

SWEET CORN

MIRAI 301BC F1

NIRVANA F1

A08767143 F1

Code	Variety	Maturity (days)	Plant Height (m)	Cob Height (cm)	Cob Length (cm)	Number of rows	Description
------	---------	-----------------	------------------	-----------------	-----------------	----------------	-------------

BICOLOUR SH2

65-0145	MIRAI 301BC F1	68	1.5-1.7	40	20	16	Robust plant. Exceptional taste, tenderness and quality.
★ 65-0156	NIRVANA F1	70	1.9	60	20	16	Early variety competitor to Fantastic. The cold soil vigor and extremely sweet and tender taste are two main characteristics of this variety.
65-0164	MIRAI 315 BC F1	71	1.8	65	19-20	16	Small kernels. Very uniform and vigorous corn with a good yield. Can be harvested mechanically.
65-0161	SUMMERSWEET 712R F1	74	1.6	50	18	16-18	Good competitor to Gourmet 204A. Vigorous and healthy plant. Rust tolerant. Kernels of contrasting colours (High Glow).
65-0167	A08767143 F1	76	1.8-2	50	20	16-18	Obsession type with tolerance to Rust. High yield potential.

SWEETNESS A SWEET START

- ◆ The sweetest
