**Fraise Hyb. Delizz®**  
**White Flowers**

**84-3823**  
**Fraise Hyb. Gazana**  
**Pink Flowers**

Don't forget to order your strawberry plugs right away! In order to obtain beautiful baskets of flowering strawberries for the beginning of May, we advise you to receive them around week 10. Please order at the beginning of December.

Several varieties are available in 50, 72 or 128 format.

### Culture Sheet

Upon arrival of your multicells (week 10 or 11):

- ▶ Transplant 3 or 4 plants, for a 25 cm basket (10"), or 1 plant per pot of 10 cm (4").
- ▶ For the best growth, leave space between pots.
- ▶ Need at least 14 hours of light per day, preferably 16 hours.
- ▶ In the flowering time, give enough water and fertilizer.
- ▶ Keep the room temperature between 15C° and 22C°.

**Start of flowering** : 4 weeks after the transplant, around week 14-15.

**Fruit-bearing plants** : 4-5 weeks after the beginning of the flowering, around week 18-20.

**84-3816**
