, 9, 10, 11, 12, 14	Early compact plant that grows large to extra large fruits, with excellent colour and firmness. High yield for field production, with or without a stake.
	65-9221	AB-0311 FI		63	110	Medium	Determinated	8, 9, 11, 13	Main season, processing hybrid tomato that produces large, firm fruit with thick walls. Good quality for peeling, dicing and paste, allowing a grower to produce a variety with good yield potential for multiple markets.
	65-9214	DAVINCI FI		65	110-120	Small-Medium	Determinate	3, 4, 8, 9, 10, 11, 12, 14, 18	Saladette type with the very high fruit quality demanded by the market. Higher yield potential due to extended setting on the plant. Very comprehensive disease package. Crimson gene for great colour and appearance.
	65-9213	POZZANO FI (SAN MARZANO)		68	150	Medium	Indeterminate	7, 8, 11, 12	A traditional looking "San Marzano" that produces large tomatoes. The fruits are really full and have a good tolerance to blossom end rot. Replacement for the San Marzano variety.
	65-9216	GRANADERO FI		68	150	Compact	Indeterminate	3, 7, 8, 11, 12, 13, 19	An Italian tomato tolerant to cooler conditions. Produces a good yield of large fruits. Can be harvested in a cluster.
	65-9211	SUPREMO FI		70	120-160	Compact	Determinate	2, 4, 8, 9, 10, 11, 13, 14	Produces large fruits early in the season. Suited for both staking and ground culture. Excellent yield potential. Classical fruit shape; excellent quality.
	65-9212	PATRIA FI		72	120-130	Medium	Determinate	3, 8, 9, 11, 13, 14	Very firm fruit with excellent yield potential. Large-sized fruit.
	65-9226	MARIANA FI		72	125-130	Small-Medium	Determinate	2, 4, 8, 9, 11	Later variety. Extra large, very uniform and fleshy fruits.
	65-9222	PLUM REGAL FI		73	120-130	Moyen	Determinate	8, 9, 11, 13, 15, 16	Our first tomato variety tolerant to both early and late blight. Plum Regal is also highly resistant to cracking and grey wall. Good plant cover and nice deep interior colour.
	65-9225	STAR 9065 FI		73	130-140	Large	Determinate	3, 5, 8, 9, 11, 19	Very good yield potential of uniform, excellent quality fruits. Tolerant to several diseases.
	65-9215	MARRIAGE PERFECT FLAME FI		75	100-125	Large	Indeterminate	—	Orange saladette tomato with a sweet-tart fruitiness. Perfect Flame is a cross of Peron x Flame and is the earliest-ripening Heirloom Marriage variety. It is best grown in-ground.

TOLERANCES: 1 = Anthracnose - 2 = Alternaria Stem Canker - 3 = Nematode - 4 = Grey Leaf Spot - 5 = Tobacco Mosaic Virus - 6 = Fusarium Crown and Root Rot- 7 = Fusarium Wilt (race 0) - 8 = Fusarium Wilt (race 1) - 9 = Fusarium Wilt (race 2) - 10 = Fusarium Wilt (race 3) - 11 = Verticillium Wilt (race 1) - 12 = Tomato Mosaic Virus - 13 = Tomato Spotted Wilt - 14 = Bacterial Speck - 15 = Early Blight - 16 = Late Blight - 17 = Cladosporium Leaf Mold (5 races) - 18 = Tomato Yellow Leaf Curl Virus - 19 = Powdery Mildew - 20 = Phytophthora

CHERRY RED

	65-9234	TINY TIM		45	Less than 25	Small	Determinate	–	Mini cherry tomatoes on mini tomato plants! Sweet and juicy red fruits on plants that rarely grow taller than 30 cm (12"). Does very well in hanging baskets or containers. Flavourful fruits on this hybrid introduced in 1945.
	65-9236	TUMBLER FI		45	25-30	Medium	Determinate	–	A superior variety for hanging baskets and containers. Prolific plant with graceful, cascading habits. Sweet and juicy early fruits.
	65-9231	MASCOTTE FI		47	25-30	Small	Determinate	–	Nice bright red cherry, slightly larger than Tumbler, on a compact plant. Great sweet taste. Good yield.
	65-9232	RED PROFUSION FI		47	20	Medium	Determinate	–	Very early trailing tomatoes with a very well-branched habit and good weather tolerance. Highly suitable for large baskets or containers, the earliness makes it easier to sell with coloured fruit. Produce an abundance of scarlet 1 inch fruit all over the plant. Red Profusion has a neat habit in a plug or 10 cm pot but will grow vigorously to fill a large container with 360° branching. Replaces the Basket Red variety.
	65-9245	CANDYLAND FI		55	7-8	Large	Indeterminate	–	Cherry tomato that can compete with the BONBON. A very tasty tomato with a dark red colour and a diameter of 1.25 cm. The fruits mainly grow outside the plant, making it easier to pick.
	65-9246	SWEET 'N' NEAT SCARLET RED IMPROVED FI		55	25	Small	Determinate	–	Ultra compact plants of about 30 cm high for growing in containers. Good yield of sweet-tasting tomatoes. Perfect for balconies.
	65-9251	LITTLE BING FI		55	Less than 25	Very Small	Determinate	–	Tasty variety that produces an abundance of tomatoes in the middle of summer. Determinate plant with a compact habit (less than 61 cm in height) and a healthy green foliage. The flowers appear early and the fruits ripen in only a few weeks, allowing the harvest of many tomatoes at a time. To be produced in the field or for transplants.
	65-9227	MONCHERRY FI		58	15	Medium	Indeterminate	5, 8, 11	A real candy treat! Extra sweet fruit, juicy and tender. Clusters can carry up to 50 fruits each. Very vigorous plants.
	65-9250	PEPE FI		58	15-20	Compact	Determinate	8, 12	A great quality cherry tomato with a high sugar content giving it an amazing sweet taste. Can be grown in the garden or in containers.
	65-9229	SUNCHERRY FI		60	Less than 25	Large	Indeterminate	8, 9, 12	Huge crops of shiny, bite-sized red fruits that ripen early and that continue to be produced throughout the summer. Fruits are tolerant to cracking.
	65-9230	CHERRY FOUNTAIN FI		60	Less than 25	Large	Semi-determinate	–	Very vigorous variety suited to large baskets and containers. Cherry-red fruits that crop heavily over a long harvest period. Tidy habit as a young plant and good establishment make this variety ideal for young plant sales.
	65-9237	JASPER FI		60	10	Large	Indeterminate	8, 9, 15, 16	A 2013 AAS winner. Finally, here is a tomato that can be compared to the "Bonbon" variety. Small tomato with an extraordinary taste. Stands out for its impressive yield and healthy plants.

CHERRY RED (CONTINUED)

	65-9253	SUGAR GLOSS FI		55	20-25	Medium	Indeterminate	–	New indeterminate variety with high-yielding trusses with very visually attractive glossy red fruit. The bright red cherry fruits have a good flavour with a 12% Brix rating. High yielding, up to 60 fruits on long and elegant trusses.
	65-9262	SAKURA FI		60	15-20	Large	Indeterminate	3, 7, 8, 12, 17	Cherry tomato well adapted to be harvested by clusters of 20 fruits or more or separately. Tolerant to cracking. Can be grown in open fields or high tunnels. Excellent taste.
	65-9288	PROFI FRUTTI CHERRY FI		60	20	Large	Indeterminate	18	Indeterminate tomato selected for its excellent productivity. Small, dark red, shiny fruits that weight around 20 g. Brix rate of 10, sweet and delicious fruits. Winner of Les Exceptionnelles 2018.
	65-9264	SWEET 100 FI		63	Less than 25	Large	Indeterminate	–	Popular. Thick walls. Very sweet. Productive.
	65-9266	SWEET MILLION FI		65	Less than 25	Large	Indeterminate	–	Popular variety. Fruit size slightly smaller than Sweet 100. Very sweet.

CHERRY YELLOW

	65-9242	BASKET YELLOW FI		55	Less than 25	Small	Determinate	–	Compact plants for hanging basket and patio container market. Sweet and delicious taste.
	65-9248	SWEET 'N' NEAT YELLOW FI		55	25	Small	Determinate	–	Ultra compact plants of about 30 cm high for containers. Good yield of sweet-tasting tomatoes. Perfect for balconies.
	65-9295	SUNLEMON FI		55	15-18	Large	Indeterminate	12	Round, pale yellow fruits on long clusters. High production. Good tolerance to cracking.
	65-9265	SWEET GOLD F.F.R FI		65	Less than 25	Large	Indeterminate	8, 11	Single to double clusters with good fruit sets. Super yield.
	65-9275	GOLDEN PEARL FI		65	25-35	Large	Indeterminate	5, 8	Good alternative to the variety Sweet Gold. Excellent taste. Does not crack and has shown a better tolerance to bacterial spot. Fruits are not jointless.

CHERRY ORANGE

	65-9267	SUN GOLD FI		60	Less than 25	Medium	Indeterminate	–	Delicious tasting, dark orange fruit. Extremely productive.
	65-9274	TORONJINA FI		60	18-22	Large	Indeterminate	7, 8, 12, 17	Vibrant orange and very sweet cherry tomato deliciously tasty. Gives high yields of very uniform fruits.
	65-9276	SUNORANGE FI		60	16	Large	Indeterminate	8, 12, 17	Vibrant orange and very sweet cherry tomato deliciously tasty. High yields of very uniform fruits. Good tolerance to cracking.
	65-9304	ORANGETO FI		60	20-25	Small	Semi-determinate	12, 20	Small, bright orange, semi-determinate tomato with the PH3 gene that gives the variety a good tolerance to late blight caused by Phytophthora infestans. The harvest can thus go to the end of the season. Sweet (10 % à 13 % Brix) and juicy fruits that do not crack and can be grown in a container or in the field. Winner of the 2020 Les Exceptionnelles program.

TOLERANCES: 1 = Anthracnose - 2 = Alternaria Stem Canker - 3 = Nematode - 4 = Grey Leaf Spot - 5 = Tobacco Mosaic Virus - 6 = Fusarium Crown and Root Rot - 7 = Fusarium Wilt (race 0) - 8 = Fusarium Wilt (race 1) - 9 = Fusarium Wilt (race 2) - 10 = Fusarium Wilt (race 3) - 11 = Verticillium Wilt (race 1) - 12 = Tomato Mosaic Virus - 13 = Tomato Spotted Wilt - 14 = Bacterial Speck - 15 = Early Blight - 16 = Late Blight - 17 = Cladosporium Leaf Mold (5 races) - 18 = Tomato Yellow Leaf Curl Virus - 19 = Powdery Mildew - 20 = Phytophthora

CHERRY BLACK

	65-9289	CHOCOLATE CHERRY FI		70	Less than 25	Medium	Indeterminate	–	Improvement of the Black Cherry variety because of an increased tolerance to skin cracking. Red mixed with dark chocolate colour. Sweet taste.
--	---------	---------------------	--	----	--------------	--------	---------------	---	--

CHERRY BROWN

	65-9291	CHOCOLATE SPRINKLES FI		55	20	Large	Indeterminate	–	First cherry tomato with a chocolate sprinkled colour that resists diseases. It also produces more fruits with a better flavour than other open pollinated tomatoes of the same colour. Best grown in-ground.
--	---------	------------------------	--	----	----	-------	---------------	---	---

CHERRY GREEN

	65-9252	SUNGREEN FI		65	Less than 25	Large	Indeterminate	–	Green cherry tomato, that will remain green! When is the right time to pick it? Watch it carefully, you'll notice a change in the skin colour, going from deep green to light green when ripe. Crisp texture and slightly sour taste with a touch of citrus.
--	---------	-------------	--	----	--------------	-------	---------------	---	--

CHERRY PINK

	65-9294	SUNPEACH FI		55	15-20	Large	Indeterminate	12, 17	Vigorous, high-yielding plants that will stay healthy longer in the season due to its tolerance to leaf mold and tomato mosaic virus. Fruits are in a shiny deep pink colour and are set on long trusses. Excellent sweet flavour.
	65-9268	SWEET TREATS FI		65	20-30	Large	Indeterminate	3, 4, 8, 9, 12	Great balance of sugar and acidity in a cherry tomato. Shiny, round fruit, tolerant to cracking.

CHERRY PURPLE

	65-9278	INDIGO BLUE BERRIES		75	25-50	Large	Indeterminate	–	Delectable bunches of small cherry tomatoes of 25 g to 50 g each. Green fruits that quickly show a purple shoulder and crimson body, ripening to a deep black colour. The fruits contain a high level of anthocyanin, a natural antioxidant (indigo pigmentation) known to fight certain diseases. Harvest the fruit when the colours have deepened.
--	---------	---------------------	--	----	-------	-------	---------------	---	--

COKTAIL PURPLE

	65-9235	INDIGO ROSE		75	50	Large	Semi-determinate	–	Cocktail tomato type. With a good balance of sugars and acids, Indigo Rose will stand out in gardens as well as in markets.
--	---------	-------------	--	----	----	-------	------------------	---	---

COKTAIL RED

	65-9277	STURDY JO FI PATIO COLLECTION		55	25-30	Large	Determinate	–	A cocktail tomato conveniently adapting to the size of the container it grows in. Sweet fruits, nice red colour, visible on top, combined with dark green leaves. Strong regrowth after harvest.
	65-9210	MOUNTAIN MAGIC FI		65	35	Medium	Semi-determinate	8, 9, 11	Campari type, excellent tasting, tolerant to cracking, long shelf life. Can be harvested in clusters.

SEEDLESS

65-6031	CITATION FI		72	Red	Medium green - Dark green stripes	Round	4.0-5.0	–	A true 60 count per box. Sets well in cold conditions. Very good yield of prime quality fruits.
65-6037	SWEET DAWN FI		72	Red	Dark green - Medium green stripes	Oval	7.5-9	2, 6	Early seedless melon that has shown consistent yields. Dep red firm flesh has also shown a lower incidence of hollow hearts than other early varieties
65-6019	AMARILLO FI		75	Yellow	Medium green - Pale green stripes	Round	6.5-7.0	–	Bright, deep yellow flesh colour with distinctive rind pattern. Broad adaptability. Variety less affected by hollow hearts than others.
65-6041	MELODY FI		78	Red	Medium green - Dark green stripes	Round	5.5-7.2	1, 2, 3, 6	Early variety. Vigorous plant, tolerant to diseases. Abundant production of melons with firm flesh and sweet taste.
65-6044	CRACKER JACK FI		78	Deep red	Dark green - Medium green stripes	Oval	6.8-8.6	2	Early watermelon. Grows on a vigorous plant that has good greenhouse emergence and continues to provide a solid vine throughout the season. Constant fruiting of oval fruits with firm dark red flesh. Sweet and crispy (12% - 13% Brix).
65-6035	ROAD TRIP FI		82	Red	Dark green - Medium green stripes	Oval	7.0-8.0	1, 6	A 45-count hybrid watermelon with exceptional external and internal quality. Uniform in fruit shape and size. Very adaptable variety with high yield potential. Average degree brix of 11.5. Sweet and crunchy flesh.
65-6054	SERVAL FI		85	Red	Dark green	Round-oval	1.8-2.7	–	Single serving type. Excellent uniform size and excellent flesh colour. Early with a good shelf life.
65-6055	SOLITAIRE FI		85	Red	Medium green - Dark green stripes	Oval	1.6-2.3	2, 3, 6, 10	Early mini watermelon, seedless, weighing from 1.6 kg to 2.3 kg for a single portion with no leftovers. Dark red flesh, sweet and crispy. Medium vine. An excellent choice for regions with a short growing season.
65-6057	TYRION FI		85	Red	Dark green	Round	1	–	Micro, seedless watermelon variety with an average weight of around 1 kg. Very good taste, uniformity and yield. Attractive fruits, with smooth, black skin, and sweet, crisp, red flesh. Excellent shelf life.

POLLINATOR

65-6096	WILD CARD PLUS FI		68	–	Pale green - Medium green stripes	Round-oval	–	2, 6	Variety of pollinators, which has an early flowering extending over a long period, to ensure availability of pollen as soon as the hybrid begins to flower. Long internodes that bring the pollen laterally to the female flowers wherever they are. Inedible fruits.

	Code	Variety	Form.	Description
AMARANTH-AMARANTHUS RETROFLEXUS				
	67-0470	SSC 3099		Variety with a darker colour development than standard varieties. Annual.
BALM-MELISSA OFFICINALIS				
	67-1310	LEMON BALM		Lobe-shaped, serrated leaves with a lemony taste. Height and width of 40 to 50 cm. Perennial.
	67-1311	MANDARINA		Very aromatic perennial with a high and spreading growth habit. Oval green leaves with a gentle mandarin fragrance. Semi-hardy perennial.
BASIL-OCIMUM BASILICUM				
	67-1100	SIMPLYHERBS TRY BASIL		Here is a mixture of three basil varieties (Genovese, red and serrated selections) all in one pellet! Fast and easy to create diversified basil plants. Each pellet contains 8 to 14 seeds. Height: 60 to 75 cm. Spread: 30 to 40 cm. Maturity: 28 days. Annual
	67-1105	GREEK		Same characteristics as the sweet basil, but more scented. Annual.
	67-1106	ARISTOTLE (GREEK)		Small leaves, dome-shaped plant habit. Spicy taste and scented leaves. Annual.
	67-1110	SWEET FINE GREEN		Selection of small smooth leaves. Compact plants. Annual.
	67-1112	EVERLEAF EMERALD TOWERS (GENOVESE)		Well-branched variety with short internodes that makes a towering plant with a huge harvest. Grows well in-ground, in containers and hydroponics. Flowers up to 10 to 12 weeks later than the standard basil. Traditional Genovese flavour. Dark green and glossy foliage. Height: 61-91 cm. Spread: 20-30 cm. Annual.
	67-1113	EVERLEAF (GENOVESE)		Our latest Genovese type to bolt. Large leaf variety with shiny, dark green leaves. Very robust against Botrytis and Fusarium with a long shelf life after cutting. Very good handling and transport capabilities. Suitable for fresh markets and processing. Annual.
	67-1117	EMILY (GENOVESE)		More compact basil type adapted for production in containers in spring and winter thanks to its faster growth. Seeds are tested to be free of downy mildew and treated with Apron in addition. Annual
	67-1119	LARGE GREEN GENOVESE		Superb! Large, aromatic and spoon-shaped bright green leaves. Annual.
	67-1120	LARGE GREEN GENOVA		Selection with large smooth leaves. Our most popular selection for bedding plants. Annual.
	67-1122	BONNAZZA (GENOVESE)		Genova type that shows a good tolerance to Fusarium and Botrytis. Excellent shelf life after harvest. Recommended for container production. Annual
	67-1123	ELIDIA (GENOVESE)		Variety that stands out for its intermediate tolerance to Fusarium. Short compact plant that produces dark green leaves. For pot production but performs well in the field.
	67-1127	EMMA (GENOVESE)		The next generation of downy mildew tolerant basil varieties, Emma is particularly well suited for indoor pot production. Emma has short internodes and uniform cupped leaves.
	67-1130	LETTUCE LEAF		Crinkled leaves offering a sweet and gentle flavour. Annual.
	67-1125	HELIOS, LEMON FLAVOUR		Rapid growth of small leaves. Great lemony basil taste. Annual.
	67-1132	THAÏ SITA		Exotic, aromatic and licorice-flavoured basil. Annual.
	67-1133	BASIL THAÏ SIAM QUEEN		Medium green colour foliage with purple flowers. Annual.
	67-1162	ROSIE		Improved red basil with an intense and constant dark red colour. Compact plants with robust stems. Annual.
	67-1163	CRIMSON KING		Red Genovese type basil with an excellent flavour and no green off-types. Improved colour, leaf shape and vigour. Annual.
	67-1165	PURPLE BALL		Unique basil with a spherical silhouette, compact and bushy, 30 cm high. A bushy plant that adorns itself with small dark purplish-purple leaves. Also bears purple tubular flowers of 1 cm in diameter. Winner of the program Les Exceptionnelles 2018.

BURNET

	Code	Variety	Form.	Description
BORAGE - BORAGO OFFICINALIS				
	67-1510	BORAGE		This plant can reach 30 to 80 cm in height on erect stems. Balm leaves are small, lobed-shaped, serrated and have a lemony perfume. Annual.
BURNET-POTERIUM SANGUISORBA				
	67-7211	BURNET		Offers both a nutty and light cucumber taste. Height: 30 cm. Perennial.
CELERY (CUTTING)-APIUM GRAVEOLENS				
	67-1911	CUTTING CELERY		Finely cut glossy leaves. To be used as a garnish like parsley, with a delicious celery flavour. For salads, soups and stews. Can also be dried. Annual.
CERVIL-ANTHRISCUS CEREFOLIUM				
	67-2510	CHERVIL CURLED		Easy to grow. Superior yield in humid soil and shade. Height: 40 to 50 cm, width: 20 cm. Annual.
CHAMOMILE - MATRICARIA RECUTICA				
	67-1710	CHAMOMILE COMMON		Produces many flowers. Equivalent to the German Chamomile. Height: 40 to 50 cm, width: 15 to 20 cm. Annual.
CHIVES-ALLIUM SCHOENOSPRASUM				
	67-3110	CHIVES IMPROVED THICK		Vigorous selection, slow to bolt. Hollow, round, greyish-green leaves. Height: 15 to 30 cm, width: 15 to 20 cm. Perennial.
	67-3116	NELLY		Nice, dark blue-green colour on a fine to medium thick stem. Vigorous and upright growth. Very tolerant to diseases and thrips. Perennial.
	67-3120	GARLIC CHIVES		Flat leaves, greyish-green colour. Very distinct garlic taste. Disease resistant. Height: 30 to 40 cm, width: 30 cm. Perennial.
CORIANDER-CORIANDRUM SATIVUM				
	67-3551	SANTO		Upright plants with broad leaves. Very tolerant to bolting. Annual
	67-3552	SANTO MONOGERM		Identical to Santo, but only one germ per seed. Annual.
	67-3556	MARINO		More compact variety, well adapted for production in containers. Annual.
CUMIN-CUMINUM CYNIMUM				
	67-1912	CUMIN		Requires warm cultivation conditions. Height: 45 cm, width: 30 cm. Annual.
DILL - ANETHUM GRAVEOLENS				
	67-0510	DUKAT		Uniform plants with bigger umbels than standard selections. Height: 60 to 75 cm, width: 30 cm. Annual
	67-0511	FERNLEAF		Bushy plant, very close internodes and multiple secondary branches. Height: 40 cm, width: 30 cm. Annual.
	67-0513	HERA		Very late bolting dill, upright growth habit with much leaf mass. Wider harvest window than Bouquet. Exceptional aroma and flavor. Suitable for the fresh market and industry. Annual.
	67-0515	ELLA		Very dark and compact variety, with short hypocotyl, producing a sturdy plant. Shows a very good bolting tolerance. Mostly for container production. Annual
	67-0517	GREEN SLEEVES		Green Sleeves is resistant to bolting and is adapted for open field or greenhouse production. Excellent growth in very hot conditions. Annual
FENNEL-FOENICULUM VULGARE				
	67-4311	PRELUDIO F1		An early fennel that can be grown in spring and summer, without having to worry about bolting. It has a superior field holding capacity and the bulb forms two weeks earlier than other hybrids. Annual
	67-4313	DRAGON F1		Medium-fast growing fennel that makes a very round bulb and is very slow to bolt. Can be grown in a wide range of growing conditions. Annual
	67-4320	FLORENCE		Produces medium sized bulbs. Taller and bushier foliage. Tolerant to bolting. Annual.

	Code	Variety	Form.	Description
FENUGREEK-TRIGONELLA FOENUM-GRACUM				
	67-4390	FENUGREEK		The leaves are similar to those of a clover, and the plant can reach 60 cm in height. Used for its culinary qualities as well as for its benefits on health. Annual.
LAVENDER - LAVANDULA				
	67-4911	MUNSTEAD		Earlier and more compact version of the common Lavandula angustifolia. Height of 30 cm. Annual.
LEMONGRASS-CYMBOPOGON SP.				
	67-3202	LEMONGRASS		Tropical herb favoured in Thai cuisine. Not only is it widely used as a culinary herb but also as a medicinal herb in India. It has long, slender, pale green stems that are thick and fleshy with a subtle citrus flavour. Lemongrass can be dried and ground into powder, or used fresh in soups, curries and stir-fries. This perennial must be grown in warm weather. Height: 60-100 cm, width: 30-60 cm. Annual.
LOVAGE-LEVISTICUM OFFICINALE				
	67-5310	LOVAGE		Celery tasting aromatic foliage. All the parts of the plant (stem, root and seed) can be used for cooking. Perennial.
MARJORAM (SWEET)-ORIGANUM MAJORANA				
	67-5510	SWEET MARJORAM		Similar to oregano but with larger leaves. Also used as a repellent for insects. Annual.
MINT-MENTHA SP.				
	67-6320	SPEARMINT		The most popular herb because of its mild, fruity taste. Over running plants. Height: 30 to 60 cm. Perennial.
	67-6321	PEPPERMINT		Can reach a height of 50 to 60 cm. Oblong, finely indented leaves with a high content of menthol. Perennial.
OREGANO - ORIGANUM VULGARE				
	67-6510	OREGANO		Requires a fertile and humid soil in a sunny area. Perennial.
	67-6520	GREEK OREGANO		Oval, thick leaves with a very spicy flavour. Perennial.
	67-6521	CLEOPATRA		Pretty silver-grey foliage appreciated for its ornamental beauty and flavour value. Cleopatra distinguishes itself from Greek and Italian oregano by a mildly spicy flavour, tinged with a fresh mint coolness. Compact, trailing plant that produces a high yield of leaves that makes it a first-rate container plant. AAS 2015 winner. Height: 25 cm, width: 25 cm. Perennial.
PARSLEY-PETROSELINUM SP.				
Curled	67-7126	FOREST GREEN		Dark green extra curled type. Erect and vigorous plants. Holds well in hot weather. Annual
Curled	67-7128	GREEN PEARL		Deep green, dense foliage on sturdy stems. Tolerant to bolting. Annual.
Curled	67-7131	ASTRA		Deep green, triple curled parsley developed to be grown and harvested all year round. Repeated crops after 8 to 10 weeks. Can be used fresh, dried or frozen. Astra is darker than Darki. Annual.
Curled	67-7133	WEGA		Dark green parsley, with a thicker and more solid stem, resulting in a more erect and robust plant habit, making it easier to bunch. Slightly curlier than Darki. Annual
Italian	67-7155	DARK GREEN IMPROVED		Smooth dark green leaves. Productive. Annual
Italian	67-7158	PEIONE		Italian parsley with bigger leaves than standard varieties. Dark green colour and good yield. Intermediate tolerance to downy mildew. Annual
Root	67-7182	ARAT		For fall harvest. 20 to 25 cm white root. Annual
ROCKET CULTIVATED-ERUCA SATIVA				
	67-8104	WASABI		Wasabi will tickle your nose in the same way the mustard of the same name does. Its oval shape and dented leaves will add punch to your recipes. Height: 15 cm. Width: 20 cm. Annual.
	67-8110	ROCKET		Belongs to the mustard family. Strong aromas with a subtle nutty flavour. Annual.
	67-8113	ASTRO		Slightly serrated leaves with a nutty taste. Slow to bolt. Annual

	Code	Variety	Form.	Description
ROCKET WILD-DIPLLOTAXIS TENUIFOLIA				
	67-8123	BELLEZIA		Beautiful variety with an impressive tolerance to downy mildew. Dark green and highly serrated leaves. Excellent bolting tolerance, and excellent shelf life. Annual.
	67-8124	GRAZIA		Improved selection of wild arugula, more compact with uniform, dark green, fine leaves. Slow bolting. The best shelf-life variety available. Annual
ROSEMARY-ROSMARINUS OFFICINALIS				
	67-7910	ROSEMARY		Greyish-green woody stems. Leaves are dark green on top and white underneath. Height and width: 90 to 150 cm. Perennial.
	67-7911	SIMPLYHERBS ROSEMARY		Multipellet including 10 to 15 seeds, ideal to easily create nice pots. Minimum germination of at least 80%. Perennial.
RUE-RUTA GRAVEOLENS				
	67-8510	RUE		Small greyish-green leaves that grow in clusters. These pungent bitter tasting leaves are used in salads, and oriental dishes. Perennial.
SAGE-SALVIA OFFICINALIS				
	67-9110	SAGE BROAD LEAF		Soft, round, greyish leaves with oblong extremities. Height and width: 30 to 60 cm. Perennial.
	67-9112	CERES		Contains a high level of essential oils. Height: 70-80 cm. Perennial.
SAVORY-SATUREJA HORTENSIS				
	67-8910	SUMMER SAVORY		Narrow dark green leaves. Height: 30 cm, width: 15 cm. Annual.
	67-8920	WINTER SAVORY		More pronounced flavour than the Summer Savory. Green-grey shiny leaves. Height: 35 to 40 cm, width: 30 to 40 cm. Perennial.
SORREL-RUMEX ACETOSA				
	67-6710	FRENCH SORREL		Large, green leaves, tangy, light lemony taste. Height: 30 to 45 cm, width: 20 to 25 cm. Perennial.
STEVIA REBAUNDIANA				
	67-9210	STEVIA		Dry leaves are used as a natural sweetener. Easy to grow. Perennial.
TAGETE-TAGETES FILIFOLIA				
	67-9301	DROPSHOT		Annual plant with a sweet taste with a strong licorice or anise flavour. Globular shape with a height of 25-30 cm. Branches freely and produces a dense plant of fine, thin and tender leaves. Annual.
TARRAGON (RUSSIAN)-ARTEMESIA DRACUNCULUS				
	67-3910	RUSSIAN TARRAGON		Less pronounced flavour than French tarragon. Height: 60 to 90 cm, width: 30 to 45 cm. Perennial.
THYME-THYMUS FRAGRANTISSIMUS				
	67-9515	ORANGELO		French Thyme with a traditional thyme fragrance and overtones of citrusy orange scent. Useful in the kitchen and very interesting as a fragrant ground cover with small white flower. Forms a low mat and spreads to cover the soil. A hardy evergreen perennial that survives to USDA zone 5. Can be used in containers of all sizes, as ground cover, with perennials or makes an excellent spiller component for mixed containers. Perennial.
THYME-THYMUS VULGARIS				
	67-9510	WINTER THYME		Very small, dark green, elongated, oval leaves. Tolerates dryness. Height: 30 cm, width: 50 to 60 cm. Perennial.

CUCUMBER

66-4201	CORINTO FI		20-25	2, 4, 7	Spring - Fall	Slicer variety that sets well under cool conditions. Produces cylindrical, dark green, shiny and smooth fruits.
66-4211	PICOLINO FI		12	2, 4, 5, 6, 7	All year round	The shortest of all the mini cucumbers we offer. Produces high quality dark green, shiny fruits. 3-4 fruits per node. The compact, vigorous plant is early to produce.
★ 66-4220	DR7109CB FI		9	2, 4, 8	All year round	Dark green snacking cucumber with good colour and crunch. Improved fruit quality and high yield potential. Compact leaf structure with short internodes. Consistent fruit size throughout the season.
66-4235	JAWELL FI		14-16	2, 4, 7	All year round	Mini European cucumber. Produces one to two fruits per nod. Generative variety with nice vigorous laterals. Variety flexible enough for most growing systems.
66-4236	KATRINA FI		16	2, 4, 5, 7	Spring - Summer - Beginning of fall	Robust and productive mini cucumber with an open plant habit. Produces three to four quality fruits per node. Fruits are glossy, nicely ribbed and very uniform.
♥ 66-4237	ELDORA FI		36-42	5, 6, 7	Spring - Summer	Variety adapted for spring and summer production because of its improved tolerance to Powdery Mildew over all other varieties.
66-4239	KALUNGA FI		31-34	5, 6, 7	Spring - Summer - Fall	Early variety of vigorous growth with a good productive plant. Dark green fruit, slightly ribbed.
66-4240	DOMINICA FI		30-40	7	Spring - Summer - Fall	Dark green, straight and slightly ribbed fruit. Good vigour.
66-4241	CAMARO FI		34-40	7	Spring - Summer - Fall	Vigorous plants. Long and straight, dark green fruit, slightly fluted. Intermediate tolerance to powdery mildew. Tends to be generative but performs very well in a variety of conditions.
66-4246	DAVIDA FI		30-35	2, 3, 4, 5, 6, 7	Spring - Summer	Strong plant, with an open plant habit, making the crop easy to grow and handle. Good yield potential of high quality fruits in spring and summer. High tolerance to powdery mildew.

PICKLING CUCUMBER

66-4290	EXCELSIOR FI		10-12	2, 4, 5, 6, 7	Spring - Fall	Pickling cucumber for both open field and unheated greenhouse, for spring and autumn production. Open and vigorous plant habits. Fruits are medium to dark green and grow 10-12 cm.

PINK TOMATO

66-8880	PINK ID F1		170-210	1, 3, 4, 5, 9, 10, 15	Beautiful early variety whose fruits weighs about 170 g to 210 g. Pink tomato with an exceptional taste, which produces a large quantity of fruit without white heart or apical rot (black spots under the tomato). It is recommended to graft Pink ID on the DR014ITX rootstock. Replaces the Makari variety.
---------	------------	--	---------	-----------------------	--

RED TOMATO

66-9001	AUREA F1		220-240	1, 9	Oxheart type with a sweet taste and very low acidity. Generative plants.
66-9020	REBELSKI F1		200	1, 4, 5, 6, 7, 9	Beefsteak type that competes against Macarena or Bigdena. Slightly ribbed fruit with a pleasant taste and a good shelf life. Labour-friendly plants with an open leaf structure.
66-9068	INSPIRED F1		300-320	1, 4, 5, 7, 9, 10	Large fruited beefsteak variety that can have a higher average brix than comparable beefsteak varieties. Excellent taste and good internal colour. High yield potential and early production with excellent disease package. Plants have a high vigor and produce large red shiny fruits.
66-9069	TOUCHÉ F1		270	1, 4, 5, 6, 9	Higher yield potential and vigour than the Torero variety, with less fruit fall. Average fruit size is 270 g that will increase with light and produce a firm and good quality fruit.
66-9070	FORONTI F1		250-300	1, 4, 5, 6, 7, 9	An improvement to the Torero variety with a better fruit grip on the stem. Higher yield than Bigdena. Performs well under intense light and high temperature.
66-9084	STARBUCK F1		250-300	2, 4, 5	Tomato offering the best yield ratio of high quality fruits and great taste.
66-9086	MARGUERITE F1		180-200	1, 4, 5, 6, 9	One of the best-tasting greenhouse varieties. Similar to Trust with a higher yield potential.
66-9087	TORERO F1		240-260	1, 4, 5, 6, 9	Large firm fruits. Tolerant to blossom end rot and cracking. Favourably competes with the Macarena variety.
66-9088	TRUST F1		180-200	4, 5, 6, 9, 11	Productive Beefsteak type. Easy to grow in most growing conditions. Excellent taste.

ORANGE TOMATO

66-9004	BEORANGE F1		200-220	1, 4, 5, 6, 9	Orange beef tomato hybrids with good taste and flavour.
---------	-------------	--	---------	---------------	---

COKTAIL TOMATO

66-9051	ORANGINO F1		35	1, 4, 5, 6, 9, 10	An orange colour fruit solidly attached to the cluster. Good overall shelf life. Loose and truss harvest. Semi open plant habit with medium vigour.
66-9054	FLORINO F1		35-40	1, 5, 9, 10	Great tasting cocktail tomato hybrids with superb truss appearance. When pruned to eight fruits. Florino gives a very nice presentation and uniform colouring. Suitable for both truss or loose harvest. For year-round production. Replaces the Kierano variety.
66-9055	BELLINI F1		45-50	1, 4, 5, 9, 10	Flavourful cocktail tomato low in acidity. Produces clusters of 8-12 fruits. For greenhouses and outdoor production.
66-9056	ROSSINI F1		30-40	1, 4, 5, 10	Early cocktail tomato with lower acidity and great flavour. Produces clusters of 10-15 fruits. For greenhouses and outdoor production.

TOV

★	66-9072	GRANDICE FI		170-180	1, 4, 5, 6, 7, 9, 10, 14	Large jointless truss variety with high yield potential, extra-large size, glossy fruits and improved truss quality. The fruits will show some ribs during early season but as plants mature, with higher light levels, the fruit shape will fill out with fewer ribs. Variety suited to long crop cycles. However, it is possible for it to go non-grafted for short cycles due to its tolerance to diseases. Superb, deep internal red colour. Good shelf life.
	66-9074	BOUNTICE FI		150-165	1, 2, 4, 5, 6, 9, 14	An outstanding weight for a TOV, an outstanding deep internal red colour and a very good disease packages are the major highlight of this new delicious tomato. Strong plant vigour and open plant type. Fruit setting is about a week after Merlice.
	66-9076	PADUA FI		160	n/d	Features extra vigour for long crops, excellent truss presentation and tolerance to powdery mildew. Also fuller canopy and higher vigour than Komeett. Better summer fruit quality and less blocky shape.
♥	66-9077	MERLICE FI		150-165	1, 4, 5, 6, 7, 9	Variety that stands out by its cluster presentation and how easy it lies flat in a box. High vigour and excellent disease package gives it a high yield potential. Less sensitive to Botrytis than other varieties.
	66-9078	MAXEZA FI		160	1, 4, 5, 6, 7, 11	Tomato on the vine that combines high yield, great fruit colour and firmness. The perfect variety of early production (3 days earlier) with a comparable yield. Open, vigorous plant that produces well in the summer. Most suitable for growing in facilities with a crop wire height of 4.25 m. Night temperatures below 15 °C are not recommended.
	66-9085	KOMEETT FI		155	1, 4, 5, 6, 9	Our earliest cluster tomato variety. High yielding and very uniform. The fruits are tight on the cluster and ripen at the same time.
	66-9094	LORENZO FI		110-115	1, 3, 4, 5, 9	Bright yellow cluster tomato. 5 to 6 fresh sweet tasting fruits per cluster. Vigorous plants with short internodes. Good tightness to the cluster.
	66-9098	BOLZANO FI		100-130	1, 4, 5, 6, 9	Orange clusters to replace the variety Orangaro. Fruits are strongly attached to the cluster.

CHERRY TOMATO

	66-9040	CONCHITA FI		25-30	1, 4, 5, 6, 9	Cluster cherry tomato. Firm fruit. Very good taste and Brix levels combined to a nice shiny look. Uniform fishbone shaped trusses with 12-16 fruits. Long shelf life.
	66-9041	FAVORITA FI		15	1, 4, 5, 10	Perfect combination of good taste, high yield and shelf life. Vigorous plants. Open habits. Uniform red fruits on solid clusters.
	66-9044	DRC 564 FI		15-20	1, 2, 5, 9, 10	A hybrid cherry tomato for loose or truss harvest with high yield potential. Excellent taste and beautiful appearance.
	66-9049	DRK 948 FI		10-15	1, 3, 4, 5, 9	A yellow cherry tomato with an excellent taste and good plant habit. Suitable for both truss or loose harvest.
★	66-9060	ROYALSTAR FI		13-15	1, 4, 5, 10, 15	Orange cherry tomato with excellent taste. Good resistance to cracking. Offers the flexibility to harvest loose or on the vine. Good plant vigour with short leaves.
	66-9065	YELORITA FI		14-22	1, 3, 5, 9, 10, 13, 14	Yellow cherry suitable for truss harvest, with excellent taste and good shelf life. Produces a high number of trusses which fruits will stay on truss, not only at harvest, but also during shelf life.

66-9152	PRUNUS FI		Red	100-120	1, 5, 6, 7, 9	Italian tomato to be harvested individually or by clusters. Firm, dark-coloured fruit, with excellent taste.

PLUM TOMATO

66-9095	FLAVORINO FI		Red	35	1, 5, 9, 10, 13	A small and tasty plum shaped tomato on uniform trusses of 12-14 fruits. Can be harvested individually in clusters. In need of artificial light during winter.
---------	--------------	--	-----	----	-----------------	--

GRAPE TOMATO

66-9052	ROZESTAR FI		Pink	15-18	1, 4, 5, 6, 10	Pink grape tomato that performs very well in high tech and mid-tech production environments. It has firm fruits and is uniform in size and shape. Well-balanced taste. Vigorous plants.
66-9053	SANTORANGE FI		Orange	10-15	1, 5, 9	Vigorous open plants with short leaves for dense spacing. Plants may be grown with more than two leaders to get more out of each plant and improve plant balance. Excellent taste.
66-9079	DR0603TC FI		Red	9-11	1, 4, 5, 9, 10	Crop Failure
66-9083	GARRINCHA FI		Red	12	1, 2, 5, 10	Beautiful, small, oval-shaped mini plum, tasty tomato for the heated glasshouse markets. Very uniform and extremely sweet fruits with an attractive shiny red colour, at maturity. Extraordinary production capacity. Trusses set well and regularly up the plant, which stays in balance through a long crop. Suitable for loose or truss harvest. A top variety.
66-9089	DR4167 FI		Red	9-11	1, 4, 5, 9, 10	Grape tomato with an exceptional taste. Very sweet fruits, well-balanced acidity. Impressive yield on an extensive period of time. Replace the variety DR0603.

ROOTSTOCK

66-8802	DR 0141TX FI		–	–	1, 5, 6, 8, 9, 10	Vigorous rootstock. Very good generative capacity. Ideal for a fast setting.
66-8803	MAXIFORT FI		–	–	1, 5, 6, 8, 9, 10	Our most vigorous rootstock available. Very high yield potential. Great for soil and rock wool. Excellent on any crop but especially on weak or generative crops lacking vigour, varieties susceptible to blossom end rot, or for very long crops. Help maintain crop vigour even under full fruit load and high temperatures.

- (1) **Mucilaginous seeds:** These seeds are mucilaginous. In water, they will release a gelatinous substance. Water from the base and drain well.
 (2) **Rinse/Drain:** Rinse daily as often as recommended and drain well. Do not leave any standing water.
 (3) Certain varieties do not have information on germs or sprouts because they are usually not used for these purposes, however, you can still enjoy the experiment.

Focus is in our genetics

PART OF THE
KWS FAMILY

At Pop Vriend Seeds, we focus on a limited number of crops. The goal? To be the best within those crops. We are a proud world leader in hybrid spinach and swiss chard seeds, a major player in bean seeds and we have a growing portfolio for red beet and carrots. **Discover our varieties.**

Marnix de Kroon
Red Beet Breeder

Bullock

- High brix level (10-12)
- Very strong tops
- Outstanding seed quality and availability

@ william_popvriendseeds

Jacinto

- Excellent flavor
- Great durability and uniformity
- Good core definition

Jeroen Wery
Carrot Breeder

Jaguar

- Dark fleshy pods
- Heat tolerant
- Healthy dark bush

Pine Higgins
Technical Advisor
Spinach, Chard and Carrot

Sharing a healthy future

Patrona RZ

Resima RZ

Jerada RZ

Patrona RZ

Lettuce

- Large green cos lettuce for fresh and processing markets
- Good field standability and shelf life
- Solid ribs and uniform heads
- Great for machine harvesting
- Strong against bacterial leaf spot

Resima RZ

Red Cabbage

- Dark red cabbage variety with uniform round shape
- High adaptability to different growing regions
- Very suitable for long-term storage
- Compact heads with strong internal structure

Jerada RZ

Carrot

- Early-segment Nantes carrot
- High yielding variety
- Very uniform cylindrical shape
- Good field standability for fresh and bunch markets

Include these varieties in your program!

Leading The Way

Snak Hero

- Looks like a green bean, tastes like a snap pea
- Plant exhibits good stress tolerance and produces an abundance of high-quality pods
- Pods suitable for fresh and processor market
- High yield potential

Primus

- TripleSweet Plus corn variety
- Features exceptional flavor and sweetness
- Tender and extra sweet bi-color kernels
- Long ears and medium-sized husks preferred for roadside and local markets

Cabo

- Superior eating quality and adaptability
- Large augmented supersweet variety with plentiful dark green flags & tip fill
- Reliable uniformity of ear size and rowing
- Sturdy plant with strong tip fill

Sabroso

- Well suited for the processing industry
- Thick petioles combined with good girth to give excellent weight and yield potential

Every New Generation*

OVERLOOK F1

A good companion to Catskill for long term storage. Will yield large and firm onions with good skin quality.

CATSKILL F1

High yielding variety thanks to its well-developed root system.

SKYRAY F1

A 78 day corn, with a nice large ear and excellent sweet and tender taste.
